Of course, radio isn't perfect. But is *anything human* perfect? Even the weather, which God makes for us, doesn't suit *everyone, all the time.* Even our preachers, and our teachers, and our Congressmen and

(Continued on next page)

our editors, even members of our own families disappoint us occasionally. Let him who is perfect make the first criticism! There wouldn't be many critics of radio, if that were the rule. And radio will always be responsive to public desire. An engineer told me the other day that of all the great electronic developments affecting broadcasting which have emerged from our laboratories, none was more important than the radio receiver in your own home. It possesses, as this engineer pointed out, a dial by which listeners can select the programs they desire; a knob by which they can reject *all* that radio has to offer.

Believe me, as long as receivers are so designed, the American system of broadcasting will bring to the people what the people want.

Broadcast Advertising

American Bankers Association Announces Second Series of Transcribed Programs

The American Bankers Association this week announced production of a new transcribed series of 26 radio programs on bank services featuring the theme of money management.

The Series "B" transportations for use by A.B.A. banks, are 4-minute dramatizations built around present-day money problems and are presented in bright, entertaining skits which use electric organ music for theme, background and bridges.

The advertising department of the A.B.A. has written member banks about the new series, asking them to contact their radio station for an audition. The A.B.A. further recommends to its members that the dramas be used as the nucleus of quarter-hour programs, and are supplying the banks with suggested program formats and local bank commercials.

The programs are primarily entertainment, and are designed to have listener appeal, with a central theme that provides a good background for local bank messages. Dramatizations emphasize problems, such as money saving in the face of high prices; combating inflation; intelligent borrowing, etc. Bank services are mentioned in a few of the transcriptions, which are open-end, for selling messages by local sponsors.

NAB-RMA Groups Hold Joint Meeting On "Radio in Every Room" Campaign

A joint meeting of the NAB Sales Managers Subcommittee for Sales Promotion, the RMA Advertising Committee, and representatives of the Fred Eldean Organization, public relations counsel in charge of RMA's "A Radio in Every Room—A Radio for Every Purpose" campaign, is scheduled in New York this week (29) at offices of the public relations firm.

NAB Sales Promotion Subcommittee personnel, who will represent the broadcasting industry in discussions aimed at implementing the campaign are: Chairman John M. Outler, general manager, WSB, Atlanta; Louis Hausman, director of presentation, CBS, New York; Joseph Creamer, director of advertising and promotion, WOR, New York; Edward P. J. Shurick, director of promotion, Free & Peters, Inc., New York; Eugene Katz, president, Katz Agency, Inc., New York; John Carl Jeffrey, formerly of WKMO, Kokomo, Indiana; Arthur Stringer, NAB director of special services, and Hugh M. P. Higgins, NAB assistant director of broadcast advertising.

IN THE OFFING

April 28-29	Area "G" Meeting (Districts 4-7)	Roanoke, Va. Roanoke Hotel
May 1-2	Area "F" Meeting (Districts 5-6)	Birmingham Tutwiler Hotel
May 5-6	District 2 Meeting	New York City Waldorf-Astoria Hotel
May 8-9	Area "D" Meeting (Districts 8-9-11)	Chicago Palmer House
May 12-13	Special Standards of Practice Committee	New York City
May 13	Music Advisory Committee (joint meeting with ASCAP)	New York City
May 15-16	Sales Managers Executive Committee	Atlantic City, N. J.
May 21-22	Board of Directors Meeting	Washington, D. C.
May 26-27	District 3 Meeting	Baltimore Lord Baltimore Hotel
June 2-3	District 1 Meeting	Boston Somerset Hotel

The RMA Advertising Committee has named the following manufacturers as their representatives: Chairman Stanley H. Manson, manager of public relations, Stromberg-Carlson Co.; Victor Irvine, Galvin Manufacturing Corp.; L. E. Pettit, General Electric Company, and E. L. Hadley, Bendix Radio Division.

General

Denver University Completing Plans For Five-Week Summer Radio Clinic

The University of Denver, which recently announced the inauguration of a four-year course in radio, (Current Reports, p. 209) is now completing final arrangements for a five-week radio clinic to be held at the University this summer, July 21-August 23.

The clinic will devote one week each to five specific topics, two of which will be led by NAB staff members, Arthur Stringer and J. Allen Brown. The five clinic subjects include: 1. Radio Journalism; 2. Sales, Advertising and Promotion; 3. Utilization of Community Resources; 4. Radio Law; and 5. Program Problems. Mr. Stringer will lead the clinic in the journalism

(Continued on next page)

discussion and Mr. Brown in the sales, advertising and promotion portion of the program.

Rex Howell, KFXJ, Grand Junction, Colo., and Allen Miller, Rocky Mountain Radio Council, are the two other discussion leaders named. Mr. Howell will direct discussions on utilization of community resources and Mr. Miller on program problems. At press time, the leader for the clinic on radio law had not been announced.

The clinic this summer, similar to the University's four-year course, will stress the operational details of small market stations. The school plans to make the clinic a regular annual feature.

Willard, Richards Participate in CCNY Annual Radio Conference

A. D. Willard, Jr., executive vice president, NAB, and Robert K. Richards, Director of Public Relations, participated in the City College of New York Third Annual Radio and Business Conference, held at the Pauline Edwards Theater.

Presiding at the closing session, April 23, in which awards were presented, Mr. Willard called for more serious consideration of problems concerned with the freedom of radio in a democracy. He emphasized that those who would employ radio's facilities must comprehend its problems.

"Broadcasting's bilateral obligation to entertain and to inform must be recognized," he said. "Without entertainment, we lose audience. Without audience, any effort we can make to inform might as well be shouted down an empty well."

Mr. Richards appeared at the opening session, April 22, discussing "Free vs. Government Radio", as part of a forum on the subject, "The Listeners Speak to Radio."

Schechter Replaces Haverlin on NAB PR Executive Committee

A. A. Schechter, vice president of MBS in charge of news, special events and publicity, was named to the NAB Public Relations Executive Committee last week.

Mr. Schechter fills the committee vacancy created when Carl Haverlin assumed his now position as president of BMI.

Advertising Council to Mark Fifth Birthday; Broadcasters to Receive Fact Sheets on Subject

Background information concerning the Advertising Council's forthcoming fifth anniversary celebration was mailed to NAB member stations over the weekend. This material includes a general story concerning the Council's activities and accomplishments, plus a more specific story about radio's participation.

It is expected that broadcasters will find this material of value in telling the story of radio's operations in the public interest.

The Council's birthday observance will occur during the first week of May.

Employee-Employer Relations

AFM President Subpoenaed by Congress; To Testify Before House Labor Group

Congressman Fred A. Hartley, Jr., Republican of New Jersey, Chairman of the House Labor Committee announced recently that he had subpoenaed James C. Petrillo, president of the AFM, ordering him to appear before the House Labor Committee to testify on the conduct of his union. Hartley said that Petrillo had planned to sail for Europe on April 27 and that the Committee staff had been looking for him for several weeks.

A sub-committee made up of Congressmen Carroll Kearns, Republican of Pennsylvania, Richard Nixon, Republican of California and Graham Barden, Democrat of North Carolina, will conduct the investigation into the activities of the AFM. No date for the beginning of the hearings has been set since it is planned to defer them until the Supreme Court announces its decision in the criminal action against Petrillo now pending there. (See story in this issue, page 339.)

Among the questions with which the Committee will concern itself are: charges that the union is operated undemocratically, that it forces radio stations and dance halls to hire more musicians than they need and the union policy of keeping school children's orchestras off the air.

Legal Department

WORL Renewal Denied by Commission; Has Until Aug. 31 to Wind Up Affairs

In a decision issued April 23, Commissioner Jett dissenting, the FCC denied Station WORL's application for a renewal of license and gave it until August 31, 1947, to wind up its affairs and go off the air. The Commission's action was taken on the basis of its findings that for the past ten years numerous reports filed with the Commission had failed to disclose the true ownership of about forty percent of the voting stock of Broadcast Service Organization, Inc., the licensee of the Boston frequency, 950 kc., 1 kw. daytime.

Relying heavily on its decision in the WOKO case, (current REPORTS, p. 288) which was affirmed by the Supreme Court last year, the Commission reiterated that "licensees and their principals must at all times be honest and candid with the Commission. Applications and reports filed by them . . . must be complete, truthful and accurate." The Commission further stated that whether or not it would have acted differently had the true facts been disclosed was com-

(Continued on next page)

paratively unimportant, quoting the opinion of Mr. Justice Jackson in the WOKO case as follows:

> "The fact of concealment may be more significant than the facts concealed. The willingness to deceive a regulatory body may be disclosed by immaterial and useless deceptions as well as by material and persuasive ones. We do not think it is an answer to say that the deception was unnecessary and served no purpose."

The opinion pointed out that not only had all three of the stockholders in WORL participated in a continued series of misrepresentations and concealments about stock transfers, but had failed to file an application for transfer of control under Section 310 (b) of the Communications Act before making the transfers. However, concluding that the misrepresentations indicated "that the applicant cannot be entrusted with the responsibility of a licensee," the FCC did not determine whether the failure to apply for transfer of control in this case was in fact a violation of Section 310 (b) "which would independently warrant a denial of the application."

Admitting that the parties might have been in doubt as to whether they were required to file a transfer application, the FCC said, nevertheless, that their repeated concealment of the facts after the stock transfers took place thus "completely vitiated the possibility of the Commission determining for itself whether or not any transfer of control had taken place." In this connection, the WPAT case, decided November 9, 1944, was cited. There, a transfer was approved even though permission had not first been obtained because the Commission had been kept informed of the dealings and negotiations and had been asked to advise the parties as to the legality of their conduct.

The majority opinion specifically rejected the defense of the station that some of the transfers were not reported in order to avoid a possible suit against the company, saying that a licensee cannot excuse a misstatement to the Commission on the ground that it was intended to deceive someone else.

Following the pattern set in the WOKO proceedings, the FCC stated that it would take no action on any new applications for WORL's facilities prior to June 1, 1947, in order to give time for further applications. At the same time it dismissed the application for the voluntary transfer of WORL's facilities to the Bitner Broadcasting Co., since, by virtue of the denial of WORL's renewal application, it had become moot.

Commissioner Jett Dissents

In a dissenting opinion, Commissioner Jett took the view that the WOKO case was not a proper basis for the Commission's action here because "the record against WORL does not disclose any motive for not reporting the extent of the holdings of two stockholders. Moreover, the identity of all the stockholders in WORL was disclosed to the Commission. Pointing to the fact that the majority admitted that they were "not entirely clear" as to the purpose of WORL in withholding information, he compared the WOKO case where "the motive for concealment was clearly established." For this reason he felt that the WORL record did not support a finding of willful misrepresentation.

He then reiterated the opinion he expressed in the WOKO case to the effect that, while the Commission clearly had legal power to put the station off the air, it had been lenient in many previous cases of misrepresentations and should frame an order dealing with the guilty parties while at the same time permitting the innocent parties to continue to render the service.

He concluded his opinion with the statement that he was not convinced that any of the parties were guilty of "having made false statements and concealments which were designed to mislead the Commission." Accordingly he would have granted WORL's renewal application, to be followed by a grant of its pending application for voluntary transfer of its facilities to the Bitner Broadcasting Company.

Government Files Brief in Petrillo Case Urging Reversal of Chicago Decision

On Thursday (24) the Government filed its brief in the Petrillo case with the Supreme Court of the United States. The brief urges the reversal of the decision of Judge La Buy of the United States District Court in Chicago, which held that the Lea Act was unconstitutional on four counts.

The prosecution of Petrillo under the Lea Act resulted from his strike call against Station WAAF in Chicago last June because the station refused to double the number of musicians it employed.

After the decision against the Government in the District Court, the case was carried directly to the Supreme Court by authority of the Criminal Appeals Act, which permits direct appeal from decisions holding Federal statutes unconstitutional. It is anticipated that the Supreme Court will hear argument in the case shortly and will issue a decision before it adjourns in June.

Following is a summary of the Government's statement taken from the text of the brief:

Summary of Argument

"The evil to which the Lea Act was addressed is a special manifestation of the general problem of monopolies and restraint of trade—the exercise of monopoly power by a labor organization in a manner which interfered with the effective use of the facilities for radio broadcasting. The Lea Act is designed partially to remove obstacles to the enforcement of the antitrust laws which Congress itself had created in other legislation. . . .

"Congress has authority under the Commerce Clause to prohibit restraining or monopolistic practices affecting radio broadcasting, and this power extends to restraints by labor unions. . . .

". . . appellee is in no position to urge that he is being required to work in possible contravention of the Thirteenth and Fifth Amendments. Neither of these Amendments gives constitutional sanctity to any right to order other persons not to work. . . .

". . . In any event, if the case be regarded as involving a question of the right to strike, the Act

(Continued on next page)

would be constitutional. The right to strike, as conceded by appellee, is not absolute. . . . It was not inappropriate for Congress to conclude that featherbedding demands are incompatible with the public interest in radio broadcasting.

"Appellee . . . contends that the Lea Act does not make the purpose of a strike unlawful since it is not made illegal for the licensee voluntarily to do what he cannot be coerced to do. We submit that the 'unlawful objective' test formulated by the courts in labor cases at common law is not a constitutional criterion. Here there was ample basis for Congress to believe that its legitimate goal of preventing coerced compliance with wasteful demands upon interstate broadcasting could not be achieved unless the Act extended to coercion through strikes, which are the normal means used by a monopolistic union to attain its objectives. . . .

". . . A strike directed at inducing a licensee to accede to a demand that he hire persons he does not need is thus a strike for an unlawful purpose, and nonetheless so because it would be lawful for the licensee to hire more workers if he wished—just as the object of an extortioner is unlawful even though the victim could voluntarily agree to make the identical payment . . .

Act Does Not Prohibit Picketing

". . . The Lea Act does not prohibit picketing as such but coercion. Picketing violates the Act only if and to the extent that it is coercive, and like other forms of coercive speech, to the extent that it is coercive it is not protected by the First Amendment . . .

". . . Furthermore picketing for an unlawful purpose is not protected by the First Amendment. The authorities establish that if a strike is unlawful because of its purpose, picketing for the same purpose is likewise unlawful . . . Clearly, it would be futile for Congress to have the power to proscribe the ends for which strikes could be prohibited if labor organizations could accomplish the same thing, equally effectively, by picketing. This is so even though picketing may be a form of speech or of writing. An order issued by a labor leader would always be verbal, and it would not acquire greater sanctity because of being carried up and down the sidewalk on a picket's placard. Soliciting others to give aid to an unlawful course of conduct is not constitutionally protected free speech, at least where there is a 'clear and present danger' that the solicitation will be successful and thus bring about the 'substantive evils that Congress has a right to prevent' . . .

Not Discriminatory

". . . The Act does not discriminate in favor of employers because they may voluntarily do what they may not be coerced into doing. Congress may hit at abuses which have been shown to exist without going beyond to cover the entire field of possible abuse. There has been no showing that the practice of hiring unnecessary employees has been prevalent in the broadcasting industry apart from outside coercion. Congress could reasonably assume that the employers' normal self-interest would adequately protect the public in this respect. . . .

"The district court's holding that Section 506 (a) (1) is too indefinite is based upon a misconstruction of the statute. . . . The language, context and history of this provision shows that it was not intended to reach *bona fide* disputes as to conditions of employment, including such matters as hours of work and whether additional workers might be required to prevent employees from working too hard, but deliberate demands for payment to additional employees made in complete disregard for the employer's need and without any justification from the viewpoint of actually getting the employer's business done. . . . The district court was therefore wrong in holding that the number of employees needed was to be determined by the licensee. The bill was amended specifically so as to avoid that result.

". . . The fact that there may be borderline cases does not render a statute unconstitutionally indefinite, if there is a hard core of circumstances to which a statute will unquestionably apply, as to which the ordinary person would have no doubt as to its application, and if this comprises the mass of situations with which the Act deals. . . ."

Legislative Supplements Provide Members With Details of Pending Labor Bills

For membership information, the NAB Legal Department has prepared a second Legislative Supplement on proposed labor legislation pending in Congress.

Last week NAB members received details of the House bill, H. R. 3020. This week members will have available for study the Senate bill, S. 1126.

The two supplements provide a readily understandable comparison of the two bills.

Five Applicants Granted Approval in N. Y. Area in Proposed Decision on FM Facilities

In a recent decision, the FCC proposed to grant applications for all five of the metropolitan FM channels now available for assignment in the New York-New Jersey metropolitan area. The grants were to WMCA, ABC, Unity Broadcasting Company, and News Syndicate Company for operation in New York, and to North Jersey Broadcasting Company for operation in Paterson, New Jersey. Twelve other applications were rejected.

Admitting the difficulty of choosing only five from among 17 applications, the Commission made its choice primarily on two bases. First, the Paterson grant was on the ground that it would provide a fairer and more equitable distribution of facilities throughout the metropolitan area, since both New York and Newark have Class B channels while Paterson has none. Second, the Commission chose from among the New York applications on the basis of their proposed program services.

Two applications by church and labor groups respectively were rejected because from "the avowed purposes for which these applicants seek radio stations, their programs will tend to be weighted along the lines of their particular interests." Another application,

(Continued on next page)

that of Station WBNX, was rejected the FCC said because the AM operation consisted in large part of foreign language programs sold through time brokers, horse racing information at half-hour intervals every weekday, excessive commercialism, and excessive commercial spot announcements.

Two other applicants were rejected because the Commission found that the amount of their proposed operating budget and the size of their staffs were such that they "could not develop a program service comparable with that proposed by other applicants."

Of the remaining applicants, ABC was granted because it would be able to draw upon the network resources and would be a key station in ABC's proposed FM network. The Commission also referred to the fact that the other three national networks have been granted FM licenses in New York. WMCA's request was granted because of the meritorius service designed to meet the local needs of New York developed the applicant's AM station, which is actively controlled by its owners.

The applications of Amalgamated Broadcasting and Unity Broadcasting, both of which companies are controlled by labor unions, were considered "well qualified to give adequate treatment to social and economic issues of fundamental importance to the New York community," because of the background and interests of the applicants. For this reason they were considered superior to Metropolitan Broadcasting Corporation, controlled by local businessmen. As between Unity and Amalgamated, the former was granted because it had developed extensive plans for the promotion of FM including specific arrangements with a FM manufacturer for the purchase of FM sets and their distribution among its membership. Furthermore, Unity indicated that it was prepared to sell up to 51% of its stock to other trade unions.

The application of News Syndicate was granted and that of WLIB, owned by the New York *Post*, denied because the New York *News* has no existing radio outlet and a grant to WLIB would preclude radio competition between the two newspapers.

On the question of the admission of the evidence of the American Jewish Congress concerning the editorial policies of the New York *Daily News*, a majority of the Commissoin granted a motion to strike that evidence. Separate opinions on the question will be issued shortly. Commissioner Durr dissented, taking the view that the evidence was entitled to weight and should have been considered adversely to the applicant along with the fact that the *Daily News* is a wholly owned subsidiary of the Tribune Company, which was controlled by interests outside of New York.

Other dissents from the decision were as follows: Commissioner Jett was in favor of granting the application of WLIB rather than that of Unity. Commissioner Denny would have eliminated the News Syndicate and Unity and granted channels to WLIB and Newark. Commissioner Durr preferred Amalgamated Broadcasting to the News Syndicate.

FCC, in Supplemental Decision, Upholds Previous Action on Sandusky Applications

The FCC released Friday (25) a supplemental, proposed decision upholding its previous decision on the conflicting applications of Sandusky Broadcasting Company, Lake Erie Broadcasting Company and Bay Broadcasting Company for a 250 watt unlimited-time operation on 1450 kc in Sandusky, Ohio.

The proposed decision dealt entirely with charges that Lloyd A. Pixley, majority stockholder of Lake Erie Broadcasting Company, who, with his wife, has a majority interest in Station WCOL, Columbus, had improperly failed to disclose facts relating to the ownership and control of the station.

The Commission found that in November 1944, WCOL gave a chattel mortgage on the studio, transmitter and equipment of the Station to secure a note to an Ohio bank. A clause of the mortgage provided that the Station would not dispose of any interests in its license nor apply for any transfer, alteration or amendment of the license without first obtaining the written consent of the mortgagee. Although the existence of this mortgage was not reported to the Commission, it concluded that this fact did not disqualify Pixley as an applicant, saying:

"Licensees are required by Section 1.342 of the Commission's Rules and Regulations to file within thirty days of execution any documents relating to ownership, management or control of a licensee or of any of licensee's stock, rights or interests. The chattel mortgage was restrictive of the discretionary rights of a radio licensee and clearly the partnership erred in not informing the Commission of its terms. However, it does not appear that this failure to file the terms of the chattel mortgage with the Commission was a deliberate non-disclosure or concealment."

Research Department

Advertising Agency Group Urges BMB To Continue Measurement Studies

The AAAA, at its annual meeting in New York (17), urged BMB to continue "to conduct regular nationwide audience measurements" in a unanimous resolution, stating that it believed that advertising agencies "will make extensive use of BMB material to increase the effectiveness of radio advertising and further the welfare of radio broadcasting."

The resolution was passed following a report on BMB made by Carlos Franco, Young & Rubicam; D. E. Robinson, LaRoche & Ellis; and Linnea Nelson, J. Walter Thompson Co., AAAA representatives on the BMB Board.

The resolution, adopted on the floor by the entire attendance follows:

Resolved that the American Association of Advertising Agencies appreciates the cooperation and foresight evidenced by broadcasters in supporting and financing BMB.

(Continued on next page)

We believe agencies will make effective and extensive use of BMB material to increase the effectiveness of radio advertising and further the welfare of radio broadcasting; and be it further

Resolved that the AAAA Directors of BMB be instructed to continue to work with their fellow-Directors in BMB, analyzing and seeking to improve BMB techniques and operations; and be it further

Resolved that the AAAA considers it important for BMB to continue and to conduct regular nationwide audience measurements on a uniform basis; and be it further

Resolved that a copy of this resolution be transmitted to the National Association of Broadcasters as further evidence of AAAA support and continued confidence in BMB on behalf of advertising agencies.

Juvenile Delinquency, BMB, NORC, Among Topics Discussed at Committee Meeting

The meeting of the NAB Research Committee in New York on Thursday (24) centered around a discussion of number of topics including BMB, the NORC survey, current rating practices and the industry's fight to combat juvenile delinquency.

In keeping with the committee's new policy, D. H. Denenholz, of the Katz Agency, New York, attended as the representative of NAB associate members with research interests. Other associate members will be invited to participate in future meetings as "working guests".

The committee heard a report from Kenneth H. Baker, NAB research director, on the current and planned activities of his department.

Committee members present for the meeting were: Carl J. Burkland, WTOP, Washington, D. C., chairman; H. M. Beville, Jr., NBC, New York; Dietrich Dirks, KTRI, Sioux City; Edward F. Evans, WJZ, New York; E. P. H. James, MBS, New York; Elmo C. Wilson, CBS, New York.

Members who were unable to attend include: William T. Lane, WAGE, Syracuse; Charles P. Scott, KTKC, Visalia, Calif.; J. C. Tully, WJAC, Johnstown, Pa.; Earl W. Winger, WDOD, Chattanooga, Tenn

News

"Four Billion Ears," Treatise on Radio News, Enroute to Stations From News Committee

A small booklet, "Four Billion Ears," having value to radio news personnel, station managers, sponsors and agencies was mailed last week to all stations by the NAB Radio News Committee.

It deals entirely with radio news, "the greatest single service a radio station can perform." The ideas presented "incorporate the best thinking of successful station operators, radio news editors and newscasters throughout the world of radio news broadcasting."

The seven principles underlying ideal presentation of news, about which the author states there is reasonable unanimity of opinion, are: 1. Stability; 2. Impartiality; 3. Freshness; 4. Balance; 5. Scope; 6. Magnetism; 7. Dignity. Each of the above points is discussed in considerable detail.

William A. Forbes, of the Platt-Forbes Agency, New York City, made the books available for distribution to stations at the request of E. R. Vadeboncoeur, chairman, Radio News Committee, and vice president of WSYR, Syracuse.

Hollywood News Club Adopts Standards; News Techniques Receive Continuing Study

More evidence that the handling of radio news continues to receive the careful study of men engaged in the profession is seen in the "Statement of Standards" adopted by the Hollywood Radio News Club on April 16.

Standards have been sent to all station managers and agency managers in Southern California.

The consistent desire to raise the standards of radio news expressed by the holding of frequent meetings and the issuance of "standards" stems from last July's radio news clinic. It was arranged for Southern California newsmen by William B. Ryan, NAB director, District 16, and general manager of KFI.

Statement of Standards

Radio News Club

"PREAMBLE. A well informed public—in our own country and in all parts of the world—is the greatest single hope for peace in an atomic world. Presentation of the news and of other matters of public interest is the greatest contribution in the interest of the public performed within radio broadcasting schedules. As such, it is also the most forceful single answer the broadcasting industry has to its critics who proclaim that radio has been subverted into the sole function of a merchandising mart. Since presentation of the news occupies this position of importance in radio broadcasting, it logically follows that the means of presenting the news is a matter of primary concern to ownership, management and sponsorship, as well as to those in the profession. Therefore, those of us engaged in the profession submit the following recommendations as goals to which radio broadcasters should aspire in the interest of further improving this vital means of public information.

I

"Newscasts, Special Events, News Commentaries, and News Analyses should be plainly labeled as such.

II

"Programs of a feature type based on events in the news involving such production devices as dramatization or impersonations are logical adjuncts to news programming, but should be clearly disassociated from newscasts, special events, commentaries, and analyses by being labeled for what they are.

III

"Each story should be presented in proportion to its total significance in the news, and never for the purpose of advancing a special selfish interest. The implementation of this objective will depend on the measure of responsibility and integrity of the newsman or news staff.

IV

"It should be borne in mind that the news editor's job does not end with the teletype. It is his responsibility, whenever possible, particularly on regional or local stories of a controversial nature, to secure first hand facts.

V

"The line of demarcation between commercial copy and the news content should always be clearly defined. An ultimate goal in this respect would be that the newscaster, analyst or commentator not read the commercial message.

(Continued on next page)

Lead-ins to commercials should include no reference to subsequent news.

VI

"Joint air credits in the case of news broadcasts prepared and delivered by different persons are a desirable professional standard.

VII

"News is a special medium and as such demands specially trained personnel. In staffing radio newsrooms close attention should be given to the news background and training of news writers, editors and broadcasters. In order to insure an accurate and impartial presentation of news, station management must exercise unusual care in the selection of a radio news editor. He must be competent and capable of accepting full responsibility for the content of all news programs and such content must continue to be based entirely on his judgment, without interference by sponsor or any outside agent. Continued vigilance against any relaxation of this policy is urged.

VIII

"The radio audience is more diverse than the press audience and hence more rigid standards of good taste should apply in the case of crimes of sex, violence, and the coverage of accidents of a gruesome nature.

IX

"Those who prepare and voice the news should constantly bear in mind the power for "slanting" material which rests even in the tonal inflection employed in delivery. Objectivity in material and voicing should be at all times the goal of good radio news presentation.

X

"Minimum news staff standards for all stations should be established. It is recommended that at least one experienced newsman be on duty at all times during the hours of broadcasting operation."

District Meetings

Rembert Elected Director in District 13; Miller, Swezey Discuss Radio's Critics

(Continued from page 335)

activities carried on by broadcasters in connection with the Texas City disaster, terming them an outstanding example of radio's operation in the public interest. He discussed the need for editorial freedom on the air, and urged broadcasters to use their own facilities in telling the positive story of radio's accomplishments.

A. D. Willard, Jr., NAB executive vice president, outlined the functions of the NAB, which he reported is now completely staffed for the first time since the beginning of the war.

BMI's new president, Carl Haverlin, participated in a discussion of the music situation. He reminded the broadcasters of the chaos which existed at the time BMI was formed and asked for their continued support. *(See resolution below.)*

BMB President Hugh Feltis discussed his organization's operations, finances, and plans looking toward another national survey in 1948.

Other NAB staff members who addressed the gathering were Richard P. Doherty, director of employee-employer relations, Kenneth Baker, director of research, and Frank Pellegrin, director of broadcast advertising.

A news clinic was held on Wednesday (23), over which Jim Byron, WBAP presided.

Resolutions

BROADCAST MEASUREMENT BUREAU

Whereas, the Broadcasting Industry, recognizing the need for standardizing statistics relating to station coverage, established Broadcast Measurement Bureau; and

Whereas, the Bureau has conducted its first study and has issued the station maps and the area reports; and

Whereas, such study has developed facts of value to agencies and advertisers, as well as to broadcasters, and further studies are being made to make such data and statistics of greater value;

Now, therefore, be it resolved, that we, the Broadcasters of the 13th District, commend BMB for the contribution which has been made to standardize radio as an advertising medium in the minds of advertisers and agencies, and we further urge a careful study of all of the data developed in connection with the first study, to the end that techniques may be developed that will bring about more constructive results from future studies.

MUSIC

Whereas, music constitutes a very important, if not the most important, raw material for broadcasters, and is essential to their service to the listening public; and

Whereas, the licensing of performing rights has constituted in past years a problem of serious concern to broadcasters; and

Whereas, as a measure to protect itself against unjust and unreasonable demands, the Industry created Broadcast Music Incorporated as a means to bring about healthy competition in the field of music copyrights;

Now, therefore, be it resolved, by the broadcasters of the 13th District, that we urge all stations in this District to carefully analyze their music used to the end that a larger percentage of BMI music may be employed where such music on the basis of merit deserves such performance, and that every effort be made by the broadcasters to popularize BMI tunes. We further urge the stations of this District to give early consideration to a renewal of their BMI contracts to the end that BMI may be maintained as a strong, competitive factor in the music licensing field; and we further urge the management of NAB to continue its study of the entire field of music copyright to the end that the interest of the industry and the public may be adequately protected.

And further, we congratulate BMI on its selection of Carl Haverlin as president.

UNIFORM TIME

Whereas, the periodic changes in time adversely affect the ability of the broadcasting industry to properly serve the listening public and create maladjustments in the broadcast schedule to the disadvantage of the listeners;

Now, therefore, be it resolved, by the Thirteenth District of NAB, that we urge the management of NAB to cooperate with other industries similarly affected in developing some plans whereby uniform time may be applicable throughout the country and throughout the year.

2% CASH DISCOUNT

Whereas, there seems to be a concerted effort on the part of advertising agencies to persuade broadcasters to grant a 2% discount for prompt payment of bills for broadcast services; and

Whereas, due to greatly increased costs in station operation, any such additional discounts would necessitate an increase in the rate charged to the advertiser; and

Whereas, because of general desires on the part of Industry to hold prices down wherever possible,

The Broadcasters of the 13th district feel it inadvisable to alter the rate structure at this time.

(Continued on next page)

TIME BROKERAGE

An increasing attempt is being made by some advertisers and their agencies to broker broadcast time either outright or through subterfuge. Broadcasters of the 13th district feel that such a practice is unfair from a competitive angle, contrary to the terms of the NAB-AAAA contract and a highly undesirable practice and that effort should be made to bring about its discontinuance.

PRESIDENT MILLER AND STAFF

The enlightened, constructive and forceful leadership which has been given to the Broadcasting Industry in the fifteen-month period during which Justin Miller has served as its President, and the very constructive contribution which he has made to a better understanding on the part of the public of the role which radio broadcasting occupies in the economic, social and political lives of the nation, are highly commended by the Broadcasters of the 13th District. The defense of freedom of speech and freedom of listening which have been the basic theses for his public addresses, deserve the commendation of all broadcasters.

We pledge our wholehearted support to him in a continuation of his splendid efforts to bring about a better understanding in the minds of public officials and the public at large with respect to the role of radio broadcasting.

We further commend the members of the NAB staff who have contributed constructively to the success of this meeting.

LABOR RELATIONS

Whereas, the prevailing trends in labor relations throughout the radio industry tend to impose nation-wide or industry-wide practices and policies upon all broadcasters without due regard to respective local and area conditions; and

Whereas, we consider such practices economically unsound and destructive of most efficient employer-employee relations in local stations;

Therefore, be it resolved, that the members of the 13th District urge the Board and Management of NAB to establish and promote policies of employer-employee relations which will recognize and make effective as possible local and area negotiations.

HOUSTON HOSTS

In view of the splendid reception, entertainment and subsequent headaches with which members of the 13th District have been received, we, through this resolution, extend the Houston Broadcasters our sincere thanks.

Public Interest Programming

Navy Seeks Half Million Men During "Operation Naval Reserve"

The United States Navy is calling on broadcasters to help enlist a half million men for the Naval Reserve. This week, radio station executives will receive a Fact Sheet on the campaign from Art Stringer, NAB special services director.

The campaign to stimulate enlistment in the civilian navy activity will run from May 18 through 25.

A letter from Rear Admiral John E. Gingrich, Deputy Chief of Naval Operations, will be sent di-

(Continued on next page)

rectly to all broadcasters within the next few days. With the letter will be a series of live spots and background information on the Naval Reserve. The Navy points out that this material may be used either sustaining or commercial.

Radio Credited with Over One-Third Of Chicago GI Insurance Reinstatements

Radio alone is responsible for 36.6 percent of the reinstatements of GI Insurance in Chicago, according to information released by Charles Dillon, Chief, Radio Division, of the Veterans Administration Public Relations Office, Washington, D. C. Dillon quoted from a report received from VA Branch Office No. 7, in that city, which conducted a survey at two contact offices of the Agency on April 3 and 4.

Of the 1,151 veterans who visited those offices in connection with GI Insurance matters on those two days, 421, or 36.6 percent, stated their inquiries were the direct result of hearing programs and announcements carried by Chicago stations at the request of the VA, during the current national VA insurance information campaign.

The value of the insurance reinstated was $113,826.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of May 5-11, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. "Education," says the Chamber of Commerce, "is an essential instrument through which commerce, industry and agriculture can be expanded in rising degree." Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people—above all too few alert and qualified young people—are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945 the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented—in some cases to the point of outspoken bitterness. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field. . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups—such as parent-teacher organizations—actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. (Fact Sheet No. 37)

Help Veterans Beat the Housing Shortage

Well over 2,000,000 newly discharged veterans, whose lives as civilians were interrupted by service in the Armed Forces, are now looking for places to live. The veteran, needs and deserves all possible help in obtaining a home now for himself and his family. Despite all that is being done, however, the housing crisis will continue through 1947. 1. *The need for homes is tremendous*—since V-J Day some 13,000,000 men and women have been released from the Armed Services—even during 1946 discharges continued at the rate of about 250,000 a month. Some of these veterans, of course, have established homes to return to, but a Census Bureau survey taken in June, 1946 showed that about 4,000,000 wanted to rent, buy or build within twelve months if they could find anything suitable at prices they could afford. About 2,200,000 are seeking accommodations even at present prices. 2. *The shortage has been accumulating for years*—We entered the war with an under-supply of houses. During the war the shortage became more acute. The marriage rate shot up. Home-building had to be held to a minimum because materials and manpower were needed to speed victory. 3. *It takes time for emergency measures to pay off*—The No. 1 problem was to step up the production of building materials. In addition it was necessary to establish machinery for eliminating unessential and deferrable commercial and industrial construction. Communities had to organize to meet the housing crisis. These measures require time, but are now producing results. Urge listeners to help take care of the veteran in the existing housing supply, until enough new homes are ready, by (1) sharing their homes; (2) "staying put" and giving the veteran first chance in renting or buying; (3) creating additional living quarters for veterans by remodeling; (4) putting off deferrable repairs; (5) listing vacancies and houses for sale at their local Veterans Housing Center; (6) not discriminating against veterans with children. (Fact Sheet No. 4-H)

(Continued on next page)

Nursing Is a Growing Profession

There is a definite and alarming shortage of nurses in the majority of the nation's hospitals. In some instances, whole floors and wings of hospitals have had to close. Literally, thousands of patients are going without adequate nursing care. (1) Point out the many opportunities open to young women who join the growing nursing profession—today, there is a tremendous demand for nurses, and the demand will be even greater in the years ahead. Industry, psychiatry, child and public health, Veterans' Administration, Public Health Service, Army and Navy all offer splendid opportunities for nurses. The field of nursing hasn't nearly begun to reach its full expansion. (2) Nursing training is an ideal preparation for marriage, family life, community leadership. (3) Urge young women under 35 who are high school graduates or college students with good scholastic records to check immediately with their local hospital for information on how to apply for admission to any one of the nearly 1300 Accredited Schools of Nursing. A nursing education will lead to the professional title of Registered Nurse, and in the college schools of nursing to the degree of Bachelor of Science as well. (4) Remind ex-servicewomen—WACS, WAVES, SPARS and MARINES—that if they qualify as student nurses, the entire cost of their nursing education may be covered by their allowance for tuition under the G.I. Bill of Rights. (Fact Sheet No. 9-G)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, April 28. They are subject to change.

Monday, April 28

Further Hearing

(10:00 A. M.)

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—For renewal of license.

WGKV—Worth Kramer (transferor) and Eugene R. Custer and Richard M. Venable(transferees), Charleston, W. Va.—For relinquishment of control of Kanawha Valley Broadcasting Co. (WGKV).

WGKV—E. R. Custer and Floyd E. Price (transferors) and R. M. Venable (transferee), Charleston, W. Va.—For transfer of control of Kanawha Valley Broadcasting Co. (WGKV).

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—For renewal of license.

Further Hearing

(10:00 A. M.)

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—C. P. **610 kc.**, 5 KW, unlimited; DA-night.

Tuesday, April 29

At Wilmington, Dela.

(Room 213, Federal Bldg., 10:00 A. M.)

NEW—WDEL, Inc., Wilmington, Dela.—For FM facilities.

NEW—Wilmington-Tri State Broadcasting Co., Inc., Wilmington, Dela.—For FM facilities.

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—For FM facilities.

NEW—York Broadcasting Co., York, Pa.—For FM facilities.

NEW—Reading Broadcasting Co., Reading, Pa.—For FM facilities.

Wednesday, April 30

Further Hearing

(10:00 A. M.)

NEW—Sarkes Tarzian, Bloomington, Ind.—C. P. **1340 kc.**, 250 watts, unlimited.

NEW—Radio Bedford, Inc., Bedford, Ind.—**1340 kc.**, 250 watts, unlimited.

FCC ACTIONS

GENERAL

Summary of Grants

Grants were announced during the past week for 6 new AM stations, 14 FM conditional grants and 17 FM construction permits were authorized.

Part I of Commission's Rules Available

Part I of the Commission's Rules entitled: "Rules Relating to Organization and Practice and Procedure," is now available in printed form, and may be purchased from the Superintendent of Documents, Government Printing Office, at a cost of 30 cents per copy.

Network Application

American Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs to Stations CFCF and CBL and the Canadian Broadcasting Corp. for the period beginning June 2, 1947.

AMPLITUDE MODULATION

AM—Docket Cases

950 KC.

The Commission announces its final decision (B-223) denying the application of Broadcasting Service Organization, Inc., for renewal of license of **Station WORL, Boston, Mass.** (Docket 6626). Broadcasting Service Organization, Inc., will be given a temporary license for Station WORL until August 31, 1947, to wind up its affairs. The Commission will take no action prior to June 1, 1947, on any application for the facilities to be vacated by Station WORL. In view of the action denying the application for renewal of license, the application for transfer of control of Broadcasting Service Organization, Inc., from its present stockholders to **Bitner Broadcasting Company** (BTC-506) has become moot and is therefore dismissed.

(Commissioners Walker, Hyde and Webster did not participate in above decision B-223; Commissioner Jett issued separate dissenting opinion.)

960 KC.

The Commission announces its proposed decision (B-352) looking toward a grant of the application of KOVO Broadcasting Co. to change operating assignment of **Station KOVO,**

(Continued on next page)

Provo, Utah, from 1240 kc., 250 watts, unlimited time, to 960 kc., 1 KW, DA at night (BP-3667; docket 6739). At the same time the Commission proposes to deny the application of KROW, Inc., to increase power of **Station KROW, Oakland, Calif.,** from 1KW, unlimited time, with full time directional antenna, to 5 KW, and change in transmitter location from Oakland to San Francisco, operating on 960 kc. (BP-4283; docket 7101). The denial would be without prejudice to the filing by KROW of a new application for 5 KW operation, either daytime or unlimited time, which will not cause objectionable interference to Station KOVO's operation as proposed to be authorized herein, or to any existing station or pending application.

1450 KC.

The Commission announces its supplemental proposed decision (B-250) looking toward the grant of the application of **Lake Erie Broadcasting Co.** for a new standard broadcast station at **Sandusky, Ohio,** to operate on 1450 kc., 250 watts, unlimited time (BP-4190; Docket 7004). At the same time the Commission proposes to deny the mutually exclusive applications of The Sandusky Broadcasting Co. (BP-4208; Docket 7003) and The Bay Broadcasting Co. (BP-4387; Docket 7172) seeking the same facilities.

The Commission announces its order vacating and setting aside its proposed decision (B-327) issued February 6, 1947, in re applications of **Charles W. Baltrope, San Antonio, Texas; Express Publishing Co., San Antonio, Texas; Gonzales Broadcasting Co., Gonzales, Texas; and Taylor Broadcasting Co., Taylor, Texas;** further ordered that the record herein be reopened for the purpose of incorporating therein such portions of the proof of performance filed with the Commission by **Station WACO** in connection with its application for a standard broadcast license, as are pertinent to a determination of the soil conductivity along the path between Waco, Texas, and Taylor, Texas, and upon such incorporation the record herein is closed.

Oral Argument

The Commission announces the adoption of an order designating for oral argument the motions of Radio Wisconsin, Inc., and Joseph Triner, et al, d/b as **Village Broadcasting Co.,** to strike the exceptions filed by Edwin Mead and the motion of Sidney H. Bliss, tr/as **Beloit Broadcasting Co.,** to strike the exceptions filed by Edwin Mead and by **Elgin Broadcasting Co.,** in re Supplemental Proposed Decision (B-299; B-291). Also adopted order setting for oral argument the petition filed by **Radio Wisconsin, Inc.,** to modify Supplemental Proposed Decision (B-299; B-291) by segregating its action into two parts, making said action final as to Elgin, Beloit, Madison and Rockford applicants, and proposed as to respective Oak Park applicants.

AM—New CP's Granted

600 KC.

San Angelo Broadcasters, San Angelo, Texas—Granted CP for new station to operate on 600 kc., 1 KW night, 5 KW-LS, DA-2, unlimited time; engineering conditions. (BP-5906)

1240 KC.

Inland Broadcast Co., Weiser, Idaho—Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time; engineering conditions. (BP-5599)

1400 KC.

Yakima Broadcasting Corp., Yakima, Wash.—Granted CP for new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (BP-5099)

1600 KC

Champion City Broadcasting Co., Springfield, Ohio—Granted CP for a new station to operate on 1600 kc., with power of 500 watts, daytime only (applicant had requested 1 KW). (BP-5208; Docket 7892)

Marion Radio Corp., Marion, Ind.—Granted CP for a new station to operate on 1600 kc., with power of 500 watts, daytime only (applicant had requested 1 KW). (BP-4429; Docket 7349)

McKinney Air Enterprises, Inc., McKinney, Texas—Granted CP for a new station to operate on 1600 kc., 500 watts, daytime only; engineering conditions. (BP-5210)

AM—Designated for Hearing

550 KC.

Shawano County Leader Publishing Co., Shawano, Wisc.—Designated for hearing application for CP for new station to operate on 550 kc., 250 watts day, 100 watts night; further ordered that KSD, WJIM and WIND be made parties to proceeding. (BP-5518)

KIFI—Eastern Idaho Broadcasting & Television Co., Idaho Falls, Idaho—Designated for hearing application for CP to change frequency from 1400 kc. to 550 kc., increase power from 250 watts to 1 KW, install new transmitter and DA for night use, and change transmitter location. (BP-5978)

600 KC.

KROD—Roderick Broadcasting Corp., El Paso, Texas—Designated for hearing application for CP to increase power from 500 watts night, 1 KW day, to 5 KW, DA, night, and change transmitter location; to be consolidated with proceedings on applications of Coconino Broadcasting Co., Flagstaff, Ariz. (Docket 8276), and KWRZ, Flagstaff, Ariz. (Docket 8277) (BP-5909)

740 KC.

West Central Broadcasting Co., Tulsa, Okla.; Seminole Broadcasting Co., Wewoka, Okla.—Designated for consolidated hearing application of West Central Broadcasting Co. for new station at Tulsa to operate on 740 kc., 50 KW day, 25 KW night, DA, day and night (BP-4797), with application of Seminole Broadcasting Co. for new station at Wewoka to operate on 720 kc., 250 watts, daytime (BP-5270); hearing to be consolidated with proceedings on Texas Star Broadcasting Co., Dallas, Texas, and Ellis County Broadcasting Co., Waxahachie, Texas, for 740 kc. and 730 kc., respectively.

1340 KC.

Thomas G. Harris, individually, and as Trustee for Coleman Gay et al, Austin, Texas—Designated for hearing application for a new station to operate on 1340 kc., 250 watts, unlimited time, and ordered that stations KAND, Corsicana, and KVIC, Victoria, be made parties to the proceeding. (BP-4355)

1450 KC.

Holland Broadcasting Co., Holland, Mich.—Designated for hearing application for a new station to operate on 1450 kc., 250 watts, unlimited time, and ordered that stations WKLA, Ludington, and WIBM, Jackson, Mich., be made parties to the proceeding. (BP-5379)

1460 KC.

WMPS—WMPS, Inc., Memphis, Tenn.—Designated for hearing application for modification of CP to change nighttime power from 5 KW to 10 KW, with directional antenna at night (BMP-2388). KFEQ and WPTF made parties.

1510 KC.

KGA—Louis Wasmer, Spokane, Wash.—Designated for hearing application for CP to increase power from 10 KW to 50 KW and install directional antenna, operating on 1510 kc. (BP-4647); WLAC Broadcasting Service made party.

AM—Modifications of CP's Granted

WEEK—West Central Broadcasting Co., Peoria, Ill.—Granted modification of CP which authorized a new station, for extension of completion date to 6-1-47. (BMP-2641)

(Continued on next page)

KXOB—Valley Broadcasting Co., Stockton, Calif.—Granted modification of CP which authorized a new station, to change type of transmitter and to change type of antenna towers. (BMP-2605)

WTRR—Southeastern Broadcasting System, Sanford, Fla.—Granted modification of CP which authorized a new station, for approval of antenna, to change type of transmitter, for approval of transmitter location at 1st St. and San Carlos Ave., Sanford, and to change studio location to Mayfair Inn, corner of 1st St. and San Carlos, Ave. (BMP-2628)

WGL—Farnsworth Television and Radio Corp., Fort Wayne, Ind.—Granted modification of CP (BP-4112), for extension of completion date to 6-1-47. (BMP-2637)

WNAM—Neenah-Menasha Broadcasting Co., Neenah, Wisc.—Granted modification of CP which authorized a new station, to change type of transmitter, make changes in vertical antenna and change studio location to 101 E. Wisc. Ave., Neenah, Wisc. (BMP-2616)

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted modification of CP (BP-4316) for extension of completion date to 10-24-47. (BMP-2645)

KOBE—Odessa Broadcasting Co., Odessa, Texas—Granted modification of CP which authorized a new station, for extension of commencement and completion dates to 6-9-47 and 12-9-47. (BMP-2653)

WBT—Jefferson Standard Broadcasting Co., Charlotte, N. C.—Granted modification of CP (BP-3699) for extension of completion date to 11-4-47. (BMP-2647)

WMIX—Mount Vernon Radio and Television Co., Mount Vernon, Ill.—Granted modification of CP which authorized a new station, for approval of antenna, to change type of transmitter, for approval of transmitter location at 4 miles north of Mount Vernon on Highway No. 37, and to specify studio location as 119 No. 9th St., Mount Vernon. (BMP-2564)

WMBH—Joplin Broadcasting Co., Joplin, Mo.—Granted modification of CP (BP-5165) to change type of transmitter and for extension of completion date to 2-13-48. (BMP-2639)

WKOY—The New Haven Broadcasting Corp., New Haven, Conn.—Granted modification of CP which authorized a new station, for approval of antenna, to change type of transmitter, and for approval of transmitter location on Spring St., at foot of Lambert St., West Haven. (BMP-2522)

WRBC—Rebel Broadcasting Co., Jackson, Miss.—Granted modification of CP which authorized a new station, to change transmitter location to: On Jackson Fannin Rd., 6 miles northeast of city of Jackson, Miss. (BMP-2590)

KGYW—California-Nevada Broadcasting Co., Vallejo, Calif.—Granted modification of CP which authorized a new station, for approval of antenna, to change type of transmitter, and for approval of transmitter and studio locations on New Napa Highway, Vallejo. (BMP-2526)

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted modification of CP (BP-5073) for extension of completion date to 10-14-47. (BMP-2649)

KWCJ—Natchitoches Broadcasting Co., Inc., Natchitoches, La.—Granted modification of CP which authorized a new station, to change type of transmitter, make changes in vertical antenna and for extension of commencement and completion dates to 60 days after grant and 180 days thereafter. (BMP-2600)

KULA—Pacific Frontier Broadcasting Co., Ltd., Honolulu, T. H.—Granted modification of CP which authorized a new station, for extension of completion date to 6-8-47. (BMP-2654)

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted modification of CP (BP-4300) for extension of completion date to 5-12-47. (BMP-2658)

KOAG—Oklahoma Agricultural and Mechanical College, Stillwater, Okla.—Granted modification of CP which authorized a new station, for approval of antenna, to change type of transmitter, and for approval of transmitter location at west side of Highway 40, 4¼ miles south of Stillwater. (BMP-2640)

WWOD—Old Dominion Broadcasting Corp., Lynchburg, Va.—Granted modification of CP which authorized a new station, to change type of transmitter. (BMP-2646)

WMFR—Radio Station WMFR, High Point, N. C.—Granted modification of CP (BP-5298) to make changes in vertical antenna and extend completion date to 12-12-47. (BMP-2633)

WILX—Carolina-Northwest Broadcasting Co., North Wilkesboro, N. C.—Granted modification of CP which authorized a new station, for extension of completion date to 7-1-47. (BMP-2656)

WTCJ—Tell City Broadcasting Co., Tell City, Ind.—Granted modification of CP which authorized a new station, for approval of antenna, of transmitter location on highway #66, near Tell City, and to specify studio location as highway #66-E, Tell City. (BMP-2541)

KFQD—Alaska Broadcasting Co., Anchorage, Alaska—Granted modification of CP (BP-2935) for extension of completion date to 11-12-47. (BMP-2657)

KYLE—Intermountain Broadcasting Co., Inc., Almagordo, N. Mex.—Granted modification of CP (BP-4949) for approval of antenna, to change type of transmitter, and for approval of transmitter and studio locations at Cuba Ave. and Mountain Rd., Almagordo. (BMP-2595)

KPBX—WCPZ Broadcasting Co., Beaumont, Texas—Granted modification of CP (BP-5113) for approval of antenna, of transmitter location at southern edge of the city of Beaumont, and specify studio location as Crosby Hotel Bldg., Beaumont. (BMP-2587)

KSD—Pulitzer Publishing Co., St. Louis, Mo.—Granted modification of CP to make changes in DA for nighttime operation (to meet condition of Commission's decision of Dec. 6, 1946). (BMP-2568)

AM—License Renewals and Extensions

WWJ—The Evening News Assn., Detroit, Mich.—Granted renewal of license for period ending May 1, 1950. (Com. Durr voting for further inquiry.) (BR-315)

The following stations were granted renewal of licenses for the period ending May 1, 1950:

WMMN, Fairmont, W. Va.; KPAC, Port Arthur, Tex.; WSIX, Nashville; KFEL, Denver; KPRC, Houston; WCOC, Meridian, Miss.; WCSH, Portland, Maine; WELI, New Haven; WHA, Madison, Wis.; WLBL, Stevens Point, Wis.; WRRF, Washington, N. C.; WSAZ, Huntington, W. Va.; WSBT, South Bend, Ind.; WTAD, Quincy, Ill.; WTAW, College Station, Tex.; WTMA, Charleston, S. C.; WTRY, Troy, N. Y.; WSPA, Spartanburg, S. C.; KALL, Salt Lake City; KFKA, Greeley, Colo.; KFXJ, Grand Junction, Colo.; KLX, Oakland, Cal.; KMA, Shenandoah, Ia.; KPOF, Denver; KSEI, Pocatello; KSEL, Lubbock, Tex.; KUSD, Vermillion, S. D.; WAAF, Chicago; WABI, Bangor, Maine; WAPO & Aux. Chattanooga; WBAA, W. Lafayette, Ind.; WCAE and Aux. Pittsburgh, Pa.; WCOP, Boston; KFKU, Lawrence, Kans.

KVNU—Cache Valley Broadcasting Co., Logan, Utah—Granted renewal of license for the period ending February 1, 1949.

WTSB—Robeson Broadcasting Corp., Lumberton, N. C.—Granted renewal of license for the period ending February 1, 1950.

WJOI—Florence Broadcasting Co., Inc., Florence, Ala.—Granted renewal of license for the period ending February 1, 1950.

WEOA—WFBM, Inc., Indianapolis, Ind.—Granted renewal of license for the period during August 1, 1947.

WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Granted renewal of license for the period ending February 1, 1948.

KRSC—Radio Sales Corp., Seattle, Wash.—Present license extended on a temporary basis for a period of two

(Continued on next page)

months, pending receipt of further information requested under Sec. 308 (b).

KFWB—Warner Bros. Broadcasting Corp., Los Angeles, Cal.—Present license extended on a temporary basis for a period of two months, pending receipt of further information requested under Sec. 308 (b).

Licenses for the following stations were extended upon a temporary basis for the period ending July 1, 1947, for the reasons shown:

KARK—Ark. Radio & Eqpt. Co., Little Rock, Ark.—Pending study of possible violation of Sec. 310(b) of the Act.

KFJZ—Tarrant Broadcasting Co., Fort Worth, Tex.—Pending study of possible violation of Sec. 310(b) of the Act.

WAIT—Radio Station WAIT, Chicago, Ill.—Pending study of possible violation of Sec. 310(b) of the Act.

KJR & Aux.—Totem Broadcasters, Inc., Seattle, Wash.—Pending receipt of program information requested of present licensee.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Pending final action on licensee's application for a frequency which is involved in the pending clear channel hearing, dockets 6584 and 6585.

KOLO—Reno Broadcasting Co., Reno, Nev.—Pending further accounting study and receipt of information requested under Sec. 308(b) of the Act.

WJHL—WJHL, Inc., Johnson City, Tenn.—Pending further accounting study and receipt of information requested under Sec. 308(b) of the Act.

KTKN—Edwin A. Kraft, Ketchikan, Alaska—Pending further accounting study and receipt of information requested under Sec. 308(b) of the Act.

KWBC—Worth Broadcasting Co., Fort Worth, Tex.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WAAT & Aux.—Bremer Broadcasting Corp., Newark, N. J.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WDEL—WDEL, Inc., Wilmington, Dela.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WFLA—The Tribune Co., Tampa, Fla.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WJAR & Aux.—The Outlet Co., Providence, R. I.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WRC—National Broadcasting Co., Inc., Washington, D. C.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WTTM—Trenton Broadcast Corp., Trenton, N. J.—Pending further engineering study and receipt of information requested under Sec. 308(b) of the Act.

WISN & AUX.—Hearst Radio, Inc., Milwaukee, Wisc.—Pending further study of information requested under Sec. 308(b) of the Act.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Pending receipt of application for involuntary transfer of control made necessary by the death of the majority stockholder.

WKPA—Allegheny-Kiski Broadcasting Co., New Kensington, Pa.—Renewal application filed late—4-18-47.

WWJ Aux.—The Evening News Assn., Detroit, Mich.—Renewal application incomplete when filed, pending consideration of information received.

WOKO—WOKO, Inc., Albany, N. Y.—Granted final extension of special temporary authorization for WOKO to expire August 31, 1947. Similar extension for Fax. station W2XWE.

AM—CP's Granted to Change Frequencies

600 KC.

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Granted CP to change frequency from 1230 kc. to 600 kc., increase power from 250 watts to 1 KW, DA-1, and change transmitter location, and install new transmitter. (BP-5350)

630 KC.

WJMS—Upper Michigan-Wisconsin Broadcasting Co., Inc., Ironwood, Mich.—Granted CP to change frequency from 1450 kc to 630 kc., increase power from 250 watts to 1 KW, DA-1, unlimited time, install new transmitter and change transmitter location to Cary, Wisc. (Com. Durr for hearing.) (BP-4909)

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Granted CP to change frequency from 1400 kc. to 630 kc., increase power from 250 watts to 1 KW, unlimited time, using DA-2, unlimited time, and change transmitter location. (BP-5964)

AM—Licenses Granted to Cover CP's

680 KC.

WAPA—Jose Ramon Quinones, San Juan, P. R.—Granted license to cover CP which authorized a new station on 680 kc., 10 KW, unlimited time. (BL-2259)

1230 KC.

KSST—Hopkins County Broadcasting Co., Sulphur Springs, Tex.—Granted license to cover CP which authorized a new station on 1230 kc., 250 watts, unlimited time. (BL-2327)

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted license to cover CP which authorized installation of a new transmitter. (BL-2197)

1390 KC.

KCBC—Capital City Broadcasting Co., Des Moines, Ia.—Granted license to cover CP which authorized a new station on 1390 kc., 1 KW, unlimited time, DA, and for change of studio location to 309 Plymouth Bldg., 10th and Walnut Sts., Des Moines. (BL-2338)

1400 KC.

WMBC—Mississippi Broadcasting Co., Inc., Macon, Miss.—Granted license to cover CP which authorized a new station on 1400 kc., 250 watts, unlimited time. (BL-2345)

1450 KC.

WKAL—Copper City Broadcasting Corp., Rome, N. Y.—Granted license to cover CP which authorized a new station on 1450 kc., 250 watts, unlimited time; conditions. (BL-2162)

1490 KC.

KVLF—Big Bend Broadcasters, Alpine, Tex.—Granted license to cover CP which authorized a new station on 1490 kc., 250 watts, unlimited time; conditions. (BL-2322)

WBAY—Atlantic Shores Broadcasting, Ltd., Coral Gables, Fla.—Granted license to cover CP which authorized a new station on 1490 kc., 250 watts, unlimited time, and change of studio location to 322 Aragon Ave., Coral Gables. (BL-2323)

AM—Miscellaneous Actions

KOH—McClatchy Broadcasting Co. of Nevada, Reno, Nev.—Granted CP to increase power from 1 KW to 5 KW, unlimited time, install new transmitter, and make changes in DA for night use; engineering conditions. (BP-5976)

WGLN—Glens Falls Publicity Corp., Glens Falls, N. Y.—Granted petition for extension of time within which to file opposition to petition of WWSC, Glens Falls, N. Y., requesting Commission to designate for hearing application

(Continued on next page)

of WGLN (BL-2352) for license to cover CP; extended time to and including April 28, 1947.

Litchfield County Radio Corp., Torrington, Conn.—Denied petition for conditional grant of construction permit (BP-5448) for a new station to operate on 1170 kc., 1 KW, day time only, pursuant to Sec. 1.385(e) of the rules.

Utica Observer-Dispatch, Inc., Utica, N. Y.—Granted petition for waiver of Sec. 1.363 (formerly 1.369) of the Rules, and accept for filing its application submitted simultaneously with petition, for a new station to operate on 1230 kc., 250 watts, unlimited time; said application to be contingent upon grant of application of WIBX (BP-5962) to change operating assignment of station WIBX, Utica.

KXOA—Sacramento Broadcasters, Inc., Sacramento, Calif.—Granted CP to install a new transmitter. (BP-6006).

WSOC—Radio Station WSOC, Inc., Charlotte, N. C.—Granted CP to install a new vertical antenna and mount FM antenna on top of AM tower. (BP-6002)

Patrick Joseph Stanton, Philadelphia, Pa.—Ordered that the effectiveness of the Commission's action of May 10, 1946, granting CP (BP-4495) to Patrick Joseph Stanton for a new station, be stayed pending further action of the Commission, because of Order of the U. S. Court of Appeals for the D. C. in the case of L. B. Wilson, Inc. v. FCC (No. 9434).

1280 KC.

WOV—Wodaam Corp., New York, N. Y.—Modification of construction permit (B1-P-5049, which authorized to make changes in transmitting equipment (main transmitter)) for extension of completion date.

WOV—Wodaam Corp., New York, N. Y.—Modification of construction permit (B1-P-5086, which authorized to make changes in transmitting equipment, of auxiliary transmitter) for extension of completion date.

1320 KC.

KWHN—KWHN Broadcasting Co., Inc., Fort Smith, Ark. —Modification of construction permit (B3-P-4254, as modified, which authorized a new standard broadcast station) to change type of transmitter, to make changes in ground system, to specify studio location and extension of completion date.

1330 KC.

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Modification of construction permit (B2-P-4137, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use and change transmitter location) to change transmitter location (same description) and for extension of commencement and completion dates.

1340 KC.

KWRZ—Grand Canyon Broadcasting Co., Flagstaff, Ariz. (James L. Stapleton, Jesse Martin Neil, Jr.)—License to cover construction permit (B5-P-4206, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

KSEK—The Pittsburg Publishing Co., Pittsburg, Kans.—Modification of construction permit (B4-P-5246, which authorized a new standard broadcast station) for approval of antenna, for approval of transmitter location, and to specify studio location.

WMSA—The Brockway Co., Massena, N. Y.—Construction permit to install a new vertical antenna and mount FM antenna on top of AM tower. Amended to make changes in antenna.

1350 KC.

WGAD—Coosa Valley Broadcasting Co., Gadsden, Ala. (E. L. Roberts)—Modification of construction permit (B3-P-4596, as modified, which authorized a new standard broadcast station) for extension of completion date.

1360 KC.

KFFA—The Helena Broadcasting Co., Helena, Ark. (J. Q. Floyd, John Thomas Franklin and Sam Anderson, a partnership)—Construction permit to change frequency from 1490 to 1360 kc., increase power from 250 watts day and night to 1 KW day and night, install new transmitter and directional antenna for night use and change transmitter location. Amended to make changes in directional antenna night time pattern.

WGFG—The Southwestern Michigan Broadcasting Co., Kalamazoo, Mich. (Harold F. Gross.)—Modification of CP (B2-P-4335, which authorized a new standard broadcast station) for extension of completion date.

1380 KC.

KSWO—Oklahoma Quality Broadcasting Co., Lawton, Okla. (A co-partnership composed of R. H. Drewry, J. R. Montgomery, Ted R. Warkentin and Robert P. Scott)—License to cover construction permit (B3-P-4252, as modified) which authorized change in frequency, increase in power, change in hours of operation, installation of new transmitter and directional antenna for day and night use and change transmitter location and authority to determine operating power by direct measurement of antenna power.

KSBW—DeHaven, Hall & Oates, Salinas, Calif.—Modification of construction permit (B5-P-4135, which authorized a new standard broadcast station) for approval of directional antenna system (DA-1) and to change transmitter location.

1400 KC.

WEOA—WFBM, Inc., Evansville, Ind.—Authority to determine operating power by direct measurement of antenna power.

KWIN—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—License to cover construction permit (BP-5651) which authorized installation of new transmitter and authority to determine operating power by direct measurement of antenna power.

NEW—Runnels County Broadcasting Co., Ballinger, Texas (Fred Harman, E. L. Ingram, Arthur M. Underwood, R. E. Bruce)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation. Amended to change name of applicants from Fred Harman, E. L. Ingram, Arthur M. Underwood and R. E. Bruce, d/b as Runnels County Broadcasting Co. to Fred Harman, E. L. Ingram, Arthur M. Underwood, R. E. Bruce, L. B. Horton, Walter E. Yaggy, L. B. Horton, Jr., and Virginia E. Carswell, d/b as Runnels County Broadcasting Co.

NEW—Utah Valley Radio Broadcasting Co., American Fork, Utah (Ray Dean Salmans and M. D. Close, a partnership) (P. O. 1016 S. 6th West, Salt Lake City, Utah)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

1450 KC.

KSIG—Acadia Broadcasting Co., Crowley, La. (Max Thomas)—License to cover construction permit (B3-P-4785, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WHDL—WHDL, Inc., Town of Alleghany, N. Y.—License to use old main transmitter at 3219 W. State Rd., Rt. 17 (NY), Town of Alleghany, N. Y. (Present location of main transmitter) to be used for auxiliary purposes with power of 250 watts.

1460 KC.

WSAC—Chattahoochee Broadcasting, Co., Columbus, Ga. —Modification of CP (B3-P-4149, which authorized a new standard broadcast station) for approval of directional antenna to make changes in transmitting equipment and change transmitter location.

1470 KC.

NEW—Richard J. Cook, Pittsburgh, Pa.—Construction permit for a new standard broadcast station to be operated on 1470 kc., power of 5 KW, directional antenna, and unlimited hours of operation. Amended to change directional antenna pattern. Amended to change name of applicant from Richard J. Cook to United Broadcasting Corp.

1480 KC.

KGLU—Gila Broadcasting Co., Safford, Ariz.—License to cover construction permit (B5-P-3955, as modified) which authorized change in frequency, increase in power, installation of new transmitter and change transmitter location, and authority to determine operating power by direct measurement of antenna power.

1490 KC.

KADP—Alva B. Adams, Jr., Pueblo, Colo.—Modification of construction permit (B5-P-4945, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

KCID—Caldwell Broadcasting Co., Inc., Caldwell, Idaho —License to cover construction permit (B5-P-4900, as modified) which authorized a new standard broadcast station and to specify studio location and authority to determine operating power by direct measurement of antenna power.

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Modification of construction permit (B2-P-5121, which authorized

(Continued on next page)

installation of new transmitter, changes in antenna, and change in transmitter location) for extension of commencement and completion dates.

1490 KC.

WBEX—Shawnee Broadcasting Co., Chillicothe, Ohio—Modification of CP (B2-P-4512, which authorized a new standard broadcast station) for approval of antenna, to change type of transmitter and for approval of transmitter and studio locations.

1510 KC.

KUSN—San Diego Broadcasting Co., San Diego, Calif.—Modification of CP (B5-P-3744, which authorized a new standard broadcast station) for extension of completion date.

1530 KC.

NEW—Kewanee Broadcasting Co., Kewanee, Ill. (Denver V. Tolle, Emerson Y. Parks, William M. Liddle and Walter J. Winship, a partnership)—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 1100 kc. to 1530 kc.

1550 KC.

NEW—Fulton County Broadcasting Corp., Atlanta, Ga.—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 10 KW night, 50 KW day, and directional antenna for night use, and unlimited hours of operation. Amended re officers, directors and stockholders.

1590 KC.

KSJO—Santa Clara Broadcasting Co., San Jose, Calif.—Authority to determine operating power by direct measurement of antenna power.

AM—Applications Dismissed

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Modification of CP (B4-P-3198, as modified, which authorized change in frequency, increase in power, change in hours of operation, installation of directional antenna for night use and change transmitter location) for extension of completion date. Dismissed April 21, 1947, application unnecessary.

Pilgrim Broadcasting Corp., West Palm Beach, Fla.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Dismissed April 18, 1947, application of WWPG denied.

Peter B. Thornell, Florence, S. C.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation (Contingent on grant of WOLS application B3-P-4538). Dismissed April 18, 1947, application of WOLS dismissed.

AM—Application Returned

Darlington Broadcasting Co., Darlington, S. C. (Richard Dana, John D. Dawkins and Madge D. Dana, a partnership) (PO 145 S. Main St.)—Construction permit for a new standard broadcast station to be operated on frequency: power of 250 watts and daytime hours of operation. Application returned April 16, 1947, incomplete.

AM—Applications Tendered for Filing Since February 7

830 KC.

NEW—Albert B. Pyatt, Garden City, Kans.—Construction permit for a new standard broadcast station to be operated on 830 kc., power of 1 KW and daytime hours of operation.

840 KC.

NEW—George M. Hughes, Florence, S. C.—Construction permit for a new standard broadcast station to be operated on 840 kc., power of 1 KW and daytime hours of operation.

1000 KC.

WSCR—Lackawanna Valley Radio, Scranton, Pa. (Dahl W. Mack, James J. Doherty, Sr., and Eugene L. Burke, a partnership)—Consent to assignment of CP to Lackawanna Valley Broadcasting Co.

1230 KC.

NEW—Northwest Public Services, Spokane, Wash. (A partnership of Roscoe Arthur Day, Jr., Henry H. Alderman and Frederick C. Arpke)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation. (Contingent on KFIO's grant.)

1240 KC.

NEW—Bastrop Broadcasting Co., Bastrop, La. (A partnership composed of George H. Goodwin, F. P. Robinson and W. Dan Files)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts, and unlimited hours of operation.

1330 KC.

WBBR—Watchtower Bible and Tract Society, Inc., Brooklyn, N. Y.—Modification of license to operate with main studio from 1111 Woodrow Road, Staten Island 12, New York (location of auxiliary studios), pending reconstruction of main studio at 124 Columbia Heights, Brooklyn, New York.

NEW—Wabash Broadcasting Co., Inc., Lafayette, Ind.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—Gillespie Broadcasting Co., Fredericksburg, Tex. (Walter T. McKay and Arthur Stehling)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

1360 KC.

WDRC, WDRC-FM, WELN—WDRC, Inc., Hartford, Conn. —Consent to assignment of licenses of standard station WDRC, high frequency broadcast station WDRC-FM, and relay broadcast station WELN, to The Connecticut Broadcasting Co.

1400 KC.

KLIZ—Brainerd Broadcasting Co., Brainerd, Minn. (E. Thomas O'Brien, Mildred O'Brien Chalberg, John Chalberg, Mabel O'Brien Smith and William F. Graham)—Consent to assignment of license to Brainerd Broadcasting Co.

1560 KC.

WTNS—Coshocton Broadcasting Co., Roscoe, Ohio—Modification of construction permit to change studio location from Roscoe, Ohio, to Coshocton, Ohio, operating on 1560 kc., power of 1 KW, and daytime hours of operation.

FREQUENCY MODULATION

FM—Conditional Grants

E. Ogden Driggs, Berkeley, Calif.—Authorized a conditional grant for a Class A station, subject to further review and approval of engineering details (Comr. Durr for hearing). (BPH-1077)

The Copley Press, Inc., Aurora, Ill.—Authorized conditional grant for a Class A station, subject to further review and approval of engineering details. (BPH-190)

The Copley Press, Inc., Elgin, Ill.—Authorized conditional grant for a Class A station, subject to further review and approval of engineering details. (BPH-546)

The Copley Press, Inc., Joliet, Ill.—Authorized conditional grant for a Class A station, subject to further review and approval of engineering details. (BPH-548)

(Continued on next page)

Southern Tier Radio Service, Inc., Binghamton, N. Y.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-924)

Washington Broadcasting Co., Washington, Pa.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details (Comr. Durr for hearing). (BPH-633)

Central Broadcasting Co., Eau Claire, Wisc.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1158)

Nied and Stevens, Inc., Warren, Ohio—Authorized a conditional grant for a Class B station in lieu of a Class A previously authorized, subject to further review and approval of engineering details. (BMPH-294)

E. Anthony and Sons, Inc., West Yarmouth, Mass.—Authorized conditional grant for a Class A station subject to further review and approval of engineering details. (BPH-1142)

WHDL, Inc., Olean, N. Y.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1173)

Copper City Broadcasting Corp., Rome, N. Y.—Authorized a conditional grant for a Class B station in lieu of a Class A station previously authorized, subject to further review and approval of engineering details; and allocated Channel No. 261 to Rome, N. Y. (BPH-928)

Woodrow Miller, d/b as San Bernardino Valley Broadcasters, Colton, Calif.—Authorized conditional grant for a Class A station subject to further review and approval of engineering details. (BPH-1082)

Monterey Bay Broadcasting Co., Santa Cruz, Calif.—Authorized conditional grant for a Class B station subject to further review and approval of engineering details. (BPH-1110)

McClatchy Broadcasting Co., Fresno, Calif.—Authorized conditional grant for a Class B station subject to further review and approval of engineering details. (BPH-472)

FM—Construction Permits

The following were authorized construction permits; conditions; (Note: power given is effective radiated power; antenna height is height above average terrain) and Channel to be assigned after final proceedings in Docket 6768:

Luther E. Gibson, Salinas, Calif.—Class B; 9.4 KW; 1430 feet. (BPH-836)

Owensboro on the Air, Inc., Owensboro, Ky.—Class B; 45 KW; 370 feet. (BPH-1081)

The following were authorized construction permits in lieu of previous conditions:

KRED—Redwood Broadcasting Co., Inc., Eureka, Calif.—Class B; 4.6 KW; minus 30 feet. (BMPH-262)

KMGM—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Class B; 49 KW; 1135 feet. (BPH-813).

KKLA—Echo Park Evangelistic Assn., Los Angeles, Calif.—Class B; 58 KW; 760 feet. (BPH-724)

KFAC-FM—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Class B; 270 KW; 2100 feet. (BMPH-322)

WMGA-FM—John F. Pidcock, Moultrie, Ga.—Class B; 14 KW; 380 feet. (BMPH-228)

KSBS—Sunflower Broadcasting System, Kansas City, Kans.—Class B; 43 KW; 320 feet. (BPH-991)

KFH-FM—The Radio Station KFH Co., Wichita, Kans.—Class B; 180 KW; 420 feet. (BMPH-253)

KYSM-FM—The Southern Minnesota Supply Co., Mankato, Minn.—Class B; 47 KW; 525 feet. (BMPH-254)

WJLK—Asbury Park Press, Inc., Asbury Park, N. J.—Class A; 1 KW; 250 feet. (BMPH-250)

KGBS-FM—Harbenito Broadcasting Co., Harlingen, Texas—Class B; 9 KW; 410 feet. (BMPH-328)

KISS—The Walmac Co., San Antonio, Texas—Class B; 170 KW; 560 feet. (BPH-337)

KTEM-FM—Bell Broadcasting Co., Inc., Temple, Texas—Class A; 220 watts; 500 feet. (BMPH-226)

WRVA-FM—Larus & Bro. Co., Inc., Richmond, Va.—Class B; 25 KW; 500 feet. (BMPH-285)

WRNL-FM—Richmond Radio Corp., Richmond, Va.—Class B; 40 KW; 420 feet. (BPH-229)

WCOD—Havens & Martin, Inc., Richmond, Va.—Class B; 46 KW; 430 feet. (BMPH-183)

FM—License Renewals and Extensions

The following FM stations were granted renewal of licenses for the period ending May 1, 1948:

KMBC-FM, Kansas City, Mo.; KYW-FM, Philadelphia; WDCA, Schenectady; WHFM, Rochester, N. Y.; WMOT, Pittsburgh; WDRC, Hartford, Conn.; WELD, Columbus, Ohio; WGNB, Chicago; WIP-FM, Philadelphia; WQXQ, New York; WTAG-FM, Worcester, Mass.; WHEF, Rochester, N. Y.

Licenses for the following stations were extended upon a temporary basis for the period ending July 1, 1947, for the reasons shown:

WLOU—Booth Radio Stations, Inc., Detroit, Mich.—Pending receipt of information requested under Sec. 308(b) of the Act. (FM station)

WSM-FM—WSM, Inc., Nashville, Tenn.—Pending receipt of information requested under Sec. 308(b) of the Act. (FM station)

WTMJ-FM—The Journal Co. (The Milwaukee Journal), Milwaukee, Wisc.—Pending study of information requested under Sec. 308(b) of the Act. (FM station)

WNBF-FM—Clark Associates, Inc., Binghamton, N. Y.—Pending receipt of information requested under Sec. 308(b) of the Act. (FM station)

WBRL—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Pending receipt of application for involuntary transfer of control made necessary by death of the majority stockholder. (FM station)

WFIL-FM—Triangle Publications, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa.—Granted renewal of license for the period ending May 1, 1948 (Comr. Durr for hearing). (BRH-7)

WOWO-FM—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Present license extended on a temporary basis for a period of 60 days. (BRH-12)

FM—Modifications of CP's Granted

KPNI-FM—Peninsula Newspapers, Inc., Palo Alto, Calif.—Granted modification of CP which authorized a new FM station, for extension of completion date to 10-27-47. (BMPH-303)

WBT-FM—Jefferson Standard Broadcasting Co., Charlotte, N. C.—Granted modification of CP which authorized a new FM station, for extension of completion date to 11-4-47. (BMPH-302)

WQAM-FM—Miami Broadcasting Co., Miami, Fla.—Granted modification of CP which authorized a new FM station for extension of completion date to 11-16-47. (BMPH-316)

WHB-FM—WHB Broadcasting Co., Kansas City, Mo.—Granted modification of CP which authorized a new FM station, for extension of commencement and completion dates to 5-13-47 and 9-13-47, respectively. (BMPH-309)

(Continued on next page)

KCRG-FM—The Gazette Co., Cedar Rapids, Ia.—Granted modification of CP which authorized a new FM station, to change studio location to 1st Ave. and 1st St., S.W., Cedar Rapids. (BMPH-319)

WKYC—Paducah Newspapers, Inc., Paducah, Ky.—Granted modification of CP which authorized a new FM station, for extension of completion date to 11-12-47. (BMPH-311)

WJPG—Green Bay Newspaper Co., Green Bay, Wisc.—Granted modification of CP which authorized a new FM station, for extension of completion date to 8-3-47. (BMPH-300)

WFBC-FM—The Greenville News-Piedmont Co., Greenville, S. C.—Granted modification of CP which authorized a new FM station, for extension of completion date to 8-11-47. (BMPH-317)

KSEO-FM—Democrat Printing Co., Durant, Okla.—Granted modification of CP which authorized a new FM station, for extension of completion date to 6-27-47. (BMPH-297)

KFXM-FM—Lee Bros. Broadcasting Co., San Bernardino, Calif.—Granted modification of CP which authorized a new FM station, for extension of completion date to 10-23-47. (BMPH-310)

WCTW—Courier-Times, Inc., New Castle, Ind.—Granted modification of CP which authorized a new FM station, for extension of completion date to 7-1-47. (BMPH-296)

WEW-FM—St. Louis University, St. Louis, Mo.—Granted modification of CP which authorized a new FM station, for extension of completion date to 6-13-47. (BMPH-306)

WRC-FM—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of CP which authorized a new FM station, for extension of completion date to 7-15-47. (BMPH-305)

WCJT—WHAS, Inc., Louisville, Ky.—Granted modification of CP which authorized a new FM station, for extension of completion date to 8-25-47. (BMPH-295)

KSO-FM—Murphy Broadcasting Co., Des Moines, Iowa—Granted modification of CP which authorized a new FM station, for extension of completion date to 11-20-47. (BMPH-315)

WGAY-FM—Tri-Suburban Broadcasting Corp., Silver Spring, Md.—Granted modification of CP which authorized a new FM station, for extension of completion date to 7-6-47. (BMPH-301)

KALW—Board of Education of the San Francisco Unified School District—Granted modification of CP which authorized a new FM non-commercial educational station for extension of completion date to 10-10-47. (BMPED-56)

FM—Miscellaneous Actions

The Commission adopted an Order designating for hearing the following applications for new Class A FM stations in the vicinity of Los Angeles, Calif.:

San Pedro Printing and Pub. Co., San Pedro; Southern Calif. Associated Newspapers, Glendale; Walter Muller and Frank Muller, d/b as **Muller Bros., Hollywood;** Don C. Martin, tr/as **School of Radio Arts, Beverly Hills; Robert Burdette, San Fernando; William R. Haupt, Inglewood; Airtone Co., Long Beach; Calif. Broadcasting Co., Santa Monica; Arthur H. Croghan; Santa Monica; Rodgers and McDonald Newspapers, Inc., Inglewood; Nichols and Warriner, Long Beach; San Fernando Valley Broadcasting Co., San Fernando; Centinela Valley Broadcasting Co., Inglewood; Alhambra Broadcasters, Inc., Alhambra; Angelus Broadcasting Co., Temple City.**

Further ordered that applications of Southern California Associated Newspapers, Inc., Alhambra, and San Pedro Printing and Publishing Co., San Pedro, be heard upon additional issue involving overlap of service; and that applications of Muller Bros., Hollywood, and San Pedro Printing and Publishing Co., San Pedro, be heard on the additional issue whether a grant would be in contravention of Sec. 3.203(b) of the Rules.

Siskiyou Broadcasting Co., Inc., Yreka, Calif.—Granted request to cancel without prejudice its construction permit for a new Class A FM station authorized January 23, 1947, because the applicant, an Oregon corporation, has been unable to obtain permission to do business in California because of the similarity of its name to that of Siskiyou County Broadcasting Corp., a California corporation. (BPH-934)

WAIT—Gene T. Dyer, et al, d/b as Radio Station WAIT, Chicago, Ill.—Granted petition for leave to amend its application (BPH-614; docket 7150) to change Par. 16 of application to specify one of three Class B FM channels allocated to Chicago, which have been reserved until June 30, 1947. Said amendment was accepted and application as amended, removed from the hearing docket and held in the files of the Commission without action until June 30, 1947.

FM—Applications Accepted for Filing

NEW—Elmer A. Benson, St. Paul, Minn.—Construction permit for a new FM broadcast station (Metropolitan) to be operated on frequency to be determined by FCC. Amended to specify transmitter site as St. Paul, Minn.

NEW—Elmer A. Benson, Rochester, Minn.—Construction permit for a new FM broadcast station (Metropolitan) to be operated on frequency to be assigned by FCC. Amended to specify transmitter and studio sites, as Rochester, Minnesota, and make changes in antenna system.

NEW—Elmer A. Benson, Duluth, Minn.—Construction permit for a new FM broadcast station (Metropolitan) to be operated on frequency to be determined by FCC. Amended to specify transmitter and studio sites as Duluth, Minn., and make changes in antenna system.

NEW—Woodward Broadcasting Co., Detroit, Mich.—Construction permit for a new (Class B) FM broadcast station to be operated on 100 mc. band and ERP of 20 KW.

KGBS-FM—Harbenito Broadcasting Co., Inc., Harlingen, Tex.—Modification of CP (B3-PH-319 as modified which authorized a new FM broadcast station) to make changes in antenna system and change commencement and completion dates.

KSFH—Pacific Broadcasting Co., San Francisco, Calif.—Modification of CP (B5-PH-1031 which authorized a new FM broadcast station) to change effective radiated power to 15.8 KW, make changes in antenna system and change commencement and completion dates.

NEW—General Electric Co., Onendaga County, N. Y. (PO Thompson Road Plant, Syracuse, New York)—Construction permit for a new developmental broadcast station to be operated on 88.1, 95.9, 107.9 mc. power of 50 KW. Emission special for FM and unlimited hours of operation.

KAKC-FM—Public Radio Corporation, Tulsa, Okla.—Voluntary acquisition of control from Ethel B. Kellough and Robert W. Kellough to Sam E. Avey (125 shares of common stock—25%).

NEW—Angelus Broadcasting Co., Temple City, Calif. (A co-partnership composed of Gomer Cool, A. L. Nunamaker and Blaine O. Bender)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 250 watts.

WESB-FM—Bradford Publications, Inc., Bradford, Pa.—Modification of CP (B2-PH-467 which authorized a new FM broadcast station) for extension of completion date.

WMRC-FM—Textile Broadcasting Co., Greenville, S. C.—Modification of construction permit (B3-PH-517 which au-

(Continued on next page)

thorized a new FM broadcast station) for extension of completion date.

KSJO-FM—Santa Clara Broadcasting Co., San Jose, Calif. —License to cover construction permit (B5-PH-737 which authorized a new FM broadcast station).

WMFR-FM—Radio Station WMFR, High Point, N. C. (James E. Lambeth, James E. Lambeth, Jr., Helen M. Lambeth, Frank S. Lambeth and Molly H. Lambeth)—Modification of CP (B3-PH-359 which authorized a new FM broadcast station) to change type of transmitter; effective radiated power to 38.3 KW, effective antenna height as 348.5 feet; make changes in antenna system and change commencement and completion dates.

NEW—Newberry Broadcasting Co., Newberry, S. C. (C. A. Kaufmann and John F. Clarkson)—Construction permit for a new FM broadcast station (Class B) to be operated on 100 mc. band and ERP of 38.4 KW.

WABX—Harold O. Bishop, Harrisburg, Pa.—Modification of CP (B2-PH-877 which authorized a new FM broadcast station) to change completion date.

WCVS-FM—WCBS, Inc., Springfield, Ill.—Modification of CP (B4-PH-230 as modified which authorized a new FM broadcast station) for extension of commencement and completion dates.

WBBW—Associated Broadcasters, Inc., Indianapolis, Ind. —Modification of CP (B4-P-3806, as modified which authorized a new standard broadcast station) to increase power, from 250 watts to 1 KW, change type of transmitter, to make changes in the vertical antenna, to change transmitter and studio location and for extension of completion date.

WBRC-FM—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Modification of CP (B3-PH-330 which authorized a new FM broadcast station) to change type of transmitter, effective radiated power to 558 KW, make changes in antenna system and change commencement and completion dates.

WKMO-FM—Kokomo Broadcasting Corp., Kokomo, Ind.—Modification of CP (B4-PH-434 which authorized a new FM broadcast station) to change description of transmitter site to Morgan and Ohio Sts., Kokomo, Ind.: effective radiated power to 30.8 KW, make changes in antenna system and change commencement and completion dates.

94.5 MC.—#233

NEW—KRGV, Inc., Weslaco, Tex.—Construction permit for a new FM broadcast station (Class B) to be operated on frequency Channel 233, 94.5 mc., ERP of 49.2 KW, and antenna height above average terrain 358 feet.

100.3 MC.—#262

NEW—Midcontinent Broadcasting Co., Sioux Falls, S. Dak. —Construction permit for a new FM broadcast station (Class B) to be operated on Channel 262, 100.3 mc., ERP of 50.7 KW, and antenna height above average terrain 361 feet.

106.1 MC.—#291

NEW—Piedmont Carolina Broadcasting Co., Inc., Reidsville, N. C.—Construction permit for a new (Class B) FM broadcast station to be operated on Channel 291, 106.1 mc.

To Be Assigned By FCC

NEW—Hazleton Broadcasting Service, Inc., Hazleton, Pa. —Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC. Amended to change frequency from "to be assigned" to Channel #227.

NEW—Alhambra Broadcasters, Inc., Alhambra, Calif.—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 370 watts and antenna height above average terrain—431 feet. Amended to change studio and transmitter locations from "to be determined, Alhambra, Calif," to 317 W. Main St., Alhambra, Calif.

NEW—Western Carolina Radio Corp., Shelby, N. C.—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and ERP of 2.1 KW.

FM—Applications Returned

Albert B. Pyatt, Garden City, Kans. (P. O. 411 N. 3rd St., Garden City, Kans.)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, and ERP of 802 watts. Returned April 22, 1947. Program analysis not submitted with the application.

Federal Telecommunication Laboratories, Inc., New York, N. Y. (P. O. 67 Broad St., New York, N. Y.)—Construction permit for a new ST Link broadcast station to be operated on 945 to 955 mc., power of 3 watts, emission special FM and unlimited hours of operation. Returned April 22, 1947, for applicant to appear before notary public for application to be subscribed and sworn to.

TELEVISION

TV—Actions

W0XBV—Kansas State College of Agriculture and Applied Science, Manhattan, Kans.—Granted modification of CP which authorized a new Exp. television station, for extension of completion date to 11-13-47. (BMPVB-161)

W9XBB—Balaban & Katz Corp., Area of Chicago—Granted CP to install a new visual transmitter, change frequency, power, emission and antenna system. (BPVB-191)

W10XLV—Radio Corp. of America, Portable-Mobile, to be used within Continental U. S.—Granted modification of CP which authorized a new experimental television relay station, for extension of completion date to 9-3-47. (BMPVB-162)

W10XLW—Radio Corp. of America, Portable-Mobile, to be used within Continental U. S.—Granted modification of CP which authorized a new experimental television relay station, for extension of completion date to 9-3-47. (BMPVB-163)

TV—Applications Accepted for Filing

WNBT—National Broadcasting Co., Inc., New York, N. Y. —Modification of construction permit (BPCT-169, as modified, and which authorized new commercial television station) for extension of completion date.

NEW—Columbia Broadcasting System, Inc., Portable-Mobile area of New York, N. Y.—Construction permit for a new experimental television relay broadcast station to be operated on 6900-6925 mc., power of 0.1 watt, emission A5, and unlimited hours of operation.

NEW—Columbia Broadcasting System, Inc., Portable-Mobile area of New York, N. Y.—License to operate an experimental television relay broadcast station to be operated on 6900-6925 mc., power of 0.1 watts, emission A5, and unlimited hours of operation.

WNBW—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (BPCT-19, as modified) for extension of completion date.

NEW—Daily News Television Co. (a corporation), Philadelphia, Pa.—Construction permit for a new commercial television broadcast station to be operated on Change No. 12, 204-210 mc., ERP. Visual 3.4 KW. Amended to change visual and aural power to 3.5 KW and 3 KW respectively, and to make changes in antenna system. Also further exhibits, in answer to 12(f).

MISCELLANEOUS BROADCAST

Noncommercial Educational License Renewals

Licenses for the following non-commercial educational stations were renewed for the period ending May 1, 1948:

KALW, San Francisco; WBEZ, Chicago; WBOB, Cleveland; WIUC, Urbana, Ill.

Remote Pickup Applications

NEW—Central States Broadcasting Co., Portable-Mobile area of Omaha, Nebr.—Construction permit for a new remote pickup broadcast station to be operated on 152-162 mc. band, power of 50 watts, emission A3 and hours of operation in accordance with section 4.403.

WCYJ—Onondaga Radio Broadcasting Corp., Area of Syracuse, N. Y.—License to cover CP (BPRE-478 for a new remote pickup broadcast station to be operated on 156.75, 158.40 mc., power of 15 watts, emission special for FM and unlimited hours of operation.

Noncommercial Educational Dismissed

The Trustees of the University of Pennsylvania, Philadelphia, Pa.—Construction permit for a new noncommercial educational broadcast station to be operated on 91.7 mc., power of 10 KW, emission special for FM and unlimited hours of operation. Dismised April 23, 1947, per request of school.

Federal Trade Commission Actions

Complaint

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

Dila-Therm Co., Inc.—The Commission issued a complaint charging The Dila-Therm Co., Inc., 322 East Colfax Ave., South Bend, Ind., and its officers with false and misleading advertising of a purported curative device designated Dila-Therm. (5491)

Cease and Desist Orders

Central University—An Indianapolis correspondence school has been ordered by the Federal Trade Commission to stop describing itself as a university and otherwise misrepresenting its status.

The Commission's cease and desist order directs that Central University, its officers, representatives, agents and employees stop using the word "University" or any abbreviation or simulation thereof as a part of the respondent's corporate name or as a part of the name of the school or otherwise representing that the school is a university. (5326)

National Retail Liquor Package Stores Assn., Inc.—The Commission has issued an order prohibiting National Retail Liquor Package Stores Association, Inc., 11 West 42nd St., New York, from conspiring to fix prices in the sale of liquors. (4168)

Schutte Laboratories—Misrepresentation in the sale of rodent exterminators is prohibited in a cease and desist order issued by the Commission against Charles W. Schutte and Janet M. Schutte, copartners trading as Schutte Laboratories and Schutte Co., Beaver Falls., Pa. (5382)

Nunn Succeeds Shouse As NAB Director; Elected At 7th District Meeting

The membership of NAB's 7th District, by a unanimous vote last Tuesday (27), elected Gilmore Nunn, WLAP, Lexington, Ky., to the NAB Board of Directors. Mr. Nunn, who is at present chairman of the NAB Public Relations Executive Committee, will serve for a two year term beginning next September.

The 7th District Director-elect was chosen at a brief district meeting following the joint Area G session, which was held at Roanoke, Va., last Monday and Tuesday (26 and 27). Area G is composed of Districts 4 and 7. Since even-numbered districts do not elect directors in 1947, district 4 did not hold a separate district meeting. Campbell Arnoux continues to represent that region on the NAB Board.

James Shouse, WLW, who currently represents District 7, requested that he not be re-elected.

Editorializing

The Federal Communications Commission's ban on editorializing by radio stations was among the subjects which provoked considerable discussion during the two day area meeting. NAB President Justin Miller, at the luncheon session which he addressed on Tuesday, expressed the conviction that broadcasters should not—and under the Constitution could not—be prevented from expressing opinions over their own facilities. The extent to which individual stations might exercise this prerogative is a matter for decision by the licensee concerned, he said, and no fetters should, or could legally, be placed upon the broadcasters' freedom to speak.

Members of the two districts urged the NAB, by resolution, to intercede with the Commission in an effort to obtain revision of the Mayflower doctrine "to the end that the broad-

To aid in developing a series of transcribed broadcasts by NAB President Miller, three broadcasters were named last week to serve as a special advisory committee to provide facilities and program counsel. (p. 361)

Endorsing proposals for a camaign to increase radio listening, a joint NAB-RMA committee is formulating plans for an intensive drive which will culminate in this year's annual observance of National Radio Week. (p. 360)

With the arrival of Royal V. Howard and Harold Fair last week, and Robert K. Richards the previous week, NAB headquarters is now fully manned. (p. 362)

The FCC, amending its FM standards of good engineering practice, published last week a new list of approved transmitting equipment. (p. 360)

At the opening general session of the annual Ohio State Institute last Friday, Robert K. Richards, NAB public relations director, discussed the question "What is Public Interest, Convenience and Necessity?" (p. 361)

Fifth District, Meeting in Birmingham, Names Johnston to NAB Board

Henry P. Johnston, managing director, WSGN, Birmingham, was elected to the NAB Board of Directors at the annual meeting of the 5th NAB District. The 5th District held a two-day joint meeting with the 6th District which ended in Birmingham, Friday (2).

Mr. Johnston, who assumes his new responsibilities at the Board meeting to be held in conjunction with the NAB Convention in September, succeeds Fred W. Borton, WQAM, Miami, as director.

Long active in radio broadcasting industry development, Mr. Johnston is a member of the NAB Freedom of Radio Committee, and has served on the ABC Station Planning and Advisory Committee.

He was a leader in the formation of the Alabama Broadcasters Association last year and elected in November to serve as that organization's first president.

[*A fuller story on the joint meeting will be included in the next issue of* REPORTS.]

FCC Grants CP's for 55 AM Stations As Temporary "Freeze" Expires

The temporary FCC "freeze" on AM applications ended Wednesday (30) after being in effect for about three months. The freeze was put into operation to permit the Commission to act on the huge backlog of AM applications. By press time on Friday, the FCC announced the granting during the current week of 55 construction permits for new AM stations.

In announcing the expiration of the temporary expediting procedure, the FCC said: "It enabled the Commission either to grant or designate for hearing every Line 2 application filed prior to February 7—some 250 in number."

Complete details of the grants and other FCC decisions will be found in this issue of REPORTS under FCC Actions.

Protection Granted to New Zealand Authors and Copyright Owners

As a result of an exchange of notes between Dean Acheson, Acting Secretary of State, and C. A. Berendsen, New Zealand Minister to the United States, President Truman has granted an indefinite extension of time to New Zealand authors and copyright owners for fulfillment of the formalities for securing American copyright.

The extension was granted under authority of an Act of Congress passed in 1941 and designed to protect foreign authors who were unable to comply with the American Copyright Act because of war conditions. Authors entitled to the extension are those citizens of New Zealand whose works were first produced or published outside the United States on or after Sept. 3, 1939, or whose works were entitled to renewal of American copyright on or after September 3, 1939, the date of the outbreak of war between New Zealand and Germany.

Broadcast Advertising

NAB-RMA Endorse Campaign to Increase Audience Through Multiple Set Ownership

The NAB Sales Managers Subcommittee for Sales Promotion and the Radio Manufacturers Association last week in New York (29) jointly endorsed and ap-

(Continued on next page)

proved a campaign to increase radio listenership through the "radio in every room—radio for every purpose" campaign, and are formulating plans for an intensive drive which will culminate in National Radio Week starting October 26.

The NAB subcommittee has scheduled for early mailing to member stations a list of suggestions which outline the RMA program, and shows how station activities can tie in to build listening audiences.

Commenting on the recent CBS survey which disclosed that 93 per cent of American homes now have radios, and that 34 per cent of all homes have more than one receiving set, Louis Hausman, director of presentation for the network said, "Even with this saturation of ownership, millions of Americans are under-privileging themselves through a long endured abstention from daily cultural, educational, informative, entertaining programs. This condition is gradually being remedied by the people themselves as these figures confirm. The people know that there is programming for all members of the family at all hours of the day and at all points on the dial. Unfortunately many excellent programs are going unheard simply because there is only a single receiving set in the homes of multiple-unit families."

A spokesman for the RMA, supporting Mr. Hausman's statement, declared "there is more and better programming going out over more and more stations." He credited this programming effort for recent purchases which have helped make multiple-set owners out of one in every three radio homes.

Representing the NAB at the discussions were:

Louis Hausman, CBS, New York; Edward P. J. Shurick, Free & Peters, Inc., New York; John Carl Jeffrey, formerly of WKMO, Kokomo, Ind.; Arthur Stringer and Hugh M. P. Higgins.

RMA members: Stanley H. Manson, Stromberg-Carlson; Victor Irvine, Galvin Mfg. Corp.; E. L. Hadley, Bendix Radio Division; Richard Hooper, RCA; W. B. McGill, Westinghouse Radio Stations; Fred Eldean, Fred Eldean Organization; Nora Hammesfahr, Institute for Better Living.

Public Relations

Plans for Transcribed Series to "Sell Radio By Radio" Get Underway

Three District of Columbia broadcasters were named Thursday (1) by NAB President Justin Miller to serve on a special committee to provide facilities and program counsel in the development of a series of transcribed broadcasts by the NAB President for distribution among radio stations.

The broadcasters are Merle S. Jones, general manager of WOL, who will serve as committee chairman; Richard L. Linkroum, WTOP program director; and Robert Morrison, head of the NBC Recording Division in Washington.

The series of transcribed talks by Judge Miller, which will deal with many different phases of broadcasting—its development, its accomplishments and its problems—were authorized by the NAB Board of Directors at its last meeting.

Lottridge Named to Serve on PR Executive Committee

Washington, D. C., May 2—Buryl Lottridge, WOC, Davenport, Iowa, has been named to the NAB Public Relations Executive Committee it was announced Friday (2).

In addition to serving the industry on the Executive Committee, Mr. Lottridge represents the 10th District on the Public Relations Committee, which is composed of the seventeen NAB District chairmen.

WHAT IS PUBLIC INTEREST, CONVENIENCE AND NECESSITY?

Robert K. Richards, NAB director of public relations, participated in the opening general session, last Friday (2), of the 17th Institute for Education By Radio at Ohio State University. Theme of the session was: "What is Public Interest, Convenience and Necessity?" He told the assemblage of broadcasters and educators from throughout the nation:

We address ourselves tonight, by designation of the chairman, to the whole question of "public interest, convenience and/or necessity."

I am reminded of the farmer who was attacked by a vicious dog. The farmer, employing a pitchfork with some dexterity, transfixed the animal with this weapon and thus killed it.

"Why," he was asked by the dog's angry owner, "did you not defend yourself with the other end of the pitchfork?"

"So I would," replied the farmer, "if I were attacked by the other end of the dog."

Thus it is with this question for this evening. Broadcasters are being attacked with just one end of

(Continued on next page)

this phrase—that which is known as "the public interest."

In the matter of convenience, there would seem to be easy access to mutual understanding. A thing is either convenient, or inconvenient, to the public or to any entity within the public, and a decision as to which it is should not be too difficult of discovery.

And about the same should apply to any considerations of necessity. I discard these, then, as the tail of the dog—wagging, but to little avail.

However, the phrase "public interest" I find to be fascinating and challenging. With due regard for Commissioner Durr and his colleagues, much more learned in these matter than I, certainly there is evidence that some puzzlement exists in their own circles.

I come to you, then, on a pilgrimage, in search of the truth—not burdened by any considerable erudition.

But I would not have you think that these notes were written in a lower berth enroute from Washington. I have undertaken some research and am prepared to report to you.

Since the first Continental Congress, 10,389 men and women have served our nation in the federal legislature. I should say, and you must accept an approximation, that the phrase "public interest" was uttered at least once by each during the term of his office. Yet a diligent search of the extensive files kept by the Library of Congress does not reveal one concrete definition worthy of your consideration. And of course, had one emerged, it is not certain that such an interpretation would apply today.

The Constitution, one can assume I hope, is in the public interest, and was considered so when written. But since then, it has been amended 21 times.

It seems to me that the public interest, whatever it may be, is of private conception. How you may view it as against how I might view it, assuming us both to be citizens of reasonable integrity, may differ in minor particulars, but not in great generalities. It becomes then, if such premise is acceptable, a burden of the individual conscience. And if you bundle up those consciences within a community, one approaches an equation that might be the "public interest." Nevertheless we must remember that the point of nuclear fission is the meeting of one conscience with another, and those two with two more and so on. You recognize, of course, that this is not original thinking. There has been very little original thinking about what is good and what is bad since the apple incident in the Garden of Eden. But there has been some, much of it authored by the immortal Oliver Wendell Holmes, Jr. He said:

"If you want to know the law and nothing else, you must look at it as a bad man, who cares only for the material consequences which such knowledge enables him to predict, not as a good one, who finds his reasons for conduct, whether inside the law or outside of it, in the vaguer sanctions of law. . . ." And he added, "The law is full of phraseology drawn from morals. . . . The law talks about rights, and duties, and malice, and intent, and negligence, and so forth, and nothing is easier, or, I may say, more common in legal reasoning, than to take these words in their moral sense, at some stage of the argument, and so drop into fallacy."

Thus, those who face the difficult task of administering a law which contains that phrase of moral fibre, pure and simple, must be cautious lest they fall into fallacy.

In terms of specifics, and with special reference to radio, it would seem unassailable that it is in the public interest to make the public laugh; and in its interest to broadcast information and fine music and drama.

I see no abridgement of the public interest in selling soap, a product which is much maligned by radio's critics although all of them appear to be well-scrubbed. Certainly, on the other hand, there is an abridgement of the public interest in any effort, no matter how well-intended, which will deprive the public of what it finds interesting.

Louis G. Caldwell, a wise and experienced radio attorney, has described this public interest, convenience and necessity clause governing broadcasters—through use of phraseology only attainable by lawyers—as The Land of Picon. P-I-C-O-N. Public Interest, Convenience and Necessity.

Mr. Caldwell charges that the broadcasters who inhabit this land must live by rules and regulations which change from day to day, sometimes almost whimsically.

Well, if you agree with Mr. Caldwell or not, there will always be a Land of Picon for the broadcasters, whether its boundaries are specifically described by law or not. For public interest is of private conception, a definition by one which finds acceptance by many.

I hope the Land of Picon can become a happy land, which it is not today. That will depend upon the vision of its established rulers—and their compassion in developing a personal definition of the public interest which is in harmony with the public's interest.

General

NAB Staff Now Fully Manned As Three New Directors Assume Duties

The recently announced additions to the NAB staff were completed Thursday (1) when Royal V. Howard, new director of engineering, assumed his duties.

Two other newly appointed staff directors had previously reported to NAB headquarters. Robert K. Richards, director of public relations, took over his new responsibilities on April 14th. Harold Fair, director of the new NAB program department, arrived at the NAB offices on Monday of last week. However, Mr. Fair has been active in his new capacity since early last month, having attended several NAB committee and district meetings.

Mr. Howard comes to NAB from KSFO, San Francisco; Mr. Fair from WHO, Des Moines; and Mr. Richards from *Broadcasting* magazine.

Reference Publications on Radio Industry Available to Broadcast Station Executives

Three new publications, affording sources for quick references on the broadcasting industry are now available to radio station management.

(Continued on next page)

Radio Daily and *Broadcasting* magazine have published and mailed their annual yearbooks to subscribers.

Radio News Bureau, which publishes the weekly *Television Digest & FM Reports*, announced last week the publication of a directory of AM broadcasting stations with weekly addenda as part of its looseleaf service. This service will be available on a subscription basis only.

District Meetings

Nunn Succeeds Shouse As NAB Director; Elected at 7th District Meeting

(Continued from page 359)

casters of America, without fear or restraint, may exercise the rights which we firmly believe are guaranteed under the Constitution."

The broadcasters expressed serious concern over the disruption in programming which had occurred the day before the meeting began when a large section of the nation changed to Daylight Saving Time. The provisions of H. R. 2740, a bill now pending before Congress which would require all businesses engaged in interstate commerce to operate on standard time *(See current* REPORTS, *p. 287)*, were discussed by A. D. Willard, Jr., NAB executive vice president. The broadcasters went on record in favor of this measure, and urged, by resolution, that the individual members of the two districts support the bill *(See below)*.

Another topic which aroused considerable attention, particularly at the Small Market Stations session, was the Commission's rule which now requires that all broadcast transmitter engineers have a first-class license. Station representatives outlined the hardship which this rule places upon stations, especially those in smaller cities. A resolution calling upon NAB to seek modification of this rule was adopted. (*See below*)

The editor and publisher of *Broadcasting* magazine, Sol Taishoff, spoke at the Monday evening banquet. Reviewing the legislative history of the Communications Act, Mr. Taishoff recalled that the original purpose of governmental regulation in the radio field was to stop technical confusion. He deplored the steady way in which the FCC has expanded its power into the area of programming by interpretation of the Act.

Legislative action to correct this situation, he said, should be aimed toward this goal: "The licensing authority shall have no power to regulate the programs or the business aspects of the mass communications media."

A resolution, introduced from the floor and adopted unanimously by the 4th and 7th District broadcasters, commended Mr. Taishoff for his long and continued fight for freedom of radio.

Another resolution, adopted at the closing session of the area meeting, condemned "certain labor practices, particularly the tendency toward industry-wide bargaining, the use of the secondary boycott, the disruptive effect of jurisdictional disputes with the ranks of labor, and the unconscionably but growing practice of feather-bedding." All, agreed the broadcasters, are "inimical to the best interests of the radio industry and the listening public which it serves."

Resolutions at Roanoke

Other resolutions, which were presented by the Resolutions Committee, under chairmanship of Don S. Elias, WWNC, Asheville, N. C., and adopted by the membership, are reprinted verbatim below:

MAYFLOWER CASE

Whereas, broadcasting as a free media of mass communications is protected by the first amendment of the Constitution and by Section 326 of the Federal Communications Act, guaranteeing freedom of speech, and

Whereas, in our opinion, in the so-called Mayflower Case, Federal Communications Commission has undertaken to deprive the licensees of broadcasting stations of the right to editorialize, and

Whereas, the members of the Fourth and Seventh Districts of the National Association of Broadcasters believe that this opinion violates the afore-mentioned constitutional guarantees;

Therefore, be it resolved, that the members of the Fourth and Seventh NAB Districts urge that the Board of Directors and the President of NAB make every effort to secure a new and more liberal interpretation on the part of the Federal Communications Commission with reference to this right, to the end that the broadcasters of America, without fear or restraint, may exercise the rights which we firmly believe are guaranteed under the Constitution.

BMI

Whereas, the availability of good music for the use of broadcasters is basic to good programming, and

Whereas, performing rights have, in past years, been a serious problem for broadcasters, and

Whereas, the broadcasting industry has successfully created and maintained Broadcast Music, Incorporated, as a source of good music;

Therefore, be it resolved, by the broadcasters of the Seventh and Fourth Districts of the NAB, that a careful analysis of the use of music be made by the stations and every effort made by them to utilize more effectively the performing rights of Broadcast Music, Incorporated.

We further suggest that the members of the aforementioned districts of NAB give early and favorable consideration to the renewal of their BMI contracts, thus assuring that this important source of supply of music be maintained unimpaired as a strong competitive factor in the music licensing field.

We particularly wish to endorse and commend the selection of Carl Haverlin as President of BMI.

UNIFORM TIME

Whereas, the shift from standard time each spring through the summer to Daylight Saving time in certain important sections of the country, resulting in a change in operations on the part of the networks twice yearly, has greatly disrupted satisfactory programming by the broadcasters and seriously annoyed the listening public:

The members of the Fourth and Seventh Districts of NAB hereby request the directors and executives of the National Association of Broadcasters to undertake through every possible means the securement of necessary legislation to correct this annual disruption in our affairs. We urge the planning and execution of a concerted and determined campaign to provide uniformity of time within the various time zones of the country for all broadcast operations and particularly we urge the support of H. R. 2740.

(Continued on next page)

2% Cash Discount

Whereas, there has been an extensive campaign by the national advertising agencies to influence broadcasters to establish the 2% discount principle for the prompt payment of advertising accounts, and

Whereas, we feel that the adoption of such a practice would, of necessity, require the revision upward of the rate cards of the broadcasters;

We, the broadcasters of the Fourth and Seventh Districts of the NAB, hereby go on record as opposed to the adoption of the proposed plan.

Engineer's Licenses

Whereas, the FCC's withdrawal of permission to use third class license holders on the engineering staffs of broadcasting stations has imposed a hardship upon the operation of many stations, and

Whereas, it is felt that the elimination of operations with this class of license holder is unrealistic;

Therefore, be it resolved by the members of the Fourth and Seventh NAB Districts that the management of NAB make every effort to persuade the Federal Communications Commission to reconsider its action in this connection and to give consideration to the establishment of a similar class of license holder so essential to the efficient operation of many of the small market stations of the Association.

President Miller and Staff

The membership of the Fourth and Seventh Districts of the NAB Convention assembled take this opportunity to heartily approve and commend the fine quality of leadership furnished the industry by its president, Justin Miller. We feel that the industry is being well served by the broadened development of departments to render well rounded services to the membership of the Association. In commending the president, we simultaneously recognize the general excellence of the staff which he has grouped about him to perform these important services. We pledge our wholehearted support to President Miller and to his staff in their efforts to bring about a better understanding of the American system of broadcasting in the minds of public officials and listeners alike.

Directors Arnoux and Shouse

To Campbell Arnoux, Director of the Fourth District, and to James D. Shouse, Director of the Seventh District, we express in this resolution our genuine appreciation of the time and effort which they have expended to arrange this meeting and to make our stay both a pleasant and profitable one. And, at the same time, we also express appreciation to Kenneth Hyde, Manager of Hotel Roanoke, and to all of his employees for the splendid facilities which have been made available and the courtesies which have been extended to the visiting broadcasters.

Host Stations in Roanoke

The members of the Fourth and Seventh NAB Districts do here express their deep appreciation to Radio Stations WDBJ, WSLS, and WROV for their gracious hospitality and for their careful and complete arrangements for the comfort and entertainment of the visiting broadcasters.

To each of the host stations, to their managements and their staffs, we, through this resolution, extend our grateful and sincere thanks.

Registration at Roanoke

Campbell Arnoux, WTAR; Milton N. Adams, WBTM; Bob Amos, WHKP; John Andrew, Associated Program Service; W. N. Abbott, WTMA; A. S. Aden, WPUV; Frederick L. Allman, WSVA.

Public Interest Programming

National Guard May Call on Stations For Aid in Recruiting Campaign

A grass roots campaign to build the National Guard to a force of approximately 682,000 men is quietly gathering momentum throughout the nation. Upwards of 6,000 local units in villages, towns and cities must be organized to achieve full strength.

State authorities have the decision as to where units are to be located within the state; they alone carry out recruiting.

For this reason, broadcasters may anticipate calls from their local Guard units for assistance in recruiting home town men. The initial enlistment age is 18-35 with exceptions in age made for veterans.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of May 12-18, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945, the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field. . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing, feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas, many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups—such as parent-teacher organizations—actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. (Fact Sheet No. 37)

Nursing Is a Growing Profession

There is a definite and alarming shortage of nurses in the majority of the nation's hospitals. In some instances, whole floors and wings of hospitals have had to close. Literally, thousands of patients are going without adequate nursing care. Point out the many opportunities open to young women who join the growing nursing profession—today, there is a tremendous demand for nurses, and the demand will be even greater in the years ahead. Industry, psychiatry, child and public health, Veterans' Administration, U. S. Public Health Service, Army and Navy all offer splendid opportunities for nurses. The field of nursing hasn't nearly begun to reach its full expansion. Nursing training is an ideal preparation for marriage, family life, community leadership. Nursing is a proud profession. Urge young women under 35 who are high school graduates or college students with good scholastic records to check immediately with their local hospital for information on how to apply for admission to any of the nearly 1300 Accredited Schools of Nursing. Applications are being taken now for fall classes. A nursing education will lead to the professional title of Registered Nurse, and in the college schools of nursing, to the degree of Bachelor of Science as well. *Important:* Remind ex-servicewomen—WACS, WAVES, SPARS and MARINES—that if they qualify as student nurses, the entire cost of their nursing education may be covered by

(Continued on next page)

their allowance for tuition under the GI Bill of Rights. (Fact Sheet No. 9-G)

Group Prejudice—A Post War Menace

Stress the reasons why we cannot afford divisive prejudice in America. 1. Division at home weakens the United States on the international scene—group strife here lowers the prestige of the United States among the nations of the world, hampers our country in its efforts toward world peace, promotes the belief that democracy has failed, encourages aggression in the hope of easy conquest. 2. Division at home hampers production—discrimination against fellow employees or business associates because of race, religion, or national origin, annually robs the United States of millions of hours of productive labor and the best skill and talents of countless workers. In a prejudice-filled America, no one would be secure—in his job, his business, his church, his home. Point out that the problem is especially acute now because of the many real difficulties that confront the American people—such as housing, jobs for servicemen, shortages, strikes, rising costs of living. We must not let ourselves be diverted from serious effort to overcome these postwar difficulties by the "scapegoat" technique that blames them on some racial, religious or national group. Recall that slandering an entire group of fellow citizens because of the behavior of individuals violates the American tradition of fair play. We should judge our neighbors by the character of their own lives alone, and not on the basis of their race or religion. Racial and religious antagonisms are exploited, as a means for gaining political favor and easy money, by quacks and adventurers whose followers make up the irresponsible "lunatic fringe" of American life. Show that every individual citizen can help keep America strong by: 1. Isolating and quarantining group antagonism. (If someone runs down a neighbor's race or religion, remind him that this is bad business for America both at home and abroad.) 2. Alertly guarding himself and his family against infection by racial and religious prejudice. (Don't spread prejudice now, any more than you would have spread enemy rumors during the war. Through your own behavior and otherwise, encourage respect in your children for neighbors of different races and religions—remind them that these very differences among Americans have resulted in a variety of contributions that have made our country great and kept her free.) 3. Work in your community—your church, your business, your trade union, your school—to promote the American principles of racial and religious freedom. (Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, May 5. They are subject to change.

Tuesday, May 6

Oral Argument

(Before the Commission en banc, Room 6121, in the order listed, beginning 10:00 A. M.)

(1)

Report & Docket No. B-339—7313—Gulf Broadcasting Co., Inc., Mobile, Ala. **1340 kc.**, 250 watts, unlimited.

Report & Docket No. B-339—7314—Burton Broadcasting Co., Mobile Ala. **1340 kc.**, 250 watts, unlimited.

Report & Docket No. B-339—7482—Mobile Broadcasting Co., Mobile, Ala. **1330 kc.**, 1 KW N, 5 KW D, unlimited. DA-N&D.

(2)

Report & Docket No. B-338—6921—WJPS, Inc., Evansville, Ind. **1330 kc.**, 5 KW D, 1 KW N, unlimited. DA-night & day.

Report & Docket No. B-338—6922—Tri-State Broadcasting Corp., Evansville, Ind. **1330 kc.**, 5 KW, unlimited. DA-night & day.

(3)

Report & Docket No. B-341—6843—Bay State Beacon, Inc., Brockton, Mass. **1450 kc.**, 250 watts, unlimited.

Report & Docket No. B-341—6845—Cur-Nan Co., Brockton, Mass. **1450 kc.**, 250 watts, unlimited.

Report & Docket No. B-341—7008—Plymouth County Broadcasting Corp., Brockton, Mass. **1450 kc.**, 250 watts, unlimited.

(4)

Report & Docket No. B-340—7216—Central Broadcasting Co., Eau Claire, Wis. **790 kc.**, 5 KW N&D, DA-unlimited.

Report & Docket No. B-340—7333—Texas Star Broadcasting Co., Houston, Tex. **790 kc.**, 1 KW N, 5 KW D.

Report & Docket No. B-340—7334—Lubbock County Broadcasting Co., Lubbock, Tex. **790 kc.**, 1 KW, unlimited.

Report & Docket No. B-340—7335—Plains Radio Broadcasting Co., Lubbock, Tex. **790 kc.**, 5 KW.

Report & Docket No. B-340—7336—Veterans Broadcasting Co., Houston, Tex.—**1230 kc.**, 250 watts, unlimited.

(5)

Report & Docket No. B-345—7367—Abilene Broadcasting Co., Abilene, Tex. **1340 kc.**, 250 watts, unlimited.

Report & Docket No. B-345—7483—Citizens Broadcasting Co., Abilene, Tex. **1340 kc.**, 250 watts, unlimited.

Thursday and Friday, May 8 and 9

(Before the Commission en banc, Room 6121, 10:00 A. M.)

In the matter of promulgation of rules and regulations and standards of good engineering practice for FM broadcasting. Other than non-commercial educational broadcast service.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

550 KC.

The Commission announced adoption of a **Memorandum Opinion and Order** directing that those portions of the Decision and Order adopted December 6, 1946, which grant the application of **WJIM, Inc., Lansing, Mich.**, grant conditionally the application of **Cincinnati Times-Star Co. (WKRC), Cincinnati, Ohio**, and sever applications from the proceeding, be vacated and set aside, and that stations WKRC and WJIM are granted leave to file exceptions and request oral argument on the Proposed Decision (B-353) on their applications released today, proposing to grant application of WJIM (BP-4087; Docket 6807) to change from 1240 kc., 250 watts, unlimited, to 550 kc., 1 KW, unlimited, DA, conditions, and application of WKRC (BP-4372; Docket 7401) to change from 1 KW night, 5 KW day, unlimited, DA,

(Continued on next page)

to 5 KW night, and change directional antenna, operating on 550 kc., conditions.

Further ordered that applications listed below be severed from each other and from the above applications of WJIM and WKRC, and ordered that insofar as the relief granted coincides with the relief requested by petition of WKRC, it is granted; insofar as the relief requested is not covered by the Memorandum Opinion and Order, it is denied:

The Constitution Publishing Co., Atlanta (BP-4086; Docket 6802); **Montana Broadcasting and Television Co., Butte, Mont.** (BP-3993; Docket 6808); **Pulitzer Publishing Co. (KSD), St. Louis** (BP-4089; Docket 6809); **Sunshine Broadcasting Co. (KTSA), San Antonio** (BP-4399; Docket 7174): **Buffalo Broadcasting Corp. (WGR), Buffalo, N. Y.** (BP-4424; Docket 7122); **Millard Eidson (KCRS), Midland, Texas** (BP-4474; Docket 7215); **Radio Station WDEV (WDEV), Waterbury, Vt.** (BP-4492; Docket 7405); and **Oregon State Agr. College (KOAC), Corvallis, Ore.** (BML-1228; Docket 7406).

1230 KC.

The Commission also announced its **Final Decision** in the following cases:

B-321—Granting application of **Commonwealth Broadcasting Corp.** for a new station at **Danville, Ky.**, to operate on 1230 kc., 250 watts, unlimited time, conditioned upon the filing of an appropriate application for the use of 250 watts (applicant had specified 100 watts) (BP-4040; Docket 7164); and denying the application of **Danville Broadcasting Co.** seeking the same facility (BP-4264; Docket 7165);

B-337—Granting application of **Pueblo Radio Co., Inc.**, for a new station at **Pueblo, Colo.**, to operate on 1230 kc., 250 watts, unlimited, conditions (BP-4175; Docket 7092); and denying the application of Dorrence D. Roderick seeking the same facility (BP-4037; Docket 7091).

The Commission announced its **Proposed Decision** (B-355) looking towards the **grant** of the application of **Allentown Broadcasting Corp.** (BP-4374; Docket 7180), for a new station in **Allentown, Pa.**, to operate on 1230 kc., 250 watts, unlimited time; conditions; and **denial** of the applications of **Easton Publishing Co.** (BP-4212; Docket 71790), **Easton, Pa.**, and **Steel City Broadcasting Co. of Bethlehem, Pa., Inc.** (BP-4428; Docket 7181), **Allentown, Pa.**, seeking the same facilities, and application of **Associated Broadcasters, Inc.**, to change frequency of station **WEST, Easton, Pa.**, from 1400 kc. to 1230 kc., operating with 250 watts, unlimited time (BP-4517; Docket 7441).

1250 KC.

The Commission announced adoption of an **Order** (B-359) granting petition of **Midwest Broadcasting Co.** to amend its application for new station at **Milwaukee, Wisc.**, to specify an antenna pattern designed to reduce interference to existing stations; further ordered that application, as amended, be granted, to operate on 1250 kc., 5 KW, unlimited time, DA, conditions (BP-3746; Docket 6795). Dismissed as moot petition to enlarge issues and reopen record.

At the same time the Commission granted application of **WREN Broadcasting Co., Inc.**, for CP to move Station WREN from Lawrence to Topeka, Kans., to operate there on its presently assigned frequency of 1250 kc., power of 5 KW day, and to increase night power from 1 KW to 5 KW, DA night, S-KFKU (BP-3625; Docket 6703), conditions.

1340 KC.

The Commission announced its **Proposed Decision** (B-354) looking towards the grant of the application of **Bullard, Metcalf and Goodlette** for a new station in **Hazard, Ky.**, to operate on 1340 kc., 250 watts, unlimited time (BP-4661; Docket 7512), and denial of the applications of The Hazard Broadcasting System (BP-4583; Docket 7511) and **Universal Broadcasting Co.** (BP-4778; Docket 7584), requesting the same facilities.

1450 KC.

The Commission announces its **Proposed Decision** (B-347) looking toward the grant of the application of **Community Broadcasting Corp.** for a new station at **Fort Wayne, Ind.**, to operate on 1450 kc., 250 watts, unlimited time (BP-4993; Docket 7699), and a denial of the applications of **Homer Rodeheaver** (BP-4305; Docket 7097) and **Radio Fort Wayne, Inc.** (BP-5282; Docket 7877), each seeking the same facilities. (Comrs. Denny and Jett favor a grant to Radio Fort Wayne, Inc., because its stockholders have had experience in radio, will take an active part in the day to day operation of the station and because they are residents of Fort Wayne and more closely identified with the community than are the Feldmans, who own 90% of stock of Community Broadcasting Corp.)

1460 KC.–1490 KC.–1500 KC.

The Commission announced its **Proposed Decision** (B-357) looking toward the grant of the applications of **Monterey Bay Broadcast Co.** (BP-4150; Docket 6952) for a new station at **Santa Cruz, Calif.**, to operate on 1460 kc., 1 KW, DA, conditions: and a grant of application of **San Jose Broadcasting Co.** (BP3921; Docket 6955) for a new station at **San Jose, Calif.**, to operate on 1500 kc., 1 KW power, DA day and night. At the same time, the Commission proposes to deny applications of **Golden Gate Broadcasting Corp.** to change frequency of **KSAN, San Francisco**, from 1450 to 1460 kc., increase power from 250 watts, unlimited, to 5 KW unlimited time, DA (BP-3913; Docket 6949); **Cascade Broadcasting Co., Inc.**, to increase power of **KTYW at Yakima, Wash.**, from 500 watts unlimited time to 1 KW unlimited time, operating on 1460 kc. (BP-3889; Docket 6953), and **Mission Brodacasting Co.** (BP-4266; Docket 7023), for a new station at San Jose to operate on 1490 kc., 250 watts, unlimited time.

Commissioner Wakefield concurs in part, but as between the San Jose applicants, believes the Mission Broadcasting Co. application should be granted.

Oral Argument

Ordered **oral argument** on following proposed decisions on May 6:

Gulf Broadcasting Co. (Docket 7313); **Burton Broadcasting Co.** (Docket 7314); **Mobile Broadcasting Co.** (Docket 7482); **WJPS, Inc.** (Docket 6921); **Tri-State Broadcasting Corp.** (Docket 6922); **Bay State Beacon, Inc.** (Docket 6843); **Cur-Nan Co.** (Docket 6845); **Plymouth County Broadcasting Co.** (Docket 7008); **Central Broadcasting Co.** (Docket 7216); **Texas Star Broadcasting Co.** (Docket 7333); **Lubbock County Broadcasting Co.** (Docket 7334); **Veterans Broadcasting Co.** (Docket 7335); **Plains Radio Broadcasting Co.** (Docket 7336); **Abilene Broadcasting Co.** (Docket 7367); and **Citizens Broadcasting Co.** (Docket 7483).

AM—New CP's Granted

560 KC.

Montana Farmer Broadcasting Corp., Great Falls, Mont.—CP for new station to operate on 560 kc., 5 KW, DA-night. (BP-5866)

590 KC.

Hudson Valley Broadcasting Co., Inc., Albany, N. Y.—Granted CP for a new station; 590 kc., 1 KW night, 5 KW day, employing a directional antenna for day and night use; conditions. (BP-5148)

Bluegrass Broadcasting Co., Inc., Versailles, Ky.—Granted CP for a new station; 590 kc., 1 KW, unlimited time, employing DA for day and night use. (BP-5136)

620 KC.

Commercial Associates, Inc., Sioux City, Iowa—Granted CP for a new station to operate unlimited time on 620 kc., 1 KW, DA arrays night and day (DA-2). (BP-5396)

690 KC.

West Texas Broadcasting Co., El Paso, Tex.—CP for new station to operate on 690 kc., 5 KW, unlimited; DA for day and night use; conditions. (BP-5957)

850 KC.

Champlain Valley Broadcasting Corp., Albany, N. Y.—Granted CP for new station to operate on 850 kc., 10 KW, unlimited time, DA-1 day and night. (BP-4740)

(Continued on next page)

940 KC.

Puerto Rico Communications Authority, Rio Piedras, P. R.—CP for new station to operate on 940 kc., 10 KW, unlimited; DA day and night; conditions. Com. Jett for hearing. (BP-4397)

Plains Empire Broadcasting Co., Amarillo, Tex.—CP for new station to operate on 940 kc., 1 KW, unlimited; DA. (BP-4551)

950 KC.

WARC, Inc., Rochester, N. Y.—CP for new station to operate on 950 kc., 1 KW, DA-2, unlimited. (BP-3565)

960 KC.

The Wooster Republican Printing Co., Wooster, Ohio—Granted CP for new station; 960 kc., 500 watts, daytime. (BP-5581)

970 KC.

Rochester Broadcasting Co., Rochester, Minn.—Granted CP for a new station; 970 kc., 1 KW, unlimited time, employing directional antenna (DA-1). (BP-5080)

990 KC.

Wichtex Broadcasting Co., Wichita Falls, Tex.—Adopted Decision and Order granting petitions of Wichtex Broadcasting Co. to sever application from consolidated proceeding with KTOK, and granted said application of Wichtex for new station to operate on 990 kc., 5 KW day, 1 KW night; DA night. (BP-3981; Docket 7127)

(See Item re KTOK under "AM—CP's Granted to Change Frequencies.")

1080 KC.

Radio Santa Cruz, Santa Cruz, Calif.—Granted CP for new station to operate on 1080 kc., 1 KW, daytime only. (BP-5105)

1110 KC.

Borinquen Broadcasting Co., Caguas, P. R.—CP for new station to operate on 1110 kc., 250 watts, unlimited. (BP-5603)

Broadcasting Corp., Alexandria, La.—Adopted memorandum opinion and order denying petition requesting that its application for CP (BP-5506) to change the assignment of KPDR from 1490 to 1400 kc., operating with 250 watts unlimited time (the facilities assigned to KSYL under a CP), be designated for consolidated hearing with KSYL's application for voluntary assignment of CP (BAP-43); ordered that application of KPDR (BP-5506) to change frequency be designated for hearing, and that Sylvan Fox and Harold M. Wheelahan, a partnership, d/b as Radio Station KSYL be made parties to this proceeding.

1410 KC.

Dalrad Associates, Delhart, Texas (Baird Bishop and Ed Bishop)—Designated for hearing; CP for a new station to operate on 1410 kc. with 250 watts, unlimited time. (BP-4919)

KERN—McClatchy Broadcasting Co., Bakersfield, Calif.—Designated for hearing; CP to increase power from 1 to 5 KW, install new transmitter and DA for night use, operating on 1410 kc. (BP-5974)

1420 KC.

Tri-County Broadcasting Co., Luling, Tex.—Designated for hearing application for new station (BP-5636), 1420 kc., 1 KW, unlimited, DA-night.

1440 KC.

WROK—Rockford Broadcasters, Inc., Rockford, Ill.—Designated for hearing; CP to change transmitter site, increase height of vertical antenna, and use new AM radiator as support for FM antenna. (BP-5555)

WBCM—Bay Broadcasting Co., Inc., Bay City, Mich.—Designated for hearing; CP to move transmitter site and install new vertical radiator with FM antenna atop AM tower, increasing effective AM height from 168 feet to 427 feet. (BP-5662)

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas—Designated for hearing application to change frequency from 1230 kc. to 1440 kc., increase power from 250 watts to 1 KW, 5 KW-LS, change site, install new transmitter, and erect new directional antenna for nighttime use (DA-N) utilizing facilities relinquished by station KGNC. (BP-4353)

1450 KC.

WFMJ—The WFMJ Broadcasting Co., Youngstown, Ohio—Designated for hearing application (BMP-2440) for approval of DA and change type of transmitter.

1460 KC.

KORE—Eugene Broadcasting Station, Eugene, Ore.—Designated for hearing application (BP-5470 to change frequency from 1450 to 1460 kc., power from 250 watts to 1 KW, unlimited time, install new transmitter and DA for day and night use, and change transmitter location.

WJPF—Orville W. Lyerla, Herrin, Ill.; WELO—Birney Imes, Jr., Tupelo, Miss.; WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals, Ala.—Designated for consolidated hearing application of WJPF (BP-5162), to change frequency and power from 1340 kc., 250 watts, unlimited to 1460 kc., 1 KW, DA-night, unlimited; with application of WELO (BP-4719) to change from 1490 kc., 250 watts unlimited, to 1460 kc., 500 watts night, 1 KW-LS, unlimited, and application of WLAY (BP-4684) to change from 1450 kc., 250 watts unlimited to 1460 kc., 1 KW, DA-night, unlimited.

1470 KC.

United Broadcasting Corp., Pittsburgh, Pa. (formerly Richard J. Cook)—Designated for hearing; CP for a new station to operate on 1470 kc., 5 KW, unlimited time, DA (BP-5863), in a consolidated proceeding with application of Western Pennsylvania Broadcasting Corp. (Docket 8170) and East Liverpool Broadcasting Co. (Docket 8171); and ordered that WSAN, Allentown; KPLC, Lake Charles, La., and KRIC, Beaumont, Texas, be made parties to the proceeding.

1480 KC.

Lincoln Broadcasting Corp., Lincoln, Neb.—Designated for hearing application (BP-4985) for a new station to operate on 1480 kc., 1 KW, DA-2, unlimited time.

1550 KC.

WLOA—Matta Broadcasting Co., Braddock, Pa.—Designated for hearing; modification of CP to increase power and hours of operation from 1 KW, day, to 5 KW, unlimited, DA at night, on 1550 kc. (BMP-2478)

1580 KC.

Gila Broadcasting Co., Winslow, Ariz.—Designated for hearing application for a new station to operate on 1580 kc., 1 KW, DA-1, unlimited time. (BP-5406)

1600 KC.

KUBA—"Peach Bowl Broadcasters", Yuba City, Calif.—Designated for hearing application (BMP-2642), to change type of transmitter, install DA and change transmitter and studio locations.

AM—License Renewals and Extensions

WBLK—News Publishing Co., Parkersburg, W. Va.—Granted renewal of license for the period ending August 1, 1947.

WAAT & Aux.—Bremer Broadcasting Co., Newark, N. J.—Granted renewal of license for the period ending May 1, 1950.

WJAR & Aux.—The Outlet Co., Providence, R. I.—Granted renewal of license for the period ending May 1, 1950.

(Continued on next page)

WLOU—Booth Radio Stations, Inc., Detroit, Mich.—Granted renewal of license for the period ending May 1, 1948.

W8XMV—Miami Valley Broadcasting Corp., Dayton, Ohio—Granted renewal of license for the period ending May 1, 1948.

W9XJD—WJJD, Inc., Chicago, Ill.—Granted renewal of license for the period ending May 1, 1948.

WFNS—Burlington-Graham Broadcasting Co., Burlington, N. C.—Present license extended upon a temporary basis to July 1, 1947, pending receipt of renewal application.

AM—Modifications of CP's Granted

WEBR—WEBR, Inc., Buffalo, N. Y.—Granted modification of CP to make changes in directional antenna (DA-1); engineering conditions. (BMP-2489)

WICA—WICA, Inc., Ashtabula, Ohio—Granted modification of CP to make changes in directional antenna at night, employ directional antenna daytime (DA-2) and change type of transmitter; engineering conditions. (BMP-2497)

WRRN—Neid & Stevens, Inc., Warren, Ohio—Granted modification of CP to specify change in nighttime directional antenna to better protect co-channel station CHNO, Sudbury, Ontario. (BMP-2670)

WFLA—The Tribune Co., Tampa, Fla.—Granted modification of CP to make changes in directional antenna, subject to such action as may be necessary by Cuban protest. (BMP-2465)

KTSA—Sunshine Broadcasting Co., San Antonio, Texas—Granted modification of CP to meet the engineering conditions specified in the Commission's decision of December 6, 1946, install new transmitter and change transmitter location (550 kc., 5 KW, DA-N, unlimited). (BMP-2481; Docket 7174)

WOLF—Civic Broadcasting Corp., Syracuse, N. Y.—Granted modification of CP extending commencement and completion dates to 7-1-47 and 9-1-47, respectively. (BMP-2671)

WHIM—Inter-City Broadcasting Co., Providence, R. I.—Granted modification of CP to change type of transmitter and make changes in vertical antenna. (BMP-2665)

WHAB—Pocono Broadcasting Co., Stroudsburg, Pa.—Granted modification of CP approving antenna and transmitter location at Cherry Valley and Highland Inn Roads, Stroudsburg. (BMP-2518)

KAYX—Waterloo Broadcasting Co., Waterloo, Iowa—Granted modification of CP to make changes in vertical antenna, and change transmitter and studio locations to on U. S. Highway 218, approximately 4.25 miles S. SW of business district, and 621½ Lafayette St., Waterloo, respectively. (BMP-2629)

WGAD—Coosa Valley Broadcasting Co., Gadsden, Ala.—Granted modification of CP extending completion date to 5-21-47. (BMP-2679)

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Granted modification of CP extending commencement and completion dates to 6-21-47 and 12-21-47. (BMP-2681)

KURV—James Cullen Looney, Edinburg, Texas—Granted modification of CP approving antenna, and transmitter and studio locations at 1.5 miles N. of city limits, west side of U. S. 281, and change type of transmitter. (BMP-2521)

WMID—Mid-Atlantic Broadcasting Co., Atlantic City, N. J.—Granted modification of CP approving antenna, and transmitter location at Absecon Blvd. and Ill. Ave., and studio location at Tenn. Ave. and Boardwalk. (BMP-2591)

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted modification of CP to extend completion date to 6-15-47. (BMP-2668)

KPMO—Valley Broadcasting Co., Pomona, Calif.—Granted modification of CP to change type of transmitter and extend completion date to 7-4-47. (BMP-2648)

WQAM—Miami Broadcasting Co., Miami, Fla.—Granted modification of CP to extend completion date to 11-16-47. (BMP-2666)

KMBC—Midland Broadcasting Co., Kansas City, Mo.—Granted modification of CP to extend completion date to 10-19-47. (BMP-2663)

WGAP—Gateway Broadcasting Co., Maryville, Tenn.—Granted modification of CP to extend completion date to 60 days after grant and 180 days thereafter, respectively. (BMP-2659)

WWNC—Asheville Citizen-Times Co., Asheville, N. C.—Granted modification of CP to make changes in directional antenna. (BMP-2340)

KSWI—Nonpareil Broadcasting Co., Council Bluffs, Iowa—Granted modification of CP to change type of transmitter, change transmitter location, and studio location specified at 554 W. Broadway. (BMP-2655)

KLAC—KMTR Radio Corp., Los Angeles, Calif.—Granted modification of CP to change type of transmitter and approval of transmitter location at Sota St. (BMP-2601)

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted modification of CP to change type of transmitter and type of towers. (BMP-2661)

WROD—Daytona Beach Broadcasting Co., Daytona Beach, Fla.—Granted modification of CP for approval of antenna, of transmitter, and studio locations at corner Beach St. and Wilder Blvd., and change type of transmitter. (BMP-2547)

WEBJ—William E. Brooks, Brewton, Ala.—Granted modification of CP extending completion date to 10-1-47. (BMP-2680)

WKMO—Kokomo Broadcasting Corp., Kokomo, Ind.—Granted CP to install vertical antenna and mount FM antenna on top of AM tower. (BP-6007)

WHBT—The Harriman Broadcasting Co., Inc., Harriman, Tenn.—Granted modification of CP for approval of antenna and transmitter location NE from postoffice, Harriman, Tenn. (BMP-2520) Also granted modification of CP to make changes in vertical antenna. (BMP-2617)

KEX—Westinghouse Radio Stations, Inc., Portland, Ore.—Granted modification of CP to make changes in directional antenna and operate directional day and night. (BMP-2644)

KGGM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Granted modification of CP to change from DA-2 to DA-night. (BMP-2528).

KBKI—Alice Broadcasting Co., Alice, Texas—Granted license to cover CP for a new station, 1070 kc., 1 KW, day. (BL-2305)

KRIG—Oil Center Broadcasting Co., Odessa, Texas.—Granted modification of license to change to DA-night, operating on 1410 kc., 1 KW. (BML-1241)

KDSH—Queen City Broadcasting Co., Boise, Idaho—Modification of CP to increase power from 1 KW to 5 KW, unlimited, install new transmitter and make changes in DA to be used for night only; conditions. (BMP-2663)

KFSA—Donald W. Reynolds, Ft. Smith, Ark.—Modification of CP to change hours from day to unlimited with 500 watts night and 1 KW day, and install DA for night use, operating on 950. (BMP-2450)

KCRG—The Gazette Co., Cedar Rapids, Iowa—Modification of CP for approval of DA system and transmitter location to comply with conditional grant of 10-4-46; conditions. (BMP-2357)

WBBC—Booth Radio Stations, Inc., Flint, Mich.—Modification of CP to make changes in antenna, change transmitter location, and extend commencement and completion dates. (BMP-2420) conditions.

WIRL—Illinois Valley Broadcasting Co., Peoria, Ill.—Modification of CP to increase power from 1 KW to 5 KW, DA, day and night, install new transmitter and change transmitter location. (BMP-2107)

(Continued on next page)

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Modification of CP to make changes in DA and mount FM antenna on AM tower, and change transmitter site: conditions. (BMP-2688)

WIRK—Ken-Sell, Inc., West Palm Beach, Fla.—CP for modification of CP to change hours of operation from day to unlimited, install DA for day and night use, extend commencement and completion dates. (BMP-2559)

AM—Miscellaneous Actions

WKAQ—Radio Corp. of Puerto Rico, San Juan, P. R.—Granted CP to install directional antenna for night and day operation (DA-1) and change location of studio: engineering conditions. (BP-5543)

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted CP to make changes in nighttime directional antenna; engineering conditions. (BP-5732)

KSYL—Fox Broadcasting Co., Alexandria, La. (Marvin Glazer and Sylvan Fox, co-partners)—Granted consent for voluntary assignment of CP for station KSYL from Glazer and Fox to Fox and Wheelehan, d/b as Radio Station KSYL. (BAP-43)

WWON—Asso. Electronic Enterprises, Woonsocket, R. I.—Granted CP to install new transmitter. (BP-6010)

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted CP to install new antenna and change transmitter location to corner of Murray and Ohio Avenues. (BP-5686)

WKLF—Southeastern Broadcasting Co., Clanton, Ala.—Granted CP for approval of antenna, change type of transmitter, and approval of transmitter location at 2 miles west of Clanton City limits on Selma Highway. (BMP-2594)

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted petition for removal from docket, reconsideration, and grant of application for CP to increase power from 1 KW to 5 KW, install new transmitter and make changes in directional antenna for night use; conditions. (BP-4421)

WKEU—Radio Station WKEU, Griffin, Ga.—Dismissed applications (BP-5884 and BP-5457), and extended the time to June 1, 1947, in which station WKEU may submit its response to the Commission's letter of December 31, 1946, regarding engineering and other facts called for.

Joe V. Williams, Jr., Chattanooga, Tenn.—Granted petition requesting that the Commission reconsider its action of October 18, in designating for hearing application (BP-4816) for a new station. Ordered said application removed from the hearing docket and granted CP to operate on 1490 kc., 250 watts, unlimited time; conditions. (Docket 7913)

WBBR—Watchtower Bible and Tract Society, Inc., Brooklyn, N. Y.—CP to increase power from 1 KW to 5 KW, install new transmitter and DA for night and day use. (BP-4807) (Shares—WEVD, WHAZ)

WTAR—WTAR Radio Corp., Norfolk, Va.—CP to make changes in DA and mount FM antenna on top of tower No. 3. (BP-5303)

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—CP to increase power from 1 KW night, 5 KW-LS, to 10 KW unlimited, make changes in transmitting equipment, install DA for day and night use and change transmitter location. (BP-5965)

KWK—Thomas Patrick, Inc., St. Louis, Mo.—CP to increase power from 1 KW night, 5 KW-LS, to 5 KW unlimited, and install DA for night use, operating on 1380 kc. (BP-4843)

WWDC—Capital Broadcasting Co., Washington, D. C.—CP to make changes in vertical antenna, mount FM antenna on top AM tower, and move synchronous amplifier. (BP-5604)

WCSH—Congress Square Hotel Co., Portland, Maine—CP to change from DA-1, day and night, to DA, night only (BP-5157); conditions.

KSEL—Lubbock Broadcasting Co., Lubbock, Texas—CP to change power and hours of operation from 1 KW, day, to 500 watts night, 1 KW day, install DA for night use, and mount FM antenna on AM tower; conditions. (BP-5537)

WDAR—A. C. Neff (assignor); WDAR, Inc. (assignee), Savannah, Ga.—Granted consent to assignment of license from A. C. Neff to WDAR, Inc. (Neff to own 90% of issued and outstanding common voting stock.) (BAL-581); consideration $29,810.

WDEV—Radio Station WDEV, Waterbury, Vt.—Granted consent to assignment of license from Lloyd E. Squier, surviving partner of Lloyd E. Squirer and Wm. G. Ricker, partnership d/b as Radio Station WDEV, and Ernest C. Perkins, executor of estate of Wm. G. Ricker deceased, to Lloyd E. Squier, individually, for $35,000. (BAL-586)

WHLI and WHNY—Elias Godofsky (assignor); FM Broadcasting Corp. (assignee), Hempstead, N. Y.—Granted consent to assignment of CP for AM station WHLI and conditional permit for FM station WHNY, from Elias Godofsky to FM Broadcasting Corp., a New York corporation in which Godofsky will own all of the issued and outstanding common voting stock. (BAL-594)

WHAL—J. O. Fly, et al., d/b as Shelbyville Broadcasting Co. (assignor); J. O. Fly, et al., d/b as Shelbyville Broadcasting Co. (assignee), Shelbyville, Tenn.—Granted consent to assignment of license of AM station WHAL from Shelbyville Broadcasting Co., a partnership, to Shelbyville Broadcasting Co., a new partnership, consisting of J. O. Fly, Sr., Geo. F. Fly and Harvard P. Smith, by purchase from a retiring partner, Robert W. Rounsaville of his one-fourth interest, for the sum of $15,000. (BAL-591). (Comr. Durr for hearing.)

WKAT, etc.—A. Frank Katzentine (assignor)— WKAT, Inc. (assignee), Miami Beach, Fla.—Granted consent to assignment of license of AM station WKAT, FM station WKAT-FM, and relay station WAFK, from A. Frank Katzentine to WKAT, Inc., a corporation instead of an individual. No monetary consideration involved. (BAL-593; APH-18 and ALRY-43)

WMAZ—Southeastern Broadcasting Co., Macon, Ga.—CP for increase in power from 5 KW to 10 KW, unlimited, and make changes in DA pattern. (BP-4899)

WINZ—Hollywood Broadcasting Co., Hollywood, Fla.—CP to change hours of operation, install DA for night use, and change transmitter location. (BP-5963)

KORN—Nebraska Broadcasting Co. (assignor); Inland Broadcasting Co. (assignee), Fremont, Neb.—Assignment of license from Nebraska Broadcasting Co. to Inland Broadcasting Co. for $20,000. (Com. Durr for hearing.) (BAL-519)

KORN—Inland Broadcasting Co., Lincoln, Neb.—CP to move transmitter and studio location from Fremont to Lincoln and install new transmitter. (Com. Durr for hearing.) (BP--466)

WWJ—Evening News Assn., Detroit, Mich.—CP to install new transmitter and DA for night use, change transmitter and studio locations. (BP-5474)

Kenneth O. Tinkham, San Fernando, Calif.—Removed from hearing docket and denied application (requesting same facilities as above applicant) as in default for want of prosecution. (BP-5600; docket 8082)

KGCU—Mandan Radio Assn., Mandan, N. Dak.—Granted, in part, petition, to increase power from 250 watts unlimited time, to 250 watts night, 1 KW-LS, unlimited, operating on 1270 kc. (BP-4516)

WHAS—Courier Journal and Louisville Times Co., Inc., Louisville, Ky.—Granted petition, insofar as it alleges groundwave interference to the normally protected contour of petitioner, to intervene in the hearing on application of Woodward Broadcasting Co. (docket 8167); insofar as petition alleges daytime skywave interference, it is denied. Exceptions noted by counsel for petitioner.

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas—Granted petition for leave to intervene in hearing on application of WDSM (docket 8301).

(Continued on next page)

Lockport Union-Sun and Journal, Inc., Lockport, N. Y.—Denied petition requesting the Commission to set an early hearing date in re consolidated proceeding involving its application (docket 8224, et al).

WTAG—WTAG, Inc., Worcester, Mass.—Granted petition for leave to intervene in the hearing on application of The Patriot Co., Harrisburg, Pa. (docket 6884).

Petaluma Broadcasters, Petaluma, Calif.—Granted petition to dismiss without prejudice its application (BP-5501; docket 8121).

Tri-Borough Broadcasting Co., Appello, Pa.—Denied petition requesting that Issue No. 5 in the proceeding upon application of Steel City Broadcasting Corp. (docket 8231), be amended to delete all reference to Tri-Borough Broadcasting Co.

KROW—KROW, Inc., Oakland, Calif.—Granted in part petition requesting extension of time within which to file exceptions to proposed decision (docket 6739 and 7101), and the time was extended to and including June 1.

Ponca City Pub. Co., Ponca City, Okla.—Granted petition to amend its application (BP-5848; docket 8183) so as to add amended Articles of Incorporation thereto.

Texas Star Broadcasting Co., San Antonio, Tex.—Granted petition to amend application (BP-4329; docket 8072) so as to show change in antenna current ratio.

Ventura County Broadcasting Co., Oxnard, Calif.—Granted petition to amend its application (BP-5846; docket 8189) so as to change name of applicant to Eva Miller Grimes, d/b as Pleasant Valley Broadcasting Co.

Alexandria Broadcasting Corp., Alexandria, Minn.—Granted petition to amend its application (BP-5463; docket 8131) so as to show the addition of a new stock holder and changes in stock interests.

Pisgah Broadcasting Co., Inc., Brevard, N. C.—Granted petition requesting 10 day extension of time in which to file proposed findings in re consolidated proceeding (dockets 8136, 8135 and 7988), and the time was extended to and including May 8.

Paul B. Lingenfelter, Clinton, Okla.—Granted petition to dismiss without prejudice its application (BP-5698; docket 8181).

Woodward Broadcasting Co., Detroit, Mich.—Granted request for enlargement of issues in dockets 7941 and 8167 to include: "To determine the type and character of program service rendered by WHAS to the areas and populations that would be lost if the application of Woodward Broadcasting Co. were granted and the character of other broadcast services available to those areas and populations."

Standard Tobacco Co., Inc., Maysville, Ky.—Granted petition to amend application (BP-5036; docket 7907) so as to further clarify engineering details re its vertical radiator, and proposed day and night contours indicating areas and populations proposed to be served; accepted said amendment.

Cedar Valley Broadcasting Co., Austin, Minn.—Granted petition to amend application (BP-5085; docket 8165) to show addition of new stockholders, show changes in antenna design; accepted said amendment.

WHAT—Independence Broadcasting Co., Philadelphia, Pa.; WCAM—The City of Camden, Camden, N. J.; WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted request for extension of time within which to file proposed findings of fact and conclusions in re dockets 5893, etc., 7065, etc., 8099, 6161, etc.

The Commission (by Commissioner Wakefield) on April 29 adopted an **order** granting petition of **Huntington Broadcasting Co.,** et al., for extension of time to May 12 to file proposed findings of fact and conclusions in re Dockets 7694, etc.

Bistone Broadcasting Co., Mexia, Texas—The Commission on its own motion, removed from the hearing docket application (BP-5837; docket 8188).

570 KC.

WQQW—Metropolitan Broadcasting Corp., Washington, D. C.—Granted modification of license to increase power of station WQQW from 500 watts to 1 KW, operating daytime only on 570 kc. (BML-124)

610 KC.

WHKC—United Broadcasting Co., Columbus, Ohio—CP to increase power from 1 KW to 5 KW, unlimited, install new transmitted and make changes in DA for night use, operating on 610 kc. (BP-4526)

620 KC.

WHJB—Pittsburgh Radio Supply House, Greensburg, Pa.—Granted CP to change hours or operation and increase power from 250 watts day only to 500 watts night, 1 KW day, unlimited time, DA arrays night and day (DA-2) and change transmitter location, operating on 620 kc. (Comr. Durr for hearing). (BP-4721)

630 KC.

Ga. Ala. Broadcasting Co., Columbus, Ga.—Granted petition for waiver of rules and accepted application tendered for filing, for a new station to operate on 630 kc., 1 KW, daytime only.

690 KC.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Denied petition requesting that his application (BMP-2021; docket 7951), for modification of CP to increase power from 1 KW-LS, 500 watts night, unlimited, to 5 KW night, 10 KW, day, DA-2, operating on 690 kc., be severed from the consolidated proceeding and granted without further hearing.

800 KC.

WMGY—Dixie Broadcasting Co., Montgomery, Ala.—Denied application for SSA to operate station WMGY on 800 kc., 500 watts, night.

850 KC.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted CP to increase power from 5 KW to 50 KW with DA-1, unlimited time, operating on 850 kc.; engineering conditions. (BP-4912)

930 KC.

Charles V. Balthrope, San Antonio, Texas—Granted petition to amend his application (BP-4375; docket 7374), so as to specify frequency 930 kc. with 1 KW, daytime only, instead of 1450 kc., 250 watts, unlimited. The amendment was accepted and application as amended, removed from hearing docket.

1080 KC.

KWJJ—KWJJ Broadcasting Co., Inc., Portland, Ore.—CP to increase power to 10 kw, install new transmitter and DA for day and night use, and change transmitter location, operating on 1080 kc. (BP-5690)

1150 KC.

News-Journal Corp., Daytona Beach, Fla.—Granted petition for waiver of rules and accepted for filing application for CP for a new station to operate on 1150 kc., 1 KW, daytime only, and ordered that the motion to amend its previously filed application (BP-4338; docket 7133), and remove same from hearing, filed Oct. 28, 1946, be dismissed.

KSAL—KSAL, Inc., Salina, Kans.—CP to increase power from 1 KW, unlimited, to 5 KW day, 1 KW night, DA, unlimited, operating on 1150 kc. (applicant requested 5 KW, unlimited). (BP-4364)

1280 KC.

Mid-Carolina Broadcasting Co., Salisbury, N. C.—Granted petition for leave to amend its application (BP-5322; docket 8029), so as to specify frequency 1280 kc., instead of 940 kc., etc. The amendment was accepted and application, as amended, removed from the hearing docket.

(Continued on next page)

1330 KC.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Denied petition requesting that its application for change of facilities to 1330 kc., 5 KW, DA-night, be designated for a consolidated hearing with application (BP-5846) of Community Service Broadcasting Co., for a new station to operate on 1330 kc., 5 KW, unlimited, DA, at Erie, Pa., and ordered that application of WERC be referred to the pending files pursuant to temporary expediting procedure of Jan. 8, 1947.

1350 KC.

KRLC—H. E. Studebaker, tr/as Station KRLC, Lewiston, Idaho—Granted special temporary authority to operate unlimited time on 1350 kc., with 250 watts, non-DA, until August 1, 1947.

1420 KC.

KUJ—KUJ, Inc., Walla Walla, Wash.—CP to increase power from 1 KW to 5 KW, install new transmitter and DA for night use, operating on 1420 kc. (BP-4908)

1440 KC.

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Granted CP to increase power from 500 watts night, 1 KW-LS, to 5 KW, install new transmitter, and install DA for nighttime use, operating unlimited time on 1440 kc. (BP-5437)

1480 KC.

KANS—Kansas Broadcasting, Inc., Wichita, Kans.—Denied petition for waiver of hearing in re application (BP-5159; docket 7952); to change frequency to 1480 kc., 1 KW, 5 KW-LS, DA-night.

WHOM—Atlantic Broadcasting Co., Inc., Jersey City, N. J.—CP to increase power from 500 watts night, 1 KW-LS, to 5 KW, unlimited, install new transmitter and DA for day and night use and change transmitter location, operating on 1480 kc. (BP-5521)

1510 KC.

Felix H. Morales, Houston, Texas—Granted petition to amend application (BP-5397; docket 8187) so as to specify frequency 1510 kc. instead of 860 kc.; the amendment was accepted and application as amended removed from hearing docket.

1530 KC.

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—CP for change in directional antenna (DA-2) and to mount FM antenna on one AM tower. Conditions. (BP-5660)

KFBK—McClatchy Broadcasting Co., Sacramento, Calif.—CP to increase power from 10 to 50 KW, install new transmitter and DA for day and night use, and change transmitter location, operating unlimited time on 1530 kc.; conditions. (BP-5072)

AM—Applications Accepted for Filing

550 KC.

WDEV—Radio Station WDEV, and Ernest G. Perkins, Executor of Estate of William G. Ricker, Waterbury, Vt. (Lloyd E. Squier, Squier, Surviving Partner of Lloyd E. Squier and William G. Ricker)—Modification of construction permit (BP-4492, which authorized change in hours of operation, installation of directional antenna for day and night use, and change in name of applicant) for approval of directional antenna system.

680 KC.

WLAW—Hildreth and Rogers Co., Lawrence, Mass.—License to cover construction permit (B1-P-3941, as modified), which authorized increase in power, installation of new transmitter, changes in directional antenna for day and night use and change transmitter location and authority to determine operating power by direct measurement of antenna power.

WMPS—WMPS, Inc., Memphis, Tenn.—Modification of construction permit (B3-P-4310, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change transmitter location) for extension of completion date.

730 KC.

KOJM—North Montana Broadcasting Co., Havre, Mont.—Modification of construction permit (B5-P-5230, which authorized a new standard broadcast station) to change type of transmitter.

790 KC.

KXXX—Western Plains Broadcasting Co., Inc., Colby, Kans.—Modification of construction permit (B4-P-5454, which authorized a new standard broadcast station) for approval of antenna, to change type of transmitter, approval of transmitter location and to change studio location.

810 KC.

WCEC—Josh L. Horne, Rocky Mount, N. C.—Modification of construction permit (B3-P-5229, which authorized a new standard broadcast station) for approval of antenna, to change type of transmitter, for approval of transmitter location and to specify studio location.

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—License to cover construction permit (B5-P-3795, as modified), which authorized change in frequency, increase in power, change hours of operation and type of transmitter and change in transmitter site and authority to determine operating power by direct measurement of antenna power.

840 KC.

NEW—Haygood S. Bowden, Camden, S. C. (P. O. 1417 Broad St., Camden, S. C.)—Construction permit for a new standard broadcast station to be operated on 840 kc., power of 250 watts, and daytime hours of operation.

860 KC.

WNEL—Juan Piza, San Juan, P. R.—Modification of construction permit (BP-3740, as modified, which authorized change in frequency and installation of directional antenna for day and night use) for extension of completion date.

890 KC.

KBYE—State Broadcasting Co., Oklahoma City, Okla.—License to cover construction permit (B3-P-4465, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

960 KC.

KGKL—KGKL, Inc., San Angelo, Tex.—Modification of construction permit (B3-P-4502, as modified, which authorized a change in frequency, increase in power, install new transmitter and directional antenna for night use, and change transmitter location) for extension of commencement and completion dates.

1000 KC.

WCFL—Chicago Federation of Labor, Chicago, Ill.—Construction permit to install a new auxiliary transmitter at near Warwick and 39th Sts., York Township, Illinois (present site of main transmitter), to be operated on 1000 kc., 10 KW power, employing directional antenna day and night for auxiliary purposes only.

WSCR—Lackawanna Valley Radio, Scranton, Pa. (Dahl W. Mack, James J. Doherty, Sr., and Eugene L. Burke, a partnership)—Voluntary assignment of construction permit to Lackawanna Valley Broadcasting Co.

1010 KC.

WINS—The Crosley Broadcasting Corp., New York, N. Y.—Modification of license to cover construction permit (B1-P-3026) in part for 50 KW day and 10 KW night, employing transmitter specified in construction permit.

(Continued on next page)

1050 KC.

WPAG—Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich.—License to cover construction permit (B2-P-5195), which authorized installation of FM antenna on top of present AM vertical radiator and authority to determine operating power by direct measurement of antenna power.

1110 KC.

WSLA—Hammond Broadcasting Co., Hammond, La. (Frederic Lemieux III, and Mrs. Edna Lemieux, a partnership)—License to cover construction permit (B3-P-5209, as modified), which authorized a new standard broadcast station and to specify studio location as 216 West Thomas St., Hammond, Louisiana, and authority to determine operating power by direct measurement of antenna power.

1130 KC.

NEW—Peach State Broadcasting Co., Macon Ga. (Thomas Carr, J. E. Duncan, Roy Richards, and Robert D. Tisinger, a partnership)—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 1 KW, and daytime hours of operation. Amended to change from 1170 kc. to 1130 kc.

1140 KC.

KGEM—Idaho Broadcasting and Television Co., Boise, Idaho—Construction permit to change frequency from 1340 to 1140 kc., increase power from 250 watts to 10 KW, install directional antenna for night use, change type of transmitter and change transmitter location. Amended to change directional antenna pattern.

1150 KC.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Involuntary transfer of control of licensee corporation from Charles P. Manship, Sr., deceased, to Leora D. Manship, testamentary executrix of the estate of Charles P. Manship, Sr. (959 shares of common stock.)

1230 KC.

WFRP—Georgia Broadcasting Co., Savannah, Ga. (F. R. Pidcock, Sr., and James M. Wilder)—Voluntary assignment of license to Georgia Broadcasting Company.

WCBT—WCBT, Inc., Roanoke Rapids, N. C.—Construction permit to make changes in vertical antenna and mount FM antenna on top of AM tower.

WLOF—Hazelwood, Inc., Orlando, Fla.—Modification of construction permit (B3-P-3973, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna, and change in transmitter location) to change transmitter location from west 28 acres of NW¼ of NE¼ Sect. 30, Twp. 22, Range 29E, near Orlovista, Fla., to 0.9 miles east of Orlovista, Fla.

NEW—Utica Observer Dispatch, Inc., Utica, N. Y. (P. O. 221 Oriskany Plaza, Utica, N. Y.)— Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation. Contingent upon a grant of WIBX for a change of facilities.

1260 KC.

KPOW—Albert Joseph Meyer, Powell, Wyo.—Modification of construction permit (B5-P-4166, as modified, which authorized a change in frequency, installation of new transmitter and directional antenna for night use, and to change transmitter and studio locations) for extension of completion date.

1280 KC.

WDSU—Stephens Broadcasting Co., New Orleans, La. (E. A. Stephens, Fred Weber and H. G. Wall)—Construction permit to make changes in the directional antenna and mount FM antenna on top of No. 2 AM tower.

WCMN—Caribbean Broadcasting Corp., Arecibo, P. R.—Modification of construction permit (BP-4564, as modified, which authorized a new standard broadcast station) to change type of transmitter.

1290 KC.

WMLO—Cream City Broadcasting Co., Inc., Milwaukee, Wis.—License to cover construction permit (B4-P-4631, as modified), which authorized a new standard broadcast station and to specify studio location and authority to determine operating power by direct measurement of antenna power.

1330 KC.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Construction permit to change frequency from 1230 to 1330 kc., increase power from 250 watts to 5 KW, install new transmitter and directional antenna for day and night use and change transmitter location.

1340 KC.

WMBN—Midwestern Broadcasting Co., Bear Creek Township, Mich.—License to cover construction permit (B2-P-4724, as modified), which authorized a new standard broadcast station, and authority to determine operating power by direct measurement of antenna power.

WCVI—Connellsville Broadcasters, Inc., Connellsville, Pa.—License to cover construction permit (B2-P-5138, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

NEW—The Montana Network, Missoula, Mont. (P. O. Northern Hotel, Billings, Mont.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

1360 KC.

WPPA—Pottsville Broadcasting Co., Pottsville, Pa. (A. V. Tidmore)—Construction permit to change hours of operation from daytime to unlimited time, increase power from 500 watts day to 1 KW day and night, make changes in transmitting equipment and install directional antenna for night use. Amended to change power from 1 KW to 500 watts night, 1 KW day and make changes in directional antenna pattern for night use.

WDRC—WDRC, Inc., Hartford, Conn.—Voluntary assignment of license to The Connecticut Broadcasting Company.

1370 KC.

WDEF—WDEF Broadcasting Co., Chattanooga, Tenn.—Modification of construction permit (B3-P-4365, as modified which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use and change in transmitter location) for extension of completion date.

1400 KC.

WELM—James Robert Meachem, Elmira, N. Y.—License to cover construction permit (B1-P-4274, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WNOC—Norwich Broadcasting Co., Norwich, Conn. (a partnership, composed of H. Ross Perkins and J. Erie Williams)—Construction permit to install a new transmitter.

KLIZ—Brainerd Broadcasting Co., Brainerd, Minn. (E. Thomas O'Brien, Mildred O'Brien Chalberg, John Chalberg, Mabel O'Brien Smith and William Graham)—Voluntary assignment of license to Brainerd Broadcasting Company.

NEW—Oral J. Wilkinson, Murray, Utah—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1230 to 1400 kc. (Contingent upon grant of KNAK to change frequency to 1280 kc.).

1410 KC.

KQV—Allegheny Broadcasting Corp., Pittsburgh, Pa.—Modification of construction permit (B2-P-3992, as modified,

(Continued on next page)

which authorized increase in power, installation of new transmitter and directional antenna for day and night use and to change transmitter location) to make changes in directional antenna.

1420 KC.

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Modification of license to change main studio location from 450 Main Street, Pawtucket, Rhode Island, to Biltmore Hotel, Providence, Rhode Island.

1440 KC.

NEW—Harold H. Thoms, Spartansburg, S. C.—Construction permit for a new standard broadcast station to be operated on 1440 kc., power of 1 KW, directional antenna (1) and unlimited hours of operation. Amended to change type of transmitter.

1450 KC.

NEW—Rodgers and McDonald Newspapers, Inglewood, Calif. (P. O. 2621 W. 54th St., Los Angeles 43, Calif.).—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and specified hours of operation (night).

WCVS—WCVS, Inc., Springfield, Ill.—License to use old main transmitter (composite) at 3000 south 4th (Southern View, Springfield, Illinois, present site of main transmitter) to be used for auxiliary purposes only on 250 watts.

1460 KC.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Modification of construction permit (B3-P-3036, which authorized a change in frequency, increase in power, installation of new transmitter and directional antenna for night use and changes in transmitter location) to make changes in the directional antenna and mount FM antenna on the AM tower.

1490 KC.

WARK—Antietam Broadcasting Corp., Hagerstown, Md.—Modification of construction permit (B1-P-5156, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

KICO—Charles R. Love, Calexico, Calif.—License to cover construction permit (B5-P-4662, as modified), which authorized a new standard broadcast station and to specify studio location as on highway 99, 1½ miles north of Calexico, California, and authority to determine operating power by direct measurement of antenna power.

WESB—Bradford Publications, Inc., Bradford, Pa.—License to cover construction permit (B2-P-5091, as modified). which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1520 KC.

NEW—Monroe Broadcasting Co., Monroe, Mich. (James Melvin Brinn, Homer Harding Brinn, Harvey Howard Huff and Glenn Clayton Pray, a partnership) (P. O. Box 376, Monroe, Mich.)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts and daytime hours of operation.

1540 KC.

NEW—The Littleton Co., West Hartford, Conn.—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 250 watts and daytime hours of operation.

1550 KC.

NEW—The Southwestern Broadcasting Company of Mississippi, McComb, Miss. (Albert Macks Smith, Phillip Dean brady, Kenneth Hinton Kuin, and J. P. Melvin, a partnership) (P. O. 230 Michigan Ave.)—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 250 watts and unlimited hours of operation.

1600 KC.

WHRV—Huron Valley Broadcasters, Inc., Ann Arbor, Mich.—Modification of construction permit (B2-P-3291, as modified, which authorized a new standard broadcast station) to specify studio location as on Packard Road; 0.3 miles east of Milan Road (U. S. 23), approximately four miles east of Ann Arbor, Michigan.

AM—Applications Tendered for Filing Since February 7

620 KC.

WAGE—WAGE, Inc., Syracuse, N. Y.—Modification of construction permit to specify power of 5 KW, day and night, using directional antenna for night time operation, install new transmitter, changes in the antenna system and change the transmitter location.

880 KC.

NEW—The Daily News Broadcasting Co., Bowling Green, Ky.—Construction permit for a new standard broadcast station to be operated on 880 kc., power of 1 KW and daytime hours of operation.

900 KC.

NEW—Hamilton Broadcasting Co., Hamilton, Tex. (Clyde Weatherby)—Construction permit for a new standard broadcast station to be operated on 900 kc., power of 250 watts and daytime hours of operation.

1000 KC.

KGRI—Goggan Radio Sales, Henderson, Texas (a partnership, composed of Benjamin F. Goggan, Jr., and Howard E. Dennis)—Consent of assignment of construction permit to Henderson Broadcasting Corporation, a corporation.

1050 KC.

NEW—Langlade Broadcasting Co., Inc., Antigo, Wis.—Construction permit for a new standard broadcast station to be operated on 1050 kc., power of 250 watts and daytime hours of operation.

1150 KC.

WJBO-WBRL—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Consent to transfer of control of the stock of licensee of Stations WJBO and FM Station WBRL from the estate of Charles P. Manship, Sr., to the testamentary executrix of his estate, Leora D. Manship.

1230 KC.

WPUV—Southwest Broadcasting Company, Pulaski, Va. (Howard R. Imboden)—Consent to assignment of license to Southwest Broadcasting Corporation.

1240 KC.

WGCM—WGCM Broadcasting Co., Gulfport, Miss. (a co-partnership, composed of Hugh O. Jones, William E. Jones and James O. Jones)—Consent to assignment of license to WGCM Broadcasting Co., co-partnership, composed of Hugh O. and Wm. E. Jones.

1330 KC.

WHBL—Press Publishing Co., Sheboygan, Wis.—Consent to assignment of license to WHBL, Inc.

1370 KC.

WSAY—Brown Radio Service & Laboratory, Rochester, N. Y. (Gordon P. Brown, Owner)—Consent to assignment of license to The Federal Broadcasting System, Inc.

1390 KC.

KSLM—Oregon Radio, Inc., Salem, Ore.—Consent to transfer of control of 26 shares of stock in Licensee Corporation from Paul V. McElwain to Glenn E. McCormick.

(Continued on next page)

1400 KC.

WHYN—The Hampden-Hampshire Corp., Holyoke, Mass.—Consent to transfer of control of 150 shares of stock in licensee corporation from Minnie R. Dwight to William Dwight.

NEW—Electronic Enterprises, Inc., San Juan, P. R.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

1470 KC.

NEW—Pauls Valley Broadcasting Co., Pauls Valley, Okla. (James T. Jackson)—Construction permit for a new standard broadcast station to be operated on 1470 kc., power of 250 watts and daytime hours of operation.

1490 KC.

WLOE—Douglas L. Craddock, Leaksville, N. C.—Construction permit to increase power from 100 watts to 250 watts, operating unlimited hours on 1490 kc.

FREQUENCY MODULATION

FM—Docket Cases

The Commission announced an **Order** (B-294) granting application of **Liberty Broadcasting Company** for a new Class B FM station in Pittsburgh, Pa. (BPH-582; Docket 7205)

Granted six-months' extension of completion date of FM (Class B) construction permit to **Bremer Broadcasting Corp.** (WAAW). (BPH-72). Commissioner Wakefield voted no.

FM—Conditional Grants

Orlando Broadcasting Co., Inc., Orlando, Fla.—Authorized a conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1205)

Fayette Broadcasting Co., Lexington, Ky.—Authorized a conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1048)

Liner's Broadcasting Station, Inc., Monroe, La.—Authorized a conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1188)

WGCM Broadcasting Co., Gulfport, Miss. (a co-partnership composed of Hugh O. Jones and Wm. E. Jones)—Authorized a conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1193)

Reidsville Broadcasting Co., Reidsville, N. C.—Authorized conditional grant for a Class A station, subject to further review and approval of engineering details. (BPH-1206)

Lycoming County Broadcasting Co., Williamsport, Pa.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1204)

Plains Empire Broadcasting Co., Amarillo, Tex.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1192)

Mercury Broadcasting Co., San Antonio, Tex.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1139)

Raoul A. Cortez, San Antonio, Tex.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1087)

Clarksburg Broadcasting Corp., Clarksburg, W. Va.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1211)

The WREN Broadcasting Co., Inc., Topeka, Kans.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-995)

FM—Designated for Hearing

Woodward Broadcasting Co., Detroit, Mich.; Lincoln Broadcasting Co., Detroit, Mich.—Designated for hearing in a consolidated proceeding the application of Woodward Broadcasting Co. (BPH-1240) with application of Lincoln Broadcasting Co. (BPH-1231), both requesting Class B stations.

FM—Modifications of CP's Granted

WSAN-FM—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted modification of CP extending completion date to 11-12-47. (BMPH-324)

WLVA-FM—Lynchburg Broadcasting Corp., Lynchburg, Va.—Granted modification of CP extending completion date to 6-17-47. (BMPH-323)

WMRC-FM—Textile Broadcasting Co., Greenville, S. C.—Granted modification of CP extending completion date to 6-12-47. (BMPH-326)

WESB-FM—Bradford Publications, Inc., Bradford, Pa.—Granted modification of CP extending completion date to 8-17-47. (BMPH-325)

FM—Placed in Pending File

The following applications were placed in the pending file for the reasons stated:

King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Application (BPH-135): until consummation of transfer authorized in (BAL-533).

Liberty Broadcasting Co., Grand Rapids, Mich.—Application (BPH-1133); until consummation of transfer authorized in (BAL-533).

Kanawha Valley Broadcasting Co., Charleston, W. Va.—Application (BPH-616); until final decision re transfer of control of WKGV (Docket 6581, 6558 and 6611).

Unity Corp., Erie, Pa.—Application (BPH-634); until final decision in either the Springfield hearing (Docket 7238) or the Mansfield hearing (Docket 7589).

Fountain of Youth Broadcasting Co., St. Augustine, Fla.—Application (BPH-785); until final action on transfer of control of WFOY (BTC-536).

Mississippi Valley Broadcasting Co., E. St. Louis, Ill.—Application (BPH-1096); until final action on assignment of license of WTMW (BAL-566).

FM—License Renewals and Extensions

The following FM broadcast stations were granted renewal of license for the period ending May 1, 1948:

WMLL-FM, Evansville, Inc.; KOZY-FM, Kansas City, Mo.; WNBF-FM, Binghamton, N. Y.; WDUL-FM, Superior, Wis.; WEFM-FM, Chicago; WGYN-FM, New York City; WENA-FM, Detroit; WTIC-FM, Hartford, Conn.;

WMGM-FM—Marcus Loew Booking Agency, New York, N. Y.—Present license extended on a temporary basis for a period of 60 days, pending receipt of additional information regarding program plans.

FM—Miscellaneous Actions

Debs Memorial Radio Fund, Inc., Metropolitan Broadcasting Service, New York City, and **No. Jersey Radio, Inc., Newark, N. J.**—Granted joint petition requesting extension of time to May 20, within which to file exceptions to the proposed decision in the consolidated proceeding upon applications for FM stations in the New York area. (Doc. 6178, et al.)

(Continued on next page)

Don Lee Broadcasting System, San Francisco, Calif.—Granted petition to amend its FM application (BPH-38; Doc. 7680), so as to supply complete engineering information.

WOKO, Inc., Albany, N. Y.—Dismissed application requesting a new Class B FM station (BPH-80), since it appears that a hearing on the qualifications of WOKO, Inc., to own and operate an FM station would serve no useful purpose.

Pryor Dillard, Raymondville, Texas—Dismissed, for failure to prosecute, application for a new FM station. (BPH-1121)

FM—Applications Accepted for Filing

WPIC-FM—Sharon Herald Broadcasting Co., Sharon, Pa.—Modification of construction permit (B2-PH-191, which authorized a new FM broadcast station) to change type of transmitter; effective radiated power to 26 KW; make changes in antenna system, and change commencement and completion dates.

KPRC-FM—The Houston Post Co., Houston, Texas—Modification of construction permit (B3-PH-126, as modified, which authorized a new FM broadcast station) to change transmitter site, effective radiated power to 57 KW, antenna height above average terrain to 317 feet; make changes in antenna system, and change commencement and completion dates.

WHLD-FM—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Modification of construction permit (B1-PH-898, which authorized a new FM broadcast station) for extension of completion date.

KERA—A. H. Belo Corp., Dallas, Texas—Modification of construction permit (B3-PH-238, as modified, which authorized a new FM broadcast station) for extension of completion date.

WHHM-FM—WHHM Broadcasting Co., Memphis, Tenn. (Herbert Herff)—Modification of construction permit (B3-PH-409, as modified, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WSMB-FM—WSMB, Inc., New Orleans, La.—Modification of construction permit (B3-PH-865, as modified, which authorized a new FM broadcast station) for extension of completion date.

WJLK—Asbury Park Press, Inc., Asbury Park, N. J.—Modification of construction permit (B1-PH-406, which authorized a new FM broadcast station) for extension of completion date.

WKNB-FM—The New Britain Broadcasting Co., New Britain, Conn.—Modification of construction permit (B1-PH-833, which authorized a new FM broadcast station) for extension of completion date.

WSAV-FM—WSAV, Inc., Savannah, Ga.—Modification of construction permit (B3-PH-660, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WOL-FM—Cowles Broadcasting Co., Washington, D. C.—Modification of construction permit (B1-PH-639, which authorized a new FM broadcast station) for extension of completion date.

KOMA-FM—KOMA, Inc., Oklahoma City, Okla.—Modification of construction permit (B3-PH-531, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WJTN-FM—James Broadcasting Co., Inc., Jamestown, N. Y.—Modification of construction permit (B1-PH-279, as modified, which authorized a new FM broadcast station) for extension of completion date.

WOPT—Palladium-Times, Inc., Oswego, N. Y.—Modification of construction permit (B1-PH-350, which authorized a new FM broadcast station) to change ERP to 3 KW; make changes in antenna system and change commencement and completion dates.

WHP-FM—WHP, Inc., Harrisburg, Pa.—Modification of construction permit (B2-PH-410, which authorized a new FM broadcast station) for extension of completion date.

WPAM-FM—Miners' Broadcasting Service, Pottsville, Pa. (Joseph L. Maguire, Kenneth Maguire, John T. Maguire, John Grenoble, Evan Evans, Patrick J. McCall, James Koch and James J. Curran)—Modification of construction permit (B2-PH-705, as modified, which authorized a new FM broadcast station) for extension of completion date.

WAGE-FM—WAGE, Inc., Syracuse, N. Y.—Modification of construction permit (B1-PH-315, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WFHR-FM—William F. Huffman, Wisconsin Rapids, Wis.—Modification of construction permit (B4-PH-908, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WMLN—MaComb Publishing Co., Mt. Clemens, Mich.—License to cover construction permit (B2-PH-904, which authorized a new FM broadcast station).

WGL-FM—Farnsworth Television and Radio Corp., Fort Wayne, Ind.—Modification of construction permit (B4-PH-309, which authorized a new FM broadcast station) to change transmitter site to approximately 3.2 miles east of Fort Wayne, Indiana; antenna height above average terrain to 528 feet; effective radiated power to 49.2 KW; specify antenna system.

WMIX-FM—Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Modification of construction permit (B4-PH-887, as modified, which authorized a new FM broadcast station) for extension of completion date.

WKRS—Keystone Printing Service, Inc., Waukegan, Ill.—Modification of construction permit (B4-PH-334, wihch authorized a new FM broadcast station) for extension of completion date.

WWOD-FM—Old Dominion Broadcasting Corp., Lynchburg, Va.—Modification of construction permit (B2-PH-600, which authorized a new FM broadcast station) to change transmitter site (geographic coordinate only); ERP to 39.3 KW, antenna height above average terrain to 316 feet; make changes in antenna system and change commencement and completion dates.

To Be Assigned by FCC

NEW—Cinnco Broadcasting Co., Cincinnati, Ohio (P. O. 1922-24 Eye St. N. W., Washington, D. C.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and ERP of 16.2 KW.

NEW—KGFF Broadcasting Co., Shawnee, Okla.—Modification of construction permit (B3-PH-465, which authorized a new FM broadcast station) to change frequency to: "To be specified by FCC," transmitter site to NW corner of SW ¼ of SW ¼ of Section 14-10N-4E, East of Shawnee, Okla.; effective radiated power to 8.8 KW, make changes in antenna system, and change commencement and completion dates.

NEW—Huntsville Broadcasting Co., Huntsville, Ala. (Lauren Mickle, John Garrison, Joe S. Foster, Jr.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC, and ERP of 1.2 KW.

Frequency to be Assigned

NEW—Albert B. Pyatt, Garden City, Kans.—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 802 watts.

MISCELLANEOUS BROADCAST

Developmental License Renewals

W9XHZ—Sarkes Tarzian, Bloomington, Ind.—Present developmental broadcast station license extended for a period of three months.

(Continued on next page)

Licenses for the following developmental stations were extended upon a temporary basis for the period ending July 1, 1947, for the reasons shown:

W9XEK—Courier-Journal and Louisville Times Co., near Eastwood, Ky.—Regular license held in abeyance pending further showing by applicant as to the need for continuance of the experimental license.

W8XFM—The Crosley Corp., Cincinnati, Ohio—Regular license held in abeyance pending further showing by applicant as to the need for continuance of the experimental license.

W1XHR—Harvey Radio Labs., Inc., Cambridge, Mass.—Renewal application filed April 22, 1947.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Pending determination of new frequency requested by applicant.

W10XF—National Broadcasting Co., Inc., Portable—Engineering requesting information pursuant to Docket 6651.

W9XJN—Joseph F. Novy, Riverside, Ill.—Pending further study by engineering department.

W4XCT—WAPO Radio Service, Chattanooga, Tenn.—Pending further study by engineering department.

W10XR—National Broadcasting Co., Inc., Portable—Pending further study by engineering department.

W9XLZ—Gates Broadcasting Co., Quincy, Ill.—Renewal application filed April 24, 1947.

KHJ-FM—Don Lee Broadcasting System, Los Angeles, Calif.—Pending decision by the Commission on application for renewal in Docket 7616.

WNBC-FM—National Broadcasting Co., Inc., New York, N. Y.—Renewal application filed April 25, 1947.

Remote Pickup Applications

KRLO—Pikes Peak Broadcasting Co., Portable-Mobile, area of Colorado Springs, Colo. (a partnership, consisting of Joseph H. Rohrer and Edythe G. Sweeney)—License to cover construction permit (BPRY-336, which authorized a new remote pickup broadcast station).

KRPI—James E. Murray, Portable-Mobile, area of Hutchinson, Kans.—License to cover construction permit (BPRE-487, which authorized a new-remote pickup broadcast station).

WBCZ—WHEB, Inc., Portable-Mobile, area of Portsmouth, N. H.—Construction permit to install new transmitter.

Federal Trade Commission Actions

CEASE AND DESIST ORDERS

David D. Doniger & Co., 305 Fifth Ave., New York, has been ordered by the Commission to stop misbranding wearing apparel in violation of the Wool Products Labeling Act and misrepresenting its country of origin in violation of the Federal Trade Commission Act. (5157)

Ideal Mail Order Co.—The Commission has ordered Samuel Smith, Abraham Weinstein and Aaron Smith, co-partners, trading as Ideal Mail Order Co. and Smith & Strickland Trading Co., 207 Thatford Ave., Brooklyn, to cease and desist from misrepresentation in connection with the sale of second-hand wearing apparel and other merchandise to purchaser-consumers and retailers. (5246)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 19, May 12, 1947

LaGuardia, at 2nd District Meeting, Stresses Importance of Industry

Close to 150 broadcasters from NAB's 2nd District heard President Justin Miller stress the importance of maintaining a positive public relations policy when they gathered for their annual district meeting in New York City last week. With Director Michael C. Hanna, WHCU, presiding, the broadcaster's sessions were held on Monday and Tuesday (5-6).

Public relations, said Judge Miller, "is getting the affection and understanding of the people you serve, and with broadcasters that means everybody."

Fiorello H. LaGuardia, former mayor of New York, and more recently UNRRA director-general, spoke to the delegates at the second day's luncheon session on the subject "The Broadcasters Public Responsibility."

He traced the tremendous growth of broadcasting in a comparatively short period of time and said that the two world wars stimulated this growth of radio—which has become "so important a part of our lives." Broadcasters, he said, have not realized how important they are, and although mistakes have occurred in the radio industry, he added that "they are being corrected rather rapidly."

More Control

Mr. LaGuardia, who as a member of Congress was active in the vamping of the radio act, warned that radio might be subject to more control in time to come. He enumerated several instances in which the government imposed controls over certain industries, and pointed out that those controls did not decrease with the passage of time.

Touching on the subject of programming, Mr. LaGuardia said that he was not an authority on the subject. He pointedly remarked "in our house, we have four radios, because we all have our individual likes and dislikes."

(Continued on page 387)

Caley, Meagher Elected to Board From Districts Nine and Eleven

NAB Districts Nine and Eleven have elected Charles C. Caley, WMBD, Peoria, Ill., and John F. Meagher, KYSM, Mankato, Minn., respectively, to the NAB Board of Directors. The elections took place at the NAB Area D meeting in Chicago, where Districts 8, 9, and 11 held their annual meetings jointly on Thursday and Friday (8-9). Since even numbered districts do not elect directors this year, there was no election in District 8.

Retiring as directors of the two districts, are Leslie C. Johnson, WHBF, Rock Island, Ill., of the 9th, and E. L. Hayek, KATE, Albert Lea, Minn., of the 11th.

Mr. Meagher is at present a member of the NAB Small Market Stations Executive Committee. Mr. Caley served for several years as a member of the NAB Sales Managers Committee. He was committee chairman during part of this service, and was active in the establishment of the Broadcast Advertising Department.

The new directors will be seated as members of the Board at the annual NAB convention in September.

Public Relations

At the opening public relations session on Thursday morning, Merrill Lindsay, WSOY, Decatur, Ill., urged an editorial policy for radio as the road to free radio. He said: "The industry's character has been emasculated, because the only safe procedure program-wise is to make sure you never make anyone really mad. And if you never make anyone mad, it is because you are a spineless critter. Program-wise, the FCC must give radio the right of free speech. The FCC must forget programming as a standard of station performance and let the listener be the judge."

(Continued on page 387)

On The Inside

Applications for daytime and limited-time stations on I-A or I-B frequencies were frozen by the FCC on Friday (9) pending conclusion of hearings. (p. 384)

The Supreme Court, taking up the Petrillo case, heard the government's oral argument opposing the lower court's decision on the Lea Act. Indicating keen interest in the case, the Court questioned attorneys from both sides on Monday (5). (p. 384)

Revision of the FCC's Mayflower doctrine was urged by Districts 5 & 6 at their joint meeting. By resolution, the districts asked the NAB Board to take appropriate action. (p. 389)

The FCC has cancelled its scheduled hearings on the proposed amendments in its FM rules and allocation plan, stating that only two briefs, not relating directly to the subject, had been filed. (p. 384)

Secretary of State Marshall, asking for funds to continue operation of short-wave broadcasting, told House committee that overseas program is vital to U. S. foreign policy. (p. 385)

Revision of Sunset-Sunrise Tables For Handbook Being Prepared

The sunset-sunrise tables published in the NAB Engineering Handbook, which are identified as being for Standard Time are actually for Daylight Saving Time.

At the time of their printing, these tables were based on "war time" and are listed as one hour in advance of Standard Time.

Corrected data will be sent to handbook holders at an early date.

Daytime, Limited Time Applications Frozen By FCC Pending Hearings Next Month

The FCC froze all pending applications which sought daytime or limited-time operation on the United States I-A or I-B frequencies on Friday (9), pending conclusion of a hearing and a decision on the matter.

The Commission stated in Public Notice No. 6630 that hearing would be held (Docket No. 8333) beginning 10 a. m. June 2 to promulgate rules and regulations and standards of good engineering practice concerning daytime sky-wave transmissions of standard broadcast stations. It was the sense of the Commission to determine if the daytime operation of Class II stations, operating daytime, are causing interference to the U. S. I-A or I-B stations, operating on clear channels, as a result of sky-wave transmission.

The Commission pointed out in the notice that there are many applications still pending which request authority to operate daytime on clear channels; that as a result of a recent appeal to the U. S. Court of Appeals, an order had been issued staying the effectiveness of a recently issued construction permit.

The Clear Channel Broadcasting Service, which had filed a petition in February in this matter, was made a party to the proceedings.

The Commission, sitting en banc, will receive evidence concerning daytime sky-wave transmission, and interested persons may appear at the hearing by filing a written appearance in duplicate on or before May 26, 1947.

FCC Cancels Hearings on Proposals to Change FM Allocation, Amend Standards

The FCC announced concellation of its hearing scheduled for Thursday and Friday (8-9), on the proposed amendments to FM rules and engineering standards last week.

The Commission deemed the hearings "unnecessary in view of the fact that only two statements in opposition to the proposed amendments had been filed." The FCC stated that since the statements did not relate to the desirability of the proposed allocation plan or the proposed amendments, they could be handled without a general hearing.

Clear Channel Group Asks Postponement Of Hearings Due to Attorney's Illness

The Clear Channel Broadcasting Service filed a petition with the FCC Friday (9) asking that the clear channel hearings, which are scheduled to be resumed on June 2nd, be postponed to a date not earlier than October 15th.

Illness of CCBS legal counsel, Louis G. Caldwell, occasioned the petition. Mr. Caldwell will not be able to participate in the hearings unless they are postponed.

Legal Department

Supreme Court Questions Attorneys In Oral Argument on Lea Act

The constitutionality of the Lea Act was the subject of detailed discussion on Monday (5) when the Supreme Court heard oral argument offered by government and AFM attorneys.

The members of Court indicated keen interest in the case, closely questioning attorneys for both sides about the meaning and application of the law, especially as it affected picketing.

It is anticipated that the Court will issue its decision early in June.

Commission Amends Rules on Procedure In Actions on Specified Petitions

The FCC announced on Friday (9) that effective immediately, it had amended its procedural rule 1.112,

(Continued on next page)

to permit the Motions Commissioner to act upon petitions requesting the dismissal of other petitions filed by the same party, and upon petitions containing only requests which have become moot.

Prior to this amendment, rule 1.112 required action by the Commission itself in these matters.

International

Shortwave Programs Vital, Sec. Marshall Tells House Appropriations Committee

The U. S.'s international broadcasting service remained at a cross roads at the week's end. The State Department had spent a busy week fighting for reversal of the House Appropriations Committee's recommendation that government financing of overseas programming end on June 30th.

Secretary Marshall was participating personally in the campaign to save the "Voice of America." He met with key Congressional leaders on Monday, at which time he called in U. S. Ambassador to Moscow, W. Bedell Smith, to support his contention that the shortwave programs are vital to the foreign policy of the United States.

Several executives of the broadcasting industry attended this meeting, at the State Department's invitation, to express their views on the matter. Among these was NAB President Justin Miller.

Although the NAB issued no public announcement on the subject last week, its position had been made known earlier in a statement concerning the proposed establishment of a public corporation to handle overseas broadcasting. In that statement, which assumed the importance of continuing foreign programming, NAB said:

> The American way of broadcasting to its own people would unquestionably be the most desirable and effective means of interpreting the American way of life to the peoples of the world.
>
> Unfortunately this is not now economically feasible and until such time as it is, the plan recommended by the State Department to invest the responsibility for this character of broadcasting in a public corporation financed by the government appears to be the most practical proposal.
>
> The NAB recommends, however, that during the existence of this public corporation, further explorations by both the industry and the government be made into the possibility of conducting international radio in a manner which is more in harmony with the free system of American domestic broadcasting.

Research Department

Baker to Head BMB Technical Group; Supplemental Daily Data Considered

At a meeting of BMB's Technical Committee in New York on Tuesday (6), the Committee unanimously named Kenneth H. Baker, NAB director of research, as chairman.

IN THE OFFING

May 12-13	Special Standards of Practice Committee	New York City
May 13	Music Advisory Committee (joint meeting with ASCAP)	New York City
May 15-16	Sales Managers Executive Committee	Atlantic City, N. J.
May 21-22	Board of Directors Meeting	Washington, D. C.
May 26-27	District 3 Meeting	Baltimore Lord Baltimore Hotel
June 2-3	District 1 Meeting	Boston Somerset Hotel

The committee, at its meeting, began consideration of several plans designed to provide a measurement of radio stations' average daily audiences, to supplement basic weekly audiences as measured in Study No. 1.

Consideration of such additional measurement was undertaken on instructions from the BMB Board Research Committee "to study the extension of Study No. 2 by supplementing the basic total weekly day and night station audiences with data on frequency of listening."

Small Market Stations

Management Study No. 8 Completed, Mailed to Small Market Outlets

NAB Radio Management Study No. 8 was mailed out to member stations last week. This study is contained in a twelve page brochure which outlines the operating practices of a 250 watt full time station, located in the Pacific Northwest. The station is an MBS-Don Lee affiliate located in a city of 26,000 to 33,000 population. Fictitious call letters, IXIX, are used so as not to reveal the identity of the operation.

The management studies are mailed to all member stations in the small market category (less than 5,000 watts, in cities of 50,000 population and under). The management study series will be sent to large stations upon request.

Emphasis Placed on Program Sales At District 2 Meeting

Small market station management attending the NAB District 2 Meeting in New York was urged to give more attention to the rate card structure because of the influence it has on the sale of programs. James Howe, WCTC, New Brunswick, New Jersey, cited the

(Continued on next page)

effective program sales work done by his sales staff. The WCTC program rate structure was set up so that sponsors would pay less for a daily 15-minute program, after frequency discounts, than they would pay for three one-minute spot announcements daily. Before opening the new station a planned sales presentation including the auditioning of commercial programs was made before local merchants. Twenty-one contracts were signed during the first 25 sales presentations. The rate structure was a vital factor in the station's successful efforts to emphasize the sale of programs over spot announcements.

During the small market stations session, presided over by Simon Goldman, WJTN, Jamestown, New York, Dale Robertson, WENT, Gloversville, New York, led a discussion on the importance of qualified personnel being assigned to the writing of all station advertising copy. Brief, fresh commercials were stressed while a certain amount of repetition was regarded as essential to radio's effectiveness.

George Bingham, WKIP, Poughkeepsie, New York, discussed practices of selling station time to labor unions.

Selling and programming *local news* was the subject of a discussion period led by Simon Goldman. It was pointed out that *local news* is in such demand that stations have sponsor waiting lists for the programs. Mr. Goldman stated that local news is included with national and international news in his station's news broadcasts. Other stations scheduled programs made up entirely of local news, which were as much in demand by sponsors.

Rates charges for regional advertisers, public interest programming, station promotion, per inquiry deals, religious programming, salesmen's compensation were also included in the round table period. The participants included Fred Keesee, WMBO, Auburn, New York; David Potter, WNAE, Warren, Pennsylvania; George Bissell, WMFF, Plattsburg, New York; A. P. Robertson, WWSC, Glens Falls, New York; Ed Derryberry, WCTC, New Brunswick, New Jersey; Richard Crans, WKIP, Poughkeepsie, New York; John Kearney, Colgren Broadcasting Company, Hudson, New York; and others.

The Small Market Stations Session was conducted by J. Allen Brown, NAB Assistant Director of Broadcast Advertising. Order blanks for NAB station aids were distributed at the close of the session.

General

Wall, Leaving NBC, Assumes Position As BMI Vice President

Col. Charles A. Wall assumed his new position as vice president in charge of finance of BMI Wednesday (7), Carl Haverlin, BMI president, announced last week.

To fill the newly created post at BMI, Col. Wall resigned from NBC, where he was administrative assistant to John H. MacDonald, vice president in charge of finance.

Prior to 1941, when he entered the army, Col. Wall had been business manager of the NBC program department.

Broadcast Advertising

NAB, Opposing Per Inquiry Offers, Cites Full Value of Radio to Four Companies

NAB member stations have reported that the following agencies have attempted to place business with them on a *per inquiry* basis: Gary A. Ruben Advertising Agency, Indianapolis, Indiana; Virginia Sales Company, Huntington, West Virginia; Adolph Salvatori, Cicero, Illinois; and Imperial Industries, Chicago, Illinois.

In writing to the agencies, NAB explained the industry's opposition to such offers, and enclosed a copy of the resolution adopted on the subject at the convention in Chicago last year.

The letter also outlined the value of radio as an advertising medium and suggested that the agencies study the various stations' rate cards.

In recommending this action, NAB assured the agencies of the stations' full cooperation in scheduling an advertising campaign and stated that the results of a radio campaign would justify the cost.

Stations Sponsor Retail Talks And Round-Table Discussions

Wichita, Kansas, Phoenix, Arizona, and Dayton, Ohio, advertising clubs recently heard talks on the effectiveness of radio advertising presented by Miss Lee Hart, NAB assistant director of broadcast advertising. In each city, the local NAB stations joined in sponsorship of the talk. Local retailers were invited to the meetings. Reports from stations indicate that Miss Hart's appearances have stimulated a new interest in favor of retail radio among local advertisers.

Following the talks, station personnel joined in a round-table discussion on methods of selling, servicing and producing radio copy for retail accounts.

During these discussions Miss Hart stressed the fact that retailers will be better customers when they are sold on the basis of the individual advertising job they can do, as well as on station coverage, character and rates. The necessity for a much closer correlation between station sales, program and copy departments was also emphasized.

Stressing also the fact that a number of the retailer's major resistances toward using radio are leveled at general things like his inability to get the time he wants immediately, she suggested constructive approaches which all stations can establish.

District Meetings

Caley, Meagher Elected to Board From Districts Nine and Eleven

(Continued from page 383)

New Standards

In the general discussion following the program session on Thursday, great interest was expressed in the new standards of practice. Francis M. Kadow, WOMT, Manitowoc, Wisc., made a plea for an "adult attitude" in developing a code. He believed the code should outline the evils of "bad radio" in positive fashion, rather than tell broadcasters how to operate their enterprises.

At this session, NAB President Justin Miller was questioned on the legal aspects of the code. He reported on his conferences with the Attorney General's office, and said that the big problem in establishing a code was in developing a system of enforcing provisions without running counter to the anti-trust law.

LaGuardia, at 2nd District Meeting, Stresses Importance of Industry

(Continued from page 383)

Commenting on so-called "advertising abuses," Mr. LaGuardia stressed the fact that if such abuses did exist they would be corrected in short order by listener reaction.

World Understanding

"World understanding is the most important thing to all of us today," he said, urging broadcasters to utilize their facilities in the promotion of world peace, tolerance and understanding among peoples. "On the whole, a good job has been done" by broadcasters, he continued.

"It is not perfect" he said, referring to the radio industry. "It is growing, it is the beginning. It is a means of bringing people together—it is the breaking of the monopoly of knowledge."

Judge Miller at Early Session

Earlier in the day, Judge Miller pointed out that broadcasters could strengthen their positions as community leaders through editorializing on the air. At the same time, he said, radio's prestige could be enhanced through such a program. Judge Miller reminded the station executives that the newspapers gained their freedom-of-press position after many years of asserting themselves and taking a strong stand to safeguard the liberty of their profession.

A. D. Willard, Jr., NAB executive vice president, in outlining the work of the Association and the three recent staff additions, said that with the present "full staff, NAB is really rolling and geared to serve all broadcasters on all levels."

FTC Official Is Guest

Speaking at the luncheon session on Monday, P. B. Morehouse, director of the FTC's division of stipulations, told the broadcasters that the NAB could lead in improving standards in advertising. He reminded the industry leaders that such work by the industry was preferable to governmental regulation. He pointed out that such a task could not be done by any

(Continued on next page)

one group alone, but required the cooperation of all interests engaged in broadcasting.

Other NAB staff executives who participated in the discussions include: Kenneth H. Baker, Robert T. Bartley, Richard P. Doherty, Frank E. Pellegrin, Don E. Petty and Allen Brown. (For details of Small Market Stations Session, see p. 385.)

Music Situation

Theodore C. Streibert, president, WOR, and chairman of the NAB Music Advisory Committee, reported to the broadcasters on the committee's talks with ASCAP representatives regarding a new contract. The present industry agreement with the music licensing organization expires in December, 1949. Mr. Streibert told the industry delegates that he hoped to present terms of the new agreement to the industry at the NAB convention in September.

Carl Haverlin, newly elected president of BMI, urged all broadcasters to "join the BMI team, to maintain a spirit of teamwork" with their own music licensing organization. He pointed out that BMI is established as a strong factor in the field and broadcasters can now devote themselves to the refinements of promoting BMI music.

New York Resolutions

BROADCAST ADVERTISING

Whereas, the Broadcast Advertising Bureau of the National Association of Broadcasters, its director, Frank Pellegrin, his assistants, and the various committees and subcommittees who worked with this bureau, have worked untiringly on behalf of all broadcasting stations, and

Whereas, as a result of their efforts they have brought forth and made available to the sales departments of all stations, invaluable studies, bulletins and other valuable information, and

Whereas, they are already laying plans for an even more ambitious program in the future of expanded services,

Be it, therefore, resolved, that the Broadcasters of the Second District in Convention assembled at the Waldorf-Astoria in New York City, May 5th and 6th, hereby commend the work of these groups as a most profitable contribution to broadcasting and do hereby express their appreciation to the Bureau, its staff and the personnel of the various committees working with them.

DISTRICT DIRECTOR

The members of the Second District in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, commend Mike Hanna, director for District Two, and the various members of the NAB staff for arranging such an enjoyable and profitable meeting.

MAYFLOWER DECISION

Whereas, broadcasting, by virtue of the first amendment of the U. S. Constitution and by Section 326 of the Federal Communications Act of 1934, as amended, is guaranteed the right of freedom of speech, and,

Whereas, in the "Mayflower Case," the Federal Communications Commission deprived licensees of broadcasting stations of the right to editorialize, and,

Whereas, the Federal Communications Commission, by such decision, has thwarted assumption of editorial leadership by broadcasters on the theory that "radio must not be an advocate,"

Now, therefore, be it resolved, that the Broadcasters of the Second District, in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, hereby petition the board of the NAB to make every effort, by appropriate action, to correct the unconstitutional principles set forth in the Mayflower Case and to seek to establish the rights of broadcasters to present their own views in keeping with the Constitutional guarantees of freedom of speech.

EMPLOYEE-EMPLOYER RELATIONS

Whereas, the trends of labor relations in the radio broadcasting industry tend more and more to impose industry-wide practices and policies without due regard to local conditions, and,

Whereas, such practices are not only economically unsound, but inimical to the most efficient employer-employee relations in such industry.

Therefore, be it resolved, that the broadcasters of the Second District, in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, urge the board of directors and the officers of the NAB to establish and promote policies of employer-employee relations which will take cognizance of local conditions to the end that effective local negotiations will be possible.

UNIFORM TIME

Whereas, the radical changes brought about by the transition from Daylight to Standard Time and Standard Time to Daylight Time in certain areas have a disturbing effect on the scheduling of broadcasts, and result in misinformation to listeners,

Now, therefore, be it resolved, by the broadcasters of the Second District in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, that we urge the NAB to cooperate with such other industries that may be affected by these time changes in working out with them plans whereby uniform time may be applicable throughout the country at all seasons of the year.

BMI

Whereas, music constitutes a very important part of broadcasting, and,

Whereas, BMI has been a valuable source of good music to the radio broadcasters,

Therefore, be it resolved by the broadcasters of the Second District in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, that every effort be made by these same broadcasters to popularize BMI tunes, and

We also urge that the stations in the district give early consideration to renewal of their BMI contracts in order that the industry may maintain this excellent source of material and in order to maintain a competitive factor in the music license world, and,

Be it further resolved, that these same stations in the Second District congratulate BMI in its choice of Carl Haverlin as president, and pledge to Mr. Haverlin and his staff complete and whole-hearted support.

BMB

Whereas, broadcasting stations, advertisers, and advertising agencies have recognized a real need for standardized measurement of station coverage, and,

Whereas, the National Association of Broadcasters, with the cooperation of the 4 A's and the ANA, brought into existence the Broadcast Measurement Bureau to fulfill this need, and,

Whereas, the Bureau has continued its first study and issued its first findings,

Now, therefore, be it resolved, that the broadcasters of the Second District in Convention assembled at the Waldorf-Astoria Hotel, New York City, May 5th and 6th, do commend the Broadcast Measurement Bureau for its

(Continued on next page)

untiring work and for the contributions which it has made in the standardization of station coverage measurement and we further recommend that careful study be made of the data brought forth from the first study with the hope that additional techniques will be developed, making possible greater service to the industry.

JUDGE MILLER

Whereas, Judge Justin Miller has served this organization as its president for over a year and a half, and,

Whereas, during that year and a half he has made many worthwhile contributions which have resulted in a better understanding on the part of the public of the role which radio broadcasting occupies in the economical, social and political lives of the nation, and,

Whereas, in his public addresses he has ably defended freedom of speech and freedom of listening, and,

Whereas, under his able guidance the staff, the services and the facilities of the Association have been greatly expanded and improved,

Now, therefore, be it resolved, that the broadcasters of the Second District in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, hereby express their sincere appreciation to Judge Miller for his outstanding work and pledge to him and his organization our continued and whole-hearted support.

TWO PER CENT CASH DISCOUNT

Whereas, the 2% cash discount principle has been suggested as a standard practice for broadcasting stations, and,

Whereas, careful study and consideration have been given to the subject,

Now, therefore, be it resolved, that the broadcasters of the Second District in Convention assembled at the Waldorf-Astoria Hotel in New York City, May 5th and 6th, do hereby oppose the adoption of the 2% cash discount principle as a standard practice for broadcasting.

NAB Districts 5 and 6 Join in Urging Revision of FCC's Mayflower Doctrine

[*For earlier story concerning election of Henry P. Johnston, WSGN, as director of the 5th District, see last week's issue of NAB* REPORTS, *p. 359.*]

Members of NAB's Fifth and Sixth Districts (Area F) meeting, May 1 and 2, at Birmingham, Ala., adopted a joint resolution calling upon the NAB board of directors to seek revision by the FCC of the Mayflower doctrine and "establish the rights of broadcasters to present views under their own sponsorship in keeping with the Constitutional guarantees of freedom of speech."

Other resolutions (*see below*) were adopted separately by the two districts on the opening day of the meeting, but official expression of sentiment concerning the Mayflower case was withheld until the delegates had heard the scheduled address of NAB President Justin Miller. At a joint meeting on the closing day of the session, the following resolution was adopted:

FREEDOM OF SPEECH

Whereas, by inference in its decision known as "the Mayflower case," the Federal Communications Commission has thwarted assumption of editorial leadership by broadcasters under the theory that "Radio must not be an advocate."

Be it, therefore, resolved, that the broadcasters of the Fifth and Sixth Districts in convention assembled do hereby petition the Board of Directors of the NAB to seek by appropriate action to bring about a revision of the said inference in the Mayflower case and establish the rights of broadcasters to present views under their own sponsorship in keeping with the Constitutional guarantees of freedom of speech.

The meeting was conducted under the joint leadership of Fifth District Director Fred W. Borton, WQAM, Miami, and Sixth District Director Wiley P. Harris, WJDX, Jackson, Miss.

Resolutions Adopted by Fifth District

[*See Above, for Joint Resolution of 5th and 6th Districts.*]

BROADCAST MUSIC, INC.

Whereas, music constitutes very important raw material for broadcasters, and is essential to their service to the listening public and

Whereas, the licensing of performing rights has consti-

(Continued on next page)

tuted in past years a problem of serious concern to broadcasters,

Be it resolved, by the broadcasters of the 5th District, that we urge all stations in this District to carefully analyze their music used to the end that a larger percentage of BMI music may be employed where such music on the basis of merit deserves such performance and that every effort be made by the broadcasters to popularize BMI tunes.

We further urge the stations of this District to give immediate consideration to renewal of their BMI contracts to the end that BMI may be maintained as a strong, competitive factor in the music licensing field.

Be it further resolved, that the broadcasters of this District approve and commend the appointment of Carl Haverlin as President of BMI and pledge him their full support.

NAB AFFILIATES COMMITTEE

Whereas, the existing network affiliates are confronted with increasing competition and

Whereas, with the advent of a great number of new stations, network affiliates are faced with an increasingly unstable outlook and

Whereas, short-term network contracts make their situation increasingly unstable and

Whereas, networks may find it possible and desirable to make more favorable contracts for station affiliation and

Whereas, there is now a possibility of curtailment of chainbreak facilities and

Whereas, there is the possibility of duplication of network outlets within normal coverage of trade areas—

Be it resolved, that it is the desire of the 5th District of NAB that there be provided within the NAB facilities for the study and improvement of such problems which may now or will confront network facilities in the future.

LABOR RELATIONS

Be it resolved, that the members of the 5th District urge the Board and management of NAB to establish and promote policies of employer-employee relations which will recognize and make as effective as possible local and area negotiations, outlaw the secondary boycott and relieve the industry of the injurious effects of jurisdictional disputes.

Be it further resolved, that the members of the 5th District urge the Board of Directors and the management of NAB to support such bills in the Congress as will achieve the aforementioned objectives.

UNIFORM TIME

Whereas, the periodic changes in time adversely affect the ability of the broadcasting industry to properly serve the listening public and create maladjustments in the broadcast schedule to the disadvantage of the listeners;

Be it resolved, by the 5th District of NAB, that we urge the management of NAB to cooperate with other industries similarly affected in supporting legislation such as HR 2740 whereby standard time may be applicable throughout the country and throughout the year; also that we urge all broadcasters who have not already done so to immediately contact their Congressmen asking them to support such legislation.

TWO PERCENT CASH DISCOUNT

Whereas, the proposed 2% cash discount to advertising agencies would increase costs, would cause all advertisers, including local, non-agency advertisers to demand it, and

Whereas, prompt payment is expected when service is rendered, and there exists no logical reason why broadcasters should extend an extra 2% to agencies, therefore,

Be it resolved, by the broadcasters of the 5th and 6th Districts, that they do hereby express their united opposition to the 2% cash discount plan or any such proposal.

PRESIDENT MILLER

The members of the 5th District are tremendously appreciative of the successful manner in which Justin Miller has lead the industry since he has become President of NAB. This District hereby pledges its full support to President Miller's program and congratulates him and his staff on the capable handling of NAB affairs.

ARRANGEMENTS

Be it resolved, that a sincere vote of thanks and appreciation is extended to the Chairman, Henry P. Johnston, and his Arrangement Committee for their very fine work in behalf of the meeting of the 5th District of NAB May 1st, 1947 at Birmingham, Ala.

PRESS

The broadcasters of the 5th District of NAB wish to take this opportunity to thank the Press for their full cooperation in aiding the success of this District Meeting.

CITY OF BIRMINGHAM

The 5th District of the National Association of Broadcasters hereby extends sincere thanks to the City of Birmingham and its officials for the many courtesies shown.

Resolutions Adopted By Sixth District

[*See Above, for Joint Resolution of 5th and 6th Districts.*]

UNIFORM TIME

Whereas, the uncertainty, confusion and adverse effect which the changing of time has upon the broadcasting industry in its efforts to properly serve the listening public, and,

Whereas, transportation and other industries are also adversely affected by such seasonal time changes in such a manner as to be likewise confronted with this industry problem, now, therefore,

Be it resolved, by the Sixth District of the NAB that the board of directors of the National Association of Broadcasters be commended for seeking and securing the assistance and cooperation of all such industries similarly affected in the development of proposed legislation whereby uniform time may be applicable throughout the country throughout the year, and to urge complete cooperation in obtaining passage of this legislation designed to correct this industry evil.

LABOR RELATIONS

Whereas, the prevailing trends in labor relations throughout the radio industry tend to impose nationwide or industry-wide practices or policies without due regard to the respective local and regional conditions, and,

Whereas, such practices are economically unsound and destructive of efficient and compatible labor relations within the individual stations, therefore,

Be it resolved, that the Sixth District of NAB urge the board of directors and management of the National Association of Broadcasters to promote such labor relations policies as well as recognize the need and make possible the handling of local labor problems through local negotiations.

BROADCAST MUSIC, INCORPORATED

Whereas, music constitutes one of the basic principles of broadcast operations and is a prime essential in serving the needs of the listening public, and,

Whereas, past experience has been filled with the thorny problems of music copyright entanglements as were and

(Continued on next page)

continue to be of serious concern to all broadcasters, now, therefore,

Be it resolved, by the Sixth District of NAB that all broadcasters within the district be urged to carefully study their use of music to the end that BMI copyrighted tunes may be employed as widely and as fully as is possible based upon the merits of these compositions and the broadcasters' needs, and,

Be it further resolved, that the Sixth District of NAB go on record as heartily approving such efforts as will keep BMI a strong competitive factor in the music licensing field, and,

Be it further resolved, that the broadcasters of this district approve and commend the appointment of Carl Haverlin as President of Broadcast Music, Inc.

BROADCAST MEASUREMENT BUREAU

Whereas, the broadcast industry has long needed the establishment of a standard method of service measurement suitable for universal use, and,

Whereas, Broadcast Measurement Bureau has been established for this purpose, and, during the two years of its existence has developed, by study and research, facts of value to agencies, advertisers and to broadcasters as tend to establish such standardization of coverage statistics as is needed, and,

Whereas, further studies and research are being made to make such data and statistics of greater value, now, therefore,

Be it resolved, that the Sixth District of NAB go on record as commending MBM for the contribution which has been made toward the standardization of radio coverage data, and,

Be it further resolved, that the Sixth District of NAB go on record as endorsing the continuation of the active support of BMB by all members of the radio industry.

TWO PER CENT CASH DISCOUNT

Whereas, a concerted and continued effort is being made to induce broadcasters to grant 2% cash discount to advertising agencies presumably for prompt payment of bills for services rendered, and,

Whereas, the adoption of such discount is contrary to good economic principles and to good business operation and would in effect constitute a preferential rate cut to certain advertisers since all advertising service is presumed by the stations to be payable promptly by all advertisers alike, now, therefore,

Be it resolved, that the Sixth District of NAB go on record as being opposed to the establishment of a 2% cash discount or to any plan or proposal of similar intent.

PRESIDENT MILLER

Whereas, the need for enlightened, constructive and forceful leadership in our industry has been fully met during the period in which Justin Miller has served as President of the NAB, and,

Whereas, President Miller has contributed much toward increasing the stature, dignity and prestige of the NAB by his thoughtful, sincere and intelligent handling of the presidential duties, therefore,

Be it resolved, that the Sixth District of NAB go on record as pledging our wholehearted support to President Miller in his continued efforts to bring about a better understanding of the radio industry by public officials and the public at large, and to commend him for the success that has been thus far achieved.

WILEY P. HARRIS

Whereas, Wiley P. Harris, director for the Sixth District of NAB, has given tirelessly of his thought and effort in arranging and conducting the business affairs of this district meeting and has given unstintedly of his time in interpreting the thoughts of the district stations to the NAB Board, now, therefore,

Be it resolved, that we highly commend Mr. Harris for the work he has rendered and extend to him our sincere appreciation for the contribution he is making through his service to this district, and to the industry.

HENRY P. JOHNSTON

Whereas, the broadcasters of the city of Birmingham have contributed much to the success of this district meeting by their work in making all necessary arrangements for our attendance, reception and entertainment, now,

Be it resolved, that the members of the Sixth District of the NAB go on record as extending our wholehearted appreciation to them and in particular to their chairman, Mr. Henry P. Johnston, for all efforts expended in our behalf.

Public Interest Programming

Veterans Administration Plans to Release Fourth Transcribed Series This Month

Distribution to radio stations of the first six programs of the VA's fourth transcribed series, "Here's To Veterans," will be made by VA Branch Offices the latter part of this month.

The six platters include "Lum 'N' Abner," "Abbott & Costello," "The Great Gildersleeve," "Gene Autry Show," "Kenny Baker Show," and "Dennis Day Show."

The VA said that there are now 1005 radio stations broadcasting the VA's transcribed 15-minute "capsule" versions of top "name" network programs.

Sustained Recruiting Campaign Required To Fill Nation's Nursing Needs

To stimulate the recruiting of nurses, the Office of Government Reports and the Ad Council, in cooperation with the American Hospital Association and the U. S. Public Health Service have prepared a series of spot announcements for use by local stations.

A statement from the OGR says:

> "The shortage of nurses is such a nationwide problem that civic groups in many communities are participating in local recruiting campaigns. The immediate objective is to fill 35,000 vacancies for student nurses this fall.
>
> "Frequent use of Nurse Recruitment announcements is urged, so that women who are high school or college graduates and under 35 years old and in good health will investigate this great opportunity to enter a proud profession."

Additional details will be found in last week's issue of Reports, p. 365.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of May 19-25, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945 the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field . . . the poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups—such as parent-teacher organizations—actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. (Fact Sheet No. 37)

Help Veterans Beat the Housing Shortage

Well over 2,000,000 newly discharged veterans, whose lives as civilians were interrupted by service in the Armed

(Continued on next page)

Forces, are now looking for places to live. The veteran needs and deserves all possible help in obtaining a home now for himself and his family. The housing crisis will continue through 1947. The reasons are: 1. *The need for homes is tremendous.* Since V-J Day some 13,000,000 men and women have been released from the Armed Services—even during 1946 discharges continued at the rate of about 250,000 a month. Some of these veterans, of course, have established homes to return to, but a Census Bureau survey taken in June, 1946, showed that about 4,000,000 wanted to rent, buy or build within twelve months if they could find anything suitable at prices they could afford. About 2,200,000 are seeking accommodations even at present prices. 2. *The shortage has been accumulating for years*—We entered the war with an undersupply of houses. During the war the shortage became more acute. The marriage rate shot up. Home-building had to be held to a minimum because materials and manpower were needed to speed victory. 3. *It takes time for emergency measures to pay off*—The No. 1 problem was to step up the production of building materials. In addition it was necessary to establish machinery for eliminating unessential and deferrable commercial and industrial construction. Communities had to organize to meet the housing crisis. These measures require time, but are now producing results. Urge listeners to help take care of the veteran in the existing housing supply, until enough new homes are ready, by (1) sharing their homes; (2) "staying put" and giving the veteran first chance in renting or buying; (3) creating additional living quarters for veterans by remodeling; (4) putting off deferrable repairs; (5) listing vacancies and houses for sale at their local Veterans Housing Center; (6) not discriminating against veterans with children. (Fact Sheet No. 4-H)

Higher Prices for Used Fats

The Advertising Council is advised that housewives can now obtain substantially higher prices for waste fats from their local dealers. *Yet a spot check shows that most women are not aware how much waste fat prices have risen since removal of price controls.* Calling attention to this information and to the continued critical shortage of fats will, in our opinion, be of great benefit both to listeners and to American industry. Regarding the continuing need for salvaging used kitchen fats, Secretary of Agriculture Clinton P. Anderson recently said: "Until the fat supply situation is greatly improved, we must ask American homemakers to help by saving and turning in all their used fats after they have gotten the cooking good from them." The contribution being made by the collection of what would otherwise be wasted household grease is a very important one, comprising better than 10% of our total supply of inedible tallow and grease. This supply is vitally important in the production of soap and also in many manufacturing operations. By continuing to salvage every drop of used kitchen fat housewives can help to assure adequate supplies of soap and other peacetime goods. With the increased supply of meat now reaching consumers, there is more fat to be salvaged. *Most dealers are today paying substantially higher prices for used fats.* (Fact Sheet No. 19-C)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, May 12. They are subject to change.

Monday, May 12

(10:00 A. M.)

NEW—WDEL, Inc., Wilmington, Del.—For FM facilities.

NEW—Wilmington Tri-State Broadcasting Co., Inc., Wilmington, Del.—For FM facilities.

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—For FM facilities.

NEW—York Broadcasting Co., York, Pa.—For FM facilities.

NEW—Reading Broadcasting Co., Reading, Pa.—For FM facilities.

(10:00 A. M.)

NEW—Joe V. Williams, Jr., Chattanooga, Tenn.—C. P. **1490 kc.,** 250 watts, unlimited.

Respondent: WRGA—Rome Broadcasting Corp., Rome, Ga.

Further Hearing

(10:00 A. M.)

KGKB—East Texas Broadcasting Co., Tyler, Tex.—C. P. DA, **690 kc.,** 1 KW night, 5 KW day, unlimited.

KGGF—Hugh J. Powell, Coffeyville, Kans.—C. P. DA (DA-2), 5 KW night, 10 KW day, unlimited.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—C. P. DA, **690 kc.,** 1 KW night, 1 KW day, unlimited.

Respondents: KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.
KFEQ—KFEQ, Inc., St. Joseph, Mo.

Further Hearing

(10:00 A. M.)

NEW—Crescent Broadcast Corp., Shenandoah, Pa.—C. P. **580 kc.,** 5 KW, unlimited; DA-night and day.

NEW—The Patriot Co., Harrisburg, Pa.—C. P. **580 kc.,** 5 KW night, 5 KW day, unlimited; DA-N.

FCC ACTIONS

GENERAL

Volume 10—Commission's Reports and Decisions Now Available

Volume 10 of the Commission's Reports and Decisions, for the period April 2, 1943 to June 30, 1945, is now available from the Superintendent of Documents, Government Printing Office, at a cost of $2.00.

AMPLITUDE MODULATION

AM—Docket Case

1280 KC.

The Commission announces a **Proposed Decision** (B-356) looking towards the **grant** of the application of **Veterans Broadcasting Co., Inc.** (BP-4826; Docket 7660), for a new station in **Rochester, N. Y.,** to operate on the frequency 1280 kc., with 5 KW, unlimited time, DA, conditions; and **denial** of the application of **Rochester Broadcasting Corp.** (BP-3593; Docket 6606), for the same facilities.

(Comr. Denny did not participate in any aspect of this case.)

AM—New CP Granted

The Wichita Beacon Broadcasting Co., Wichita, Kans.—Granted CP for a new station on 1420 kc. with 500 watts, daytime only.

AM—Correction on New CP Frequency

According to a correction by the Commission, the item referring to the new CP for **Duncan Broadcasting Co., Duncan, Oklahoma,** should have shown frequency **1350 kc.** was granted instead of 1340 kc.

AM—Licenses for New Stations Granted

860 KC.

WOAY—Robert R. Thomas, Jr., Oak Hill, W. Va.—Granted license for new station to operate on 860 kc., 250 watts, day. (BL-2318)

950 KC.

KFSA—Donald W. Reynolds, Ft. Smith, Ark.—Granted license for new station on 950 kc., 1 KW, daytime only, conditions; and to specify studio location as 3700 Wheeler Ave., Ft. Smith. (BL-3319)

1400 KC.

KXLK—Great Falls Broadcasting Co., Great Falls, Mont.—Granted license for new station on 1400 kc., 250 watts, unlimited time. (BL-2332)

KEBE—Billy Averitte Laurie, Jacksonville, Tex.—Granted license for new station on 1400 kc., 250 watts, unlimited time; conditions. (BL-2219)

KCOY—News-Press Publishing Co., Santa Maria, Calif.—Granted license for new station on 1400 kc., 250 watts, unlimited; conditions. (BL-2257)

1490 KC.

WROV—Radio Roanoke, Inc., Roanoke, Va.—Granted license for new station on 1490 kc., 250 watts, unlimited time; conditions. (BL-2199)

AM—Modifications of CP's Granted

WOV—Wodaam Corp., New York, N. Y.—Granted modification of CP for extension of completion date to 5-30-47. (BMP-2675) Also granted modification of CP for extension of completion date of (BP-5086) to 5-30-47. (BMP-2676)

KWTC—Mojave Valley Broadcasting Co., Barstow, Calif.—Granted modification of CP for extension of completion date to 7-19-47. (BMP-2683)

KWHN—KWHN Broadcasting Co., Inc., Fort Smith, Ark.—Granted modification of CP to change type of transmitter, make changes in ground system, to specify studio location and extension of completion date to 10-29-47. (BMP-2672)

FREQUENCY MODULATION

FM—Conditional Grants

The following were authorized conditional grants, for the type of station indicated, subject to further review and approval of engineering details:

Radio Springfield, Springfield, Ill.—Class B (Comr. Durr for hearing). (BPH-161)

Central States Broadcasting Co., Omaha, Neb.—Class B (Comr. Durr for hearing). (BPH-403)

Rahall Broadcasting Co., Norristown, Pa.—Class A (Comr. Durr for hearing). (BPH-1074)

A. C. Neff, Savannah, Ga.—Class B. (BPH-1130)

Illinois-Alton Broadcasting Co., Alton, Ill.—Class B (Comr. Durr for hearing), (BPH-1156) and Channel 223 was deleted from Columbia, Mo., and added to Alton, Ill., and Channel 277 added to Columbia.

Harry L. Crisp, Marion, Ill.—Class A. (BPH-1219)

Commander Industries, Oak Park, Ill.—Class A. (BPH-1225)

The McPherson Broadcasting Co., Inc., McPherson, Kans.—Class A. (BPH-1216)

Richard Balch, Utica, N. Y.—Class B. (BPH-1222)

Lubbock Broadcasting Co., Lubbock, Tex.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1218)

Rose Capital Broadcasting Co., Tyler, Tex.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1202)

Hinson Memorial Baptist Church, Portland, Ore.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1131)

The Journal Co., Green Bay, Wisc. (The Milwaukee Journal)—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details (BPH-1215) and added Channel 230 to Green Bay.

FM—Construction Permits

*The following were authorized construction permits; conditions: (*NOTE*: Power given is effective radiated power; antenna height is height above average terrain, and Channel to be assigned after final proceedings in Docket 6768.)*

Gadsden Broadcasting Co., Inc., Gadsden, Ala.—Class B; 1.5 KW; 500 ft. (BPH-1086)

Baltimore Broadcasting Corp., Baltimore, Md.—Class B; 15 KW; 555 ft. (BPH-251)

KOZY—Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Class B; 9.7 KW; 270 ft. (BPH-1190)

Capital Broadcasting Co., Jefferson City, Mo.—Class B; 9.7 KW; 310 ft. (BPH-932)

Medford Printing Co., Medford, Ore.—Class B; 4.3 KW; 1880 ft. (BPH-170)

Richard Austin Dunlea, Wilmington, N. C.—Class B; 13 KW; 345 ft. (BPH-466)

WKY-FM—WKY Radiophone Co., Oklahoma City, Okla.—Class B; 190 KW; 940 ft. (BPH-171)

Oklahoma Press Publishing Co., Muskogee, Okla.—Class B; 9.7 KW; 325 ft. (BPH-1003)

Carter Publications, Inc., Fort Worth, Tex.—Class B; 44 KW; 435 ft. (BPH-622)

The following were authorized construction permits in lieu of previous conditions; channel to be assigned after final proceedings in Docket 6768:

WBRC-FM—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Class B; 560 KW; 625 ft. (BMPH-331)

WMIX-FM—Mt. Vernon Radio & Television Co., Mt. Vernon, Ill.—Class B; 13.7 KW; 550 feet; subject to granting AM application which makes provision to mount FM antenna on top of AM radiator of station WMIX. (BMPH-308)

KIMV—Hutchinson Publishing Co., Hutchinson, Kans.—Class B; 40 KW; 530 ft. (BMPH-265)

KTSJ—The Topeka State Journal, Inc., Topeka, Kans.—Class B; 33 KW; 285 ft. (BMPH-273)

WLSC—Lancaster Broadcasting Co., near Lancaster, S. C.—Class B; 9.4 KW; 440 feet. (BMPH-247)

FM—Miscellaneous Actions

KAGH—Andrew G. Haley, et al (Assignor), Andrew G. Haley, tr/as Rose Bowl Broadcasters, Ltd. (Assignee), Pasadena, Calif.—Granted consent to assignment of CP for FM station KAGH, from Rose Bowl Broadcasters, Ltd., a partnership, to Andrew G. Haley, tr/as Rose Bowl Broadcasters, Ltd. Three retiring partners propose to sell their 40% interest therein to assignee for a consideration equal to their cash contribution ($1501) to the partnership. (BAPH-23)

FM—Applications Accepted for Filing

WJLK—Asbury Park Press, Inc., Asbury Park, N. J.—Consent to transfer of control of construction permit for FM station WJLK to Mabel Brazer Kinmonth and Asbury Park National Bank and Trust Company, executors and trustees u/w of J. Lyle Kinmonth, deceased.

WAVE-FM—WAVE, Inc., Louisville, Ky.—Modification of construction permit (B2-PH-329, as modified), for extension of completion and commencement dates.

WRCM—Supreme Broadcasting System, Inc., New Orleans, La.—Modification of construction permit (B3-PH-485, which authorized a new FM broadcast station) for extension of completion date.

WESX-FM—North Shore Broadcasting Co., Salem, Mass.—Modification of construction permit (B1-PH-684, which authorized a new FM broadcast station) for extension of completion date.

WMBS-FM—Fayette Broadcasting Corp., Uniontown, Pa.—Modification of construction permit (B2-PH-240, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WEIM-FM—Mitchell G. Meyers, Ruben E. Aronheim and Milton H. Meyers, Fitchburg, Mass.—Modification of construction permit (B1-PH-698, which authorized a new FM broadcast station) for extension of completion date.

WRGA-FM—Rome Broadcasting Corp., Rome, Ga.—Modification of construction permit (B3-PH-661, as modified, which authorized a new FM broadcast station) for extension of completion date.

WWHG—The W. H. Greenhow Co., Hornell, N. Y.—Modification of construction permit (B1-PH-391, which authorized a new FM broadcast station) for extension of completion date.

(Continued on next page)

WSPA-FM—Spartanburg Advertising Co., Spartanburg, S. C.—Modification of construction permit (B3-PH-149, which authorized a new FM broadcast station) for extension of completion date.

WCOD—Havens and Martin, Inc., Richmond, Va.—Modification of construction permit (B2-PH-180, as modified, which authorized a new FM broadcast station) for extension of completion date.

94.1 MC.—#231

NEW—Martinsville Broadcasting Co., Inc., Martinsville, Va.—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 231, 94.1 mc., ERP of 4.44 KW.

96.1 MC.—#241

WBRL—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Involuntary transfer of control of licensee corporation from Charles P. Manship, Sr., deceased, to Leora D. Manship, testamentary executrix of the estate of Charles P. Manship, Sr. (959 shares of common stock).

98.5 MC.—#253

NEW—Northwest Broadcasting Co., Fort Dodge, Ia. (P. O. 912 First Avenue South (Warren Bldg.), Fort Dodge, Ia.)—Construction permit for a new (Class B) FM broadcast station to be operated on 98.5 mc., Channel 253, and ERP of 7 KW.

99.3 MC.—#257

NEW—Rome Radio Broadcasting Co., Rome, Ga. (Robert L. Tomlinson, Jr., and Robert L. Tomlinson, Sr.) (121 Broad St.)—Construction permit for a new (Class A) FM broadcast station to be operated on 99.3 mc., Channel 257, and ERP of .720 KW.

99.5 MC.—#258

WAFM—Voice of Alabama, Inc., Birmingham, Ala.—Modification of construction permit (B3-PH-249, which authorized a new FM broadcast station) to change frequency to Channel 258, 99.5 mc., antenna height above average terrain to 618 feet; effective radiated power to 540 KW, and to make changes in antenna system and change transmitter.

102.7 MC.—#274

WCAO-FM—The Monumental Radio Co., Baltimore, Md.—Modification of construction permit (B1-PH-175, which authorized a new FM broadcast station) to change frequency to Channel 274, 102.7 mc., and make changes in antenna system.

To Be Assigned By FCC

NEW—Western Maryland Broadcasting Corp., Norfolk, Va. (P. O. Alexander Hotel, 200 Public Square, Hagerstown, Md.)—Construction permit for a new (Class B) FM broadcast station to be operated on frequency to be assigned by FCC, and ERP of 44.8 KW.

NEW—Radio Anthracite, Inc., Scranton, Pa. (P. O. 6th and Market Sts., Sunbury, Pa.)—Construction permit for a new (Class B) FM broadcast station to be operated on frequency to be assigned by FCC, and ERP of 4.3 KW.

NEW—South Central Broadcasting Corp., Evansville, Ind. (P. O. Mt. Auburn and Bismark Sts.)—Construction permit for a new (Class B) FM broadcast station to be operated on frequency to be assigned by FCC, ERP of 21.5 KW, and antenna height above average terrain 449.25 feet.

NEW—Trent Broadcast Corp., Trenton, N. J.—Construction permit for a new FM broadcast station to be operated on frequency to be specified. Amended to change officers, directors, stockholders; transmitter site from north side of Upper River Rd., 1.4 miles north of center of Yardley, near Yardley, Pa., to 156 West State St., Trenton, N. J.; studio site from 35 West State St., Trenton, N. J., to 156 West State St., Trenton, N. J.; ERP from 38.2 KW to 250 watts, frequency from "to be specified" to 98,000 kc.; type of transmitter from RCA FM 10A, maximum 10 KW to RCA BTF-250A maximum 250 watts and make changes in antenna system.

TELEVISION

TV—New Commercial Television CP Granted

Sarkes Tarzian and Mary Tarzian, a partnership, Bloomington, Ind.—Granted CP for a new station to operate on Channel No. 10, 192-198 mc., 1 KW, unlimited. (B-PCT-184)

TV—New Experimental Television CP Granted

Columbia Broadcasting System, Inc., area of New York City—Granted CP for new experimental television relay station. (BPVB-192)

TV—Modifications of CP's Granted

WNBW—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of CP for extension of completion date to 8-19-47. (BMPCT-56)

WNBT—National Broadcasting Co., Inc., New York, N. Y.—Granted modification of CP for extension of completion date to 6-15-47. (BMPCT-57)

TV—Applications Accepted for Filing

NEW—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Construction permit for a new commercial television broadcast station to be operated on 204 to 210 mc., Ch. #12, power of Visual, 5 KW (peak); Aural 5 KW, and unlimited hours of operation.

W10XP—Philco Television Broadcasting Corp., Portable, area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 and 1380-1400 mc.; add special for FM emission, and change transmitter location and antenna system.

WPEN-TV—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (BPCT-150, which authorized a new commercial television broadcast station) for extension of completion date.

W2XDK—Sherron Metallic Corp., Brooklyn, N. Y.—License to cover construction permit (BPVB-183, which authorized a new experimental television broadcast station).

WRTV—Maison Blanche Co., New Orleans, La.—Modification of construction permit (BPCT-78, which authorized new commercial Television broadcast station) for extension of commencement and completion dates.

WTCN-TV—Minnesota Broadcasting Corp., Minneapolis, Minn.—Modification of construction permit (BPCT-176, which authorized a new commercial television broadcast station) for extension of commencement and completion dates.

W10XPB—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc.; add special for FM emission; change transmitter location and antenna system.

W3XPF—Philco Television Broadcasting Corp., area of Central Maryland, N. E. Maryland, S. E. Pennsylvania, and District of Columbia—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc.; add special for FM emission; change transmitter location and antenna system.

W3XPL—Philco Television Broadcasting Corp., area of Central Maryland, N. E. Maryland, S. E. Pennsylvania, and District of Columbia—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc.; add special for FM emission; change transmitter location and antenna system.

W10XPC—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc.; add special for FM emission; change transmitter location and antenna system.

(Continued on next page)

NEW—Scripps-Howard Radio, Inc., area of Cleveland, Ohio—Construction permit for a new experimental television relay broadcast station to be operated on 1295 to 1425 mc., emission visual A5, power of visual, 1 watt (peak), and hours of operation unlimited.

NEW—National Broadcasting Co., Inc., area of New York, N. Y.—Construction permit for a new experimental television relay broadcast station to be operated on 6975-7000 mc., emission visual A5, power of 0.1 watt (visual) (peak). License to operate a new experimental television relay broadcast station.

WBEN-TV—WBEN, Inc., Buffalo, N. Y.—Modification of construction permit (BPCT-155, as modified, which authorized a new commercial television broadcast station) for changes in antenna system.

WNBY—National Broadcasting Co., Inc., Chicago, Ill.—Modification of construction permit (BPCT-27, as modified, which authorized a new commercial television broadcast station) for extension of completion date.

MISCELLANEOUS BROADCAST

Actions

New Noncommercial Educational CP Granted

The University of Tulsa, Tulsa, Okla.—Granted CP for a new station: Channel (No. 212), 90.3 mcs.: 1 KW; 350 feet. (BPED-82)

New Remote Pickup License Granted

KRLO—Pikes Peak Broadcasting Co., Portable-Mobile, area of Colorado Springs—Granted a license for new remote pickup broadcast station. (BLRY-331)

Remote Pickup License Renewals and Extensions

Renewal of licenses were granted the following remote pickup broadcast stations, subject to changes in frequency which may result from proceedings in docket 6651:

WRBQ, Alamance Broadcasting Co., Inc.; WAUH, Atlantic Coast Broadcasting Co.; WAUB, WSIX Broadcasting Station; WQER, Board of Regents, etc. on behalf of Ga. School of Tech.; WBPC, Board of Regents, etc., Ga. School of Tech.; KRHP, The Houston Post Co.; KEMA, May Broadcasting Co.; KAOH, KEIS, KEIT, Midland Broadcasting Co.; KCGJ, KCGI, News Press Pub. Co.; KEIX, KEIW, Eugene P. O'Fallon, Inc.; WAEA, WAPO Broadcasting Service; WMJA; WMJB, WMJC, WMJD, WMJH, RadiOhio, Inc.; WAHM, WEOH, Richmond Radio Corp.; WEKO, WEKP, Scranton Broadcasters, Inc.; WDAJ, Tampa Times Co., WAIQ, WELB, WELC, WAVE, Inc.; KBRG, KEHI, WEOE, WDAY, Inc.; KAZA, KAXB, KEHL, WKY Radiophone Co.

Licenses for the following remote pickup stations were extended upon a temporary basis for the period ending July 1, 1947, pending determination upon applications for renewals:

WENM, WEHN, The Evening News Assn.; KABD, KAOG, KAOY, Don Lee Broadcasting System; WFME, Monocacy Broadcasting Co.; WEJC, WEJD, WEJE, WEJS, WEJT, WNCU, WNTJ, WNBR, WNBU, National Broadcasting Co., Inc.; WDAC, State of Wisconsin, University of Wisconsin; KEGR, Totem Broadcasters, WTHB, The Tribune Co., WAIX, WJHL, Inc.

Licenses for the following remote pickup stations, were further extended upon a temporary basis only, pending determination upon applications for renewals, for the period ending July 1, 1947:

KAAD, KEGT, Tarrant Broadcasting Co.; WBCZ, WHEB, Inc.;

WMWA—WOKO, Inc., area of Albany, N. Y.—Present license for remote pickup station was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending Aug. 31, 1947.

Applications

Remote Pickup

NEW—Miami Broadcasting Co., area of Miami, Fla.—Construction permit for a new remote pickup broadcast station (with WQAM & WQAM-FM) to be operated on 31.22, 35.62, 37.02 and 39.26 mc., power of 2 watts, emission A3, and hours of operation in accordance with Section 4.403.

NEW—Mississippi Valley Broadcasting Co., area of East St. Louis, Ill. (Myles H. Johns, Penrose H. Johns, William F. Johns and William F. Johns, Jr., a partnership)—Construction permit for a new remote pickup broadcast station to be operated on 31.62, 35.26, 37.34 and 39.62 mc., power of 42 watts, emission A3, and hours of operation in accordance with Section 4.403.

NEW—Emporia Broadcasting Co., Inc., area of Emporia, Kans.—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150, 2790 kc., power of 20 watts and emission A3, hours of operation unlimited, in accordance with Section 4.403.

WEWT—WAGE, Inc., area of Syracuse, N. Y.—License to cover construction permit (BPRY-328, which authorized a new remote pickup broadcast station).

NEW—Radio Sales Corp., area of Twin Falls, Idaho. (P. O. 126½ Shoshone St., East, Twin Falls, Idaho)—Construction permit for a new remote pickup broadcast station to be operated on 30.82, 33.74, 35.82 and 37.98 mc., power of 15 watts, emission A3, and hours of operation in accordance with Section 4.403.

Studio Transmitter Link

NEW—Federal Telecommunication Laboratories, Inc., New York, N. Y.—Construction permit for a new ST Link broadcast station to be operated on 945 to 955 mc., power of 3 watts, emission special-FM, and unlimited hours of operation.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued afainst them.

Englishtown Cutlery, Ltd., (Inc.)—Englishtown, N. J., and its officers are charged in a complaint issued by the Commission with falsely representing that their cutlery is designed and manufactured in England. Officers of the corporation, which manufactures and sells knives, spoons, forks and other kitchen and table cutlery, are Norman J. Mercer, president; Joseph Berger, vice-president; and Edward W. Ginsburg, secretary. (5492)

STIPULATIONS

Buchanan-Thomas Advertising Co.—Paxton & Gallagher Co., Omaha, Nebr., and its advertising representatives, Lyman H. Thomas and C. C. Buchanan, trading as Buchanan-Thomas Advertising Co., 412 South 19th St., Omaha, entered into a stipulation with the Commission to stop representing that either Butter-Nut Coffee or its blend, quality or flavor is insured for one million dollars or any other amount. (7601)

Colomby Watch Co., Inc.—The Commission approved a stipulation in which Colomby Watch Co., Inc., 580 Fifth Ave., New York, and its officers agree to stop using the word

(Continued on next page)

"America's" as part of the phrase "The Gem of America's Wrist Watches" without clearly disclosing with equal conspicuousness that the watches or movements are of Swiss origin. (7602)

Goulard and Olena, Inc.—The Commission accepted from Goulard & Olena, Inc., Skillman, N. J., a stipulation to discontinue representing that an insecticide spray designated "Go-Nex" is non-combustible, that it is the safest insecticide and that it will knock down insects instantaneously or kill them within 60 seconds. (7599)

Horrocks-Ibbotson Co., Utica, N. Y., entered into a stipulation with the Commission to discontinue representing that Hicolon fishing line and leader material No. 430 possesses tensile strength greater than that actually possessed. (7598)

Parnis-Livingston, Inc.—The Commission approved a stipulation in which Parnis-Livingston, Inc., 530 Seventh Ave., New York, agrees to disclose the rayon content of the ladies' garments it sells and to stop using the term "linen" or any other term of similar import to describe any fabric or garment the fiber content of which is not linen exclusively, or which contains any fiber other than linen. (7600)

R. & M. Trading Co.—In a stipulation accepted by the Commission, Joseph Rosenbaum and Dora Marks, copartners trading as R. & M. Trading Co., 68 Greene St., New York, agree to disclose that the hat bodies they sell are composed of used or secondhand materials. (7603)

CEASE AND DESIST ORDERS

Associated Merchandising Corp.—An order to cease and desist from misrepresentation in connection with the sale of "P & S" brand toothbrushes has been issued by the Commission against Associated Merchandising Corp., New York, Owens Staple-Tied Brush Co., Toledo, and 21 department stores operating in 19 cities. (4719)

Draper Corporation, Hopedale, Mass., has been ordered by the Commission to cease and desist from price discrimination and the negotiation of exclusive-dealing contracts in connection with the sale of bobbins, shuttles and repair and replacement parts for automatic looms used by textile manufacturers. (5436)

Emmett J. Smith and Sarah Alma Maxwell, Murfreesboro Hiway, Nashville, Tenn., have been ordered by the Commission to cease and desist from misrepresentation in connection with the sale of chickens and poultry remedies. The respondents trade as Emmett J. Smith and Daughter, Smith Baby Chix and Emmett J. Smith and Daughter Poultry Farms. (5199)

COMPLAINTS DISMISSED

Booth Fisheries Corp.—In accordance with the precedent set in the case of General Foods Corp. and three of its subsidiaries (4627), the Commission dismissed its complaint charging Booth Fisheries Corp., Chicago, with misrepresentation in selling rosefish fillets as perch. (4888)

Ralston Purina Co.—The Commission dismissed without prejudice its complaint charging Ralston Purina Co., 835 South Eighth St., St. Louis, with false and misleading advertising of Purina poultry feeds. (5458)

CASES CLOSED

Philippine Mahogany Cases—The Commission closed its proceedings in the Philippine Mahogany cases with a statement declaring that its "fixed and definite policy" is to "proceed vigorously" against all persons selling Philippine hardwoods as mahogany without using the qualifying word "Philippine." (1736, 1738, 1739, 1740, 1741, 1743, 1744, 1751 and 1916)

Sales Promotion, Time Brokerage Discussed At Sales Managers Group Meeting

The Sales Managers Executive Committee, concluding a two-day session in Atlantic City on Friday (16), heard an extensive report on matters relating to sales practices.

The problems of bulk sales and time brokerage were discussed and the committee urged that all stations be alert to combat the practice. A subcommittee, continuing its study of the problems, will make a detailed

(Continued on page 408)

Full Committee Works Over First Draft Of Proposed New Standards for Industry

The NAB Special Standards of Practice Committee spent last Monday and Tuesday (12 and 13) working over the first draft of the new standards for the broadcasting industry.

Its two sub-committees having presented drafts of provisions relating to program and commercial practices, the Committee agreed on the general policies it would recommend and appointed a special re-drafting sub-committee to polish the language of the proposed new Standards.

The Committee does not expect to complete its work in time to submit its recommendations to the NAB Board of Directors at its spring session (May 21 and 22).

The re-drafting sub-committee is composed of Ken R. Dyke, NBC, chairman; C. T. Lucy, WRVA; and Roger W. Clipp, WFIL.

All members of the full Committee were present for last week's meeting. In addition to those appointed to the sub-committee, members are Chairman Robert D. Swezey, MBS; George C. Biggar, WIBC; Edgar Bill,

Widening of Standard Broadcast Band Proposed By U. S., Other ITC Delegations

The possibilities of widening the standard broadcast band were increased with the opening of the International Telecommunications Radio Conference at Atlantic City (15th) when several Governments submitted their proposals for assignment of frequencies to the various services.

The United States Delegation proposed, as a revision of the Cairo (1938) conference, to enlarge the standard broadcast band from the present Cairo and NARBA assignment of 550-1600 kc inclusive to 535-1605 kc. This would permit the lowest and highest assignable frequencies to be 540 kc and 1600 kc with a 5 kc guard band at both ends.

The U. S. Delegation proposal pointed out "care must be employed in the selection of transmitter sites, antenna directivity patterns, and powers of broadcasting stations on 540 kc so as not to interfere with the safety and distress functions of the maritime mobile service" operating on 500 kc.

The American position was assumed to be conservative when other countries submitted their proposals calling for wider extensions.

The United Kingdom proposes to include, in addition to 540 kc, the channel 530 kc (525-1605 kc). This extension of the low frequency end is in line with the proposals of both the USSR and France. These two countries, however, propose to stop broadcast assignments at 1560 kc. Additionally, France proposes to share the channel 520 kc with maritime. This would make 520 kc available at interior locations.

Channels 520-530-540 kc would become available under the Swiss proposal. The Swiss, like some of the other European countries, propose to stop at 1560 kc, while Czechoslovakia proposes that the channels 1560 to 1670 kc be assign-

able to low power stations remote from coastal areas.

The American Delegation's allocation structure calls for the use of the frequencies between 510 and 535 kc for "mobile, telegraph" not open to public correspondence.

Extended Conference

The conference, one of the most important and significant of the various post-war international conferences, is expected to conclude just about the time NABer's converge on Convention Hall there next mid-September.

This meeting carries special significance because it is the first International Telecommunications Conference to be held since the Cairo conference of 1938. The conference scheduled for Rome in 1942 was never held.

At Atlantic City, representatives of some 80 nations are attempting to bridge the gap which has been made wider than its eight years by the "dislocations of the war and the rapid wartime advancements in the telecommunications art."

International allocation, or re-allocation, of the entire radio spectrum falls within the scope of the current sessions. It is not known now what demands other countries will make for allocations other than those reported above. While it is expected that the American delegates will support the American standard, FM, and television allocation plans, it is anticipated that protracted and serious discussions will result from any endeavor of the delegates to reach unanimity of opinion concerning international broadcasting channels.

NAB's director of engineering, Royal V. Howard, is attending the Atlantic City sessions as an observer. NAB REPORTS will publish periodic dispatches from Mr. Howard throughout the summer.

Since the four-month meeting will be divided into three separate sessions, the United States will be represented officially by three delegations. The delegation chairmen are: FCC Chairman Charles R. Denny—for the International Radio Conference; Assistant Secretary of State Garrison Norton—for the International Plenipotentiary Telecommunications Conference; Assistant Secretary of State William Benton—for the High Frequency Broadcasting Conference.

WMBD; Eugene Carr, WPAY; Walter Damm, WTMJ; Harold Fellows, WEEI; Gilson Gray, CBS; Gayle Grubb, KGO; and John M. Outler, Jr., WSB.

NAB headquarters was represented by President Justin Miller; C. E. Arney, Jr., secretary-treasurer; Don Petty, general counsel; and Harold Fair, director of the program department.

Television

FCC Schedules Engineering Conference On Inter-City Television Facilities

The informal engineering conference on inter-city television facilities, originally scheduled for June 3, has been postponed until June 9, the FCC announced on Thursday (15).

The conference was called, the Commission said, because it "seems desirable at this time to acquaint the television broadcasters, existing and potential, with the present plans of the common carriers for relaying television programs between cities, and to acquaint the common carriers, existing and potential, as well as the manufacturers who supply them, with the *immediate* needs of broadcasters for common carrier inter-city relay service."

In its announcement, the FCC invited all interested persons to attend the conference and asked that participants be prepared to state the date of completion of their stations and the date they will desire network facilities either at the meeting or within ten days after the meetng.

Engineering Department

FCC Partially Grants Clear Channel Request; Hearings Postponed Until July 7

Acting on a petition of the Clear Channel Broadcasting Service asking for a postponement of the Clear Channel hearings scheduled for June 2, the FCC on Friday (16) ordered that the hearings be set for July 7.

The CCBS asked for postponement until October 15 because of the illness of its legal counsel, Louis G. Caldwell.

General

ASCAP-NAB Committees Look Toward Satisfactory Outcome of Discussions

The joint committees representing ASCAP and the NAB met Tuesday (13) to consider the reports of three sub-committees which have been at work for the past two months on matters incident to the relations of the Society and the industry.

Both President Deems Taylor of ASCAP and Judge Justin Miller of NAB expressed satisfaction with the nature and temper of the discussions. They joined in expressing conviction that continuing discussions will result in an amicable and mutually satisfactory outcome of the discussions.

Plans for National Radio Week Include Wide Industry Participation

Radio program sponsors and advertising agencies handling radio accounts will be invited to utilize their program and talent facilities in helping to celebrate National Radio Week Oct. 26-Nov. 1.

Representatives of the RMA Advertising Committee and the NAB Sales Promotion Subcommittee at a meeting this week in New York agreed that every facet of the radio industry should be tapped to make National Radio Week this year the greatest national observance in the history of broadcasting.

Both the FM Association and the Television Broadcasters Association also will be invited to join in the industry-wide event, the RMA and NAB committees decided.

It was generally agreed that the keynote of the 1947 observance of National Radio Week will be the greater listening opportunities available from expanded broadcasting and radio receiver production facilities. Attention also will be directed to the millions of dollars in radio entertainment available for the price of a radio receiver.

The committee will prepare promotion material for radio dealers and broadcasting stations and will offer suggestions for cooperative local promotion programs.

John M. Outler, of Station WSB, Atlanta, is chairman of the NAB Sales Managers Subcommittee. W. B. McGill, of Westinghouse Radio Stations, Inc., Philadelphia, is chairman of the RMA subcommittee on Radio Week. The next meeting of the two committees is tentatively scheduled for May 27 in New York.

Three Broadcasters Appointed to Serve As District Committee Chairmen

Three broadcasting executives have been appointed to serve as district chairmen of NAB committees, it was announced last week.

Two appointments made by George D. Coleman, WGBI, NAB District 3 Director, are: G. S. Wasser, KQV, to serve on the Employee-Employer Relations Committee, and J. Gorman Walsh, WDEL, to serve on the Program Committee.

In District 16, Director William B. Ryan, KFI, announced the appointment of Sydney Gaynor, KHJ, to the Sales Managers Committee.

May 26-27	District 3 Meeting	Baltimore Lord Baltimore Hotel
June 2-3	District 1 Meeting	Boston Somerset Hotel

Two NAB Staff Directors on Agenda At Georgia Radio Institute

NAB participation at the Second Annual Georgia Radio Institute at the University of Georgia, May 18-20, includes addresses by two staff directors, Robert K. Richards, director of public relations, and Arthur Stringer, director of special services.

The annual institutes, sponsored jointly by the Georgia Association of Broadcasters and the University's Henry W. Grady School of Journalism, bring together radio business executives and educators interested in the profession.

Small Market Stations

New Booklet, Aid to New Stations, Written by Robert T. Mason

"Some Do's and Don't's of Station Management" by Robert T. Mason, WMRN, Marion, Ohio, is the title of a new NAB booklet published last week. In this discussion of "what I would do if I were to open a new station tomorrow" Mr. Mason discloses some of the sound principles that have guided his and other stations to success.

The booklet, which was prepared as an aid to management of new stations, contains 27 important points for station operation. These hints cover subjects such as: Credits and Collections, Rate Cutting, Trick Advertising Tests, Resale of Time, Rate Structure, Trade Deals, Per Inquiry Offers, Free Program Offers, Station Continuity, Double-Spotting, Station Production, Program Adjacencies and others.

In the booklet, Mr. Mason cautions management: "Don't get yourself so involved in the day-to-day technical problems of broadcasting that you forget to fulfill the major responsibility that is yours.

"Radio occupies the same position in community life today that the newspaper did a generation or two ago. Then the newspaper editor was the motivating force in

(Continued on next page)

his community; he originated, stimulated and brought to fruition most of his community's progress.

"That position today is occupied in many cities by the radio station manager. That position is yours to inherit, but you will find that it isn't *given* to you—you must *earn* it.

"Cast your bread of service upon the waters of your community, and you will integrate your station into community life; it will become an inseparable part of the community.

"You have entrusted to you something far more important than merely a license granted you by the FCC to operate a radio station. You have entrusted to you a vital part of mankind's most basic freedom—the right to knowledge."

The booklets are being sent to all new stations as an aid to management, however, all member stations may obtain a copy upon request.

Employee-Employer Relations

NLRB Ruling on Part-Time And Supervisory Employees

A recent NLRB case concentrates attention on National Labor Relations Board policy concerning inclusion of part-time employees and station supervisors in a collective bargaining unit. In the *Great Trails Broadcasting Company* case, decided by the Board on April 14, 1947, two temporary technicians were not permitted to vote in a representation election on the grounds that they did "not have sufficient interest in the selection of a bargaining representative to entitle them to vote in the election." These employees worked from six to eight hours per week installing a new transmitting plant for the station. Usually, however, they were employed only as substitute technicians when regular employees were ill or absent.

The Board ruled, however, that another employee who worked 36 hours per week on a regular part-time basis was eligible to participate in the election. The Board found that his interest was substantially the same as those of regularly employed engineers.

This case also affords an additional affirmation of the Board's policy of excluding station supervisors from the regular bargaining units. The International Brotherhood of Electrical Workers, AFL, petitioned for a single bargaining unit including transmitter, engineering, and control room supervisors. The station contended that transmitter, control room, and remote control employees constituted three separate bargaining units. The Board found "that the close interrelation of the functions of all groups, the similar conditions of employment, the integration of personnel, and the general pattern of organization in the broadcasting industry indicate a sufficient community of interest to warrant their inclusion in a single bargaining unit." However, the Board denied the IBEW contention that the transmitter supervisor (Chief Engineer) should be included in the bargaining unit. This employee, the Board found, was the sole continuous supervisory authority at the transmitter with the authority to discipline and recommend discharge of employees. These factors, plus the 10% differential in his salary, indicated to the Board that the employee was in fact a supervisor and, therefore, should be excluded from the bargaining unit. The same decision prevailed with respect to an Engineering Supervisor, who supervised control room operators, had discharged one employee, and had effectively recommended a pay raise for another. The Board found that these facts, as well as the differential in his salary, indicated that he was actually a supervisor and thus excluded from the bargaining unit.

The station also employed a "Control Room Supervisor," who repaired radio equipment in the control room and directed the routine activities of control room operators. The NLRB included him in the bargaining unit because he received "no additional remuneration during his 3-month shift in the control room and . . . he possessed no supervisory authority . . . "

Single copies of the NLRB decision in the Great Trails Broadcasting Company case are available from EERD on request.

Legal Department

General Statement on Copyright Law In Public Performance of Works

From time to time NAB has had requests, especially from newer members, for information about the copyright laws governing the use of books, articles, poetry and other printed matter in broadcasting. The following brief statement is designed to help clarify the rights and duties of stations in these respects.

While the rules here stated are substantially sound, it must be remembered that, in dealing with a subject as complex as the copyright law, it is impossible to frame general statements which will be an adequate guide in all situations. Consequently, in case of any doubt, broadcasters should consult their own attorneys as to the applicability of any of the following rules to any particular case.

1. No copyrighted work may be adapted, arranged, novelized or dramatized without permission from the copyright owner.

2. No copyrighted drama, musical comedy, opera, musical composition,* lecture,* address* or sermon* may be broadcast in any way without permission from the copyright owner.

3. Copyrighted novels, poetry, biographies, histories, etc., or parts of them may be broadcast without permission from the copyright owner provided (a) they were not written for dramatic production, and

---

* While the Copyright Act is not concerned with the performance of these works unless the performance is for profit, the court decisions indicate that *any* performance by a commercial broadcast station is in fact a performance for profit.

(Continued on next page)

(b) they are not altered by arrangement, adaptation, addition or deletion.

Apart from the copyright statutes, there are two additional considerations: uncopyrighted works and the law of unfair competition.

(1) Uncopyrighted works. Insofar as the common law of the various states, as distinguished from the copyright statutes of the United States, treats as property a literary or artistic work, the right to the property remains complete and absolute until the work has been published; that is, until it has been made available to or distributed to the public at large. Prior to publication, no person has any right, as against the owner, to the use of it. However, once there has been general publication, the American common law considers that the work has been dedicated to the public, and the common law property in it abandoned. The question of what constitutes publication cannot be categorically answered. The most that can be said generally is that while the public performance of plays and music, the public exhibition of works of art, and the public delivery of lectures are not normally publication in legal effect and do not result in the loss of the common law property right, the reproduction and general sale of copies is such a publication and does result in the loss of the common law property right.

(2) The Law of unfair competition. Both the common law and many state statutes recognize the doctrine of unfair competition. Under its principles the unauthorized use or imitation of another's literary or artistic property in such a way as to interfere with his right to exploit it and to confuse or mislead the public may give a right of action for injunction or damages or both, even though, under the copyright laws, the use is permissible.

The principles of common law copyright and the principles of the law of unfair competition are both matters of state law, vary considerably from state to state, and are highly flexible. Therefore, only an examination of particular state statutes and court decisions will disclose with any certainty the circumstances which may permit their application at the instance of one who claims to own or owns a literary or artistic work. Therefore, broadcasters should seek the advice of their own attorneys, who have access to all of the facts of any given situation and are familiar with the applicable principles of state law.

Slight Increase in National Spot Business Shown in Rorabaugh Report for April

(Continued from page 407)

tions, 6% became newly active or resumed their activity in the medium, 9% curtailed their schedules slightly, and only 4% (mainly seasonal accounts) cancelled out entirely.

Among the accounts which became newly active or resumed their activity in the medium (after having dropped out previously) were:

> Better Homes & Garden Magazine, Baldwin Piano Co.—Eastern Division, Canada Dry Sparkling Water, Chesapeake & Ohio RR, Club Aluminum Products, Dara Shampoo, L. De Martini Mixed Nuts, Dill's Best Tobacco, Kellogg's Rice Krispies, Kraché Facial Oil, Meritt Medicated Powder, Nestle's Semi-Sweet, New Jersey Bell Telephone Co., Olympic Radio & Television, Omega & White Ring Flour, OZ Ice Cream Mix, Pennzip Gasoline, Pestmaster, Pillsbury Minitmix, Rodan (Wash Laboratories, Inc.)

Some of the national accounts which increased their spot schedule during April were:

> Atlantic Gas & Oil, Banjo Snuff & Rooster Snuff, Birds-Eye Frosted Foods, Broadcast Corned Beef Hash, Brock Candy Bar, Capital Bread & Cakes, Cincy Wallpaper Cleaner, Dawson's Beer & Ale, Dude Ranch Preserves & Syrups, Esquire Shoe Polish, Goodyear Rubber Shoe Products, Guittard Ground Chocolate, Harvester Cigars, Jax Beer, J-O Roach Paste, Kellogg's Corn Soya, Krank's ShaveKreem, Kroger Bread, Krueger Beer, La France & Satina, Larvex, Lay Potato Chips, Merry War Lye, Mobilgas & Oil, Tavern Products & Bug-A-Boo, Nestle's Evaporated Milk, Newsweek, Northrup King Seeds, Old Gold Cigarettes, Oscar Mayer Meat Products, Phillips 66 Gas & Oil, Pillsbury Pie Crust Mix, Pyequick, Rainier Beer & Ale, Southern Dairies Ice Cream, Southern States Iron Roofing Co., Tavol, TWA Service, United Artists Pictures, Ward's Tip-Top Bread, Wheaties, Whiz & Pecan Pete Candy Bars.

Broadcast Advertising

Sales Promotion, Time Brokerage Discussed At Sales Managers Group Meeting

(Continued from page 403)

report when the full committee meets again in September.

In a review of sales promotion activities, the committee discussed the series of talks being prepared for local presentation by station executives to civic clubs and other community organizations. A subcommittee was appointed to consider the need for an overall sales promotion campaign for the broadcasting industry. It is to study the form, method, costs and possible methods of financing such an undertaking, and to report back to the full committee at its next meeting.

Named to the subcommittee were: Arthur Hull Hayes, WCBS, chairman; H. Preston Peters, Free & Peters, Inc.; J. Robert Gulick, WGAL; and Louis Read, WWL.

Spot Broadcasting

The subcommittee studying means for eliminating confusion concerning the term "spot broadcasting" suggested a possible solution to the problem. It recommended that broadcasting stations drop the word "spot" in connection with announcements. This would reserve the term "spot" for use by national advertisers who utilize individual stations in a given campaign.

The sales managers group discussed preliminary plans for the broadcast advertising portion of the forthcoming NAB Convention. A subcommittee to work on details for the session was appointed. Members named are: Lewis H. Avery, Avery-Knodel, Inc., chairman; Bill Bennett, KXYZ; James V. McConnell, NBC; Eugene S. Thomas, WOR, and Joseph J. Weed, Weed and Co.

The full committee also heard a report on the work of BMB, presented by President Hugh Feltis. Mr. Feltis discussed details of the use of BMB information by stations, advertisers and advertising agencies.

Arthur Stringer, director of special services, discussed the NAB's series of management studies. In addition, he pointed out how radio stations utilized their newscasts as a profitable operation during 1946.

Retail Advertising

After hearing a report of the Joske Advisory Subcommittee, presented by Miss Lee Hart, assistant director of Broadcast Advertising, the committee commended the work of Miss Hart in the discussions and forums concerning retail advertising which she has been conducting during the past several months among stations, advertisers and civic groups.

Committee members present for the two-day meeting were: Odin S. Ramsland, KDAL, chairman; Ray Baker, KOMO; Bill Bennett, KXYZ; J. Robert Gulick, WGAL; Arthur Hull Hayes, WCBS; John W. Kennedy, WHAM; James V. McConnell, NBC; Louis Read, WWL; Eugene S. Thomas, WOR.

Associate members in attendance were: H. Preston Peters, Free & Peters, Inc.; Lewis H. Avery, Avery-Knodel, Inc.; Joseph J. Weed, Weed & Company.

Board Liaison representatives present were: Harry R. Spence, KXRO; and Walter Johnson, representing Paul W. Morency, WTIC.

Prepared Scripts on Auto Information Available Free for Use by Stations

The National Automobile Dealers Association, Washington, D. C., is distributing 5-minute weekly scripts to some 200 radio stations. These scripts, "Your Car," may be developed into 15-minute programs by adding music or other automotive information. Stations are selling the series to local auto dealers. The NADA reports that its membership is comprised of 30,000 auto dealers with new car franchises in the U. S.

NAB members wishing to order sample scripts, should address their requests to: H. R. Daniel, Radio Director, National Automobile Dealers Association, 1926 17th Street, N. W., Washington 6, D. C.

Initial Meeting at AFA Convention To Be Devoted to Radio Advertising

Advertising leaders from throughout the nation and from several countries overseas will meet at the Hotel

(Continued on next page)

Statler, Boston, May 25 to 28, for the 43rd annual convention and exposition of the Advertising Federation of America.

Broadcast advertising will have an important place at the convention with the entire morning of the opening day (Monday) devoted to a session under the direction of Frank E. Pellegrin, NAB Director, Department of Broadcast Advertising. Three outstanding features which emphasize radio's advertising impact will be incorporated into this half-day session.

An adaptation of the NORC survey, "The People Look at Radio" (with slide pictures), will be presented by Dr. Kenneth H. Baker, NAB Director of Research.

The Joske Department Store study, "Radio For Retailers," will be conducted by Mr. Pellegrin.

Hugh M. Feltis, President, Broadcast Measurement Bureau, will show radio's coverage, and discuss the activities of his organization in a graphic presentation.

District Meetings

Area D Broadcasters United in Opposition to Mayflower Case Decision

[*See NAB* REPORTS, *May 12, for earlier story of Area D meeting in Chicago, Districts 8, 9 and 11, announcing election of two new members of the Board. Resolutions passed at the meeting, not available when* REPORTS *went to press last week, are printed below.*]

Resolutions at Chicago

MAYFLOWER DECISION

Whereas, broadcasting as a free medium of mass communication is protected by the First Amendment of the Constitution and by Section 326 of the Communications Act, guaranteeing freedom of speech, and

Whereas, freedom of speech and the right to editorialize is a vital necessity if broadcasting stations are to develop character and win the respect of their listeners, and

Whereas, in our opinion, in the so-called Mayflower Case the Federal Communications Commission has undertaken to deprive broadcasters of the right to editorialize, and

Whereas, the broadcasters of the 8th, 9th and 11th NAB Districts believe this action deprives licensees of their constitutional rights as well as substantially reducing the civic and educational effectiveness of radio.

Be it resolved, that the broadcasters of the 8th, 9th and 11th Districts of the NAB urge the Board of Directors and the management of the Association to make every effort to secure early FCC liberalization of policy to the end that through free speech and the right of editorializing, without fear of governmental reprisal, broadcasters may exercise the maximum effectiveness of the radio broadcasting art.

2% CASH DISCOUNT

Whereas, there has been an extensive campaign by the National Advertising Agencies to influence broadcasters to establish the 2% discount principle for the prompt payment of advertising accounts, and

Whereas, the adoption of such a principle would increase the cost of operations of broadcasters and result in higher rates for radio advertisers, without attendant advantages for either broadcaster or advertiser,

Be it resolved, that the members of the 8th, 9th and 11th NAB Districts go on record as opposed to the principle of a cash discount for the prompt payment of advertising accounts.

UNIFORM TIME

Whereas, the periodic changes in time adversely affect the ability of the broadcasting industry to properly serve the listening public, and create maladjustments in broadcasting schedules to the disadvantage of the inhabitants of a major part of the country,

Be it resolved, by the members of the 8th, 9th and 11th NAB Districts that we urge the management of the Association to cooperate with other industries similarly affected in developing some plan whereby uniform time may be applicable throughout the country and throughout the year.

BROADCAST MUSIC, INC.

Whereas, the availability of good music for the use of broadcasters is indispensable to good programming, and

Whereas, performing rights have in the past been a serious problem for broadcasters, and

Whereas, the broadcasting industry has successfully created and maintained Broadcast Music, Incorporated, as a source of good music,

Be it resolved, by the broadcasters of the 8th, 9th and 11th NAB Districts, that a careful analysis of the use of music should be made by all stations and every effort made by them to utilize more effectively the performing rights of BMI, and

Be it further resolved, that the members of these NAB Districts urge the Board of Directors and the management of the Association to encourage through its various publications early and favorable consideration to the renewal of all BMI contracts, and

Finally be it resolved, that the members of these NAB Districts endorse the selection of Carl Haverlin as President of BMI.

MUSIC CLEARANCE-AT-SOURCE

Whereas, under the terms of the so-called "consent" decree of the Federal Department of Justice, BMI and ASCAP are now required to provide clearance-at-source of music copyrights,

Be it resolved, that the management and Board of Directors of the National Association of Broadcasters, and also the Association's Music Advisory Committee, take appropriate action to secure application of the rule of clearance-at-source to all music copyright and performance licensing organizations.

BMB

Whereas, the Radio broadcasting industry for the past two years has cooperated in a project for the measurement of station circulation, and

Whereas, the industry is now faced with the decision of whether to continue the present project or to abandon it,

Be it resolved, that the broadcasters of the 8th, 9th and 11th NAB Districts endorse the continuance of industry-wide circulation rating and urge the Directors and management of the Association to work with the appropriate organizations for the improvement of measurement standards to the end that they will be acceptable to all parties involved in their use.

FEES FOR SCHOOL BROADCASTS

Whereas, the broadcasters of the country are faced with the growing problem of fees being levied on radio broadcasts by tax-supported colleges and public schools for the privilege of broadcasting certain activities of these institutions,

Be it resolved, that the broadcasters of the 8th, 9th and 11th NAB Districts urge the Board of Directors and the

(Continued on next page)

management of the Association to give this matter careful attention, and

Be it further resolved, that their effort take the form of a thorough survey of the situation as it affects each member of NAB, and that a report on such survey be made to the membership at the September, 1947, annual convention in order that whatever action is indicated may then be taken by the Board and/or the membership of the Association.

Director Leslie C. Johnson

Whereas, Leslie C. Johnson, Director of the Ninth District of the National Association of Broadcasters, has been the host of 8th, 9th and 11th District members at this Area Meeting for the last time before his voluntary retirement in September, 1947, and

Whereas, Leslie C. Johnson has been the past host of the same NAB Area, always with efficiency, always with fairness, and always with a sense of consideration of the attendant members thereof, far beyond the normal expectations of that membership,

Be it resolved, that the members of the Association from these Districts extend to him their thanks and appreciation for a job well done.

President Miller and Staff

Whereas, in the past year and one-half the National Association of Broadcasters has expanded its staff and its activities, and

Whereas, these expansions have led to greater usefulness of the Association to its members as well as to improving the broadcasters' relations with important segments of our population,

Be it resolved, that the members of the 8th, 9th and 11th NAB Districts endorse the present operation of the Association,

And be it further resolved that these members particularly commend the efforts of President Justin Miller and of the Employer-Employee Relations Department in providing leadership and education for the membership.

The resolutions were prepared by a committee consisting of: Merrill Lindsay, WSOY, chairman; Clarence Leich, WGBF; Owen F. Uridge, WJR; Melvin Drake, WDGY; and John F. Meagher, KYSM.

Delegates at the meeting unanimously authorized and directed Chairman Les Johnson, WHBF, to send the following telegram to E. L. Hayek, KATE, and District 11 director:

> "Greetings from your friends and fellow broadcasters of Area "D" NAB assembled in Chicago stop regret you are unable to be with us stop sincerely hope for your rapid and complete recovery stop Meeting directed me to send this message, to which I add my warmest personal regards to you and your good wife."

Public Interest Programming

1947 Campaign Successful, Red Cross Recognizes Assistance of Broadcasters

The broadcasting industry, through NAB, has been awarded the Certificate of Honor by the American Red Cross, for its aid in stimulating contributions during the recent fund raising campaign.

In a letter accompanying the award, Red Cross Vice Chairman Howard Bonham wrote NAB President Justin Miller:

> "For your generous cooperation and support during the 1947 Fund appeal, I am pleased to transmit to the National Association of Broadcasters again this year the American Red Cross Certificate of Honor.
>
> "We recognize that the success of the campaign was due in no small measure to your all-out assistance. This cooperation was extremely helpful in informing the public of our needs.
>
> "On behalf of the American Red Cross, may I extend to you and to your associates our warm appreciation and thanks."

The NAB President served as chairman of the National Radio Division again in 1947.

While the recapitulation is not complete, the Red Cross stated that about 885 local stations scheduled the transcribed series "These Are My People," which starred Helen Hayes. In addition, through the cooperation of the Advertising Council, radio participation included about 1000 national network broadcasts and 1500 regional allocations. A more detailed report on broadcasting's part in the successful campaign is now being prepared by the Red Cross radio office.

G.I. Insurance Campaign to Continue; $2½ Billion in Policies Reinstated

The Veterans Administration announced last week that, through the cooperation of the Advertising Council, its campaign to reinstate National Service Life Insurance will continue until August 1. That day marks the end of the period during which most policies may be reinstated without physical examination.

The VA stated: "Two and one-half billion dollars worth of National Service Life Insurance were reinstated between February 3 and April 30, and a study made by our Chicago Branch Office (No. 7) suggests that 36% of the reinstatements are the result of radio."

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of May 26-June 1, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

Safety on the Highway

The National Safety Council reports: 1) *More deaths in 1946*. The nation's 1946 motor vehicle death toll of 33,500 was 19% greater than the total of 28,076 for 1945—though it was still about 6,500 below the all-time high of 1941. 2) *More driving*. Vehicles mileage in 1946 is estimated at 39% above 1945, 4% above 1941, the previous high year. With more new cars pouring into the market daily, mileage totals will continue to rise—thus multiplying the danger of traffic casualties unless Americans learn to

(Continued on next page)

be more careful than ever before. 3) *Inexperienced drivers.* In 1946 there were 45% more traffic deaths in the 15 to 24 year age group than in 1945. Many teen-age drivers have recently returned from the Armed Services; others are new drivers. Teen-age drivers as a rule have a higher accident rate per mile than any other age group. Stress the seriousness of the accident menace, as revealed in National Safety Council statistics. Remind each listener that accidents don't always happen to someone else—that the chances he takes every day are the very ones that are causing our present big accident totals. Make him realize that HE is a potential accident victim, and that he cannot afford to be careless. Stress the safety campaign theme: "BE CAREFUL! THE LIFE YOU SAVE MAY BE YOUR OWN." Point out that there are one or more violations of the law in almost every motor vehicle accident. The National Safety Council—the recognized authority in the field of public safety—believes that obedience to the law is one of the best ways to promote safety on the highway. Every motorist and every pedestrian should obey traffic signs and signals. Drivers should observe safety and other traffic regulations . . . never drive after drinking . . . keep cars in good condition at all times . . . watch for warnings at grade crossings . . . be alert and careful every moment behind the wheel. Urge every motorist and pedestrian actively to support the safety movement in his own community . . . encourage driver training in high schools . . . teach children the rules of safety on the highway, in the home and everywhere. Listeners should be reminded of the extra need for careful driving in order to avoid Memorial Day accidents. (Fact Sheet No. 15-D)

Help Prevent Forest Fires

Our forests and woodlands are vital to the nation's welfare. America needs timber for homes and thousands of other urgent uses . . . water for irrigation, power and domestic use. In the midst of a critical lumber shortage, our natural resources are suffering appalling losses from forest fires, *9 out of 10 of which are man-made.* Figures compiled on forest fires and the damage done by them show that sharp reductions have been achieved as the result of what advertisers have done to alert Americans to the danger of forest fires and how to prevent them. Over 200,000 forest fires annually lay waste an average of 31,000,000 acres of timberland—an area larger than the State of New York . . . destroy enough timber to build 215,000 two-bedroom homes; enough to make 90 million railroad ties or almost 6 million tons of newsprint . . . tie up almost 1 million man-days of labor . . . cripple watersheds on which many people, industries, and cities depend for pure water, power and light . . . cause soil erosion, floods and serious property damage . . . transform playgrounds into charred wastes—destroying wildlife—robbing America of its peace and beauty. MORE gasoline, tires and time in 1947 mean MORE opportunity for MORE Americans to be careless with fire in 1947. Everyone, therefore, should memorize and follow these four rules of forest fire prevention: 1. . . Crush out cigarette, cigar and pipe ashes. 2. . . Break matches in two after using 3. . . Drown all camp fires; then stir and drown again. 4. . . Find out the law before using fire. Remind Memorial Day weekenders of the simple rules for preventing Forest Fires. (Fact Sheet No. 16-C)

Our New Soldier—Young, Skilled Volunteer

Everybody hopes the United Nations will find the means to outlaw war, but everyone admits the way hasn't yet been found. We live in a still-quarreling world, a world that respects the strong—a world in which our country must assume a position of leadership with its attendant responsibilities. With this in mind, and after examining our present overseas commitments, Congress has authorized the largest peacetime Regular Army in our history. The required strength has been set at 1,070,000 by July 1, 1947. (We had 8,000,000 during the war.) The Army is conducting a paid recruiting campaign—but it's not enough. Unless the Council's campaign to build and maintain prestige and appreciation for the new Regular Army is continued, says the War Department, it will be very difficult for the paid campaign to bring in the 40,000 recruits each month that are needed to maintain the Army's authorized strength. Except in wartime, Americans have tended to have a poor opinion of Army enlisted men. Many people have thought that men joined the Army because they couldn't get jobs anywhere else—didn't like to think for themselves—or were incompetent. These are just a few of the notions which circulated easily in the years before blitzkrieg, before radar and atomic energy. Actually, the new Regular Army of today is a compact, carefully chosen force of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the stakes are high in the task before them: maintenance of the peace and security for which thousands of other young Americans have already died. But the Army won't attract enough such young men unless the Council's Army Prestige Campaign continues to build respect for the Regular Army and its enlisted personnel in the public mind, particularly in the minds of potential recruits, their families and friends—and in the minds, too, of those who have already enlisted. (Fact Sheet No. 2-F)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, May 19. They are subject to change.

Monday, May 19

(Reopened for Further Hearing, 10:00 A. M.)

WHYN—Hampden-Hampshire Corp., Holyoke, Mass.—C. P. to change frequency, etc. **560 kc., 1 KW**, unlimited.

NEW—Atlantic Radio Corp., Boston, Mass.—C. P. **550 kc., 5 KW**, unlimited.

NEW—Pynchon Broadcasting Corp., Springfield, Mass.—C. P. DA-1, **560 kc.**, 5 KW, unlimited.

WNBH—Bristol Broadcasting Co., Inc., New Bedford, Mass. —C. P. to change frequency, etc. DA, **550 kc., 5 KW**, unlimited.

NEW—The Fairfield Broadcasting Co., Danbury, Conn.—C. P. **500 kc.**, 500 watts, 1 KW, unlimited.

Tuesday, May 20

Further Hearing

(Engineering Testimony, 10:00 A. M.)

KMAC—The Walmac Co., San Antonio, Tex.—For renewal of license. **1240 kc.**, 250 watts, unlimited.

KMAC—The Walmac Co., San Antonio, Tex.—C. P. to change frequency, etc. DA (DA-2) **630 kc.**, 5 KW, unlimited.

Wednesday, May 21

Further Hearing

(10:00 A. M.)

NEW—The A. S. Abell Co., Baltimore, Md.—C. P. **850 kc.**, 1 KW, unlimited.

WEEU—Berks Broadcasting Co., Reading, Pa.—C. P. **850 kc.**, 1 KW, DA-Night, unlimited.

(Continued on next page)

Thursday, May 22

(Reopened for further hearing, 10:00 A. M.)

WGRC—Northside Broadcasting Corp., New Albany, Ind.—C. P. **790 kc.,** 1 KW night, 5 KW day, DA-Night, unlimited.

Intervenor: WMC—Memphis Publishing Co., Memphis, Tenn.

(10:00 A. M.)

NEW—Community Broadcasting Co., Fort Worth, Tex.—C. P. **1490 kc.,** 250 watts, unlimited.

Respondents: KVWC—Northwestern Broadcasting Co., Vernon, Texas.

KPLT—North Texas Broadcasting Co., Paris, Texas.

KGKB—East Texas Broadcasting Co., Tyler, Texas.

FCC ACTIONS

GENERAL

Notice

The informal engineering conference concerning inter-city television program transmission is postponed to June 9, 1947.

AMPLITUDE MODULATION

AM—Docket Cases

790–1230 KC.

The Commission announced an **Order** granting petitions of **Veteran's Broadcasting Co.** and **Texas Star Broadcasting Co.** (KTHT), requesting that their applications be severed from the consolidated proceeding of which they are now a part (B-340), and granted; said applications were severed and granted as follows:

Texas Star Broadcasting Co. to change frequency of Station KTHT, Houston, Texas, from 1230 to 790 kc., power from 250 watts to 1 KW night, 5 KW-LS, conditions (BP-4361; Docket 7333); and

Veteran's Broadcasting Co., for new station at Houston to operate on 1230 kc., 250 watts, unlimited time (BP-4362; Docket 7336).

1220–1230 KC.

The Commission announced adoption of a **Proposed Decision** (B-343) looking toward the grant of the application of **Norfolk Broadcasting Corp.** (BP-3794; Docket 7087) for a new station in **Norfolk, Va.,** to operate on 1220 kc., 250 watts, daytime only, conditions, and the denial of the application of **Tidewater Broadcasting Corp.** (BP-4456; Docket 7390) for a new station to operate on 1230 kc., 100 watts, unlimited time, in Norfolk. (Com. Hyde voted to grant Tidewater application and to deny Norfolk Broadcasting Corp. application; Com. Durr voted to deny both applications.)

1450 KC.

The Commission also adopted **Final Decisions** in the following cases:

B-327: Granting application of **Gonzales Broadcasting Co.** (BP-4546; Docket 7432), for new station in **Gonzales, Texas,** to operate on 1450 kc., 250 watts, unlimited time, and denying applications of **Express Publishing Co.** (BP-4471; Docket 7391), **San Antonio, Texas,** and **Taylor Broadcasting Co.** (BP-4567; Docket 7433), **Taylor, Texas.**

1490 KC.

B-331: Granting application of **George Arthur Smith** (BP-4580; Docket 7489), new station in **Jackson, Tenn.,** to operate on 1490 kc., 250 watts, unlimited time, conditions, and denying applications of **Jackson Broadcasting Co.** (BP-3792; Docket 7487), and **Hub City Broadcasting Co.** (BP-4523; Docket 7488), for same facilities.

1590 KC.

The Commission announced an **Order** denying petition of **Berkshire Broadcasting Corp., Danbury, Conn.,** to vacate the Proposed Decision (B-336) and reopen the record in the hearing to receive in evidence the proof of performance filed by **Station WBRY** on January 31, 1947, for the reason that the evidence sought to be incorporated is not material or relevant to the issues involved in the proceeding in Dockets 6895 and 6897.

Oral Arguments

Scheduled for **Oral Argument** on May 28, 1947, the following:

1. Dockets 7313, 7314, 7432: **Gulf Broadcasting Co., Burton Broadcasting Co., Mobile Broadcasting Co., Mobile, Ala.;**
2. Dockets 6921, 6922: **WJPS, Inc., Evansville, Ind., Tri-State Broadcasting Corp.;**
3. Dockets 6843, 6845, 7008; **Bay State Beacon, Inc., Brockton, Mass., Cur-Nan Co., Brockton, Mass., Plymouth County Broadcasting Co., Brockton, Mass.;**
4. Dockets 7216, 7334, 7336: **Central Broadcasting Co., Eau Claire, Wisc., Lubbock County Broadcasting Co., Lubbock, Tex., Plains Radio Broadcasting Co., Lubbock, Tex.;**
5. Dockets 7367, 7483: **Abilene Broadcasting Co., Citizens Broadcasting Co., Abilene, Texas.**

Scheduled for **Oral Argument** on May 29, 1947, the following:

1. Dockets 7565, 7566: **KHTN, Inc., W. Albert Lee, Houston, Tex.;**
2. Dockets 7716, 7717: **Tri-City Broadcasting Co., Newport, Ky., Moraine Broadcasters, Inc., Dayton, Ohio;**
3. Dockets 7477, 7478: **Northern Ky. Airwaves Corp., Northern Ky. Radio Corp., Covington, Ky.;**
4. Dockets 7099, 7100: **Syndicate Theatres, Inc., Columbus, Ind., Universal Broadcasting Co., Inc., Indianapolis, Ind.;**
5. Dockets 7578; 7577: **Birney Imes, Jr., Grenada Broadcasting Co., Grenada, Miss.**

AM—Licenses for New Stations Granted

550 KC.

KMVI—Maui Publishing Co., Ltd., Wailuku, T. H.—Granted license for new station on 550 kc, 1 KW, unlimited. (BL-2358)

660 KC.

WESC—Greenville Broadcasting Co., Greenville, S. C.—Granted license for new station on 660 kc, 5 KW, daytime. (BL-2375)

670 KC.

WLAQ—News Publishing Co., Rome, Ga.—Granted license for new station on 670 kc, 1 KW, day, and to specify studio at 209 Broad St., Rome. (BL-2346)

990 KC.

KWEM—West Memphis Broadcasting Corp., W. Memphis, Ark.—Granted license for new station on 990 kc., 1 KW, day only. (BL-2333)

1120 KC.

WBCC—Broadcast Management, Inc., Bethesda, Md.—Granted license for new station on 1120 kc, 250 watts, daytime. (BL-2290)

(Continued on next page)

1230 KC.

WGLN—Glens Falls Publicity Corp., Glens Falls, N. Y.—Granted license for new station on 1230 kc, 100 watts, unlimited time. (BL-2352)

KOSF—Kelly Bell, Nacogdoches, Tex.—Granted license for new station on 1230 kc, 250 watts, unlimited time, and for change of studio to 1.55 Mi. S. of Nacogdoches Court House on U. S. 59. (BL-2373)

1340 KC.

KOLE—Port Arthur Broadcasting Co., Port Arthur, Tex.—Granted license for new station on 1340 kc, 250 watts, unlimited time. (BL-2367)

KRUX—Gene Burke Brophy, Glendale, Ariz.—Granted license for new station on 1340 kc, 250 watts, unlimited, and to specify studio location at intersection of Grand Ave. and S. 7th Ave., Glendale. (BL-2366)

1470 KC.

WCBC—Civic Broadcasting Corp., Anderson, Ind.—Granted license for new station on 1470 kc, 1 KW, daytime, and change studio location to 116 W. 12th St. (BL-2354)

1490 KC.

KXRJ—The Valley Broadcasters, Russellville, Ark.—Granted license for new station on 1490 kc, 250 watts, unlimited time. (BL-2330)

WBEO—Western Massachusetts Broadcasting Co., Pittsfield, Mass.—Granted license for new station on 1490 kc., 100 watts, unlimited. (BL-2353)

1510 KC.

WAUX—WAUK Broadcasting Co., Waukesha, Wis.—Granted license for new station on 1510 kc, 250 watts, daytime. (BL-2356)

AM—Modifications of CP's Granted

KLIK—Balboa Radio Corp., San Diego, Calif.—Granted modification of CP to change transmitter location to N. E. of center of Grantville, San Diego, and to specify studio as Imig Manor, 2223 El Cajon Blvd. (BMP-2592)

KSFA—Wilbur Courtland Fouts, Nacogdoches, Tex.—Granted modification of CP to change name of Permittee to Wilbur C. Fouts, tr/as Nacogdoches Broadcasting Co. (BMP-2557)

WFOR—Forrest Broadcasting Co., Hattiesburg, Miss.—Granted modification of CP for extension of completion date to 8-2-47. (BMP-2717)

WTVN—Washington County Broadcasting Corp., Johnson City, Tenn.—Granted modification of CP for extension of commencement and completion dates to 8-4-47 and 2-4-48, respectively. (BMP-2709)

WETB—East Tennessee Broadcasting Co., Johnson City, Tenn.—Granted modification of CP for approval of antenna, of transmitter location 1.5 miles from center of Johnson City, at Erwin State Highway and County Road, and studio location as 204 Main St. (BMP-2664)

WBT—Jefferson Standard Broadcasting Co., Charlotte, N. C.—Granted modification of CP for extension of completion date to 10-3-47. (BMP-2718)

WPWA—Lou Peller, Chester, Pa.—Granted modification of CP for approval of antenna, to change type of transmitter and for approval of transmitter and studio locations at Edgemont Road at Main St. (BMP-2514)

WCMN—Caribbean Broadcasting Corp., Arecibo, P. R.—Granted modification of CP to change type of transmitter. (BMP-2699)

KSBW—DeHaven, Hall and Oates, Salinas, Calif.—Granted modification of CP for approval of DA and to change transmitter location to near Salinas, Cal. (BMP-2689)

WHRV—Huron Valley Broadcasters, Inc., Ann Arbor, Mich.—Granted modification of CP to specify studio location as on Packard Road, east of Milan Road, approximately 4 miles east of Ann Arbor. (BMP-2700)

WOKZ—Illinois-Alton Broadcasting Co., Alton, Ill.—Granted modification of CP for approval of antenna, of transmitter location at U. S. Highway 67, approximately 1 mile N. W. of N. W. corner of City Limits, and to specify studio location as 10 E. Broadway. (BMP-2461)

KPOW—Albert Joseph Meyer, Powell, Wyo.—Granted modification of CP for extension of completion date to 9-20-47. (BMP-2703)

KGKL—KGKL, Inc., San Angelo, Tex.—Granted modification of CP for extension of commencement and completion dates to 2-6-47 and 8-6-47, respectively. (BMP-2698)

WMPS—WMPS, Inc., Memphis, Tenn.—Granted modification of CP for extension of completion date to 8-20-47. (BMP-2708)

WDEC—The Americus Broadcasting Co., Americus, Ga.—Granted modification of CP for approval of antenna, of transmitter location at McGarrah St., and specify studio location as 109 Windsor Ave., Americus. (BMP-2604)

AM—Miscellaneous Actions

W. Albert Lee, Houston, Tex.—Granted petition requesting extension of time within which to file a reply brief to the exceptions and supporting brief filed by KHTH, Inc. (Docket 7565), and the time within which Lee may file his reply brief was extended to and including May 20.

Beloit Broadcasters, Inc., Beloit, Wisc.—Granted petition for continuance of hearing in re Dockets 7964 and 8169, presently scheduled for May 12, and continued same to May 27.

Beloit Broadcasters, Inc., Beloit, Wisc.—Granted petition for leave to amend its application (BP-5617; Docket 8169), so as to add an engineering statement relative to field intensity measurements and a transmitter site option agreement.

KGKB—East Texas Broadcasting Co., Tyler, Tex.—The Commission on its own motion continued the consolidated further hearing on its application (Docket 7950) et al, presently scheduled for May 12, to May 27.

Metropolitan Broadcasting Corp., Belleville, Ill.—Denied petition for leave to amend its application (BP-5034; Docket 7843), so as to show deletion of Paul R. Richter as an officer, director and stockholder of applicant corporation, etc.

KGBC—The Galveston Broadcasting Co., Galveston, Tex.—Granted in part petition for extension of time to and including May 9, within which to file proposed findings in re applications in Docket 8090, et al.

Hillsdale Broadcasting Co., Inc., Hillsdale, Mich.—Granted petition for severance of its application (BP-5281; Docket 7941), from the proceeding involving application of Woodward Broadcasting Co., Inc. (Docket 8167)

Woodward Broadcasting Co., Detroit, Mich.—Granted petition for continuance of hearing on its application (Docket 8167) presently scheduled for May 12 at Detroit; said hearing was continued to June 11, and the Commission on its own motion, transferred the hearing to Washington.

Crest Broadcasting Co., Inc., Pascagoula, Miss.—Granted petition for waiver of rules and accepted petitioner's late appearance in re proceeding in Docket 8267.

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Granted petition for leave to intervene in the hearing on application of WCNT (Docket 8174).

Williamson Broadcasting Corp., Pikesville, Ky.—Granted petition for waiver of rules and accepted petitioner's written appearance in re its application for CP (Docket 8259).

Puritan Broadcast Service, Inc., Lynn, Mass.—Granted petition for leave to amend its application for CP (BP-5117; Docket 7802) so as to specify power of 500 watts instead of 250 watts, etc. and the amendment was accepted.

(Continued on next page)

Community Broadcasting Co., Fort Worth, Tex.—The Commission on its own motion, ordered that the hearing on application (Docket 7848), presently scheduled for May 22 at Fort Worth, be transferred to Washington, to be heard on that date.

Crescent Broadcast Corp., Shenandoah, Pa.—Granted petition insofar as it requests leave to amend its application for CP (BP-4092; Docket 6883), so as to specify frequency 980 kc, with 5 KW, unlimited time, instead of 580 kc, with 5 KW, unlimited. The amendment was accepted and application as amended, was removed from the hearing docket on the Commission's own motion. Insofar as petition requests grant of application as amended, it was denied.

The Connecticut Electronics Corp., Bridgeport, Conn.—Granted petition for waiver of rules and accepted petitioner's written appearance in re proceeding in Docket 8239.

Western Pennsylvania Broadcasting Corp., Pittsburgh, Pa.—Granted petition for leave to amend its application (BP-5344; Docket 8170), so as to show revised information as to transmitter site and main studio sites, etc.

WBET—Enterprise Publishing Co., Brockton, Mass.—Granted petition for leave to intervene in the hearing on application of Viking Broadcasting Co., Newport, R. I. (Docket 8284)

Lamar A. Newcomb, Falls Church, Va.—Granted petition for leave to amend its application (BP-5436; Docket 8026) so as to specify frequency 1220 kc instead of 840 kc, etc. The amendment was accepted and application as amended removed from the hearing docket.

KQW—Pacific Agricultural Foundation, San Jose, Calif.—Dismissed petition for leave to intervene in the hearing on application of Texas Star Broadcasting Co. (Docket 8258)

WMSA—The Brockway Co., Massena, N. Y.—Granted CP to install a new vertical antenna and mount FM antenna on top of AM tower. (BP-5552)

WBRY—American Republican, Inc., Waterbury, Conn.—Granted license to use old main transmitter at Boyden St., for auxiliary purposes with power of 1 KW, directional antenna. (BL-2376)

WLDS—Edge and Korsmeyer, Jacksonville, Ill.—Granted license for increase in power to 1 KW, and installation of new transmitter. (BL-2314)

KMOX—Columbia Broadcasting System, Inc., St. Louis, Mo.—Granted license covering installation of new transmitter and antenna and change transmitter location. (BL-2357)

WPAG—Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich.—Granted license for increase in power to 1 KW, and installation of new transmitter. (BL-2350)

KDNT—Harwell V. Shepard, Denton, Tex.—Granted license covering changes in antenna and to mount FM antenna on top of AM tower. (BL-2310)

WHEC—WHEC, Inc., Rochester, N. Y.—Granted license to use old main transmitter as an auxiliary with power of 500 watts, 1 KW-LS. (BL-2371)

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted CP to install a new auxiliary transmitter at North Warwick and 39th St., to be operated on 1000 kc., 1 KW, directional antenna, for auxiliary purposes only. (BP-6031).

KWIN—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—Granted license covering installation of new trnasmitter. (BL-2391)

WJHP—The Metropolis Co., Jacksonville, Fla.—Granted license for increase in power to 5 KW, installation of new transmitter and directional antenna for night use, and change transmitter location. (BL-2360)

WIBW—Topeka Broadcasting Association, Inc., Topeka, Kans.—Granted license covering CP to mount FM antenna on top of No. 1 element of directional antenna system. (BL-2349). Conditions.

KENO—Nevada Broadcasting Co., Las Vegas, Nev.—Granted license to cover CP which authorized installation of new vertical antenna. (BL-2362)

WCVS—WCBS, Inc., Springfield, Ill.—Granted license covering use of old main transmitter for auxiliary purposes only, with 250 watts. (BL-2412)

WHDF—Upper Michigan Broadcasting Co., Calumet, Mich.—Granted CP to install a new vertical radiator and move transmitter and studio to Houghton, Mich; conditions. (BP-5580)

Metropolitan Broadcasting Corp., Belleville, Ill.—Denied petition for review of the action of Motions Commissioner taken May 2, denying a petition filed by Metropolitan Broadcasting Corp. requesting leave to amend its application (BP-5034; docket 7843), and affirmed said action by motions officer.

Southern Broadcasting Corp., New Orleans, La.—Adopted memorandum opinion and order denying petition for reconsideration directed against the Commission's action of February 6, 1947, dismissing without prejudice the petitioner's application for CP (BP-5587) for a new station.

Ordered that the record in the consolidated hearing in the following cases, be reopened and a further hearing held in Washington on May 19, to take testimony on the issue to determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station and the character of other broadcast service available to those areas and populations:

Hampden-Hampshire Corp., Holyoke, Mass.; Pynchon Broadcast Corp., Springfield, Mass.; Atlantic Radio Corp., Boston; Bristol Broadcast Co., New Bedford, and Fairfield Broadcasting Co., Danbury, Conn.

Grenada Broadcasting Co., Grenada, Miss.; Birney Imes, Jr., Grenada, Miss.—Ordered that the exceptions heretofore filed by Grenada Broadcasting Co., in re (B-344), which proposed to deny application of Grenada (BP-4768) and grant Imes (BP-4773), be designated for oral argument before the Commission en banc on May 29, 1947. (Action taken May 8.)

Alvin E. O'Konski, Merrill, Wisc.—Denied petition requesting the Commission to set an early hearing date in the consolidated proceeding in re his application. (Docket 8206, et al)

Alvin E. O'Konski, Merrill, Wisc.—Granted petition which requests leave to amend his application (BP-5724) so as to show exact transmitter and studio sites.

Western Oklahoma Broadcasting Co., Clinton, Okla.—Granted petition for leave to amend its application (BP-5321; Docket 8264), so as to specify the frequency 1320 kc with 1 KW, daytime only, instead of 670 kc, with 250 watts, daytime. The amendment was accepted and application as amended was removed from the hearing docket.

KSKY—Sky Broadcasting Service, Dallas, Tex.—The Commission, on its own motion, removed from the hearing docket application (BP-3966; Docket 8263).

James E. Latimer and William A. Pritchett, Lake City, S. C.—Granted petition to dismiss without prejudice application (BP-5008; Docket 8243).

WKST—WKST, Inc., New Castle, Pa.—The Commission, on its own motion, removed from the hearing docket application (BP-5913; Docket 8244).

Voice of Wyoming, Inc., Laramie, Wyo.—Granted petition to dismiss without prejudice, application (BP-5532; Docket 8010).

Snowy Range Broadcasting Co., Laramie, Wyo.—The Commission, on its own motion, removed from the hearing docket application (BP-5001; Docket 7770).

Kirksville Broadcasting Co., Kirksville, Mo.—Granted petition to dismiss without prejudice application (BP-5892; Docket 8226).

Rock Creek Broadcasting Corp., Washington, D. C.—Dismissed petition for enlargement of the issues in re the consolidated proceeding on its application and that of Lamar A. Newcomb (Dockets 8027 and 8026).

Weber County Service Co., Ogden, Utah—Granted petition for leave to amend its application (BP-5462; Docket 8034), so as to make minor engineering changes.

(Continued on next page)

WKRC—Cincinnati Times-Star Co., Cincinnati, Ohio.—Granted petition for extension of time within which to file exceptions to Proposed Decision in Dockets 7401 and 6807, and the time was extended to and including June 18.

Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Dismissed petition requesting reconsideration and grant without hearing of application (BP-4289; Docket 7130).

WDSU—Stephens Broadcasting Co., New Orleans, La.—Granted petition for leave to intervene in the consolidated hearing upon applications of WJOI and WGBF (Dockets 8304 and 8305).

KAKC—Public Radio Corp., Tulsa, Okla.—Granted petition for leave to amend its application (BP-5985; Docket 8270) so as to show the correct figures on location of transmitter site, etc.

Lincoln Broadcasting Corp., Lincoln, Neb.—Dismissed petition requesting that its application (BP-4985; Docket 8370), be designated for hearing in consolidation with application of KANS (Docket 7952).

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted petition for waiver of Rules and accepted petitioner's written appearance in re application of Davenport Broadcasting Co., Inc. (Docket 8309).

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted petition for waiver of rules and accepted petitioner's written appearance in re application of Davenport Broadcasting Co., Inc. (Docket 8309).

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted petition in part for continuance of hearing presently scheduled for May 28 on its application and that of WLEU (Dockets 8160 and 6913), and the hearing was continued to June 25.

Community Broadcasting Co., Fort Worth, Tex.—Granted request for continuance of hearing on application (Docket 7848) presently scheduled for May 22, and continued same to July 21.

AM—CP Deleted

KWOB—Wonderland Broadcasting Co., Ltd., Redding, Pa. (a limited partnership composed of Roscoe J. Anderson, Kenneth G. Burkard, Harold Gebauer, Eugene T. Goldrup, Dr. O. J. Hansen, Robert Lingle, Robert Stewart and Carl A. Williams)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation. Deleted at request of applicant April 17, 1947, Commission letter April 25, 1947.

AM—Applications Accepted for Filing

560 KC.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Modification of construction permit (B2-P-3943, which authorized increase in power, new transmitter, DA-night and change in transmitter site) for extension of completion date.

570 KC.

WQQW—Metropolitan Broadcasting Corp., Washington, D. C.—License to cover modification of license (BML-1245), which authorized an increase in power.

590 KC.

KFXM—J. C. Lee and E. W. Lee, San Bernardino, Calif. (Lee Bros. Broadcasting Company)—Modification of construction permit (B5-P-4093, which authorized change in frequency increase of power, installation of new transmitter and directional antenna for day and night, and change in transmitter location) for extension of completion date.

600 KC.

WCAO—The Monumental Radio Co., Baltimore, Md.—Construction permit to make changes in the directional antenna array, install new North Tower and mount FM antenna on top.

620 KC.

WAGE—WAGE, Inc., Syracuse, N. Y.—Modification of construction permit (B1P-4098, which authorized increase in power, installation of new transmitter and change in directional antenna for night use) to specify power of 5 KW night, make change in directional antenna for night use, and to change transmitter location.

630 KC.

NEW—Georgia-Alabama Broadcasting Corp., Columbus, Ga. (P. O. 17 West 12th St., Columbus, Ga.)—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 1 KW, and daytime hours of operation.

640 KC.

NEW—Liberty Broadcasting Corp., Rochester, N. Y.—Construction permit for a new standard broadcast station to be operated on 650 kc., power of 5 KW, directional antenna and daytime hours of operation. Amended to change frequency from 650 to 640 kc., and hours of operation from daytime to limited time.

750 KC.

KSEO—Democrat Printing Co., Durant, Okla. (a partnership, composed of R. F. Story and Bennett Story)—License to cover construction permit (B3-P-4897), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

NEW—Montebello Broadcasting Co., Montebello, Calif. (Albert M. Carmona, Frank J. Fontine and John R. Parsons, a partnership) (P. O. 4821 Lexington Ave., Los Angeles 27, Calif.)—Construction permit for a new standard broadcast station to be operated on 750 kc., power of 250 watts and daytime hours of operation.

780 KC.

WCKB—North Carolina Central Broadcasters, Inc., near Dunn, N. C.—Modification of license to change hours of operation from daytime to limited time.

NEW—Blue Ridge Broadcasting Co., Inc., Seneca, S. C. (P. O. Box 443, Seneca, S. C.)—Construction permit for a new standard broadcast station to be operated on 780 kc., power of 250 watts and daytime hours of operation.

790 KC.

WTOA—Thomasville Broadcasting Co., Thomasville, N. C. (George W. Lyles, Sr., Russell F. Van Landingham and George W. Lyles, Jr., a partnership)—Modification of construction permit (B3-P-5206, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna transmitter site and specify studio location.

1270 KC.

NEW—The Fairfield Broadcasting Co., Lancaster, Ohio—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 1 KW, and daytime hours of operation.

1340 KC.

NEW—Oroville Mercury Co., Oroville, Calif. (Dan L. Beebe, and Floyd L. Sparks and Betty Clark Sparks, his wife, a partnership)—Construction permit for a new standard

(Continued on next page)

broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

1400 KC.

WNOC—Norwich Broadcasting Co., Norwich, Conn. (a partnership composed of H. Ross Perkins and J. Eric Williams)—Voluntary assignment of license to H. Ross Perkins d/b as Norwich Broadcasting Co.

1420 KC.

WSBA—Susquehanna Broadcasting Co., North of York, Pa.—Construction permit to change frequency from 900 kc. to 1420 kc., power 1 KW to 5 KW, hours of operation from daytime to unlimited, install new transmitter and directional antenna for night use.

1500 KC.

KSTP—KSTP, Inc., St. Paul, Minn.—Modification of license for temporary use of Minneapolis, Minn., studio as main studio.

1590 KC.

KSJO—Santa Clara Broadcasting Co., San Jose, Calif.——Request for SSA to operate on 1590 kc., with power on 250 watts night, 1 KW day, unlimited hours with non-directional antenna, until directional antenna is installed for night use, or period not to exceed August 31, 1947.

FREQUENCY MODULATION

FM—Docket Cases

The Commission announced adoption of its **Proposed Decision** (B-362) looking towards the grant of the following applications for Class B FM stations in the Boston, Mass., area, subject to assignment of a specific channel at a later date. Power given is effective radiated power; antenna height is height above average terrain.

1. **Columbia Broadcasting System**—20 KW; antenna 495 ft. (BPH-79; Doc. 6024);
2. **Matheson Radio Co., Inc.**—20 KW; antenna 500 ft. (BPH-142; Doc. 6991);
3. **The Yankee Network, Inc.**—19.5 KW; antenna 510 ft. (BPH-590; Doc. 6693);
4. **Unity Broadcasting Corp. of Mass.**—20 KW; antenna 500 ft.; conditions (BPH-687; Doc. 6694);
5. **Templetone Radio Manufacturing Corp.**—20 KW; antenna 500 ft.; conditions (BPH-689; Doc. 6995);
6. **Massachusetts Broadcasting Co.**—20 KW; antenna 350 ft.; conditions (BPH-685; Doc. 6996); and
7. **Harvey Radio Laboratories, Inc.**—20 KW; antenna 500 ft.; conditions (BPH-628; Doc. 6697).

At the same time the Commission proposes to deny the application of **The Northern Corporation** (BPH-668; Doc. 6992). Another applicant, **Raytheon Manufacturing Company** (BPH-367; Doc. 6998) withdrew its application.

FM—Conditional Grants

The following were authorized conditional grants, for type of station indicated, subject to further review and approval of engineering details:

Radio Station KRMD, Shreveport, La.—Class B. (BPH-1224)

Warren Broadcasting Corp., Glens Falls, N. Y.—Class A. (BPH-1213)

Port Arthur College, Port Arthur, Tex.—Class B. (BPH-1223)

Tribune Publishing Co., Tacoma, Wash.—Class B. (BPH 1209)

FM—Construction Permits

The following were authorized construction permits; conditions. (Note: power given is effective radiated power; antenna height is height above average terrain, and channel to be assigned after final proceedings in Docket 6768):

McClatchy Broadcasting Co., Bakersfield, Calif.—Class B; 9.3 KW; 295 feet. (BPH-564)

The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Calif.—Class A; 1 KW; 180 feet. (BPH-663)

The following were authorized construction permits in lieu of previous conditions; channel to be assigned after final proceedings in Docket 6768:

WQQW-FM—Metropolitan Broadcasting Corp., Washington, D. C.—Class B; 20 KW; 500 feet. (BMPH-249)

KFVS-FM—Oscar C. Hirsch, Cape Girardeau, Mo.—Class B; 2.5 KW; 270 feet. (BPH-847)

KCST—The Kansas City Star Co., Kansas City, Mo.—Class B; 230 KW; 830 feet. (BPH-356)

KWGD—Globe-Democrat Publishing Co., St. Louis, Mo.—Class B; 218 KW; 500 feet. (BMPH-176)

KGFF-FM—KGFF Broadcasting Co., Shawnee, Okla.—Class B; 7.8 KW; 400 feet. (BMPH-337)

KFAB-FM—KFAB Broadcasting Co., Lincoln, Neb.—Class B; 11 KW; 330 feet. (BPH-601)

KPRC-FM—The Houston Post Co., Houston, Tex.—Class B; 57 KW; 320 feet. (BMPH-335)

FM—License Renewal

KDKA-FM—Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—Granted renewal of license for the period ending June 1, 1948.

FM—Modifications of CP's Granted

KERA—A. H. Belo Corp., Dallas, Tex.—Granted modification of CP for extension of completion date to 10-10-47. (BMPH-340)

WKRS—Keystone Printing Service, Inc., Waukegan, Ill.—Granted modification of CP for extension of completion date to 8-13-47. (BMPH-344)

WABX—Harold O. Bishop, Harrisburg, Pa.—Granted modification of CP to change completion date to 8-30-47. (BMPH-290)

WSMB-FM—WSMB, Inc., New Orleans, La.—Granted modification of CP for extension of completion date to 7-28-47. (BMPH-339)

WHLD-FM—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Granted modification of CP for extension of completion date to 12-1-47. (BMPH-342)

WCVS-FM—WCBS, Inc., Springfield, Ill.—Granted modification of CP for extension of commencement and completion dates to 4-28-47 and 10-28-47, respectively. (BMPH-332)

WKNB-FM—The New Britain Broadcasting Co., New Britain, Conn.—Granted modification of CP for extension of completion date to 7-23-47. (BMPH-338)

WKPB—Knoxville Publishing Co., Knoxville, Tenn.—Granted modification of CP to change commencement and completion dates to 5-26-47 and 11-26-47. (BMPH-293)

WSAV-FM—WSAV, Inc., Savannah, Ga.—Granted modification of CP for extension of commencement and completion dates to 4-21-47 and 10-21-47, respectively. (BMPH-333)

WJLK—Asbury Park Press, Inc., Asbury Park, N. J.—Granted modification of CP for extension of completion date to 9-26-47. (BMPH-334)

WMIX-FM—Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Granted modification of CP for extension of completion date to 8-18-47. (BMPH-345)

(Continued on next page)

WFHR-FM—William F. Huffman, Wisconsin Rapids, Wisc.—Granted modification of CP for extension of commencement and completion dates of new FM station to 5-25-47 and 9-25-47, respectively. (BMPH-343)

WOL-FM—Cowles Broadcasting Co., Washington, D. C.—Granted modification of CP for extension of completion date to 8-26-47. (BMPH-347)

KCFM—KCMO Broadcasting Co., Kansas City, Mo.—Granted modification of CP to extend completion date of FM station to 8-18-47. (BMPH-280)

WJTN-FM—James Broadcasting Co., Inc., Jamestown, N. Y.—Granted modification of CP to extend completion date of FM station to 8-16-47. (BMPH-353)

WHP-FM—WHP, Inc., Harrisburg, Pa.—Granted modification of CP to extend completion date of FM station to 8-26-47. (BMPH-350)

WAGE-FM—WAGE, Inc., Syracuse, N. Y.—Granted modification of CP for extension of commencement date to 5-18-47 and completion date to 11-18-47. (BMPH-351)

WPAM-FM—Miners' Broadcasting Service, Pottsville, Pa.—Granted modification of CP to extend completion date of FM station to 8-25-47. (BMPH-352)

WTPS-FM—The Times-Picayune Publishing Co., New Orleans, La.—Granted modification of CP to change studio location and type of transmitter. (BMPH-286)

WNXC—Northwestern Ohio Broadcasting Corp., Lima, Ohio—Granted modification of CP to change type of transmitter. (BMPH-227)

FM—Miscellaneous Actions

Reading Broadcasting Co., Reading, Pa.—Granted petition for leave to amend its FM application (BPH-522; Docket 8293) so as to supply complete engineering information as requested by the Commission.

Keystone Broadcasting Corp., Harrisburg, Pa.—Granted petition for leave to amend its FM application (Docket 8291) so as to supply complete engineering information as requested by the Commission.

WDEL, Inc., Wilmington, Del.—Granted petition for leave to amend its FM application (Docket 7834) so as to supply complete engineering information as requested by the Commission.

York Broadcasting Co., York, Pa.—Granted petition for leave to amend its FM application (Docket 8292) so as to supply complete engineering information as requested by the Commission.

Radio Projects, Inc., Newark, N. J.—Dismissed as moot petition for extension of time within which to file proposed findings in re New York FM applications.

Frequency Broadcasting Corp., Brooklyn, N. Y.—Dismissed petition requesting extension of time within which to file proposed findings in re New York FM applications.

WDEL, Inc., et al, Wilmington, Del.—Granted joint petition requesting continuance of consolidated FM hearing presently scheduled for May 12 in re its application (Docket 7834, et al), and said hearing was continued to May 26.

Kingston Broadcasting Corp., Kingston, N. Y.—Dismissed petition requesting extension of time within which to file motion for reconsideration of the Commission's action of Feb. 14, making a conditional partial grant of FM application. (BPH-725)

FM—Applications Accepted for Filing

KMYC-FM—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Modification of construction permit (B5-PH-999, which authorized a new FM broadcast station) to change ERP to 5 KW; make changes in antenna system and change commencement and completion dates.

KIMV—Hutchinson Publishing Co., Hutchinson, Kans.—Modification of construction permit (B4-PH-349, which authorized a new FM broadcast station) for extension of completion date.

WHYN-FM—The Hampden-Hampshire Corp., Holyoke, Mass.—Voluntary relinquishment of control of licensee corporation from Minnie R. Dwight to William Dwight. (150 shares of common stock.)

KWBR-FM—Warner Brothers, Oakland, Calif. (S. W. Warner & E. N. Warner)—Modification of construction permit (B5-PH-552, which authorized a new FM broadcast station) for extension of completion date.

KTRN—Times Publishing Co. of Wichita Falls, Wichita Falls, Tex.—Modification of construction permit (B3-PH-204, as modified, which authorized a new FM broadcast station) for extension of completion date.

KVEC-FM—The Valley Electric Co., San Luis Obispo, Calif. (Christina M. Jacobson)—Modification of construction permit (B5-PH-759, which authorized a new FM broadcast station) to change effective radiated power to 16.7 KW, make changes in antenna system and change completion date.

WSOY-FM—Commodore Broadcasting, Inc., Decatur, Ill.—Modification of construction permit (B4-PH-162, which authorized a new FM broadcast station) for extension of completion date.

WSAR-FM—The Fall River Broadcasting Co., Inc., Fall River, Mass.—Modification of construction permit (B1-PH-273, which authorized a new FM broadcast station) for extension of completion date.

KRCC—Contra Costa Broadcasting Co., Richmond, Calif.—Modification of construction permit (B5-PH-347, which authorized a new FM broadcast station) for extension of completion date.

KENO-FM—Nevada Broadcasting Co., Las Vegas, Nev. (Maxwell Kelch and Laura Belle Kelch)—Modification of construction permit (B5-PH-278, which authorized a new FM broadcast station) for extension of completion date.

KPRA—Pacific Radio Advertising Service, Portland, Ore. (A partnership composed of John C. Egan and Wilbur J. Jerman)—Modification of construction permit (B5-PH-503, which authorized a new FM broadcast station) for extension of completion date.

WGBC-FM—The Gable Broadcasting Co., Altoona, Pa.—Modification of construction permit (B2-PH-543, which authorized a new FM broadcast station) for extension of completion date.

WMFM—James A. Hardman, North Adams, Mass.—Modification of construction permit (B1-PH-452, which authorized a new FM broadcast station) for extension of completion date.

WHVA—Poughkeepsie Newspapers, Inc., Poughkeepsie, N. Y.—Modification of construction permit (B1-PH-260, as modified, which authorized a new FM broadcast station) for extension of completion date.

WSBA-FM—Susquehanna Broadcasting Co., York, Pa.—Modification of construction permit (B2-PH-160, as modified, which authorized a new FM broadcast station) for extension of completion date.

WCAC—Wilton E. Hall, Anderson, S. C.—Modification of construction permit (B3-PH-568, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WRUN—Rome Sentinel Co., Utica, N. Y.—Modification of construction permit (B1-PH-958, which authorized a new FM broadcast station) for extension of completion date.

WABF—Metropolitan Broadcasting & Television, Inc., New York, N. Y.—Modification of construction permit (B1-PH-754, which authorized a change in new FM broadcast station) for extension of completion date.

WJLK—Asbury Park Press, Inc., Asbury Park, N. J.—Involuntary transfer of control from J. Lyle Kinmonth, deceased to Mabel Brazer Kinmonth and Asbury Park National Bank and Trust Co. (900 shares common stock.)

WROW-FM—Hudson Valley Broadcasting Co., Inc., Albany, N. Y.—Modification of construction permit (B1-PH-

(Continued on next page)

939, which authorized a new FM broadcast station) to change transmitter site to 1.5 miles north of Wolf Hill, N. Y., make changes in antenna system and change commencement and completion dates.

NEW—Tropical Broadcasting Co., Miami, Fla. (P. O. 2034 16th St., N. W., Washington, D. C.)—Construction permit for a new (Class B) FM broadcast station to be operated on frequency to be assigned by FCC and ERP of 16.2 KW.

WKRG-FM—Giddens & Rester, Mobile, Ala. (a partnership composed of Kenneth R. Giddens and T. J. Rester)—Modification of CP (B3-PH-798 as modified) which authorized a new FM broadcast station for extension of completion date.

KARM-FM—KARM, The George Harm Station, Fresno, Calif.—Modification of construction permit (B5-PH-638 which authorized a new FM broadcast station) for extension of completion date.

WRBL-FM—Columbus Broadcasting Co., Columbus, Ga. (J. W. Woodruff, J. W. Woodruff, Jr., and E. B. Cartledge, Jr.)—Modification of construction permit (B3-PH-677 as modified) which authorized a new FM broadcast station, for extension of completion date.

95.1 Mc.—#236

WAVE-FM—WAVE, Inc., Louisville, Ky.—Modification of CP (B2-PH-329 as modified) which authorized a new FM broadcast station, to change transmitter site to 334 East Broadway Louisville, Ky., change type of transmitter and antenna system; change frequency to Channel 236, 95.1 mc.; effective radiated power to 14.9 KW; antenna height above average terrain to 302 feet and change commencement and completion dates.

97.3 Mc.—#247

NEW—Evangeline Broadcasting Co., Inc., Lafayette, La. (P. O. American Life Insurance Building)—Construction permit for a new (Class B) FM broadcast station to be operated on 97.3 mc., ERP of 14.22 KW and antenna height above average terrain 222.4 feet.

102.1 Mc.—#271

NEW—Nonpareil Broadcasting Co., Council Bluffs, Ia.—Construction permit for a new (Class B) FM broadcast station to be operated on frequency 102.1 mc., Channel 271, and ERP of 371.9 KW. Amended to change frequency from Channel 271, 102.1 mc., to Channel 300, 107.9 mc.

To Be Assigned by FCC

NEW—Santa Monica Broadcasting Co., Santa Monica, Calif. (P. O. 5525¼ Carlton Way (Temporary), Hollywood 28, Calif.)—Construction permit for a new (Class A) FM broadcast station to be operated on frequency to be assigned by FCC, ERP of 392 watts, and antenna height above average terrain —55 feet.

NEW—Alvin E. O'Konski, Merrill, Wisc. (P. O. 1009 House Office Bldg., Washington, D. C.)—Construction permit for a new (Class A) FM broadcast station to be operated on frequency to be assigned by FCC and ERP of 337 watts.

NEW—Empire Newspapers-Radio, Inc., Endicott, N. Y. (P. O. 911 East Main Street)—Construction permit for a new (Class A) FM broadcast station to be operated on frequency to be assigned by FCC and ERP of 825 watts.

Rahall Broadcasting Co., Inc., Beckley, W. Va.—Construction permit for a new (class B) FM broadcast station to be operated on frequency to be assigned by FCC and ERP of 20 KW and antenna height above average terrain 499 feet.

NEW—Virgil Edward Otto and Robert Charles Meissner d/b as Commander Industries, Oak Park, Ill. (P. O. 3700 West Roosevelt Road, Chicago, Ill.)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 730 watts. Amended to change frequency from "to be assigned by FCC" to Channel 252, 98.3 mc.

NEW—Coastal Broadcasting Co., Inc., Bay Shore, N. Y.—Construction permit for a new (Class A) FM broadcast station to be operated on frequency to be assigned by FCC and ERP of 195 watts.

FM—Applications Returned

KGRI—Goggan Radio Sales, Henderson, Tex. (a partnership composed of Benjamin F. Goggan, Jr., and Howard E. Dennis)—Voluntary assignment of construction permit to Henderson Broadcasting Corp. Returned May 12, 1947, incomplete.

The Community Broadcasting Co., Inc., Columbus, Ohio—Construction permit for a new (Class A) FM broadcast station to be operated on frequency to be assigned by FCC. Returned May 12, 1947. Program analysis and Engineering information not submitted.

FM—Applications Dismissed

Herald and Globe Ass'n, Rutland, Vt.—Granted request to vacate conditional grant for a new Class B station (BPH-1026), and said application was dismissed without prejudice.

Charleston Broadcasting Co., Clarksburg, W. Va.—Construction permit for a new (metropolitan) FM broadcast station. Dismissed April 16, 1947 per request attorney, April 1, 1947.

TELEVISION

TV—Docket Cases

The Commission adopted a **Final Decision** in the following cases:

B-349: Granting the following four applications for new television stations in the New York-Northeastern New Jersey Metropolitan District:

Bamberger Broadcasting Service, Inc. (Channel No. 9) (BPCT-15);

Bremer Broadcasting Corp. (Channel No. 13) (BPCT-57);

American Broadcasting Co., Inc. (Channel No. 7) (BPCT-79); and

News Syndicate Co., Inc. (Channel No. 11) (BPCT-83).

The application of **Debs Memorial Radio Fund, Inc.** (BPCT-116; Docket 7250) is denied; another applicant, **WLIB, Inc.** (BPCT-114; Doc. 7248) withdrew. (Commissioner Durr dissenting in part, voting to grant Debs Memorial Radio Fund, Inc., and deny News Syndicate, Inc.)

TV—Actions

WNBY—National Broadcasting Co., Inc., New York City—Granted modification of construction permit for extension of completion date to 12-1-47. (BMPCT-61)

WTCN-TV—Minneapolis Broadcasting Corp., Minneapolis, Minn.—Granted modification of construction permit for extension of commencement date to 6-3-47 and completion date to 12-31-47. (BMPCT-59)

WRTV—Maison Blanche Co., New Orleans, La.—Granted modification of construction permit for extension of completion date to 3-16-48. (BMPCT-58)

Daily News Television Co., Philadelphia, Pa., and Pennsylvania Broadcasting Co., Philadelphia, Pa.—Designated for hearing in a consolidated proceeding the application of Daily News (BPCT-119) and application of Pennsylvania Broadcasting Co. (BPCT-185), both requesting a new station in Philadelphia, to operate on the same and only unassigned television channel allocated to the Philadelphia metropolitan area.

Allen B. DuMont Labs., Inc.; Paramount Pictures, Inc.—Extended for 90 days, from May 18, the time in which to request hearing with respect to Commission's January 16th dismissal of DuMont applications for new commercial television stations in Cincinnati and Cleveland, and applications of Interstate Circuits, Inc.; New England Theaters, Inc., and United Detroit Theaters Corp. for stations at Dallas, Boston and Detroit respectively, which are meanwhile retained in the pending files.

(Continued on next page)

WPEN-TV—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit to extend completion date to 11-30-47. (BMPCT-60)

TV—Applications Accepted for Filing

WWHB—The Wm. H. Block Co., Indianapolis, Ind.—Modification of construction permit (B4-PCT-126, which authorized a new commercial television broadcast station) for extension of completion date.

WOI-TV—Iowa State College of Agriculture and Mechanic Arts, Ames, Ia.—Modification of construction permit (BPCT-120, which authorized new commercial television broadcast station) for change of transmitter location and change antenna system.

MISCELLANEOUS BROADCAST

New Noncommercial Educational CP Granted

Seton Hall College, South Orange, N. J.—Granted construction permit for a new station. Frequency to be assigned; 250 watts. (BPED-78)

Applications

Experimental Dismissed

Bendix Aviation Corp.—Dismissed application (3533-PE-B; docket 7949) for an experimental class 2 portable radio station for developing and testing an automatic warning system for oil field pumping equipment.

Noncommercial Educational

WBKY—University of Kentucky, Beattyville, Ky.—License to cover construction permit (B2-PED-75) which authorized noncommercial educational broadcast station.

KOKU—State University of Oklahoma, Norman, Okla.—Modification of CP (B3-PED-41 as modified which authorized a new noncommercial educational broadcast station) for extension of completion date.

WDTR—The Board of Education of the City of Detroit, Detroit, Mich.—Modification of construction permit (B2-PED-34 as modified) which authorized a new noncommercial educational broadcast station, for extension of completion date.

WBGO—The Board of Education of Newark in the County of Essex, Newark, N. J.—Modification of construction permit (B1-PED-50, as modified) which authorized a new noncommercial educational broadcast station for extension of completion date.

Remote Pickup

NEW—American Broadcasting Co., Inc., area of Chicago, Ill.—Construction permit for a new remote pickup broadcast station to be operated on 152-162 mg., band to be assigned by the Commission, power of 30 watts; emission, special for FM, and unlimited hours of operation.

NEW—Bamberger Broadcasting Service, Inc., area of New York, N. Y.—Construction permit for a new remote pickup broadcast station to be operated on 153.05 mc., power of 15 watts, and emission special for FM; hours of operation in accordance with Section 4.403.

NEW—Bamberger Broadcasting Service, Inc., area of New York, N. Y.—Construction permit for a new remote pickup broadcast station to be operated on 153.05 mc., power of 50 watts, emission special for FM, and hours of operation in accordance with Section 4.403.

NEW—KFAB Broadcasting Co., area of Omaha, Nebr.—Construction permit for a new remote pickup broadcast station to be operated on 1646, 2090, 2190 and 2830 kc., power of 50 watts, A3 emission, and hours of operation in accordance with Section 4.403.

WOGR—Ashbacker Radio Corp., area of Muskegon, Mich.—Modification of construction permit (BPRY-324, which authorized a new remote pickup broadcast station) for extension of completion date.

Federal Trade Commission Actions

Complaint

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Jackson Research Laboratories—False and misleading advertising of an insecticide designated "D.P.T." is charged in a complaint issued by the Commission against Walter B. Jackson, trading as Jackson Research Laboratories, with his principal place of business located in Houston, Texas, and branch offices in St. Louis and New Orleans. (5493)

Stipulations

Aluminum Products Co. and its wholly-owned subsidiary, Stainless Steel Products Corp., both of La Grange, Ill., entered into a stipulation with the Commission to stop making certain representations with respect to health benefits and economies resulting from use of their stainless steel kitchenware. (7604)

Instant Products Corp.—The Commission accepted from Instant Products Corp., Spencer, Iowa, and its officers, a stipulation to cease and desist from certain representations with respect to the composition and properties of a compound used for sealing leaks in automobile radiators and similar articles. (7605)

Cease and Desist Order

Spinnerin Yarn Co., Inc.—The Commission has ordered Spinnerin Yarn Co., Inc., 230 Fifth Ave., New York, to stop misrepresenting the place of origin of hand knitting yarns and the fibers or materials of which they are made. (5280)

Complaints Dismissed

Benson & Hedges—The Commission dismissed without prejudice its complaint charging Benson & Hedges, 435 Fifth Ave., New York, with falsely representing that certain brands of cigarettes it sells are of English origin and manufacture. The action was taken after the corporation executed a stipulation to cease and desist from practices challenged by the complaint. (5312)

Steri-Seal—The Commission dismissed without prejudice its complaint charging Dorman E. Hamiel and Dorman E. Hamiel II, trading as Steri-Seal, 329 East Long St., Columbus, Ohio, with misrepresentation in connection with the sale of devices designated Steri-Seal for use as caps on nursing bottle nipples. NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 21, May 26, 1947

Miller, In Statement To Congress, Cites Blue Book As "Star Chamber" Procedure

The FCC Blue Book constitutes "Star Chamber" procedure of "government by intimidation," Justin Miller, NAB president, charges in a statement which has been filed with Congress.

The statement was included in a letter to Representative Harris Ellsworth (R) Oregon, who asked for the broadcasters' opinions of the Blue Book, after the FCC had presented each member of the House Committee on Interstate and Foreign Commerce with a copy of its report on "Public Service Responsibility of Broadcast Licensees." Congressman Ellsworth is a member of the House Committee.

"Within the *proper scope of its (the Commission's) authority*, there is a tremendous task to be done which is now being well done," Judge Miller said. "Within this area of its proper authority, Chairman Denny, other Commissioners and members of the Commission staff are now working with me and with the broadcasters, generally, on a very friendly and cooperative basis."

The NAB executive pointed out, however, that since the FCC "has not repudiated its Blue Book or withdrawn its assertions of undelegated power" he felt it necessary "to define the issues and present the case of the broadcasters" and insisted "that the Commission's proper duties could be better performed—at less expense"—if the FCC limited itself to authorized duties.

Broadcasters, with few exceptions, united in opposing the Commission's implications, Judge Miller pointed out.

Striking at the Commission's report as dangerous "statements of philosophy destructively inconsistent with a free medium of speech," the NAB president challenged the suggestion that the Blue Book is "no more than an effort

(Continued on page 426)

On The Inside

A bill introduced by Sen. Joseph R. McCarthy (R) of Wisconsin last week proposed to deny members of Congress and their wives from holding radio station licenses. (p. 429)

NAB President Justin Miller, addressing the Congress of the Daughters of the American Revolution, warned against the over-reaching of administrative "star-chamber" government. (p. 427)

Figures on radio set production, released by RMA, show an increase of 47 percent in FM-AM receiver output during April over March. (p. 429)

Hearings started on Friday on a copyright bill which would enable musicians to get a copyright on recorded performances, in addition to the copyright of the composer. (p. 428)

The FCC has scheduled an engineering conference to discuss the feasibility of sharing television channels with non-Government fixed and mobile services. (p. 427)

NAB Board Approves Network Associate Memberships, Long-Term BMB, AFRA-Ind. Talks

In an action-packed, two-day meeting at Washington last week, the NAB Board of Directors:

¶ Approved a by-law revision changing network memberships in the NAB from "active" to "associate."

¶ Received from ABC acceptance of an invitation to join the Association as an associate member.

¶ Admitted more than a hundred additional stations to membership in the NAB.

¶ Gave enthusiastic support to the Broadcast Measurement Bureau as a standard-setting body for measuring U. S. station and network audiences.

¶ Appropriated funds for a second study of listener attitudes toward radio similar to the one recently completed by the National Opinion Research Center.

¶ Reversed the present schedule for district (or area) meetings and the annual NAB convention, directing that, beginning in 1948, the conventions be held in the Spring and the regional meetings in the Fall.

¶ Approved appointment by NAB President Justin Miller of four station representatives to serve—within certain policy limitations—on the AFRA-industry liaison committee.

BMB

In a resolution giving support to BMB and commending the Bureau for its "outstanding work" in developing the initial nationwide audience survey, which has been completed, the NAB Board urged immediate industry support for Study Number 2.

The resolution will be presented to the Board of Directors of BMB when it meets in New York in July. The latter board is made up of seven members each from the NAB, the American Association of Advertising Agencies and the Association of National Advertisers.

In order to "allow sufficient time" to prepare for

ROBERT K. RICHARDS *Director of Public Relations*
ARTHUR C. STRINGER *Director of Special Services*

the second study, the NAB Board, in its resolution, requested that BMB conduct its next study in 1949, rather than in 1948 as originally projected.

Since April 1, BMB has received subscriptions from 120 broadcasters for participation in Study Number 2. The first study was completed after two years "spade work," during which time 710 stations, four national networks and ten regional networks subscribed.

Hugh Feltis, president of BMB, predicted that the second study might be supported by "over 1000" subscribers, in light of the increased number of stations on the air.

During the next few weeks, Mr. Feltis will meet with various standing committees of the Bureau to develop plans for the next study. These committees also will examine the areas in which readjustments will be made pursuant to the recommendation that the next measurement be made in 1949. These reports will be submitted, with the NAB resolution, to the BMB Board for final action.

The first BMB study of broadcast audience was officially launched in March, 1946, with the mailing of ballots throughout the nation. BMB officially was incorporated a year earlier, in January, 1945. Cost of the first study was over $1,000,000.

The resolution adopted by the NAB Board follows in full:

> The Board of Directors of the National Association of Broadcasters enthusiastically endorses and commends BMB for its outstanding work in the preparation and issuance of its first nation-wide study of station and network audiences.
>
> In light of the success of Study #1, we urge immediate and wholehearted Industry support of Study #2 and recommend establishment of a long-range plan whereby nation-wide studies are made at regular intervals and the continuing services of BMB are assured.
>
> In order to allow sufficient time for this plan and to enlist station support on a permanent basis, the NAB Board requests the BMB Board to change the date of the next Study from 1948 to 1949. BMB is proving itself to stations, agencies and advertisers and now deserves a permanent place in the Industry.
>
> The NAB Board offers the services of its members for consultation with the BMB Board in helping to establish a long-range financial plan to make possible the future operation of BMB to the end that the maximum number of stations will participate in BMB.

Memberships

The Board-approved by-law revision altering the status of network memberships will be presented immediately to the entire NAB membership for a referendum vote, required to amend the Association's by-laws. CBS, MBS, and NBC, who are currently active members of the NAB, informed the Board that they would accept reclassification of their memberships and become associate members. Pending the membership vote on the proposed by-law revision, all three networks will continue as active members.

At the same time, a telegram from ABC President Mark Woods to NAB President Justin Miller accepted an invitation to join the Association as an associate member. Thus, for the first time in a number of years, all of the national networks will be members of NAB.

The revised by-law article governing membership in the NAB, which also calls for certain changes in membership eligibility for groups of stations jointly owned, reads:

ARTICLE III

MEMBERSHIP

Section 1. CLASSES OF MEMBERSHIP. The members of this Association shall consist of two classes, active and associate.

A. ACTIVE DEFINITION. Any individual, firm or corporation which is engaged in the operation of a broadcasting station or which holds a construction permit for such a station within the United States or its dependencies shall, subject to the approval of the Board of Directors as hereinafter provided, be eligible to active membership in the Association to the extent of one membership for each station which it operates; provided, where an individual, firm or corporation operates two or more stations he or she shall be ineligible for membership for the lesser station or stations with respect to dues classification, as hereafter provided, unless the larger station or stations with respect to dues classification is in membership.

Whenever active membership is in name of a firm or corporation, such firm or corporation shall certify to the Secretary-Treasurer of the Association the name of an owner, partner, an officer, or an executive whose time is devoted principally to the broadcasting business of such firm or corporation and such individual may represent, vote and act for the member.

Each active member shall be entitled to one vote for each active membership and shall be entitled to participate in all affairs of the Association.

B. ASSOCIATE DEFINITION. Any individual, firm or corporation engaged in any business or profession connected with broadcasting but not such as to come within the requirements for active membership shall, subject to the approval of the Board of Directors, be eligible to associate membership in the Association. An associate member shall not be entitled to any vote (*except as a member of a committee to which he has been duly appointed*).

Study of Listener Attitudes

Field work on the new study to measure, on a nation-wide scale, the public's likes and dislikes about radio will be conducted this year, according to the schedule laid out by the NAB Board. This portion of the undertaking will be financed by a $15,000 appropria-

(Continued on next page)

tion set aside at this meeting. It is expected that publication of results will take place in 1948.

The first study of this type was completed early last year by the National Opinion Research Center of the University of Denver. Results were published in a book by Dr. Paul Lazarsfeld titled "The People Look at Radio."

AFRA-Industry Committee

Having reaffirmed its opposition to the secondary boycott "in any form," the NAB Directors made this unalterable policy a limitation within which the NAB appointees on the AFRA-Industry Committee must function. Under this arrangement AFRA and network representatives will be joined in their studies of union-industry problems by four station representatives named by NAB President Miller. Action on this matter had been deferred by the Board at its January meeting until a special five-man committee of broadcasters could study the issues in detail.

This committee, composed of Chairman John J. Gillin, Jr., WOW, representing NBC affiliates; Roger Clipp, WFIL, representing ABC affiliates; John Elmer, WCBM, Baltimore, representing MBS affiliates; E. E. Hill, WTAG, representing CBS affiliates; and Herbert Petty, WHN, representing non-affiliated stations, submitted the following recommendations which received the approval of the Board:

I. The Committee recommends that the Board of Directors authorize the appointment by the President of NAB of one representative from each of four broadcasting stations, subject to the following terms and conditions:

  (a) That the representatives thus appointed be at all times guided and restricted by all Employee-Employer relations policies expressed in formal resolutions of the NAB Board of Directors, including unalterable opposition to the secondary boycott in any form.

  (b) That authority of the Industry-AFRA Committee provided for in the Code of Fair Practices for commercial broadcasting shall be limited to the consideration and study of matters with respect to the relations existing between management and employees who are members of AFRA.

  (c) That no reports concerning such studies of the Industry-AFRA Committee shall be binding upon NAB.

  (d) That as a general principle the following procedure be adopted with respect to labor negotiations in the broadcasting industry:

    1. The networks and the Director of the Employee-Employer Relations Department shall establish methods by which information pertinent to the industry concerning pending or prospective labor negotiations shall be made available to the Employee-Employer Relation Committee.

    2. Whenever it is considered desirable and practicable by the Chairman of the Employee-Employer Relations Committee and the President of NAB, the Employee-Employer Relations Committee shall be convened for the purpose of being fully informed on the significant developments in pending or prospective negotiations between the networks and unions.

    3. That the Employee-Employer Relations Committee shall communicate, through the President of NAB, to the Board of Directors such information as to the progress of all negotiations as will, in their opinion, be helpful to the industry.

    4. That the three foregoing specifications of procedure shall be applicable to pending and prospective negotiations affecting (a) network-owned and operated stations, (b) network affiliated stations, and (c) non-affiliated stations.

II. It is the consensus of the Committee that the interests of the non-affiliated stations are adequately protected by the machinery set up through which decisions of the Industry-AFRA Committee must be reviewed and approved by the NAB Board of Directors.

It is the further view of the Committee that the inclusion in any contract of the "most favored nations" clause is inimical to the interests of the industry.

White, Wolverton Introduce Legislation Revising Communications Act

A complete revision of the Communications Act was introduced in both houses of Congress on Friday afternoon. The Senate Bill was proposed by Wallace H. White (R), Maine, while the House Bill was introduced by Charles A. Wolverton (R), New Jersey.

An analysis of the proposed legislation is published in a special supplement to the NAB *Legislative Digest* mailed to Association membership on Friday.

Membership Meetings

The annual NAB conventions will be held in the Spring beginning next year, and regional meetings will be held in the Fall. This reversal of schedule was called for by the Board to enable NAB officials to spend more time in the Capital during the busy Spring period.

This change will not affect the plans for the 1947 convention. It will be held at Atlantic City, September 15, 16, 17, and 18, with some pre-convention activity scheduled for Sunday, September 14.

AM-FM Membership Dues

In cases where AM and FM stations serving the same area are owned by the same companies, the Board approved a by-law providing that they will be eligible for joint membership in the NAB and their dues for the single membership based upon the combined income of the two stations.

In accepting more than a hundred new members into the Association, the Board brought the total membership up to 1301. This represents an increase of 100% since Jan. 1, 1945.

Robert D. Swezey, vice president and general manager of Mutual, and chairman of the NAB's Special Standards of Practice Committee, made a progress report to the Board on the activities of his group in re-writing proposed new standards for the broadcasting industry. Mr. Swezey reported that a special redrafting committee is now working on the provisions of the new standards, which have been agreed upon in principle by the large group. Since this was purely a progress report, no action by the Board was required.

(Continued on next page)

Meagher Joins Board

At its opening session the NAB Directors invited John F. Meagher, KYSM, Mankato, Minn., to sit as a member representing District Eleven, replacing E. L. Hayek, KATE, Albert Lea, Minn., who had resigned because of ill health. Mr. Meagher had recently been elected to represent the district beginning next September.

Only two members of the twenty-six man board were forced to be absent. They were:

Leslie C. Johnson, WHBF, Rock Island, Illinois, director of District 9, and Harold Hough, WBAP, Fort Worth, Texas, director-at-large.

Those present were:

Paul W. Morency, WTIC; Michael R. Hanna, WHCU; George D. Coleman, WGBI; Campbell Arnoux, WTAR; F. W. Borton, WQAM; Wiley P. Harris, WJDX; James D. Shouse, WLW; C. Bruce McConnell, WISH; John J. Gillin, Jr., WOW; William B. Way, KVOO; Martin B. Campbell, WFAA; Hugh B. Terry, KLZ; John F. Meagher, KYSM; William B. Smullin, KIEM; William B. Ryan, KFI; Harry R. Spence, KXRO; J. Harold Ryan, WGBS; T. A. M. Craven, WOL; G. Richard Shafto, WIS; Wayne Coy, WINX; Clair R. McCullough, WGAL; Frank Stanton, CBS; Frank M. Russell, NBC; Edgar Kobak, MBS.

Miller, in Statement to Congress, Cites Blue Book As "Star Chamber" Procedure

(Continued from page 423)

upon the part of the Commission to remove and prevent abuses of over-commercialism."

Stating that the Blue Book goes much deeper than such a suggestion, Judge Miller cited seventeen additional subjects with which the report concerns itself. Among them are:

> "Commission jurisdiction with respect to program service.
> "Economic aspects of broadcasting.
> "Programs and program policies.
> "Round-table discussions of current problems.
> "Religious programs.
> "Proposals for future Commission policy."

Commenting on the last point, Judge Miller questioned the right of a "governmental report" to propagate the sociological ideas of particular Commissioners. He said: "While it is entirely proper and desirable for informed critics to analyze and challenge practices and performances of radio broadcasting, it is an entirely different proposition for a government agency which is engaged in 'regulation of interstate commerce' to be stirring up such criticism. It is as if the Postmaster General, in administering the law concerning the use of the second-class mail privilege, by magazines and newspapers, should issue a 'report' condemning the contents of such publications and urging critics to attack them."

Criticizing the Commission's standards for distinguishing between "commercial" and "sustaining" programs, Judge Miller cited as "unsound" the agency's principle and stated that several Commissioners already have conceded the weakness of the Blue Book's standards in this respect. Taking the Metropolitan Opera broadcasts as an example, Judge Miller pointed out that if carried as a "sustainer," the broadcasts are "two and a half or three hours on the credit side of the station's program ledger, but sponsored by Texaco, the Opera becomes merely a cipher . . . to be counted against the station's commercial vs. sustaining position."

Showing that broadcasts improve with commercial sponsorship because of the additional funds available, Judge Miller stated that the glorification of "sustainers" over "commercials" by the Commission, "is a patent injustice which has no basis in reason."

Striking at the FCC's action in issuing its report, the NAB president said: "Nothing that resembled a judicial trial preceded the issuance of this Blue Book. *Moreover*, nothing that resembled the usual guaranties of fair hearing in legislative procedures occurred." He pointed out that the Commission gave no notice of a hearing, that no specification of offenses or misconduct was made, that the broadcasters had no opportunity to cross-examine witnesses or to challenge Commission evidence, that the broadcasters had no opportunity to present witnesses or evidence.

The Blue Book, he continued, inflicted punishment on a number of broadcasters, by naming their stations expressly and condemning their alleged improper operations. In addition, Judge Miller pointed out, the entire American broadcasting industry was punished because the "Blue Book was so widely publicized that statements were quoted in debates in the English Parliament as established facts." Further, the "Blue Book was accepted by American people, generally, as a truthful, objective, impartial description of American broadcasting; when it was, instead, a highly biased, partial presentation of the case" for the FCC.

Continuing, he stated that the report "was seized upon avidly by crackpots, communists and rival advertising media" to ridicule the broadcasting industry generally.

Through utilization of a "Report" technique, Judge Miller continued, "the FCC attempted to evade the prohibition against interference with freedom of speech contained in the First Amendment and in Section 326 of the Communications Act . . . (and) followed its familiar established practice of deciding important questions in such a manner as to prevent judicial review of them."

In summarizing his statement, Judge Miller stated that the Blue Book is "an example of that type of 'Star Chamber' procedure, of government by intimidation or 'by the lifted eyebrow' which prevailed in England prior to the separation of the United States."

Conceding that broadcasting—"like other human institutions"—was not perfect, he pointed out that radio broadcasting, as other mass media, "should be subjected to a minimum of governmental regulation."

If additional regulation is necessary, he said, it should come from the industry itself and from the listening audience, in the manner similar to the practice followed in the press, the motion picture industry and in the professions. Adding that the large majority of Americans like present-day broadcasting as it is conducted in this country, Judge Miller pointed out that "Americans do not want government-operated

(Continued on next page)

broadcasting or governmentally controlled broadcasting."

Judge Miller's analysis of the Blue Book was presented to the NAB Board of Directors Thursday (22) at the concluding session of its quarterly meeting.

Engineering Department

FCC Engineering Conference to Discuss Sharing of Television Channels

The FCC Public Notice 6760 issued Friday (23), designated an Engineering Conference on June 10 and 11, 1947, at the Commission's offices, Washington, D. C., for 10 a.m. E.D.S.T., to determine the technical problems inherent in the utilization of frequencies between 42 and 88 mc. The Commission will conduct the conference to hear and present evidence on the problem.

The Commission is particularly concerned about the feasibility of sharing television channels with non-Government fixed and mobile services, with particular references to co- and adjacent channel interference.

Among other subjects to be scrutinized will be that of interference from amateurs in the 50-54 mc. and from others in the 42-44 mc. and 72-76 mc. bands. Receiver characteristics, such as selectivity and local oscillator radiation, will be discussed.

The Commission also announced that all interested persons are invited to attend and participate in the discussions. All persons planning to attend should file with the Secretary of the Commission, on or before June 2, 1947, a statement outlining the information to be presented.

FCC

Commissioner Wakefield Nominated To Serve Another Term With The FCC

The nomination of Commissioner Ray C. Wakefield to serve another term on the FCC was made on Wednesday (21).

Originally named to the Commission in 1941, Commissioner Wakefield was appointed to succeed the late Thad H. Brown in the government agency.

A native of California, he came to the FCC from the California Railroad Commission, on which he had been a member from 1937 to 1940, and president from August, 1938.

A Republican, Commissioner Wakefield was active in California political affairs and was a delegate to the Republican National Convention in 1932.

FCC Announces New Office Hours for All Commission Staffs

The FCC announced new daily hours of business on Friday (23) for its offices in Washington and at its offices throughout the country.

Effective on June 2, the hours of the Commission are from 8:30 A. M. to 5 P. M., Monday through Friday, except on legal holidays.

General

Judge Miller, Addressing DAR Meeting, Warns Against Over-reaching Government Practices

NAB President Justin Miller, addressing the 56th Continental Congress of the Daughters of the American Revolution in Washington on Friday (23), reminded the delegates that it was "the arrogance, the over-reaching of administrative star-chamber government, which prevailed in England prior to the American Revolution, more than anything else" which caused the colonists to assert their rights.

On Thursday (22) the DAR delegates adopted a resolution stressing the necessity of maintaining a radio broadcasting system "free from government censorship or control of programs". (Full text is reprinted below)

Continuing, Judge Miller pointed out that we have in our midst a group of people who do not like the free institutions which have been built in this country during the past century and a half. He warned that this group devotes itself to dividing our people against each other.

"There are others", he continued, "who, because of ignorance or indifference take for granted the protection of these great liberties and smile, smugly, at those who warn them of danger. They give aid and comfort to the malcontents; they join in the process of creating confusion and discontent; wittingly or unwittingly, they help to build again, a structure of star-chamber; a government of whim, caprice and arbitrary action. They seek or condone government encroachment upon radio programming; they care not that censorship of motion pictures and books creeps into state laws. They have not eyes to see that the loss of freedom in any one of the media of mass communication must inevitably result in the deterioration of them all.

"Radio broadcasting is, today, recapitulating the fight for freedom which man and press fought out a century and a half ago. The same guileful arguments are heard today; to divide us and to establish, again, government controls of the media of free communication.

"Do not let anyone deceive us," he emphasized, "into

(Continued on next page)

believing that the problem is a different one for radio broadcasting than it is for the press, the movies or any other means of communication."

Judge Miller pointed out to the DAR delegates that with the advent of facsimile, many of them might soon have a daily newspaper printed in their own homes by radio. He pointed out that the FCC rules, prohibiting radio from editorializing, might well interfere with the freedom of the press in printing newspapers through facsimile.

He pointed out that motion pictures, to, would be subjected to FCC regulations with the expansion of television facilities.

"Once concede to government," he said, "power to tell our people what they may read or hear—on the theory of good or bad taste—and we have conceded power to tell us what our political beliefs must be; what our religious beliefs must be and whom we shall call 'Der Fuehrer.'"

Concluding his address to the assembly, Judge Miller said:

> "Eternal vigilance is, indeed, the price of freedom, and only if we are alert to the facts of life—politically, economically, socially—in this great country, the United States of America, can we preserve the institutions which have made it great, and protect the people who have built and maintained those institutions. Benjamin Franklin said, at the concluding session of the Constitutional Convention in 1787, 'There is no form of government but what may be a blessing to the people if well administered for a course of years, and can only end in despotism, as other forms have done before it, when the people shall become so corrupted as to need despotic government, being incapable of any other . . .'
>
> "May it please God, that freedom of communication in these United States—freedom of the press, of motion pictures, of speech in all forms—shall help, long, to prevent the despotism which comes only to a corrupted people; people no longer capable of a self-government which is free of the controls of strong men who give such security as they please, at the price of slavery."

DAR Resolution

Following is the text of the DAR resolution concerning broadcast operations:

> *Resolved*, That the 56th Continental Congress of the National Society Daughters of the American Revolution reaffirm the resolution of Radio Broadcasting adopted by the 55th Continental Congress of 1946, namely:
>
> "*Whereas*, Radio Broadcasting is the most universal and rapid medium of mass communication available to the people of the United States; and
>
> *Whereas*, It is essential to the free and intelligent exercise of citizenship in a republic that radio broadcasting shall remain free from government censorship or control of programs; and shall be conducted in accordance with the traditional American Institutions of free speech and free enterprise;
>
> *Resolved*, That the National Society, Daughters of the American Revolution in 55th Continental Congress assembled, affirm its belief that freedom of radio ranks in importance with freedom of speech and of the press and its opposition to all efforts which would lead in the direction of government censorship, dictation or control of radio programs; and that the Society urge the Congress of the United States to enact such legislation as is required to give effect to this affirmation."

Beaton Named to Serve as President Of Southern California Broadcasters

The Southern California Broadcasters Association, at its recent annual meeting, elected a new roster of officers to serve for the next year.

Assuming their offices immediately, the new officials are:

President—William J. Beaton, KWKW
Vice President—Ernest L. Spencer, KVOE
Secretary-Treasurer—Thelma Kirchner, KGFH

The following were named to the Board of Directors:

Harry W. Witt, KNX; Calvin J. Smith, KFAC; and Lee Wynne, KGER.

Robert O. Reynolds, KMPC, the retiring president, automatically became a member of the Board as do the newly elected officers.

Canadian Broadcasters to Hold Convention At Jasper National Park Next Month

The annual convention of the Canadian Association of Broadcasters will be held at Jasper Park, Alberta, June 9-12.

The Canadian organization has invited a top-group of industry executives representing both Canadian and American broadcasting interests to address its membership and guests. NAB members have been invited to attend the sessions.

NAB President Justin Miller will highlight the annual banquet on June 10 when he speaks on "the editorial voice of radio."

Other subjects on the CAB agenda are: *Why Radio Sells, How to Sell in Tomorrow's Markets, Public Relations, BBM, Radio Research, FM* and *BMI*.

American broadcasters who wish to attend the meeting may obtain complete details from Mr. Harry S. Dawson, manager, Canadian Association of Broadcasters, 2100 Victory Building, Toronto, Canada.

Legal Department

NAB Opposes Bill Which Gives Copyright to Performer, in Addition to Composer

The Copyright Subcommittee of the House Judiciary Committee opened hearings Friday (23) on three copyright bills introduced at this session. Two of the bills, H. R. 1269 and 2570, would eliminate that section of the present law which exempts juke box operators from paying royalties for the use of music. Of more interest to broadcasters is H. R. 1270 *(See NAB Legislative Digest, March 7, p. 39)* which would permit the copyrighting of works in the form of records, and would enable performers of music to get a copyright in their recorded performances which would be separate and distinct from the copyright of the composer.

At the hearing Friday, Fred Waring and Maurice Speiser, representing the National Association of Per-

(Continued on next page)

forming Artists, spoke on behalf of all three bills. Gene Buck, representing ASCAP, began a presentation supporting the juke box bills and opposing H. R. 1270. Before he concluded his remarks the hearing was interrupted by a quorum call from the House of Representatives which forced an adjournment. Before adjourning, however, the committee announced that the hearings would continue in the near future although the date was not announced.

Don Petty, NAB General Counsel, attended on behalf of the Association, which is opposing H. R. 1270. His prepared statement will be released at the time it is filed with the Committee immediately prior to his oral presentaation.

Bill Introduced in the Senate Proposes to Prohibit Congressmen from Owning Stations

Senator Joseph R. McCarthy (R), Wisconsin, introduced a bill in the Senate on Monday (19) which would prohibit the holding of radio station licenses by members of Congress and their wives.

The bill, S. 1309, was introduced as an amendment to the Communications Act of 1934 and referred to the Senate Committee on Interstate and Foreign Commerce.

The proposed legislation provides: that station licenses for commercial broadcasting stations shall not be granted to or held by any Congressman or his wife; any partnership of which any active or silent partner is a Member of Congress or the wife of any such member; any corporation of which any officer or director is a Member of Congress or the wife of any such Member, or of which more than one-fifth of the capital stock is owned of record or voted by any Member of Congress or the wife of any such Member; or any association of which any officer or director is a Member of Congress or the wife of any such Member, or whose policies are actually determined by any Member of Congress or the wife of any such Member. *(See NAB Legislative Digest, May 23)*

Research Department

FM-AM Set Production Shows Marked Increase During April

According to a report issued by the RMA, FM-AM receiver production jumped 47 percent in April over March, as all set production showed a weekly average higher than in the first quarter of 1947.

An estimated 98,625 radio sets with FM reception facilities were manufactured by RMA member-companies in April as compared with 67,264 in March.

April's estimated production of all types of radio receivers by RMA companies was 1,548,540 as compared with 1,377,269 in March.

Television receiver production in April showed a slight gain over March, reaching 7,886 for the five-week period, March 31 to May 2.

April's television output was classified as follows: 3,971 radio table models, 2,242 direct viewing radio consoles, 87 projection consoles, 686 direct viewing radio-phonograph combinations, 40 projection radio-phonograph combinations, and 860 converters.

The April figure brings the total television receiver output for 1947 to 26,205 as of May 2, while FM-AM sets produced during the same four-month period totaled 284,432.

Following is the monthly breakdown on FM, television, and all-sets production for the year:

Month	FM-AM	TV	All Sets
January (5 weeks)	51,318	5,437	1,564,171
February	53,594	6,243	1,379,966
March	67,264	6,639	1,377,269
April (5 weeks)	112,256	7,886	1,759,723

Public Relations

Broadcasters Were First Radio Critics Richards States at Georgia Institute

There is greater criticism of radio from within the industry than from outside sources, Robert K. Richards, NAB director of public relations, said last week in a talk at the 2nd Annual Radio Institute conducted by the University of Georgia.

He pointed out that most criticism of radio is directed against programs and that the major sources of such criticism are the government, educators, newspapers and broadcasters themselves.

"Broadcasters," he said, "were criticising radio before the idea ever occurred to those in any of the other three categories. It's an absolute fact that broadcasting stations, for over a quarter of a century, have been hiring program directors—and paying them salaries—to criticise programs."

Stating that in some areas newspapers have performed constructive service as radio critics, he suggested "that the newspaper critic ply his trade with *two* implements: a receiver and a typewriter." Elaborating, Mr. Richards explained that constructive criticism was impossible unless the critic listened to radio's fare.

"I believe the educators at some of our great universities—such as this one right here", he continued, "want to perform an honest and profitable service in their criticism of broadcasting. . . . I should like to ask whether the educators *really are listening*?" He pointed out that "education and radio have common cause" and that by cooperation the two institutions could make greater progress "with our arms linked, not our horn locked."

He pointed out that "it is not the FCC's prerogative by law to concern itself with program matters in the manner evidenced by the Blue Book. If it is", he continued, "we misinterpret the Communications Act of 1934."

Concluding his talk, Mr. Richards cited the fact that "broadcasters want to work with educators in the cause of greater learning and a fuller life for all.

(Continued on next page)

Broadcasters ask only that educators meet them halfway—recognizing the practical problems of operating a radio station, learning the tried techniques by which education on the air can be most effective."

Broadcast Advertising

Australian Magazine Will Publish NAB's "Radio For Retailers" Study

Broadcasting Business, a magazine devoted to the promotion of commercial broadcast stations in Australia, has requested the Department of Broadcast Advertising for permission to reprint in its columns the Joske study, "Radio For Retailers."

In an exchange of letters with Hugh M. P. Higgins, assistant director of broadcast advertising, O. F. Mingay, managing director of the magazine, wrote: "It was indeed a pleasure to receive your letter and to note once again your organization's cooperation with your friends 'down under.' Your permission to reprint this material is received with gratitude, as I feel sure that our Australia-wide circle of readers will find much to interest them in the story which will also aid Australian commercial broadcasting stations in their approach to the problem of retail store advertising."

Small Market Stations

Session on Small Market Stations Scheduled For Two District Meetings

The small market stations sessions have been scheduled as follows for the two remaining district meetings:

The session at the District No. 3 meeting in Baltimore, May 26-27, is set for today from 2:00 until 4:00 p.m. George E. Joy, WRAK, Williamsport, Pa., will preside.

The session for the District No. 1 meeting at Boston, May 2-3, is scheduled on Tuesday (3) from 11:15 A. M. until 12:15 P. M. Bert Georges, WHEB, Portsmouth, N. H., will officiate. Small Market Stations Executive Committeeman A. E. Spokes, WJOY, Burlington, Vt., will have an active part in the program.

Allen Brown, NAB assistant director of broadcast advertising, will conduct both sessions, which will include round-table discussions of operational problems and practices of particular significance in these districts.

Committee Chairmen Appointed in Districts One and Sixteen

Bert Georges, WHEB, Portsmouth, N. H. (NAB District No. 1) and Mrs. Roberta M. Pfister, KYCA, Prescott, Ariz. (NAB District No. 16) have been appointed district chairmen, Small Market Stations Committee. The appointments were made by District Directors Paul W. Morency, No. 1, and William B. Ryan, No. 16.

American University Radio Students Hear Brown Discuss Station Operations

"The Manager's Role in Station Operations" was the subject of an address given by J. Allen Brown, assistant director, NAB Department of Broadcast Advertising, before a radio class at the American University, Washington, D. C., last week. The speaker also discussed "Job Opportunities in Radio" during a round-table period. NAB literature was distributed.

Listener Activity

Quad-City Radio Council Reorganizes, Elects Officers, Hears Radio Leaders

Setting a general objective at "greater listener participation in the evaluation and development of Quad City radio fare," a representative group of radio listeners from four cities, Davenport, Iowa, Rock Island, Moline and East Moline, Ill., recently met to reorganize the Quad-City Radio Council.

Chairman for the gathering was Woody Woods, WHO, while discussions were delivered by Buryl Lottridge, vice president, WOC, and host of the evening, and Frank E. Pellegrin, NAB.

Dorothy Lewis, NAB co-ordinator of listener activity was scheduled to address the meeting, but was prevented from attending by sudden illness which required hospitalization. Mr. Pellegrin attended in her place.

Basic activities of the Quad-City Radio Council are:

> To supply all Quad-City radio stations with factual, balanced opinions of program values and station conduct through objective listening and prompt replies to questionnaires.
>
> To maintain regular forum programs for discussion of local public issues.
>
> To assure regular and adequate radio facilities to all reputable Quad-City organizations and to all recognized minority groups.

Public Interest Programming

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of June 2-8, 1947 by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your

(Continued on next page)

station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, N. Y.

Buy U. S. Savings Bonds—"Save the Easy Automatic Way"

The U. S. Treasury is conducting its most important stepped-up promotion of U. S. Savings Bonds for 1947 during June and July. The way the public debt is managed will affect the life of every American for years to come, as regards money supply, the price level, business conditions and what the dollar will buy; *and wise management of the debt demands that ownership of U. S. securities be spread as widely as possible among individuals. Beginning June 1, the U. S. Treasury, in cooperation with the banks of America, is inaugurating an easy, automatic method—The Bond-A-Month Plan*—of buying Bonds for the millions of Americans not on regular payrolls. The backbone of the Savings Bonds program is still the Payroll Savings Plan, and, although it is receiving whole-hearted support from industry, recent surveys show that this method now needs additional stimulation. The rate of interest, sound investment value, and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like *retirement incomes, education for the children, new homes, the most enjoyable use of leisure time.* As an investment, U. S. Savings Bonds are safe, profitable. The effective way to provide for the future is through *regular* savings. Regular saving is easy and automatic if you sign up for the Payroll Savings Plan where you work, or the Bond-A-Month Plan where you bank. (Fact Sheet No. 11-G)

Help Veterans Beat the Housing Shortage

Well over 2,000,000 newly discharged veterans, whose lives as civilians were interrupted by service in the Armed Forces, are now looking for places to live. Returning war veterans have been hardest hit by the present severe shortage in houses and apartments. The veteran, who by going into the service gave up his house or apartment, or missed the chance to get one during the war years, needs and deserves all possible help in obtaining a home now for himself and his family. Voluntary steps taken by individuals and local communities since the Council advertising campaign began indicates that wide public awareness of the veterans' urgent need for homes, and what private citizens can do about it, can help alleviate the problem of housing our war heroes until an adequate number of new buildings has been completed. Living space, permanent and temporary, has been found for hundreds of thousands of veterans and their families in existing buildings. A great deal of discomfort and actual hardship has been averted through action stimulated by increased consciousness of the housing problem. The need for homes is tremendous. The shortage has been accumulating for years. It takes time for emergency measures to pay off. Urge listeners to help take care of the veteran in the existing housing supply, until enough new homes are ready, by (1) sharing their homes; (2) creating additional living quarters for veterans by remodeling; (3) listing vacancies and houses for sale at their local Veterans Housing Center, so that veterans can get first chance at them; (4) not discriminating against veterans with children. (Fact Sheet No. 4-H)

United America—Group Prejudice—A Post War Menace

To divide the United States along racial and religious lines, and so to conquer it, was the chief hope of our enemies during the war. In fact, it was the possibility that America could be thus weakened and disintegrated by conflict between group and group that gave the Axis courage to embark on its catastrophic adventure. This Axis strategy was defeated. *But today we cannot afford division any more than we could during the war.* We have two great tasks before us: (1) to build a peaceful world; (2) to press forward on the home front to high production and prosperity. The achievement of both these goals becomes immeasurably more difficult if America is torn by racial and religious strife. A divided America seems weak in the eyes of the world and is disabled as a force for peace; nor can it successfully carry out great undertakings here at home. Both internationally and domestically, we need the same harmony among our various racial and religious groups that was the source of our strength in war. What makes the danger of division especially acute at the present time is that many real problems now confront the American people—problems of housing for veterans and other civilians, jobs for the returning servicemen, strikes, shortages of food and household goods, rising costs of living. In the midst of postwar dislocations and unrest, when everyone naturally seeks to discover the causes and cures for what troubles him, the "scapegoat" technique of blaming all difficulties on one group or another is likely not to pay off well. Political quacks and adventurers belonging to the "lunatic fringe" of American life seek to gain adherents and make easy money for themselves by diverting citizens from their real problems and attacking some racial or religious group as being "at the bottom of" the shortages, the strikes, or the rising prices. People who, out of indifference to American principles of racial and religious freedom, and "undecided" about prejudice, or who might support hate campaigns against Protestants or Jews, Catholics or Negroes, are potential confederates or dupes of such subversive forces. No one can prevent people from being prejudiced or hating their neighbors. We can, however, (1) recognize such antagonisms for what they are: *a danger to the nation that is particularly acute in the midst of postwar dislocations and unrest:* (2) isolate such antagonisms and quarantine them, prevent them from spreading and infecting the whole community; malicious slanders against groups of fellow Americans cannot be respected as "honest opinions;" (3) guard ourselves and our families against the danger of contracting prejudices and passing them on, however innocently—we can refuse to listen to or spread stories which discredit members of any race or religion—we can make sure that we judge our fellow-men by the character of their lives alone, and not on the basis of their race or religion—we can keep our children from absorbing prejudice. (Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, May 26. They are subject to change.

Monday, May 26

Hearing and Oral Argument

(Before the Commission en banc, 10:00 A. M.)

In the Matter of Allocation of Frequencies to the Various Classes of Non-Governmental Services in the Radio Spectrum from 10 Kilocycles to 30,000,000 Kilocycles. (Proposed changes to revise existing frequency service-allocations to make available the entire band 960-1600 mc. for the aeronautical navigational service.)

(10:00 A. M.)

NEW—WDEL, Inc., Wilmington, Del.—For FM facilities.

NEW—Wilmington Tri-State Broadcasting Co., Inc., Wilmington, Del.—For FM facilities.

(Continued on next page)

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—For FM facilities.

NEW—York Broadcasting Co., York, Pa.—For FM facilities.

NEW—Reading Broadcasting Co., Reading, Pa.—For FM facilities.

Further Hearing

(10:00 A. M.)

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Renewal of license; complaint.

Tuesday, May 27

(10:00 A. M.)

NEW—Wired Music, Inc., Rockford, Ill.—C. P. **1400 kc.,** 250 watts, unlimited.

NEW—Beloit Broadcasters, Inc., Beloit, Wisc.—C. P. **1380 kc.,** 500 watts, daytime only.

Respondent: WRJN—Racine Broadcasting Corp., Racine, Wisc.

Further Hearing

(10:00 A. M.)

KGKB—East Texas Broadcasting Co., Tyler, Tex.—C. P. DA, **690 kc.,** 1 KW night, 5 KW day; unlimited.

KGGF—Hugh J. Powell, Coffeyville, Kans.—C. P. DA (DA-2), 5 KW night, 10 KW day; unlimited.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—C. P. DA **690 kc.,** 1 KW night, 1 KW day; unlimited.

Respondents: KABC—Alamo Broadcasting Co., Inc., San Antonio, Texas.

KFEQ—KFEQ, Inc., St. Joseph, Mo.

Wednesday, May 28

Oral Argument

(Before the Commission en banc in Room 6121, beginning 10:00 A. M., in the order listed)

(1)

Gulf Broadcasting Co., Inc., Mobile, Ala.—**1340 kc.,** 250 watts, unlimited.

Burton Broadcasting Co., Mobile, Ala.—**1340 kc.,** 250 watts, unlimited.

Mobile Broadcasting Co., Mobile, Ala.—**1330 kc.,** 1 KW night, 5 KW day, unlimited. DA-N&D.

(2)

WJPS, Inc., Evansville, Ind.—**1330 kc.,** 5 KW day, 1 KW night; unlimited. DA-N&D.

Tri-State Broadcasting Corp., Evansville, Ind.—**1330 kc.,** 5 KW, unlimited. DA-N&D.

FCC ACTIONS

GENERAL

"ABC of the FCC" on Public Sale

"An ABC of the FCC" which, in question-and-answer form gives factual information about this Commission and its many activities, is now on public sale by the Superintendent of Documents, Government Printing Office, Washington 25, D. C., for five cents a copy.

AMPLITUDE MODULATION

AM—Docket Cases

1220 KC.

The Commission announces its **Decision** (B-283) granting the application of the **WGAR Broadcasting Company** to increase power for Station WGAR, Cleveland, Ohio, from 5 to 50 KW, operating on frequency 1220 kc., using DA; subject to condition that WGAR will modify its antenna

(Continued on next page)

pattern to afford any protection to Station **CMKO, Holquin, Cuba,** as the Commission may determine is necessary after consultation with the Government of Cuba (BP-3942; Docket 7320). At the same time the Commission denied the application of Allen T. Simmons to change power of Station **WADC, Tallmadge, Ohio,** from 5 KW to 50 KW, operating on 1220 kc. (BP-4243; Docket 7319).

Commissioner Durr agreed with the majority that WADC should be denied, but feels that Section 3.35 of the Rules also requires a denial of WGAR's application.

1540 KC.

The Commission on May 19 adopted an **Order** granting petitions of the **Patroon Broadcasting Co., the Texhoma Broadcasting Co. and the East-West Broadcasting Co.,** requesting that their respective applications be severed from the consolidated proceeding; removed from hearing docket, and granted said applications, as follows, subject to approval of transmitter locations and antenna sites by the CAA:

Patroon Broadcasting Co., Inc., for new station in Albany, New York to operate on 1540 kc., 10 KW, unlimited time, DA (BP-4611; Docket 7992);

Texhoma Broadcasting Co. for new station in Durant, Okla., to operate on 1540 kc., 250 watts, unlimited time (BP-5112; Docket 7993); and

East-West Broadcasting Co. for new station in Fort Worth, Texas, to operate on 1540 kc., 5 KW-D, 1 KW-N, unlimited time (BP-4524; Docket 7994).

The Commission ordered that the petition filed by **Josh Higgins Broadcasting Co.,** licensee of KXEL, Waterloo, Iowa, insofar as it may affect the Patroon Broadcasting Co., the Texhoma Broadcasting Co. and the East-West Broadcasting Co., be dismissed.

AM—New CP's Granted

980 KC.

Louie L. Morris, Hartwell, Ga.—Granted CP for a new station to operate on 980 kc., 1 KW, daytime only; conditions. (BP-5655)

1110 KC.

Big Island Broadcasting Co., Ltd., Hilo, T. H.—Granted CP for a new station to operate on 1110 kc., 1 KW, unlimited time. (BP-5632)

1230 KC.

Kola Broadcasting Co., Opelousas, La.—Ordered that the application (BP-4917; Docket 7812), be removed from hearing docket and granted for a new station to operate on 1230 kc., 250 watts, unlimited time; conditions; and that the joint petition filed by Kola and James A. Noe for waiver of hearing be dismissed as moot.

1340 KC.

Border Broadcasting Co., Inc., Nogales, Ariz.—Granted petition to reconsider, remove from hearing docket and grant its application. The Commission ordered said application (BP-5345; Docket 7940) be removed from the hearing docket and granted for a new station to operate on 1340 kc., 250 watts, unlimited time, subject to the condition that applicant, within 60 days, file an application for modification of permit specifying a transmitter site and antenna system meeting requirements of the standards, and further subject to condition that transmitter site selected is such that applicant's operation will cause no interference to Station XEHF, Nogales, Sonora, Mexico.

1400 KC.

Halifax Broadcasting Co., South Boston, Va.—Granted CP for a new station to operate on 1400 kc., 250 watts, unlimited time; subject to approval of proposed transmitter site and antenna system by CAA, and to the condition that applicant submit measurements showing that transmitter apparatus meets the requirements of standards, and provided no operation takes place until WBTM ceases operation on 1400 kc. (BP-5629)

1440 KC.

John J. Laux, Niagara Falls, N. Y.—Granted CP for a new station to operate on 1440 kc., 1 KW, day; conditions. (BP-5628)

1450 KC.

The Voice of Nevada's Capital, Carson City, Nev.—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time; conditions. (BP-5654)

AM—License Renewals

KFWB—Warner Bros. Broadcasting Corp., Los Angeles, Calif.—Granted renewal of license for the period ending May 1, 1950.

WCSH & Aux.—Congress Square Hotel, Portland, Me.—Granted renewal of license for the period ending May 1, 1950.

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Granted renewal of license for the period ending May 1, 1950.

AM—Licenses for New Stations Granted

710 KC.

WROM—Coosa Valley Radio Co., Rome, Ga.—Granted license for new station; 710 kc., 1 KW, day; conditions. (BL-2228)

760 KC.

WCPS—Coastal Plains Broadcasting Co., Inc., Tarboro, N. C.—Granted license for new station; 760 kc., 1 KW, day; and for change of studio location to Main St., Tarboro; conditions. (BL-2267)

900 KC.

WKYW—Radio Kentucky, Inc., Louisville, Ky.—Granted license for new station; 900 kc., 1 KW, daytime. (BL-2363)

990 KC.

WJMR—Supreme Broadcasting System, Inc., New Orleans, La.—Granted license for new station; 900 kc., 250 watts, day. (BL-2253)

1230 KC.

WNOK—Palmetto Radio Corp., Columbia, S. C.—Granted license for new station; 1230 kc., 250 watts, unlimited time; conditions. (BL-2242)

1450 KC.

KTIP—J. F. Tighe, Porterville, Cal.—Granted license for new station; 1450 kc., 250 watts, unlimited time; conditions. (BL-2243)

WTOK—Meridian Broadcasting Co., Meridian, Miss.—Granted license for new station; 1450 kc., 250 watts, unlimited time; conditions; and for change of studio location to Corner 6th St. and 22nd Ave., Citizens Bank Bldg. (BL-2172)

WFUN—Huntsville Broadcasting Co., Huntsville, Ala.—Granted license for new station; 1450 kc., 250 watts, unlimited time; conditions. (BL-2171)

AM—Modifications of CP's Granted

WJMO—W. J. Marshall, Cleveland, Ohio—Granted modification of CP to change type of transmitter, make changes in vertical antenna and change transmitter and studio locations to E. 22nd St. and Euclid Ave., and 2157 Euclid Ave., Cleveland, respectively. (BMP-2660)

KENI—Midnight Sun Broadcasting Co., Anchorage, Alaska—Granted modification of CP to change transmitter location to 5.2 mi. SSE of Anchorage, and extend commencement and completion dates to 5-30-47 and 11-30-47, respectively. (BMP-2714)

WGUY—Portland Broadcasting System, Inc., Bangor, Maine—Granted modification of CP for approval of antenna, to change type of transmitter and for approval of transmitter and studio locations at Mt. Hope Ave., Bangor. (BMP-2635)

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted modification of CP for extension of completion date to 5-26-47.

(Continued on next page)

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Granted modification of CP to change transmitter location, and for extension of commencement and completion dates to 60 days after grant and 180 days thereafter, respectively. (BMP-2674)

WFTW—Fort Wayne Broadcasting, Inc., Fort Wayne, Ind.—Granted modification of CP for approval of antenna, change type of transmitter and for approval of transmitter location at East Side of Getz Road, between Route 14 and Covington Road, near Fort Wayne. (BMP-2417)

WLOS—Skyway Broadcasting Corp., Asheville, N.C.—Granted modification of CP to mount FM antenna on top of AM tower and specify studio location as Battery Park Hotel, Asheville. (BMP-2473)

WWPB—Paul Brake, Miami, Fla.—Granted modification of CP for approval of antenna and approval of transmitter and studio locations at 418 SW 2nd Ave., Miami. (BMP-2602)

KCOH—Lee Segall Broadcasting Co., Houston, Texas—Granted modification of CP for approval of antenna, of transmitter location at 4 blocks E. of intersection of Kerr and McCarty Sts., Houston, and to mount FM antenna on top of AM tower. (BMP-2513)

WHLW—Herbert L. Wilson, Rutland, Vt.—Granted modification of CP for approval of antenna, to change type of transmitter, and for approval of transmitter and studio locations at .58 mile S. of city limits of Rutland, on U. S. No. 7. (BMP-2607)

WPGH—Pittsburgh Broadcasting Co., Pittsburgh, Pa.—Granted modification of CP for approval of antenna, to change type of transmitter, and for approval of transmitter location at Allegheny County, Pittsburgh. (BMP-2588)

WNMP—Evanston Broadcasting Co., Evanston, Ill.—Granted modification of CP for approval of antenna, to change type of transmitter, for approval of transmitter location on Hartery at Oakton Ave., and studio at Evanston Hotel; conditions. (BMP-2087)

KQV—Allegheny Broadcasting Corp., Pittsburgh, Pa.—Granted modification of CP for extension of completion date to 8-6-47. (BMP-2732)

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Granted modification of CP for extension of completion date to 8-4-47. (BMP-2730)

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted modification of CP for extension of completion date to 6-15-47.

WMOI—Union Broadcasting Co., Monroe, N. C.—Granted modification of CP for approval of antenna, to change type of transmitter and for approval of transmitter and studio locations at Walkup Ave. between Alexandria and Turner Sts., Monroe. (BMP-2624)

WSTV—The Valley Broadcasting Co., Steubenville, Ohio—Granted modification of CP to make changes in vertical antenna and extend completion date to 10-5-47. (BMP-2705)

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted modification of CP to extend completion date to 9-7-47. (BMP-2722)

AM—Miscellaneous Actions

The Walmac Co., San Antonio, Texas—Granted petition requesting continuance of further hearing in re Dockets 7983 and 7866, presently scheduled for May 20, and continued same to June 3.

Pacific Foundation, Richmond, Cal.—Denied petition for leave to amend its application (BP-5746; Doc. 8120) so as to show a revised balance sheet of the corporation, and requesting reopening of the record for the purpose only of receiving the amendment into the record without further hearing.

WPAG—Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich.—Granted license to cover installation of FM antenna on top of present AM vertical radiator. (BL-2410)

WCJU—Forrest Broadcasting Co., Columbia, Miss.—Granted CP to make changes in transmitting equipment. (BP-6045)

WPLH—Huntington Broadcasting Corp., Huntington, W. Va.—Granted CP to install a new transmitter. (BP-6042)

WFNS—Burlington-Graham Broadcasting Co., Burlington, N. C.—Granted CP to install new transmitter. (BP-6060)

WNYC—City of N. Y. Municipal Broadcasting System, New York City—Granted request to cancel license for auxiliary transmitter expiring Nov. 1, 1949. (BR-241)

WAGM—Aroostook Broadcasting Corp., Presque Isle, Maine—Granted license for increase in power to 250 watts, hours to unlimited, install new transmitter and change transmitter location, and change of studio location to 180 State St., Presque Isle; conditions. (BL-2137)

WSGC—Elberton Broadcasting Co., Elberton, Ga.—Granted CP to install new transmitter. (BP-6041)

WMC—Memphis Publishing Co., Memphis, Tenn.—Granted CP to make changes in DA and mount FM antenna on top of AM tower (BP-5992)

WOKO—WOKO, Inc., Albany, N. Y.—Dismissed application for CP to increase power from 500 watts, 1 KW, LS, to 5 KW unlimited time, DA night. (BP-5621)

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—Granted modification of license to change from directional to non-directional operation during daytime hours. (BML-1246)

WFIG—Radio Station WFIG, Inc., Sumter, S. C.—Granted consent to transfer 80 shares, 80% of the voting stock, in licensee of WFIG from J. Samuel Brody, T. Douglas Youngblood, Ruth B. Brody (transferers), to 18 new individuals (transferees), for a consideration of $57,062.00. (BTC-531)

KAKC and KAKC-FM—Public Radio Corp. (permittee), Tulsa, Okla.—Granted consent to acquisition of affirmative control over Public Radio Corp. by Sam E. Avey (transferee) from Ethel B. Kellough and Robert W. Kellough, (transferers), for a consideration of $12,500, for AM and FM station permits. (BTC-547).

WSAY—Gordon P. Brown, d/b as Brown Radio Service and Lab. (assignor), The Federal Broadcasting System, Inc. (assignee), Rochester, N. Y.—Granted consent to assignment of license and outstanding CP for betterment of facilities of WSAY, from Brown Radio Service and Lab. to The Federal Broadcasting System, Inc., a new corporation 100% controlled by Brown. (BAPL-22)

WIGM—George F. Meyer (assignor), Dairyland's Broadcasting Service, Inc. (assignee), Medford, Wis.—Granted consent to assignment of AM station WIGM from George F. Meyer to Dairyland's Broadcasting Service, Inc., for a consideration of $30,000. (BAL-588)

KLIZ—Brainerd Broadcasting Co., Brainerd, Minn.—Granted consent to assignment of license of station KLIZ from E. Thomas O'Brien, et al, d/b as Brainerd Broadcasting Co. (assignor), to Brainerd Broadcasting Co. (assignee), a corporation controlled by the assignor partners in the same proportion as their interests in the assignor partnership. (BAL-599)

WDRC—WDRC, Inc., Hartford, Conn.—Granted consent to assignment of license of standard station WDRC, FM station WDRC-FM, and relay station WELN, from WDRC, Inc. (assignor), to The Connecticut Broadcasting Co. (assignee). No monetary consideration involved. (BAL-600)

KOBE—Odessa Broadcasting Co., Odessa, Tex.—Granted authority to delete all the record relative to construction permit (BP-3901) and modification (BMP-2653), authorized August 9, 1946, and April 15, 1947, respectively, as permittee has determined not to go ahead with the construction.

Beloit Broadcasters, Inc., Beloit, Wis.—Denied petition to reconsider, sever and grant without hearing application for construction permit (BP-5617; docket 8169).

(Continued on next page)

Walter L. Read, Petaluma, Calif.—Granted petition for waiver of rules and accepted petitioner's appearance in re application (BP-5762; docket 8122).

Tri-City Broadcasting Co., Bellaire, Ohio—Granted petition for leave to amend its application (BP-5421; docket 8273) so as to specify 1290 kc., instead of 1050 kc., and for removal from hearing docket. The amendment was accepted and application as amended removed from the docket.

Arlington-Fairfax Broadcasting Co., Inc., Arlington, Va.—Granted petition for leave to amend its application (BP-5975; docket 8391), so as to supply additional engineering information.

KWKH—International Broadcasting Corp., Shreveport, La.—Granted petition for waiver of rules and accepted petitioner's written appearance in re oral argument upon applications of Syndicate Theatres, Inc., and Universal Broadcasting Co., Inc. (docket 7099 and 7100).

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—The Commission, on its own motion, continued hearing on application of WHLS from May 26 to July 23 (docket 6987).

John B. Quinn, et al, Lincoln, Nebr.—Denied petition for leave to intervene in the hearing upon application of Capital Broadcasting Co. (docket 8311).

KOIN—KOIN, Inc., Portland, Ore.—Granted petition for leave to intervene in the hearing on application of KAKC (docket 8270).

Arecibo Broadcasting Co., Inc., Arecibo, P. R.—Granted petition for leave to amend its application (BP-5047; docket 7807) so as to specify 1420 kc., with 1 KW, unlimited time, instead of 1190 kc., 250 watts, unlimited. The amendment was accepted, and application as amended removed from the hearing docket.

Southeastern Broadcasting System, East Point, Ga.—Denied petition for leave to amend its application (BP-4235; docket 7068) so as to specify 1260 kc., with 250 watts, daytime only, instead of 1490 kc., 250 watts, unlimited.

WHP—WHP, Inc., Harrisburg, Pa.—Granted petition for leave to intervene in the hearing on application of Foundation Co. of Washington. (Doc. 8279)

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Granted petition for leave to intervene in the hearing upon applications of Western Reserve Broadcasting Co. and Civic Broadcasters, Inc. (Docs. 7584 and 8269)

WDEL, Inc.; Tri-State Broadcasting Co., Inc., Wilmington, Del., et al—Granted petition for continuance of consolidated hearing from May 26 to June 9, at Washington. (Doc. 7834, et al.)

Lake County Broadcasters, Eustis, Fla.—Granted petition for leave to amend its application (BP-5193; Doc. 8355) so as to add to the application a supplementary engineering statement.

KIFI—Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho, et al.—Granted petition for continuance of consolidated hearing presently scheduled for June 2, and continued same to June 30. (Doc. 8343, et al.)

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Granted petition for extension of time for filing exceptions to Proposed Decision (Doc. 6949, et al.), and the time was extended to and including June 11. (Action taken May 21.)

AM—Applications Accepted for Filing

570 KC.

WNAX—Cowles Broadcasting Co., Yankton, S. Dak.—Modification of construction permit (B4-P-5231, which authorized installation of new transmitter) for extension of completion date.

600 KC.

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Modification of construction permit (B3-P-3801, as modified, which authorized change in frequency, installation of new directional antenna for night use, and new ground system) for extension of completion date.

610 KC.

KGGM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—License to cover construction permit (B5-P-2918, as modified) which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change transmitter location, and authority to determine operating power by direct measurement of antenna power.

690 KC.

KULA—Pacific Frontier Broadcasting Company, Limited, Honolulu, T. H.—License to cover construction permit (BP-4308, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

730 KC.

WPIT—Liberty Broadcasting Co., Pittsburgh, Pa. (John J. Laux, Richard Teitlebaum, Myer Wiesenthal, Alex Teitlebaum, Louis Berkman, Jack N. Berkman, Charles C. Swaringen, Joseph Troesch, & John L. Meridian)—License to cover construction permit (B2-P-3797, as modified) which authorized a new standard broadcast station and specify studio location and authority to determine operating power by direct measurement of antenna power.

750 KC.

NEW—Frankfort Broadcasting Co., Inc., Frankfort, Ind. (P. O. 402 Peoples Life Bldg.)—Construction permit for a new standard broadcast station to be operated on 750 kc., power of 250 watts, and daytime hours of operation.

780 KC.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of construction permit (B4-P-4009, which authorized installation of new vertical antenna) for extension of completion date.

790 KC.

KVOS—KVOS, Inc., Bellingham, Wash.—License to cover construction permit (B5-P-3925, as modified) which authorized an increase in power, installation of new transmitter and directional antenna for day and night use, and change in transmitter location and authority to determine operating power by direct measurement of antenna power.

860 KC.

WNEL—Juan Piza, San Juan, Puerto Rico—Modification of construction permit (BP-3740, as modified, which authorized change in frequency and installation of directional antenna for day and night use) for extension of completion date.

930 KC.

NEW—Walter Olin Nisbet, Jr., Charlotte, N. C. (P. O. 534 Colville Rd.)—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 1 KW, and daytime hours of operation.

950 KC.

WGOV—E. D. Rivers, Valdosta, Ga.—Modification of construction permit (B3-P-3213, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for day and night use and change in transmitter location) to change type of transmitter to make changes in the directional antenna and mount FM antenna on top of AM tower and for extension of completion date.

970 KC.

KHBC—Hawaiian Broadcasting System, Limited, Hilo, Hawaii—Modification of construction permit (BP-5039, which authorized change of frequency, increase of power, installation of new transmitter and to change transmitter and studio locations) to change type of transmitter and for approval of antenna and transmitter location on Piihonua Road, approximately 3 miles from Hilo Post Office, Hilo, Hawaii.

(Continued on next page)

980 KC.

NEW—Crescent Broadcast Corp., Shenandoah, Pa.—Construction permit for a new standard broadcast station to be operated on 580 kc., power of 5 KW, directional antenna (2) and unlimited hours of operation. Amended to change frequency from 580 to 980 kc., change in transmitting equipment: change transmitter location from 2.3 miles approximately north of Ringtown, Pa., to northwest corner St. Clair Borough, near St. Clair Borough, near St. Clair, Pa.; modify directional antenna pattern (DA-1).

1000 KC.

WKNS—Kinston Broadcasting Co., Kinston, N. C.—Modification of construction permit (B3-P-5227, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and transmitter location, and specify studio location.

1020 KC.

NEW—Calhoun Broadcasting Corp., Calhoun, Ga. (P. O. 300 Richards St.)—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 250 watts, and daytime hours of operation.

1080 KC.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Modification of construction permit (B1-P-5052, which authorized installation of new transmitter) for extension of completion date.

1110 KC.

NEW—Brazoria County Broadcasting Corp., Freeport, Tex. (W. David Evans, Luther L. Copeland and Richard J. Higgins, a partnership)—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 250 watts, and daytime hours of operation. Amended to change name of applicant from W. David Evans, Luther L. Copeland and Richard J. Higgins, a partnership, d/b as Brazoria County Broadcasting Co., to W. David Evans, Richard J. Higgins, A. T. Deere, John S. Hain, George D. Reeves, Ross K. Prescott and H. J. Griffith, a partnership, d/b as Brazoria County Broadcasting Co.

1220 KC.

NEW—Lamar A. Newcomb, Falls Church, Va.—Construction permit for a new standard broadcast station to be operated on 840 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 840 to 1220 kc.

1230 KC.

WCOM—Parkersburg Broadcasting Co., Parkersburg, W. Va.—Modification of construction permit (B2-P-4741, which authorized a new standard broadcast station) to make changes in transmitting equipment for approval of antenna and transmitter site and to change studio location.

WCOL—The Pixleys, Columbus, Ohio (Lloyd A. Pixley, Martha P. Pixley, Milton A. Pixley and Grace M. Pixley, partners)—Modification of construction permit (B2-P-5199, which authorized installation of FM antenna on AM tower) for extension of commencement and completion dates.

NEW—The Wiregrass Broadcasting Co., Enterprise, Ala. (Franklin H. James, Robert Edward James and Ralph M. Stanford, a partnership) (P. O. 200 No. Main St., % Dixie Drygoods Co.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation.

KDIX—Dickinson Radio Ass'n, Dickinson, N. Dak.—License to cover construction permit (B4-P-4586, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1240 KC.

WWON—Associated Electronic Enterprises, Woonsocket, R. I.—License to use old main transmitter (composite) at Getchell Ave., Woonsocket, Rhode Island (present location of main transmitter) to be used for auxiliary purposes with power of 250 watts.

WWON—Associated Electronic Enterprises, Woonsocket, R. I.—License to cover construction permit (BP-6010), which authorized installation of new transmitter.

NEW—Standard Tobacco Co., Inc., Maysville, Ky.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts, and unlimited hours of operation. Amended to change transmitter and studio location from Forest Ave. at Walnut St., Maysville, Ky., to: To be determined, Maysville, Ky.

1270 KC.

NEW—The Fairfield Broadcasting Co., Lancaster, Ohio (P. O. % Kermit C. Sitterley)—Construction permit for a new standard broadcast station to be operated on 1270 kc., power of 1 KW, and daytime hours of operation.

1280 KC.

WKST—WKST, Inc., New Castle, Pa.—Modification of construction permit (B2-P-5290, which authorized changes in vertical antenna and to mount FM antenna on AM tower) for extension of completion date.

1340 KC.

NEW—Oroville Mercury Co., Oroville, Calif. (Dan L. Beebe, Floyd L. Sparks and Betty Clark Sparks, a partnership) (P. O. 1835 Robinson St.)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation.

1350 KC.

WADC—Allen T. Simmons, Village of Tallmadge, Ohio—Authority to determine operating power by direct measurement of antenna power.

1360 KC.

WGFG—The Southwestern Michigan Broadcasting Co., Kalamazoo, Mich. (Harold F. Gross)—Modification of construction permit (B2-P-4335, which authorized a new standard broadcast station) to change type of transmitter, and for extension of completion date.

1380 KC.

KPBX—WCPZ Broadcasting Co., Beaumont, Texas (William Paul Beville, Louise Beville, Vincent F. Callahan, Florence Anita Callahan, Eugene M. Zuckert and Barbara J. Zuckert, a partnership)—License to cover construction permit (B3-P-5113 as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1400 KC.

WGNH—General Newspapers, Inc., Gadsden, Ala.—License to cover construction permit (B3-P-4624, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WHCC—Smoky Mountain Broadcasters, Inc., Waynesville, N. C.—Modification of construction permit (B3-P-5496, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and transmitter location and to change studio location.

WSLB—St. Lawrence Broadcasting Corp., Ogdenburg, N. Y.—Construction permit to install new vertical antenna and mount FM antenna on AM tower.

1420 KC.

WSBA—Susquehanna Broadcasting Co., York, Pa.—Construction permit to change frequency from 900 to 1420 kc., increase power from 1 to 5 KW day and night, change hours of operation from daytime to unlimited time, install new transmitter and directional antenna for night use.

(Continued on next page)

1450 KC.

WWNR—Rahall Broadcasting Co., Inc., Beckley, W. Va.—Construction permit to mount FM antenna on AM tower.

WIBM—WIBM, Inc., Jackson, Mich.—Construction permit to install a new vertical antenna and mount FM antenna on AM tower, and to change transmitter location from 228 W. Michigan Ave., Jackson, Mich., to 2511 Kibby Rd., in SW¼ of SW½ of Section 9, Town 3 South, Range 1 West, Twp. of Summit, Mich.

1470 KC.

KVAK—S. H. Patterson, Atchison, Kansas—Voluntary assignment of construction permit and license to Albert Alvin Almada.

WJOC—Air Waves, Inc., Jamestown, N. Y.—Modification of construction permit (B1-P-5318 which authorized a new standard broadcast station) for approval of antenna and transmitter location, at 2½ miles south of downtown portion of Jamestown, in Busti, New York.

1480 KC.

990 KC.

NEW—Redlands Broadcasting Co., Redlands, Calif. (a partnership)—Construction permit for a new standard broadcast station to be operated on 990 kc., power of 250 watts and daytime hours of operation.

1080 KC.

NEW—The Lancaster Broadcasting Co., Lancaster, Ohio (Richard Field Lewis, Jr., and Winslow T. Porter, a partnership)—Construction permit for a new standard broadcast station to be operated on 1080 kc., power of 250 watts, and daytime hours of operation.

1100 KC.

WLBB—Carroll Broadcasting Co., Carrollton, Ga. (Roy Richards, Robert Tisinger, J. E. Duncan and Thomas Carr, a partnership)—Consent to assignment of license to Carroll Broadcasting Co., Inc.

1170 KC.

NEW—Peninsula Broadcasting Corp., Hampton, Va.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 250 watts, and daytime hours of operation.

1230 KC.

KGFJ—Ben S. McGlashan, Los Angeles, Calif.—Construction permit to increase power from 100 watts to 250 watts and approval of transmitter location and antenna system, unlimited hours of operation.

1240 KC.

NEW—Home Appliance Store, Susanville, Calif. (Nolan Hallowell, James E. McKahan)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts, and unlimited hours of operation.

1250 KC.

NEW—Englewood Broadcasting Co., Englewood, Colo. (Alf. M. Landon)—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 1 KW, and daytime hours of operation.

NEW—The Helm Coal Co., York, Pa. (H. J. Williams, M. E. Cousler, Lowell W. Williams, and Edward C. Hale, partners)—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 1 KW, and daytime hours of operation.

1310 KC.

KFKA—The Mid-Western Radio Corp., Greeley, Colo.—Construction permit to change frequency from 910 kc. to 1310 kc., change hours of operation from sharing time with KPOF to unlimited hours, install new transmitter and directional antenna for night use, and change the transmitter location.

1340 KC.

WTAL—Capital City Broadcasting Corp., Tallahassee, Fla.—Consent to assignment of license and construction permit to John H. Phipps.

WLAK—Radio Station WLAK, Lakeland, Fla. (S. O. Ward)—Consent to assignment of license and construction permit to Lakeland Broadcasting Corp.

1400 KC.

NEW—The Greenville Broadcasting Co., Greenville, Ala. (A partnership composed of E. Vernon Stabler, Calvin Poole, and Samuel W. Ferrell, Jr.)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts, and unlimited hours of operation.

1420 KC.

NEW—Minnesota Valley Broadcasting Co., Mankato, Minn.—Construction permit for a new standard broadcast station to be operated on 1420 kc., power of 1 KW, and unlimited hours of operation. Directional antenna for night use.

1480 KC.

NEW—Wilbur E. Rocchio, d/b as Central Colorado Broadcasting Co., Denver, Colo.—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 500 watts night, 1 KW day, and unlimited hours of operation.

1490 KC.

NEW—Radio Courier, Inc., East Liverpool, Ohio—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts, and unlimited hours of operation. Contingent on WWSW utilizing 970 kc., as granted.

KTTR—Luther W. Martin, Wilson C. Burkhead and Martin M. Mitchum, a partnership, d/b as "Show Me" Broadcasting Co., Rolla, Mo.—Construction permit to change frequency from 1340 kc. to 1490 kc.

1600 KC.

WBAT—Marion Radio Corp., Marion, Ind.—Modification of construction permit to specify power of 500 watts, daytime hours of operation, and approval of transmitter location and antenna system.

FREQUENCY MODULATION

FM—Conditional Grants

The following were authorized conditional grants for the type of station indicated, subject to further review and approval of engineering details:

News Publishing Co., Rome, Ga.—Class B station. (BPH-1232)

Parker Bros. Inc., Ahoskie, N. C.—Class B station (in lieu of a Class A previously authorized). (BPH-380)

American Quartz Labs., Inc., Camden, N. J.—Class A station. (BPH-1226)

Trent Broadcast Corp., Trenton, N. J.—Class A station. (BPH-794)

Pocono Broadcasting Co., Stroudsburg, Pa.—Class A station. (BPH-1217)

Tri-State Broadcasting Co., Sioux Falls, S. D.—Class B station. (BPH-1150)

Wm. F. Huffman, Wisconsin Rapids, Wis.—Class B station (in lieu of a Class A previously authorized). (BMPH-159)

FM—Construction Permits Authorized

The following were authorized construction permits; conditions. (Note: power given is effective radiated power; antenna height is height above average terrain, and Channel to be assigned after final proceedings in Docket 6768):

Central Calif. Broadcasters, Inc., Berkeley, Calif.—Class B; 6.8 KW; 1420 feet. (BPH-723)

Portsmouth Star Publishing Corp., Portsmouth, Va.—Class B; 32 KW; 290 feet. (BPH-849)

Surety Life Insurance Co., Columbia, S. C.—Class B; 150 KW; 455 feet. (BPH-341)

The following were authorized construction permits in lieu of previous conditions; channel to be assigned after final proceedings in Docket 6768:

(Continued on next page)

KGLO-FM—Lee Radio, Inc., Mason City, Ia.—Class B; 260 KW; 920 feet. (BPH-627)

WBIG-FM—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Class B; 14 KW; 575 feet. (BPH-254)

KFOR-FM—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Class B; 22 KW; 230 feet. (BMPH-298)

KRNT-FM—The Cowles Broadcasting Co., Des Moines, Ia.—Class B; 160 KW; 1580 feet. (BPH-662)

KRLD-FM—KRLD Radio Corp., Dallas, Tex.—Class B; 46 KW; 490 feet. (BPH-255)

Dublin Broadcasting Co., Dublin, Ga.—Class B; 2.5 KW; 310 feet. (BPH-840 BMPH-220)

FM—License Renewals

WABF—Metropolitan Broadcasting & Television, Inc., New York City, N. Y.—Granted renewal of license for the period ending June 1, 1948.

WBBM-FM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted renewal of license for the period ending June 1, 1948.

WFBG-FM—The Gable Broadcasting Co., Altoona, Pa.—Granted modification of CP for extension of completion date to 8-1-47. (BMPH-367)

WMFM—James A. Hardman, No. Adams, Mass.—Granted modification of CP for extension of completion date to 8-13-47. (BMPH-366)

KENO-FM—Nevada Broadcasting Co., Las Vegas, Nev.—Granted modification of CP for extension of completion date to 8-6-47. (BMPH-368)

KRCC—Contra Costa Broadcasting Co., Richmond, Calif.—Granted modification of CP for extension of completion date to 7-31-47. (BMPH-376)

KIMV—Hutchinson Publishing Co., Hutchinson, Kans.—Granted modification of CP for extension of completion date to 7-27-47. (BMPH-377)

KTRN—Times Publishing Co. of Wichita Falls, Wichita Falls, Tex.—Granted modification of CP for extension of completion date to 9-10-47. (BMPH-378)

WHVA—Poughkeepsie Newspapers, Inc., Poughkeepsie, N. Y.—Granted modification of CP for extension of completion date to 9-7-47. (BMPH-274)

WSBA-FM—Susquehanna Broadcasting Co., near York, Pa.—Granted modification of CP for extension of completion date to 8-5-47. (BMPH-371)

WPDQ-FM—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Granted modification of CP for extension of completion date of FM station to 6-15-47. (BMPH-268)

WESX-FM—North Shore Broadcasting Co., Salem, Mass.—Granted modification of CP for extension of completion date of FM station to 8-18-47. (BMPH-357)

WEIM-FM—Meyers, Aronheim & Meyers, Fitchburg, Mass.—Granted modification of CP for extension of completion date of FM station to 10-23-47. (BMPH-359)

WSPA-FM—Spartanburg Advertising Co., Spartanburg, S. C.—Granted modification of CP to extend completion date to 12-2-47. (BMPH-365)

WWHG—The W. H. Greenbow Co., Hornell, N. Y.—Granted modification of CP to extend completion date to 7-17-47. (BMPH-364)

WRCM—Supreme Broadcasting System, Inc., New Orleans, La.—Granted modification of CP to extend completion date to 10-27-47. (BMPH-355)

WRGA-FM—Rome Broadcasting Corp., Rome, Ga.—Granted modification of CP to extend completion date to 8-10-47. (BMPH-360)

WCOD—Havens & Martin, Inc., Richmond, Va.—Granted modification of CP to extend completion date to 10-23-47. (BMPH-363)

FM—Applications Accepted for Filing

KALE-FM—KALE, Inc., Portland, Ore.—Modification of construction permit (B5-PH-751, as modified) which authorized a new FM broadcast station, for extension of completion date.

WTOC-FM—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-PH-653, as modified) which authorized a new FM broadcast station, for extension of completion date.

WBBB-FM—Alamance Broadcasting Co., Inc., Burlington, N. C.—Modification of construction permit (B3-PH-566, which authorized a new FM broadcast station) for extension of completion date.

WATG—Beer and Koehl, Ashland, Ohio (Robert M. Beer and Edgar Koehl)—License to cover construction permit (B2-PH-223, as modified) which authorized a new FM broadcast station.

WOPI-FM—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Modification of construction permit (B3-PH-676, which authorized a new FM broadcast station) for extension of completion date.

WCOL-FM—The Pixleys, Columbus, Ohio (Lloyd A. Pixley, Martha P. Pixley, Milton A. Pixley and Grace M. Pixley, partners)—Modification of construction permit (B2-PH-307, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WAZV—Cur-Nan Co., Brockton, Mass.—Modification of construction permit (B1-PH-604, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WJR-FM—WJR, The Good Will Station, Inc., Detroit, Mich.—Modification of construction permit (B2-PH-28, as modified) which authorized a new FM broadcast station, for extension of completion date.

(Continued on next page)

KMBC-FM—Midland Broadcasting Co., Kansas City, Mo.—Modification of construction permit (B4-PH-952, which authorized a new FM broadcast station) for extension of commencement and completion dates.

KLTI—R. G. LeTourneau, Longview, Tex.—Modification of construction permit (B3-PH-987, which authorized a new FM broadcast station) to change studio location and transmitter site and change commencement and completion dates.

WJBK-FM—James F. Hopkins, Inc., Detroit, Mich.—Modification of construction permit (B2-PH-1, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WWST—The Wooster Republican Printing Co., Wooster, Ohio—Modification of construction permit (B2-PH-275 which authorized a new FM broadcast station) to change type of transmitter; ERP to 13 KW; specify studio location, change antenna height above average terrain to 331 feet; make changes in antenna system and change completion date.

WWST—The Wooster Republican Printing Co., Wooster, Ohio—Modification of construction permit (B2-PH-275 which authorized a new FM broadcast station) for extension of completion date.

WFOB—Laurence W. Harry, Fostoria, Ohio—Modification of construction permit (B2-PH-493 which authorized new FM broadcast station) to change type of transmitter, ERP to 450 watts, make changes in antenna system and change commencement and completion dates.

WMGA-FM—John F. Pidcock, Moultrie, Ga.—Modification of construction permit (B3-PH-420 as modified) which authorized a new FM broadcast station, for extension of commencement and completion dates.

WFBR-FM—The Baltimore Radio Show, Inc., Baltimore, Md.—Modification of construction permit (B1-PH-133 which authorized a new FM broadcast station) for extension of completion date.

WDNC-FM—Durham Radio Corp., Durham, N. C.—Modification of construction permit (B3-PH-144 as modified) which authorized a new FM broadcast station to change effective radiated power to 35.9 KW and make changes in antenna system. And change commencement and completion dates.

WNJD—H. C. Winslow, Meadville, Pa.—Modification of construction permit (B2-PH-664 as modified) which authorized a new FM broadcast station for extension of completion date.

WKST-FM—WKST, Inc., New Castle, Pa.—Modification of construction permit (B2-PH-805 which authorized a new FM broadcast station) for extension of completion date.

92.5 MC.—#223

WMBD-FM—Peoria Broadcasting Co., Peoria, Ill.—Modification of construction permit (B4-PH-231 which authorized a new FM broadcast station) to change frequency to Channel 223, 92.5 mc., specify type of transmitter, change effective radiated power to 17 KW and make changes in antenna system.

92-7 MC.—#224

NEW—Village Broadcasting Co., Oak Park, Ill. (P. O. Oak Park Club) (Joseph Triner, Charles M. Hickman, George Herrmann, Jr., Edward J. Faltysek and William L. Klein)—Construction permit for a new FM broadcast station (Class A) to be operated on Frequency Channel 224, 92.7 mc., ERP of 1 KW and antenna height above average terrain 250 feet.

94.5 MC.—#233

NEW—Reading Broadcasting Co., Reading, Pa.—Construction permit for a new high frequency FM broadcast station to be operated on 48.1 mc., amended to change frequency from 48.1 mc., to channel #233, 94.5 mc.; change type of transmitter; transmitter site from South of 13th & Highland Streets, Reading, Pa., to Reading, Pa.; ERP from 630 watts to 16200 watts and make changes in antenna system.

97.9 MC.—#250

KOMB—Consolidated Broadcasting Corp., Ltd., Los Angeles, Calif.—Modification of construction permit (B5-PH-258, which authorized a new FM broadcast station) to change frequency to Channel 250, 97.9 mc., transmitter site to Summit of Mt. Wilson, Los Angeles County, California; type of transmitter; effective radiated power to 10.4 KW; antenna height above average terrain to 2748.7 feet, and make changes in antenna system.

±98 MC.

WFSS—Suffolk Broadcasting Corp., Long Island, N. Y.—Modification of construction permit (B1-PH-816 as modified, which authorized a new FM broadcast station) to change type of station from Class A to Class B; frequency to plus or minus 98 mc.; type of transmitter; ERP to 3 KW; antenna height above average terrain to 513 feet; make changes in antenna system and change commencement and completion dates.

98.9 MC.—#255

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—Construction permit for a new high frequency FM broadcast station to be operated on 44,700 kc., amended to change frequency from 44,700 kc., to channel #255, 98.9 mc., change type of transmitter, transmitter site from: exact site to be determined, Harrisburg, Pa., to Harrisburg, Pa.; specify ERP as 4400 watts and make changes in antenna system.

99.5 MC.—#258

NEW—WDEL, Inc., Wilmington, Del.—Construction permit for a new high frequency FM broadcast station to be operated on 44,500 kc., amended to change frequency from 44,500 kc. to channel #258 99.5 mc., change type of transmitter, transmitter site from: exact site to be determined North Central or Central Delaware to Wilmington, Del.; specify ERP as 15,300 watts and make changes in antenna system.

100.5 MC.—#263

NEW—York Broadcasting Co., York, Pa.—Construction permit for a new high frequency FM broadcast station to be operated on 45,100 kc. amended to change frequency from 45,100 kc. to channel #263, 100.5 mc., change type of transmitter, specify ERP as 13,000 watts and make changes in antenna system.

To Be Assigned by FCC

NEW—Don Lee Broadcasting Co., Berkeley, Calif.—Construction permit for a new high frequency broadcast station to be operated on 43,500 kc. Amended to change frequency from 43,500 kc. to, to be assigned by FCC, type of transmitter, specify ERP as 333 KW; and make changes in antenna system.

NEW—Springtime City Broadcasting Co., Clearwater, Fla. (P. O. 300 North Garden Avenue, Clearwater, Florida) (Victor John Morgan)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 600 watts and antenna height above average terrain 236.5 feet.

NEW—The Sayre Printing Co., Sayre, Pa.—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 270 watts.

FM—Applications Dismissed

Central Nebraska Broadcasting Corp., Kearney, Nebr.—Construction permit for a new FM broadcast station to be operated on channel #228, 93.5 mc., or as assigned by FCC. Dismissed May 20, 1947, per request attorney letter April 30, 1947.

Joseph M. Viana, Woonsocket, R. I. (P. O. Social street)—Construction permit for a new FM broadcast station (community) to be operated on frequency to be determined by chief engineer of FCC. Dismissed May 15, 1947, per request of applicant, letter dated April 28, 1947.

TELEVISION

TV—License Renewals

W1XHR—Harvey Radio Labs., Inc., Cambridge, Mass.—Granted renewal of license for the period ending May 1, 1948.

W9XEK—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted renewal of license for the period ending May 1, 1948.

W9XLZ—Gates Radio Co., Quincy, Ill.—Granted renewal of license for the period ending May 1, 1948.

TV—New Experimental CP Granted

Scripps-Howard Radio, Inc., Portable-Mobile, area of Cleveland, Ohio—Granted CP for new experimental television relay broadcast station. (BPVB-198)

TV—Miscellaneous Actions

WWHB—The Wm. H. Block Co., Indianapolis, Ind.—Granted modification of CP for extension of completion date to 12-10-47. (BMPCT-64)

W2XDK—Sherran Metallic Corp., Brooklyn, N. Y.—Granted license for new experimental television station. (BLVB-82)

National Broadcasting Co., Inc., Portable-Mobile, area of New York—Granted license for experimental television relay station. (BLVB-83)

KWIS—The Associated Broadcasters, Inc., San Francisco, Calif.—Granted modification of CP for extension of completion date to 12-17-47. (BMPCT-65)

TV—Applications Accepted for Filing

NEW—Radio Station WOW, Inc., area of Omaha, Nebr. (P. O. 17th & Farnam St., Insurance Building)—Construction permit for a new experimental television relay broadcast station to be operated on 6775 to 6800 mc., power of .1 watt Visual Emission Visual A5 and unlimited hours of operation.

W9XPR—Balaban & Katz Corp., area of Chicago, Ill.—License to cover construction permit (BPVB-186 which authorized conversion of experimental television broadcast station to experimental television relay broadcast station).

NEW—Federal Telecommunication Laboratories, Inc., area of New York, N. Y.—Construction permit for a new experimental television relay broadcast station to be operated on 1295-1375 mc. band, power of 25 watts, emission A5, and hours of operation unlimited, in accordance with Sections 4.131(b) and 4.163.

MISCELLANEOUS BROADCAST

Actions

Noncommercial Educational

WBGO—The Board of Education of Newark in the County of N. J., Newark, N. J.—Granted modification of CP for extension of completion date of noncommercial educational station to 6-10-47. (BMPED-59)

KOKU—State University of Oklahoma, Norman, Okla.—Granted modification of CP for extension of completion date of noncommercial educational station to 8-10-47. (BMPED 58)

Remote Pickup

KRPI—James A. Murray, Mobile, area of Hutchinson, Kans.—Granted license for new remote pickup broadcast station. (BLRE-470)

WEWT—WAGE, Inc. (Portable mobile), area of Syracuse, N. Y.—Granted license for remote pickup broadcast station. (BLRY-332)

General Electric Co., Onondaga County, N. Y.—Granted CP for new developmental broadcast station. (BPEX-105)

Emporia Broadcasting Co., Inc., Portable, area of Emporia, Kans.—Granted CP for new remote pickup broadcast station. (BPRY-341)

KEGJ—Columbia Broadcasting System, Inc., Portable mobile—Granted request for deletion of remote pickup broadcast station. (BPRE-251)

Studio Transmitter

Federal Telecommunications Labs., Inc., New York City.—Granted CP for new studio-transmitter link broadcast station. (BPST-13)

Facsimile

W8XUM—Radio Ohio, Inc., Columbus, Ohio—Granted CP to change transmitter site to 33 No. High St., Columbus, and to change antenna system. (BPFB-20)

Applications

Remote Pickup

NEW—Billy Averitte Laurie, area of Jacksonville, Tex.—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150, 2790 kc., power of 15 watts, emission A3, and hours of operation in accordance with Sec. 4.403.

NEW—Onondaga Radio Broadcasting Corp., area of Syracuse, N. Y.—Construction permit for a new remote pickup broadcast station to be operated on 156.75 and 158.4 mc., power of 15 watts, emission Special for FM, and unlimited hours of operation.

NEW—Onondaga Radio Broadcasting Corp., area of Syracuse, N. Y.—Construction permit for a new remote pickup broadcast station to be operated on 156.75, 158.40 mc., power of 15 watts, emission Special for FM, and unlimited hours of operation.

WIHU—The Ludington Broadcasting Co., area of Ludington, Mich. (Karl L. & Grant F. Ashbacker, Partnership)—Modification of construction permit (B2-PRY-323, which authorized a new remote pickup broadcast station) for extension of commencement and completion dates.

NEW—WAGE, Inc., area of Syracuse, N. Y.—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150 and 2790 kc., power of 80 watts, emission A3, and hours of operation in accordance with Section 4.403.

Noncommercial Educational

KSUI—The State University of Iowa, Iowa City, Iowa—Modification of construction permit (B4-PED-28, as modified) which authorized a new noncommercial educational station for extension of completion date.

Federal Trade Commission Actions

Complaint

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Jesse C. Stewart Co.—Receipt of brokerage fees by a brokerage company on purchases of flour and other commodities for a macaroni company in which it owns a majority of the capital stock is challenged as a violation of the Robinson-Patman Act in a complaint issued by the Commission. The respondents are Jesse C. Stewart Co., 1217 West

(Continued on next page)

Carson St., Pittsburgh, and its president, Jesse C. Stewart. (5494)

Stipulations

Ideal Distributing Co.—The Commission approved a stipulation in which Ideal Distributing Co., a partnership located at 480 Lexington Ave., New York, agrees to discontinue selling any abridged copy of a book or publication unless the word "abridged" appears in clear and conspicuous type on the front cover and on the title page of the book in immediate connection with the title. (7606)

The Lofstrand Co., 959 Selim Road, Silver Spring, Md., stipulated with the Commission that in connection with the sale of the Lofstrand Insecticide Sprayer it will discontinue representing that the United States Department of Agriculture has approved or endorsed the device. (7607)

Cease and Desist Orders

Hi-Pote Products, etc.—The Commission has ordered Edward I. Frankel, trading as Hi-Pote Products and as Edward I. Frankel and Associates, 418 Seventh St., Des Moines, Iowa, to stop misrepresenting the therapeutic properties and effectiveness of a vitamin preparation designated "Hi-Pote." (5472)

Myndall Cain House of Beauty—The Commission has ordered William A. Wickland and Myndall Cain Wickland, copartners trading as The Myndall Cain House of Beauty, 808 LaSalle Ave., Minneapolis, to stop disseminating false advertisements of the Myndall Cain line of cosmetic products. (5466)

Complaint Dismissed

Know Your Bible Co.—The Commission dismissed without prejudice a complaint charging Roy E. Castetter, Margaret H. Castetter, Robert C. Castetter and Rosemary C. Steffens, copartners trading as Know Your Bible Co., 317 Sycamore St., Cincinnati, and Bert Ray, trading as R & R Furniture Co. and R & R Sales Co., 666 Lake Shore Drive, Chicago, with misrepresentation in the advertising and sale of "Heart-Shield" Bibles, New Testaments and Catholic Prayer Books. (5158)

Case Closed

Maritime Milling Co., Inc.—The Commission closed its case against Maritime Milling Co., Inc., and Everett L. Bowers, Inc., both of Buffalo, N. Y., which had been charged with misrepresentation in connection with the sale of Hunt Club Dog Food. (5343)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 22, June 2, 1947

25th ANNUAL CONVENTION

ATLANTIC CITY

MID-SEPTEMBER

℺ The 25th Annual Convention and Membership meeting of NAB will be held in Atlantic City, New Jersey, September 15-18, inclusive.

℺ The huge Convention Hall has been engaged for all meetings and exhibits.

℺ Contracts have been made with boardwalk hotels for accommodations for the exclusive use of properly certified NAB members.

℺ These accommodations will be available *only* to persons connected directly with NAB active or associate members and must be reserved through NAB headquarters.

℺ Pre-registration and hotel reservation will open about June 15 and will close August 15. Standard forms covering these matters will be mailed to all members and only those room requests made on these forms will be processed. No letters, other than explanatory, will be honored.

℺ The registration fee is $27.50 if made on the pre-registration form before August 15. After August 15 and at the convention, it is $30.00.

℺ Special clinics or panels on broadcast advertising, employer-employee relations, engineering and programs are being arranged, to be held simultaneously, on Monday. An additional $5.00 registration fee, including luncheon, will be charged for each of these clinics or panels.

℺ The general registration fee covers three luncheons and a banquet.

℺ Pre-registrants will be given preferred consideration in the matter of hotel assignments.

℺ Several groups, including some networks, are considering plans for meetings to be held in advance of the convention dates. Until all of these matters are settled, no member can make his plans definitely.

So "Don't Jump the Gun!"

℺ Wait until all details have been settled and you receive the standard forms for pre-registration, hotel reservation, certification, etc.

℺ If you send in your request without complete information, both of us have to go through the same process twice. To avoid confusion and assure efficient handling of all details, we urgently request the cooperation of all NAB members.

A Special Word to Exhibitor Members

℺ Plans for the exhibit are being perfected. It will be held on the main arena floor of the huge Convention Hall. Details will be explained and questionnaires sent around June 15.

A Statement by President Justin Miller, Concerning the White and Wolverton Bills

The White Bill (S-1333) and the Wolverton Bill (HR-3959) now pending before the Congress offer an opportunity which broadcasters have been awaiting for years—a chance to place upon our statute books a law governing broadcasting which will recognize beyond a shadow of doubt that the First Amendment guarantees in express terms a radio as free from government abridgement as any other form of speech or press.

Broadcasters will not be satisfied with the White-Wolverton bills as now written.

I am convinced that no party to the legislation will be completely satisfied, not excepting the authors themselves. Senator White has said frequently that his purpose in introducing this legislation was to afford equal opportunity to all for extensive hearings. From the evidence accumulated, a practical and acceptable measure can emerge.

It should be remem-

A Statement by President Justin Miller Concerning the White and Wolverton Bills

(Continued from page 443)

bered that Senator White has pioneered radio legislation. He is a statesman of consummate fairness. The membership of the Senate Interstate and Foreign Commerce Committee (of which Senator White is chairman) and the House Interstate and Foreign Commerce Committee (of which Rep. Wolverton is chairman) comprises some of the best legislative minds in our Congress.

I am confident that all who are interested in new radio legislation will be welcome before the committees when hearings are held, and that their viewpoints will be given full consideration. These bills have been produced only after monumental effort to facilitate introduction before the Congressional recess.

I am hopeful that hearings will not be held hastily, but that all parties will be given time to prepare carefully. I say this in consideration not only of the NAB, but also of the FCC, three of whose members are engaged in a summer-long conference on international broadcasting right now in Atlantic City—a vital proceeding which will have important effect on radio here and throughout the world.

Senator White and Representative Wolverton have made it possible to obtain new legislation. I call upon all broadcasters at this time to study the pending measures and express their opinions of them frankly and fully.

NAB's Legislative Committee will meet Thursday, June 5th at NAB headquarters, 1771 N Street, N. W., to examine the proposed measures thoroughly. Members of the Committee who will meet with me, A. D. Willard, Jr., and Don Petty are: J. Harold Ryan, WSPD, Toledo, Ohio (chairman); Joe B. Carrigan, KWFT, Wichita Falls, Texas; Wayne Coy, WINX, Washington, D. C.; Don S. Elias, WWNC, Asheville, N. C.; Herbert Hollister, KMMJ, Grand Island, Nebraska; Clair R. McCollough, WGAL, Lancaster, Pa.; Joseph H. Ream, CBS, New York; Frank M. Russell, NBC, Washington; G. Richard Shafto, WIS, Columbia, S. C.; Robert D. Swezey, MBS, New York; O. L. Taylor, KGNC, Amarillo, Texas; Louis Wasmer, KGA, Spokane, Washington.

District Meetings

Coleman Re-Elected by Acclamation At District 3 Meeting in Baltimore

George D. Coleman, WGBI, Scranton, was reelected, by acclamation, as NAB 3rd District Director when the broadcasters of Delaware, Maryland and Pennsylvania held their annual meeting in Baltimore last Monday and Tuesday (26-27).

With approximately 125 representatives registered for the meeting, the first morning's sessions on public relations, programming and engineering were conducted by NAB's three new staff directors, Robert K. Richards, Harold Fair, and Royal V. Howard respectively.

Richard C. Hottelet, CBS news correspondent, who spoke at the first day's luncheon, graphically described his experiences in broadcasting from the Soviet Union.

Mr. Richards emphasized that "a public relations battle can be won only by taking the offensive." He pointed out that stations which are considered outstanding have attained their stature by providing their listeners with "something extra." The "extra" might be one of several contributions such as community activity by the station manager, exceptionally interesting programming, etc.

On the national scale, Mr. Richards, pointed out NAB's public relations program in combatting juvenile delinquency has met with enthusiastic cooperation industry-wise, while plans for the transcribed series to "sell radio by radio" are in the production stage.

Mr. Fair, who spoke immediately after the public relations session, emphasized the close tie-up between programming and public relations. He reviewed the work of the Standards Committee and stated that one way to combat current criticism directed at the industry "is to do something affirmative" in establishing a strong code.

He suggested three avenues which broadcasters could follow in carrying out programs in communities to decrease juvenile delinquency.

1. Broadcasts directed at parents. Authorities on the subject, have agreed that the principal source of juvenile delinquency is the home. Mr. Fair pointed out that round table discussions and forum type programs were especially successful. He suggested also, that this type of presentation was ideal for "bringing delinquents" on the air to tell their stories.

2. Broadcasts directed at youngsters. It was suggested that these program be presented by the youngsters themselves, since they know what others in the same age group want and what they will listen to.

United States Proposals Advanced at Atlantic City for International Broadcasting

One of the most vexing of world communications problems, that of assignment of channels to international broadcasting, was brought before the International Telecommunications Conference last week at Atlantic City when the various nations submitted their proposed assignments for this service. Since the number of stations throughout the world currently using international frequencies for broadcasting (400-27000 kc.) is estimated to have grown to approximately 1,000, the submission of these proposals has been anticipated with great interest. The majority of these are so-called "Tropical Broadcasting" stations, and use international frequencies in equatorial areas where static is extremely heavy.

The countries using these channels feel the standard broadcast band and standard band transmissions would not permit coverage of wide, sparsely settled areas, and therefore feel that ionispheric transmission is necessary. The finding of space for these "tropical broadcasting" stations is considered the key to all other interlocking allocations. Although the United States does not employ this type of broadcasting, the use of the international frequencies for "tropical broadcasting" would reduce the number of channels available to the United States and all other countries for use in high-powered international broadcasting. The extreme crowding of tropical stations into the present spectrum has caused considerable derogation or off-channel operation.

The United States, in submitting its international broadcasting proposal, disclosed that its position is essentially unchanged from the Moscow Five-Power Conference and proposes less spectrum space than any of the nations submitting proposed allocations. The U. S. delegation, however, proposes to put "Tropical Broadcasting" in the band 3000-5000 kc., which would be shared with other services. The total kilocycle space proposed for use by the entire world as submitted by each country is as follows: United States, 1700; United Kingdom, 2390; Russia, 2900; France, 2500; Canada, 2000; Czechoslovakia, 3359; China, 1300 (does not include frequencies in the 25 mc. band); and Norway, Sweden and Iceland, 2350.

The conference in its second day (29th) after submission of proposals reached three agreements of importance to broadcasting. It was agreed that there would be no broadcasting within the band from 2850 to 4000 kc., although the door was left open to include, if necessary, "Tropical Broadcasting." The Conference further agreed that International Broadcasting should be assigned two blocks, one from 17700 to 17900 kc. and the other from 25600 to 26100 kc. These were the same as the Moscow understanding.

In view of the shortage of channels, it was the opinion of many delegates that some kind of time-sharing or frequency-sharing arrangement, or both, of the international broadcasting stations of the world would have to be arranged. Many delegates also felt that the band width for international broadcasting might have to be decreased from 10 kc to 9 kc but that, in so doing, great care would have to be taken in regard to adjacent channel interference. This reduction in channel spacing would increase the number of channels by approximately 10 per cent. Many felt that only by a rigorous tightening of technical standards, such as frequency stability, etc., could 9 kc separation be made satisfactory. European delegates pointed out that 9 kc frequency separation in the Standard Broadcast Band is common practice on the Continent. However, precise frequency control is more easily obtained in the Standard Band than at the high frequencies used by international broadcasting.

The following is the American position in regard to "Tropical Broadcasting" as stated in the proposal:

> ### *Tropical Broadcasting (3000-5000 kc.)*
>
> Since the United States has no requirement for tropical broadcasting, it has not included a specific provision for this service in its table of frequency allocations. Recognizing, however, that certain countries have repeatedly expressed a need for this service for domestic broadcasting, particularly in the American Region, it is recommended that the appropriate committees of the Conference consider the proposals of the delegations concerned with this problem in the light of their essential needs with the objective that the necessary stations be given suitable frequency assignments for local daytime use in the band 6000-6200 kc., together with assignments shared with other services, within that portion of the spectrum between 3000 and 5000 kc. on a sound technical basis which will avoid mutual interference between the broadcasting service and the other services concerned."

A list of the High Frequency International Broadcasting Band proposals submitted by the various nations is listed below:

General

Plans for National Radio Week Include Allied Industry Cooperation

The annual observance of National Radio Week, October 26 to November 1, will have the cooperation

(Continued on next page)

of several national trade associations, it was revealed at the joint NAB-RMA meeting last week as plans for the celebration continue to take form.

Trade groups which will participate include: National Association of Music Merchants, National Retail Furniture Association and the NRDGA.

In cooperation with NAB and RMA, joint sponsors of the celebration, the three groups plan to furnish their thousands of members with promotion kits, including posters, streamers and suggestions for activities in cooperation with the local radio stations. The material is being prepared by the RMA Advertising Committee and the NAB Sales Managers Subcommittee.

Attending the meeting at NAB headquarters last week were:

W. B. McGill, Westinghouse Radio Stations; James Secrest, RMA; William Crist and Melva Chesrown, Fred Eldean Organization; Roy Hofheinz, FMA; Ben Strouse, WWDC; and, representing NAB, Robert Bartley, Hugh Higgins, Robert Richards and Arthur Stringer.

Legal Department

FCC, Amending Its Rules, Creates Hearing Division

In an order issued Thursday (29), the FCC amended its rules of practice and procedure to create within the Commission a Hearing Division which will include a Review Section. The Review Section will be responsible for coordinating all hearings and pre-hearing conferences and scheduling the times and places of them. In addition, it will be charged with reviewing the records of hearings, proposed findings and conclusions, decisions of presiding officers, and with preparing review reports.

The Hearing Division will be composed of officers designated to preside at hearings and to prepare recommended and initial decisions. Presiding officers will be assigned to cases in rotation with due consideration being given to their grade classifications, their specific experience, the extent of their work load and the nature of the cases to be heard.

Designations will be made and notice of them given to the public at least ten days before hearing. Provision is made for the disqualification of presiding officers on the ground of personal bias or otherwise. Requests that a presiding officer be disqualified will be addressed in the first instance to him, but in the event they are overruled they may be certified to the Commission which will rule on the question either without hearing or after taking testimony and hearing argument.

Presiding officers are required to conduct their functions in an impartial manner and are given authority to administer oaths, examine witnesses, issue subpoenas and in general regulate the course and procedure of the hearing. However, they are specifically forbidden to decide any motion to dismiss the proceeding or any other motion involving a final determination on the merits.

The rules further provide that any party may file proposed findings of fact and conclusions of law if he wishes to, by notifying the Commission of his intention before the record is closed.

The recommended decisions of presiding officers, which are required to be prepared, will be made public and filed in the docket of case at the same time as the Commission's proposed decision is issued.

In proceedings involving applications to revoke or suspend a license, applications for renewals, consent to assignment or transfer of control and in proceedings initiated by the Commission or by a person other than the licensee to modify a license, presiding officers are forbidden to consult or confer with any person or party without notice and opportunity for all parties to participate; nor can such officers be responsible to or subject to the supervision of any Commission personnel engaged in investigative or prosecuting functions. No Commission personnel engaged in such functions are permitted to participate or advise in any decision in any such proceeding.

These rules, which will become effective June 11, 1947, are made pursuant to the Administrative Procedure Act, passed last year, and designed to assure fair and impartial action by regulatory agencies, taken on the basis of fair and full hearings.

Broadcast Advertising

"Copy For Ear" Requires Development

Lee Hart Stresses at Ad Clinic

Citing the similarities and the differences between copy for the ear and copy for the eye, Miss Lee Hart, NAB assistant director of broadcast advertising, pointed out the necessity for store advertising departments to spend as much time developing good copy techniques for advertising that is to be heard, as they do for advertising to be read.

Miss Hart spoke at the Allied Stores Advertising Clinic last week in New York, substituting for Walter Dennis, director of radio and television, Allied Purchasing Corporation, who was ill.

She gave specific examples to point out the fact that radio copy which is to abstract, too detailed or too descriptive, will not do the job. Recommendations were made about the things that store copy writers can do to see that their radio advertising does a more effective job in reaching the dual objectives of:

1. Giving the listeners such a good character picture of the store or its departments that they become the first place for radio listeners to look for merchandise of a given type.
2. Giving the listeners such a believable, concrete sales story on the specific merchandise advertised that the radio listeners will want to come to the store to buy that specific merchandise.

After reviewing steps of operation, merchandising, and copy pre-evaluation necessary to achieve these two objectives, Miss Hart showed how results from this type of copy could be measured both in terms of increased sales of items advertised, and in long-range increased sales in radio-advertised departments.

Headed by Russell A. Brown, vice president in charge of sales and advertising of the Allied Pur-

(Continued on next page)

chasing Corporation, the four-day advertising clinic had as other participants: Harold Merahn, sales promotion manager of Gertz Jamaica Store; Ben Dalgin, director of art and reproduction, The New York Times; Elizabeth Flannery, copy chief, Macy's, N. Y.; and Howard Cowee, instructor in retail advertising and sales promotion at the School of Retailing, New York University.

PI's, Free Time Deals Reported By NAB Members

NAB member stations have reported that the following firms are attempting to place advertising with them on a per inquiry basis: *Lincoln Home Products, Inc.*, Riverside, Illinois, for the "Gardenia That Glows In The Dark"; *Learn-Wyly Advertising, Inc.*, Chicago, Ill., for "three high-grade smoking pipes"; *Edward E. Tharp Products Company*, Columbus, Ohio, for "Bait-aide."

NAB member have also reported that the *Penn Mutual Life Insurance Company* has attempted to secure free time to announce to the public that 1947 marks their 100th business anniversary. The insurance firm sent stations continuity marked "courtesy spot announcements."

NAB has written these firms inviting them to use radio at published rates. Copies of the industry's resolution against per inquiry and free time deals were enclosed with the letters.

Aid in Selling Programs Sent To NAB Membership

"Suggestions For Emphasizing Program Sales" is the title of a new NAB station operations aid distributed to member stations this week. The piece, prepared by J. Allen Brown, Assistant Director, Department of Broadcast Advertising, was purposely kept brief for easy reading by management and sales executives, particularly those in new stations.

Small Market Stations

Overall Discussion of Station Operation Highlights Third District Session

The Small Market Stations session of the NAB District Three meeting in Baltimore, Monday and Tuesday (26-27) developed into an open forum on "Station Operations." Broadcasters from large and small stations participated. The presiding officers were District Director George D. Coleman, WGBI, and Small Market Stations District Chairman George E. Joy, WRAK. The session was conducted by Allen Brown, NAB assistant director of broadcast advertising.

Following a discussion of the national situation for small stations and an explanation of NAB services to stations by Brown, the roundtable began when NAB Sales Managers District Chairman, Robert Gulick, WGAL, opened a discussion on "The Importance of Emphasizing Program Sales." He pointed out the effective techniques employed at his station and urged the broadcasters to audition more shows for clients, having the sales staff concentrate on a particular program until it is sold. Mr. Gulick suggested that management give consideration to paying bonus or commission on local live programs.

David Rosenblum, WISR, introduced on the floor a discussion of "Rate Charges for Regional Advertisers." The subject drew many comments and expressions of views from the broadcasters. Stations adopting the terms "Retail" and "General" for rates were reported to have less difficulty in dealing with regional advertisers.

Broadcasters were cautioned by George Joy to be firm with prospective advertisers who attempt to obtain reduction of rates. A readjustment of the rate card is better than selling under the published rates, he said. Once the rate is set, get your published prices, the broadcasters were advised.

Managements' practice with regard to paying "Announcers' Talent Fees," introduced by Tom Carr, WANN, provoked many points of expression from A. K. Redmond, WHP, Julian Skinnell, WLBR, Mr. Rosenblum, Morris Blum, WANN, and others. Richard P. Doherty, NAB director of employee-employer relations, was called on for an explanation of industry-wide practices in regard to the subject.

"Station Management's Community Leadership" was presented as a discussion topic when Brown told of NAB activity stressing "community leadership" and citing the work of Robert T. Mason, WMRN. The topic was given impetus when the broadcasters heard a report on the community leadership record of Victor C. Diehm, WAZL. Mr. Diehm, who was recently reelected president of the Hazleton Chamber of Commerce, told of the roles radio and management played in his city in raising a $660,000 fund for attracting new industry. The Hazleton broadcaster was general chairman of the Special Industry Committee that exceeded its goal by $160,000.

"Religious Programming, Sustaining vs. Commercial," was a thought-provoking subject introduced by Julian Skinnell, WLBR. He told of the steady demand for commercial time despite several increases in station rates. Bennett Larson, WPEN, said he had cancelled religious program contracts amounting to thousands of dollars in order to balance the station's program structure.

"Syndicated Transcribed Programs" were discussed by Homer R. Smith, WKOK. Mr. Smith stated that WKOK, a non-network station, has 22 daily commercial shows of this type. He related how over-all sales and programming had been improved with their use. When asked about the costs of these programs, Mr. Smith explained that the producers' new package rates to small market stations made them salable in Sunbury. His station, he said, has been in operation for 14 years and, up until this year, the bulk of his revenue had been derived from the sale of announcements. Many local productions are also sponsored, he said.

"Radio Success Stories On the Air," was related by Norman S. Caldwell, WBPZ, Philip Reilly, WLBR, and Arthur McCracken, WGPA. These broadcasters reported that good case histories of their stations' advertising effectiveness are broadcast on the air.

(Continued on next page)

New accounts and increased budgets resulted from this promotional activity.

Art Graham, WKST, New Castle, Pa., reported on his four years' experience with one rate card. He outlined his "Space Saver" rate, patterned after the local newspaper, whereby the advertisers were kept on the air 52 weeks in the year.

"Selling and Programming Local News" was introduced by C. B. Heller, WJPA, Washington, Pa., and David Rosenblum, WISR, Butler, Pa. Mr. Heller pointed out the increased community interest in his station as a result of daily *local news* programs at 12:30 p.m. and 6:30 p.m. He plans to increase the schedule soon.

Mr. Rosenblum revealed that he has had a *Local News Bureau* at WISR for the past six years. The news staff consists of an editor, and three girls. Station has a sponsors waiting list for local news broadcasts. Local florists try to out-bid each other for sponsorship of news periods devoted to local obituaries. The broadcasters were told of the NAB News Clinics, conducted by Arthur C. Stringer, NAB Director of Special Services, available through their District Director.

Committee to Meet This Month; Stations Asked to Submit Problems

A meeting of the Small Market Stations Executive Committee will be held at NAB headquarters on June 19 and 20.

The Committee will discuss industry-wide problems and practices of particular interest to the small station. All NAB member stations in the small market category (less than 5000 watts, and located in cities of 50,000 population and under) are requested to send problems which they wish handled by the Committee to their respective, district chairmen.

Members of the Executive Committee are: Wayne W. Cribb, chairman, KHMO, Hannibal, Mo.; Simon Goldman, WJTN, Jamestown, N. Y.; R. Sanford Guyer, WBTM, Danville, Va.; John F. Meagher, KYSM, Mankato, Minn.; Lefton L. Hendrick, KRRV, Sherman, Tex.; Robert T. Mason, WMRN, Marion, Ohio; Frank R. Mills, WDWS, Champaign, Ill.; Marshall H. Pengra, KRNR, Roseburg, Ore.; and A. E. Spokes, WJOY, Burlington, Vt.

The NAB Board Liaison members are William B. Smullin, KIEM, Eureka, Calif., and Michael R. Hanna, WHCU, Ithaca, N. Y.

Books for Broadcasters

RADIO: How, When and Why to Use It, by Beatrice Tolleris. New York, National Publicity Council, 1946. 48p. $1.00.

This is excellent down-to-earth advice on how to use radio for publicity, written for those working in the "fields of health, welfare, education, and civic affairs." The author discusses the various types of programs—talks, interviews, round-tables, dramatizations, and so on—showing clearly the pitfalls of each as well as the advantages. Emphasis is placed on working together with those in the station who know the ropes and upon achieving a *successful* program.

With the exception of a few paragraphs on sustaining time, the booklet is full of sound suggestions. The public service department of any station will find it a great help in explaining the use of radio to civic groups of all kinds.

RADIO AND YOUR CLUB: A Radio Handbook, prepared by M. Marguerite Ralls. New York, The National Federation of Business and Professional Women's Clubs, Inc., 1946. 18p. 35¢.

A clear, sensible pamphlet explaining the use of radio to club groups. It includes not only brief information on arranging and preparing programs, but also some pages on microphone technique and on intelligent radio listening. This is naturally less complete than the longer booklet reviewed above, but both are recommended as excellent for aiding the novice to use radio effectively.

Coleman Re-Elected by Acclamation At District 3 Meeting in Baltimore

(Continued from page 444)

Mr. Fair pointed out the importance of choosing *articulate* youngsters.

3. Stimulation or sponsorship of outside activities. Such activities include: junior olympics; sand lot baseball; hobby clubs.

International Conference

Royal V. Howard, engineering director, told the broadcasters that he would spend a great deal of time this summer as an observer at the International Telecommunications Conferences in session at Atlantic City.

He pointed out that topics of utmost importance, such as frequency allocations are being discussed. "We must watch closely so that we will not be deprived of facilities," he cautioned.

He outlined his plans for serving NAB members through publishing, from time to time, information on the technical developments in the industry.

In closing his remarks, Mr. Howard stated that work was going forward in setting recording standards, both in this country and internationally. By setting of such standards, he pointed out, many of the inconsistencies of recording standards would be eliminated.

Monday afternoon was devoted to a discussion of small market station operation. Details of the meeting will be found in this issue of REPORTS under *Small Market Stations.*

Willard Speaks at Luncheon

Executive Vice President A. D. Willard, Jr., the luncheon speaker on Tuesday, outlined the legislative situation in Washington as it affects broadcasters. Additional information concerning the White and Wolverton Bills will be furnished the NAB membership, he said. (*See first page of this issue.*)

After outlining the augmented services now being

(Continued on next page)

furnished by NAB, Mr. Willard reported that this, as well as the acquisition of a new headquarters building in Washington, had been accomplished without any increase in dues or additional financing.

The first speaker on Tuesday was Director of Research Kenneth Baker, who presented the talk "Report from the People." This presentation, complete with slides, is available to NAB members for local use. Dr. Baker reminded the broadcasters that slides may be borrowed from District Directors.

In a session devoted to broadcast advertising, Frank Pellegrin, director of that department at NAB, discussed the numerous sales aids which are available to stations, such as "Radio for Retailers," "Results from Radio," and others. He emphasized that a huge backlog of information documenting results radio has obtained for sponsors of all types is available, in mimeograph form, at NAB headquarters. Broadcasters were urged to write for this material, since it is distributed only upon request.

Mr. Pellegrin also told the broadcasters of a new service which the National Retail Dry Goods Association has inaugurated to aid its members in developing radio advertising campaigns. Broadcasters should prevail upon retailers in their areas to use the service, he urged, in order that NRDGA would realize its full value and continue the service.

No "Magic Cure-All"

Richard P. Doherty, director of employee-employer relations, discussed with the broadcasters the situation in his field of activity. Pointing out that "Congress can not legislate some magic cure-all for labor problems," Mr. Doherty offered the full services of his NAB department, on an advisory basis, to the individual broadcasters.

The presentations concluded with a session devoted to BMB, in which Linnea Nelson, chief time-buyer of J. Walter Thompson, told the broadcasters of the way in which advertisers and their agencies are utilizing the BMB materials. Hugh Feltis made a full report concerning BMB activities.

The meeting closed with the re-election of Mr. Coleman as district director and the unanimous adoption of the resolutions printed below, after they had been presented by C. G. Moss, WKBO.

PBA Meeting

At a brief meeting of the Pennsylvania Broadcasters Association, held immediately following adjournment of the district meeting, all of the incumbent officers of the PBA were re-elected. They are: George Coleman, president; Roy Thompson, WRTA, vice president; Dr. Leon Levy, WCAU, treasurer; and C. G. Moss, secretary.

Five new members were admitted at PBA at this meeting, bringing total membership to approximately 75.

Resolutions

Judge Miller

Be it resolved, that the broadcasters of the 3rd NAB District highly commend the work of the National Association of Broadcasters under the able leadership of its President, Justin Miller, and his very efficient staff. Be it further resolved that the broadcasters of the 3rd NAB District give their wholehearted support in the continuation of the splendid work already accomplished and that in progress at this time.

BMI

Be is resolved, by the broadcasters of the 3rd NAB District that all stations of the district carefully analyze their music needs and endeavor to employ greater use of BMI music on the basis of merit; therefore we further urge the stations of this district to give early consideration to the renewal of their BMI contracts.

Daylight Time

Whereas, most communities in the 3rd NAB District observe daylight saving time, be it resolved that the broadcasters of the 3rd District go on record as being in favor of broadcasting on daylight time when such time is in common usage in their respective communities.

Freedom of Speech

Be it resolved, that the broadcasters of the 3rd NAB District commend President Miller for his efforts to establish the rights of broadcasters in keeping with the Constitutional guarantees of freedom of speech.

Cash Discount

Whereas, there has been an extensive campaign by the National Advertising Agencies to influence broadcasters to establish the 2% discount principle for the prompt payment of advertising accounts, and

Whereas, the adoption of such a principle would increase the cost of operations of broadcasters and result in higher rates for radio advertisers, without attendant advantages for either broadcaster or advertiser,

Be it resolved, that the members of the 3rd NAB District go on record as opposed to the principle of a cash discount for the prompt payment of advertising accounts.

BMB

Whereas, the NAB Board of Directors in a recent Washington meeting enthusiastically endorsed and commended BMB for its outstanding work in the first study, and asked the BMB Board to defer the second study from 1948 to 1949,

Be it resolved, that the broadcasters of the 3rd NAB District approve the action taken by the NAB Board and

Be it further resolved, that a copy of this resolution be forwarded to the Board of Directors of NAB and BMB.

George D. Coleman

Whereas, George D. Coleman, Director of the NAB 3rd District, has given unstintingly of his time and efforts on behalf of the broadcasters of this District,

Be it resolved, that he be publicly commended for his splendid service.

Public Interest Programming

Highway Safety Campaign Scheduled; Spots to Be Mailed This Week

[*Story from Office of Government Reports*]

A kit of live spot announcements publicizing the objectives of the action program group of the President's Highway Safety Conference meeting in Washington June 18, 19, 20 will be mailed to all radio station managers June 5. This is the second annual meeting of the National Highway Safety Conference and the gathering will evaluate progress in reducing traffic accidents during the past year. Representatives of the 48 State governments and the District of Columbia, enforcement officials, highway engineers and a large group of representatives of unofficial organizations with a basic interest in highway safety will attend the meeting. Sessions will be held in the Interior Department auditorium. Radio stations of the nation gave strong support to the initial meeting of the President's Highway Safety Conference held in May, 1946.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of June 9-15, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

Buy U. S. Savings Bonds—"Save the Easy Automatic Way"

The U. S. Treasury is conducting its most important stepped-up promotion of U. S. Savings Bonds for 1947 during June and July. The way the public debt is managed will affect the life of every American for years to come, as regards money supply, the price level, business conditions and what the dollar will buy; *and wise management of the debt demands that ownership of U. S. securities be spread as widely as possible among individuals. Beginning June 1, the U. S. Treasury, in cooperation with the banks of America, is inaugurating an easy, automatic method—The Bond-A-Month Plan*—of buying Bonds for the millions of Americans not on regular payrolls. The backbone of the Savings Bonds program is still the Payroll Savings Plan, and, although it is receiving whole-hearted support from industry, recent surveys show that this method now needs additional stimulation. The rate of interest, sound investment value, and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like *retirement incomes, education for the children, new homes, the most enjoyable use of leisure time.* As an investment, U. S. Savings Bonds are safe, profitable. The effective way to provide for the future is through *regular* savings. Regular saving is easy and automatic if you sign up for the Payroll Savings Plan where you work, or the Bond-A-Month Plan where you bank. (Fact Sheet No. 11-G)

Nursing Is a Growing Profession

There is a definite and alarming shortage of nurses in the majority of the nation's hospitals. In some instances, whole floors and wings of hospitals have had to close. Literally, thousands of patients are going without adequate nursing care. In the belief that the demand for nurses can best be met by pointing out the many opportunities open to those who join the nursing profession, both hospital and nursing groups have recommended that these opportunities be stressed in all student-nurse recruiting copy. There are many reasons why the demand for nurses far exceeds the supply. Among these reasons are: (1) Long-range health plans are vast in scope, calling for the expansion of hospitals, public health programs and industrial clinics. (2) Hospitalization Plans have made it possible for more people to have necessary hospital care. (3) Health education and preventive programs teach people to make greater use of medical resources. Modern medicine is advancing rapidly and demands the best in nursing care to keep pace with its discoveries. Young women who become nurses enter a profession which offers extraordinary opportunities in many different fields: (1) In the years to come, there will be an even greater demand for graduate nurses as a result of the expansion of hospital facilities, public health centers and industrial clinics. (2) Starting with general staff duty, nurses can advance to head nurse, supervisor, Director of Nurses of Hospital Administrators. They can specialize in surgical, psychiatric, industrial and child health, and other fields. Nurses may prepare for executive positions or for teaching in a School of Nursing. They may choose an interesting career in government: In the U. S. Public Health Service, Children's Bureau, Veterans Administration or in the Indian Service. The Army and Navy offer nurses interesting work, excellent salaries and opportunities for travel. (3) Nursing is an ideal prepara-

(Continued on next page)

tion for marriage, family life, parenthood and leadership in community life. Young women who are high school graduates or college students in good standing are eligible to apply for admission to Schools of Nursing. Applicants should be under 35 and in good health. Interested young women should check with their local hospital for information on how to apply for entrance to a School of Nursing. WACS, WAVES, MARINES and SPARS who qualify as student nurses may find that the entire cost of their nursing education will be covered by their allowance for tuition and books under the G. I. Bill of Rights. (Fact Sheet No. 9-G)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 2. They are subject to change.

Tuesday, June 3

Further Hearing

(Engineering Testimony on C. P., 10:00 A. M.)

KMAC—The Walmac Co., San Antonio, Tex.—For renewal of license; **1240 kc.**, 250 watts, unlimited.

KMAC—The Walmac Co., San Antonio, Tex.—C. P. to change frequency, etc.; DA (DA-2), **630 kc.**, 5 KW, unlimited.

Wednesday, Thursday and Friday, June 4, 5, and 6

(Before the Commission en banc, Conference Room B, adjacent to Departmental Auditorium, 13th and Constitution Ave., 10:00 A. M.)

In the Matter of Promulgation of Rules and Regulations and Standards of Good Engineering Practice concerning daytime skywave transmissions of standard broadcast stations.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Case

910 KC.

The Commission announces adoption of **Proposed Decision** (B-365) looking towards the grant of application of **Paul F. Braden** for a new station in **Middletown, Ohio,** to operate on 910 kc., 1 KW, daytime only (BP-4680; Docket 7587), conditions; and denial of the application of **I and E Broadcasting Co.,** for the same facilities in **Dayton, Ohio** (BP-4659; Docket 7586).

AM—Miscellaneous Actions

Southeastern Broadcasting Co., Clanton, Ala.—Ordered that the effectiveness of the construction permit and modification of CP (BP-4747 and BMP-2594) of Dec. 5/46 and April 25/47, respectively, which authorized a new station on 760 kc., be suspended, until further order of the Commission, because of Order of the Court of Appeals for the District of Columbia, in the case of WJR, The Goodwill Station, Inc., v. FCC (9495), staying the Commission's grant to Southeastern until the Court's decision in the case of WJR v. FCC (9464) and in the case of L. B. Wilson, Inc., v. FCC (9434) shall have been rendered or until further order of the Court.

Radio Virginia, Inc., Richmond, Va.—Ordered that the effectiveness of the construction permit authorized Nov. 21/46, for a new station to operate on 720 kc. be suspended until further order of the Commission, because of Order of the Court of Appeals for the District of Columbia in re WGN, Inc. v. FCC (9497) staying the Commission's grant to Radio Virginia, Inc., until the Court's decision in the case of WJR, etc., referred to above.

WCPS—Coastal Plains Broadcasting Co., Tarboro, N. C.—Ordered that the license heretofore granted by the Commission on May 13/47 for a new station on 760 kc. be set aside; and that the effectiveness of the construction permit issued Aug. 22/46 be suspended until further order of the Commission, because of Order of the Court of Appeals in re WJR v. FCC (9464), staying the Commission's grant of CP to WCPS until the Court's decision in the case of WJR v. FCC (9464) and L. B. Wilson, Inc. v. FCC (9434) shall have been rendered or until further order of the Court.

WCPS—Coastal Plains Broadcasting Co., Tarboro, N. C.—Granted Special Temporary Authority for operation of WCPS on 570 kc., 1 KW, daytime only, for 30 days, from May 28, pursuant to provisions of Sec. 1.324 of the Rules; provided, however that this or subsequent authorization extending operation on 570 kc. shall be subject to immediate cancellation and recission at any time prior to the expiration date thereof.

Coastal Plains Broadcasting Co., Tarboro, N. C.—Ordered that the effective date of the Commission's order of May 27, 1947, setting aside the license heretofore granted on May 13, 1947, to Coastal Plains Broadcasting Co. and suspending, until further order of the Commission, the effectiveness of the construction permit issued on Aug. 22/46, be suspended until June 3, 1947. (BP-4891; BL-2267; BZ-2084)

Gila Broadcasting Co., Inc., Coolidge, Ariz.—Granted petition to intervene in the hearing on application of KRKD. (Doc. 8341)

Hotels & Theatres, Inc., Bluefield, W. Va.—Granted petition for waiver of rules and accepted petitioner's written appearance in re their application. (Doc. 8310)

Litchfield County Radio Corp., Torrington, Conn.—Granted petition for leave to amend its application (BP-5448; Doc. 8093), so as to specify frequency 990 kc. instead of 1170 kc., etc. The amendment was accepted and application as amended was removed from the hearing docket.

The New City Broadcasting Co., Torrington, Conn.—The Commission, on its own motion, removed from the hearing docket application (BP-5630; Doc. 8094).

Litchfield County Radio Corp., Torrington, Conn.—Dismissed petition for leave to take deposition of The New City Broadcasting Co.

Mount Vernon Broadcasting Co., Mount Vernon, Ohio—Granted petition for waiver of rules and accepted petitioner's written appearance in re application (BP-5239; Doc. 8021).

AM—Applications Accepted for Filing

640 KC.

WNAD—University of Oklahoma, Norman, Okla.—Construction permit to install new vertical antenna and mount FM antenna on #1 Tower, install new transmitter, and change transmitter location East Stadium, University of Oklahoma, Norman, Okla., to 3 miles south of Moore, Okla.

670 KC.

NEW—Aiken-Augusta Broadcasting Co., Aiken, S. C.—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 1020 to 670 kc.

(Continued on next page)

690 KC.

KPET—Lamesa Broadcasting Co., Lamesa, Tex. (R. O. Parker, R. A. Woodson, K. S. Ashby, a Partnership)—License to cover construction permit (B3-P-5126, as modified) which authorized a new standard broadcast station and to specify studio location and authority to determine operating power by direct measurement of antenna power.

WVOK—Voice of Dixie, Inc., Birmingham, Ala.—Modification of construction permit (B3-P-4598, which authorized a new standard broadcast station) to change type of transmitter, to make changes in vertical antenna, to change transmitter location, and to specify studio location.

710 KC.

WTPR—Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—License to cover construction permit (B3-P-4528, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

790 KC.

NEW—Samuel L. Stephens, Sr., Brigham City, Utah—Construction permit for a new standard broadcast station to be operated on 1100 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 1100 to 790 kc.

840 KC.

NEW—Bay Cities Radio Corp., Santa Monica, Calif.—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 890 to 840 kc., power from 1 KW daytime to 5 KW daytime; change type of transmitter.

860 KC.

NEW—Randall County Broadcasting Co., Canyon, Tex. (Marshall Formby and John Blake, a Partnership)—Construction permit for a new standard broadcast station to be operated on 870 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 870 kc. to 860 kc.

900 KC.

NEW—Antigo Broadcasting Co., Antigo, Wisc.—Construction permit for a new standard broadcast station to be operated on 1060 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 1060 to 900 kc.

920 KC.

NEW—Cortland Broadcasting Co., Inc., Cortland, N. Y. (P. O. 45 Main St.)—Construction permit for a new standard broadcast station to be operated on 920 kc., power of 1 KW, and daytime hours of operation.

930 KC.

NEW—Springtime City Broadcasting Co., Clearwater, Fla. (Victor John Morgan)—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 250 watts, and daytime hours of operation. Amended to change frequency from 930 to 920 kc.

NEW—The Daily News Broadcasting Co., Bowling Green, Ky.—Construction permit for a new standard broadcast station to be operated on 880 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 880 to 930 kc.

NEW—Columbia-Montour Broadcasting Corp., Bloomsburg, Pa.—Construction permit for a new standard broadcast station to be operated on 780 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 780 to 930 kc., power from 250 watts daytime to 500 watts daytime; change type of transmitter; change transmitter location from: To be determined, Bloomsburg, Pa., to halfway between towns of Light Street and Espy, Scott Twp., Pa.

NEW—Surety Broadcasting Co., Charlotte, N. C. (P. O. 112 So. Tryon St.)—Construction permit for a new standard broadcast station to be operated on 930 kc., power of 1 KW night, 5 KW day, directional antenna night, and unlimited hours of operation.

970 KC.

WJMX—Atlantic Broadcasting Co., Florence, S. C.—Modification of construction permit (B3-P-4948, as modified, which authorized a new standard broadcast station) to change type of transmitter.

980 KC.

NEW—Stanley S. Beaubaire, Oroville, Calif.—Construction permit for a new standard broadcast station to be operated on 1110 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 1110 to 980 kc., and change transmitter location from 1¼ mi. west of highway 24 and ¾ miles north of Oroville-Richvale highway in the Thermalite Section, Oroville, Calif., to: To be determined, Oroville, Calif.

1010 KC.

WINS—The Crosley Broadcasting Corp., New York, N. Y.—Modification of construction permit (B1-P-3026, as modified, which authorized change in frequency, increase in power, change hours of operation, installation of new transmitter and directional antenna) for extension of completion date.

1090 KC.

KAYX—Waterloo Broadcasting Co., Waterloo, Iowa—License to cover construction permit (B4-P-5012, as modified; which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1100 KC.

WGAT—Central Broadcasting Co., Utica, N. Y. (a partnership, composed of H. Ross Perkins and J. Eric Williams)—Voluntary assignment of license to J. Eric Williams, tr/as Central Broadcasting Company.

1120 KC.

NEW—Robert W. Rounsaville, Buckhead, Ga.—Construction permit for a new standard broadcast station to be operated on 1120 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 1120 kc. to 790 kc.

1130 KC.

NEW—Peach State Broadcasting Co., Macon, Ga. (Thomas Carr, J. E. Duncan, Roy Richards, and Robert D. Tisinger, a partnership)—Construction permit for a new standard broadcast station to be operated on 1130 kc., power of 1 KW and daytime hours of operation. Amended to change frequency from 1130 to 1280 kc.

1220 KC.

WLAS—The LaSalle County Broadcasting Co., LaSalle, Ill. (F. F. McNaughton and Louis F. Leurig, a partnership)—Modification of construction permit (B4-P-5284, which authorized a new standard broadcast station) to make changes in transmitting equipment, for approval of antenna and transmitter location, and to specify studio location.

WSFT—Thomaston Broadcasting Co., Thomaston, Ga.—License to cover construction permit (B3-P-5205, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1230 KC.

NEW—Alvin E. O'Konski, Merrill, Wis. (P. O. 1009 House Office Bldg., Washington, D. C.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation. Amended to change transmitter and studio locations from to be determined, Merrill, Wis. to Merrill Hotel, Main and Mill Streets, Merrill, Wisconsin.

(Continued on next page)

WISE—Radio Station WISE, Inc., Asheville, N. C.—Authority to determine operating power by direct measurement of antenna power.

1250 KC.

NEW—Englewood Broadcasting Co., Englewood, Colo. (Alf M. Landon) (P. O. National Bank of Topeka Bldg., Topeka, Kans.)—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 1 KW, and daytime hours of operation.

NEW—Midwest Broadcasting Co., Milwaukee, Wisc.—Construction permit for a new standard broadcast station to be operated on 1250 kc., power of 5 KW, directional antenna for day and night use, and unlimited hours of operation. Amended re changes in directional antenna patterns. (DA-2)

1260 KC.

WGWR—Asheboro Broadcasting Co., Asheboro, N. C. (W. C. Lucas and Roy Cox)—License to cover construction permit (B3-P-4641, as modified) which authorized a new standard broadcast station. And authority to determine operating power by direct measurement of antenna power.

NEW—Seminole Broadcasting Co., Seminole, Okla. (Tom Potter) (P. O. 1517 Commerce St., Dallas, Tex.)—Construction permit for a new standard broadcast station to be operated on 1260 kc., power of 250 watts, and daytime hours of operation.

1280 KC.

KXOB—Valley Broadcasting Co., Stockton, Calif.—License to cover construction permit (B5-P-4015, as modified) which authorized a new standard broadcast station and specify studio location and authority to determine operating power by direct measurement of antenna power.

NEW—Mid-Carolina Broadcasting Co., Salisbury, N. C.—Construction permit for a new standard broadcast station to be operated on 940 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 940 to 1280 kc.

1340 KC.

WLEX—The Central Kentucky Broadcasting Co., Lexington, Ky.—Authority to determine operating power by direct measurement of antenna power.

WEPM—Martinsburg Broadcasting Co., Martinsburg, W. Va. (C. M. Zinn and C. Leslie Golliday)—Authority to determine operating power by direct measurement of antenna power.

NEW—Eastland County Broadcasting Co., Eastland, Tex. (Robert W. Chapman and Manning L. Trammell, a partnership)—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 500 watts and daytime hours of operation. Amended to change name of applicant from Robert W. Chapman and Manning L. Trammell, a partnership, d/b as Eastland County Broadcasting Co. to Robert W. Chapman and Manning L. Trammell, a partnership, d/b as Stephens County Broadcasting Company; change transmitter and studio locations from to be determined, Eastland, Texas, to To be determined, Breckenridge, Texas.

WMID—Mid-Atlantic Broadcasting Co., Atlantic City, N. J.—Modification of construction permit (B1-P-5185, as modified, which authorized a new standard broadcast station) to change type of transmitter.

1350 KC.

WGAD—Coosa Valley Broadcasting Co., Gadsden, Ala. (E. L. Roberts)—Modification of construction permit (B3-P-4596, as modified, which authorized a new standard broadcast station) for extension of completion date.

1360 KC.

WTTH—The Times Herald Co., Port Huron, Mich.—Modification of construction permit (B2-P-5361, which authorized a new standard broadcast station) to change type of transmitter and for approval of antenna and transmitter location.

1370 KC.

WDEF—WDEF Broadcasting Co., Chattanooga, Tenn.—Modification of construction permit (B3-P-4365, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use and change in transmitter location) for extension of completion date.

1400 KC.

WTRR—Southeastern Broadcasting System, Sanford, Fla. (James S. Rivers)—License to cover construction permit (B3-P-4225, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WNOC—Norwich Broadcasting Co., Norwich, Conn. (a partnership, composed of H. Ross Perkins and J. Eric Williams)—Voluntary assignment of license to H. Ross Perkins, tr/as Norwich Broadcasting Company.

NEW—The Greenville Broadcasting Co., Greenville, Ala. (E. Vernon Stabler, Calvin Poole and Samuel W. Ferrell, Jr., a partnership) (P. O. % Walter Erwin James, 724 Bell Building, Montgomery, Ala.).—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation.

NEW—The Voice of Fallon, Fallon, Nev. (Chet L. Gonce and Ralph Morgali, a partnership)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1490 to 1400 kc.

1420 KC.

NEW—Minnesota Valley Broadcasting Co., Mankato, Minn. (P. O. 128 E. Cherry St.)—Construction permit for a new standard broadcast station to be operated on 1420 kc., power of 1 KW, directional antenna for night use and unlimited hours of operation.

1430 KC.

WEXT—Andave Radio Co., Milwaukee, Wis.—Modification of construction permit (B4-P-5352, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna, and transmitter location, and to specify studio location.

1460 KC.

WBNS—Radiohio, Inc., Columbus, Ohio—License to cover construction permit (BP-6000), which authorized installation of new auxiliary transmitter and authority to determine operating power by direct measurement of antenna power.

1490 KC.

NEW—Radio Courier, Inc., East Liverpool, Ohio (P. O. No. 222 Webber Ave.).—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Contingent upon the relinquishment of 1490 kc., by WWSW.

NEW—Collinson-Wingate Broadcasting Co., Topeka, Kans. (T. Hall Collinson and Norville G. Wingate, a partnership)—Modification of construction permit (B4-P-4440, which authorized a new standard broadcast station) for approval of antenna, to change type of transmitter, approval of transmitter location and to change studio location.

1500 KC.

KSTP—KSTP, Inc., St. Paul, Minn.—Modification of license to change main studio location from St. Paul Hotel, St. Paul, Minnesota, to Radio City, 9th and La Salle Street, Minneapolis, Minn. (present location of auxiliary studio).

1540 KC.

NEW—Dale S. Crowley, Washington, D. C.—Construction permit for a new standard broadcast station to be operated on 1540 kc., power of 1 KW and daytime hours of operation. (Amendment re transmitter location dated 4-29-47, withdrawn 5-13-47.)

(Continued on next page)

1550 KC.

WLOA—Matta Broadcasting Co., Braddock, Pa.—License to cover construction permit (B2-P-5142, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurementment of antenna power.

1590 KC.

KSJO—Santa Clara Broadcasting Co., San Jose, Calif.—Special service authorization to operate on 1590 kc., unlimited time with power of 1 KW day and 250 watts night, for a period ending in no event later than August 31, 1947.

1600 KC.

WFRC—Piedmont Carolina Broadcasting Co., Inc., Reidsville, N. C.—Modification of construction permit (B3-P-4164, as modified, which authorized a new standard broadcast station) to change type of transmitter.

WAPX—United Broadcasting Co., Inc., Montgomery, Ala.—Modification of construction permit (B3-P-3695, as modified, which authorized a new standard broadcast station) for extension of completion date.

KMAE—McKinney Air Enterprises, Inc., McKinney, Tex.—Modification of construction permit (B3-P-5210, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and transmitter location, specify studio location.

AM—Applications Tendered for Filing

740 KC.

NEW—Tri Cities Broadcasting Co., Tullahoma, Tenn. (Raymond L. Prescott, Jr., Henry L. Wilson)—Construction permit for a new standard broadcast station to be operated on 740 kc., power of 250 watts and daytime hours of operation.

850 KC.

WNAO—The News and Observer Publishing Co., Raleigh, N. C.—Modification of construction permit to change proposed transmitter location and modify directional antenna, so as to permit incorporation of an FM radiator on one of the towers of directional antenna system operating with power of 5 KW, unlimited hours of operation and directional antenna for night use.

930 KC.

KANA—Mosby's Inc., Anaconda, Mont.—Construction permit to change frequency from 1230 to 930 kc., power from 250 watts to 2½ KW night and 5 KW day, install new transmitter and directional antenna for day and night use and change the transmitter location.

950 KC.

KSEL—Lubbock Broadcasting Co., Lubbock, Texas—Modification of construction permit to make changes in directional antenna system and approval of transmitter location, operating with power of 500 watts night, 1 KW day, unlimited hours and directional antenna for night use.

960 KC.

NEW—Cosmopolitan Broadcasting Co., Los Angeles, Calif. (a partnership)—Construction permit for a new standard broadcast station to be operated on 960 kc., power of 250 watts and specified hours (night) of operation.

970 KC.

WWSW—WWSW, Inc., Pittsburgh, Pa.—Modification of construction permit to make changes in directional antenna system, using power of 5 KW, unlimited hours and directional antenna for day and night use.

1140 KC.

NEW—The Master Broadcasting Corp., Rio Piedras, P. R.—Construction permit for a new standard broadcast station to be operated on 1140 kc., power of 500 watts night, 1 KW day and unlimited hours of operation.

1240 KC.

NEW—Melbourne Broadcasting Corp., Melbourne, Fla.—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1290 KC.

NEW—Gilroy Broadcasting Co., Inc., Gilroy, Calif.—Construction permit for a new standard broadcast station to be operated on 1290 kc., power of 1 KW and daytime hours of operation.

1330 KC.

NEW—Bert Williamson, Martinez, Calif.—Construction permit for a new standard broadcast station to be operated on 1330 kc., power of 250 watts and daytime hours of operation.

1340 KC.

WLNH—Northern Broadcasting Co., Laconia, N. H.—Consent to assignment of license to Northern Broadcasting Corporation.

1460 KC.

NEW—The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—Construction permit for a new standard broadcast station to be operated on 1460 kc., power of 5 KW and unlimited hours of operation, directional antenna.

The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—License to operate present facilities of WOKO upon termination of its present authorization. (1460 kc., 500 watts night, 1 KW day and unlimited hours of operation.)

1480 KC.

WHOM—Atlantic Broadcasting Co., Inc., Jersey City, N. J.—Modification of license to move main studio location from 30 Journal Square, Jersey City, New Jersey, to 29 W. 57th Street, New York, N. Y.

FREQUENCY MODULATION

FM—Applications Accepted for Filing

KLOK-FM—Valley Broadcasting Co., San Jose, Calif. (E. L. Barker, Claribel Barker, T. H. Canfield, Opal A. Canfield and Charles M. O'Brien, Jr.)—Modification of construction permit (B5-PH-752, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WCIL-FM—Southern Illinois Broadcasting Partnership, Carbondale, Ill. (Paul E. McRoy, John H. Searing, Ann E. Searing)—Modification of construction permit (B4-PH-605, as modified, which authorized a new FM broadcast station) for extension of commencement and completion dates.

KWNO-FM—Winona Radio Service, Winona, Minn. (M. H. White and H. R. Wiecking)—Modification of construction permit (B4-PH-808, which authorized a new FM broadcast station) for extension of completion date.

NEW—Cortland Broadcasting Co., Inc., Cortland, N. Y. (P. O. 45 Main St.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 258, 99.5 mc., ERP of 28.24 KW, and antenna height above average terrain 723 feet.

KOMO-FM—Fisher's Blend Station, Inc., Seattle, Wash.—Modification of construction permit (B5-PH-454, as modified) which authorized a new FM broadcast station, for extension of completion date.

WCOY—The Patriot Co., Harrisburg, Pa.—Modification of construction permit (B2-PH-393, as modified, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WPAY-FM—The Scioto Broadcasting Co., Portsmouth, Ohio—Modification of construction permit (B2-PH-960, as modified, which authorized a new FM broadcast station) for extension of completion date.

(Continued on next page)

WGNC-FM—F. C. Todd, Gastonia, N. C.—Modification of construction permit (B3-PH-752, which authorized a new FM broadcast station) for extension of completion date.

WNYC-FM—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of construction permit (B1-PH-1067, which authorized changes in new FM broadcast station) for extension of commencement and completion dates.

WEXL-FM—Royal Oak Broadcasting Co., Royal Oak, Mich.—Modification of construction permit (B2-PH-773, which authorized a new FM broadcast station) to change type of transmitter, transmitter site to 2201 Woodward Heights, near Ferndale, Michigan; studio location to "To be determined, Royal Oak, Michigan; ERP to 18.3 KW; antenna height above average terrain to 382 feet; make changes in antenna system and change commencement and completion dates.

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Modification of construction permit (B5-PH-1083, which authorized a new FM broadcast station) to change studio location and transmitter site, make changes in antenna system and change commencement and completion dates. Change antenna height above average terrain to 15.5 feet.

KDNT-FM—Harwell V. Shepard, Denton, Tex.—Modification of construction permit (B3-PH-866, which authorized a new FM broadcast station) for extension of completion date.

WPEN-FM—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (B2-PH-795, which authorized changes in new FM broadcast station) for extension of completion date.

KSD-FM—The Pulitzer Publishing Co., St. Louis, Mo.—Modification of construction permit (B4-PH-30, as modified) which authorized a new FM broadcast station for extension of completion date.

WHYN-FM—The Hampden-Hampshire Corp., Holyoke, Mass.—Modification of construction permit (B1-PH-192, as modified) which authorized a new FM broadcast station, for extension of commencement and completion dates.

WEHS—WHFC, Inc., Chicago, Ill.—Modification of construction permit (B4-PH-1065, which authorized changes in new FM broadcast station) for extension of completion date.

WSTC-FM—The Western Connecticut Broadcasting Co., Stamford, Conn.—Modification of construction permit (B1-PH-607, which authorized a new FM broadcast station) to change studio location, make changes in antenna system and change commencement and completion dates.

WALA-FM—Pape Broadcasting Co., Mobile, Ala. (W. O. Pape)—Modification of construction permit (B3-PH-283, which authorized a new FM broadcast station) to change effective radiated power to 101.4 KW, and make changes in antenna system.

102.5 MC.—#273

NEW—WGR Broadcasting Corp., Buffalo, N. Y. (P. O. Rand Bldg.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 273, 102.5 mc., ERP of 57 KW.

To Be Assigned by FCC

NEW—Louise C. Carlson, New Orleans, La. (P. O. 92 Fontainebleau Drive)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC. ERP of 4.96 KW, and antenna height above average terrain 227 feet.

NEW—Eurith Dickinson Rivers, Jr., Decatur, Ga. (P. O. 217 W. Ponce de Leon Ave.)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC: ERP of 600 watts, and antenna height above average terrain 309.5 feet.

FM—Application Dismissed

WDUL—Head of the Lakes Broadcasting Co., Superior, Wisc.—Modification of construction permit (B4-PH-1099) to change effective radiated power to 80.1 KW, and to make changes in antenna system. Dismissed May 21, 1947, per request Att'y, letter May 13, 1947.

FM—Applications Returned

The Wave Publications, Vernon, Calif.—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 250 watts. Returned May 22, 1947. Program analysis not submitted. Also charter to be amended.

Redlands Broadcasting Co., Redlands, Calif. (Edward Lannelli and John C. Mead)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 250 watts. Returned May 22, 1947. Program analysis not submitted. Letter written May 22, 1947.

TELEVISION

TV—Applications Accepted for Filing

WOIC—Bamberger Broadcasting Service, Inc., Washington, D. C.—Modification of construction permit (B1-PCT-41, which authorized a new commercial television broadcast station) for extension of completion date.

W10XP—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc, add Special for FM Emission, change transmitter location and antenna system. Amended to change frequencies from 1300-1320 mc. and 1380-1400 mc. to 1340-1360 mc. and 1400-1420 mc.

W3XPF—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc, add Special for FM Emission, change transmitter location and antenna system. Amended to change frequencies from 1300-1320 mc. and 1380-1400 mc. to 1340-1360 mc. and 1400-1420 mc.

W10XPB—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc, add Special for FM Emission, change transmitter location and antenna system. Amended to change frequencies from 1300-1320 mc. and 1380-1400 mc. to 1340-1360 mc. and 1400-1420 mc.

W3XPL—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Y.—Construction permit to change frequencies to 1300-1320 mc. and 1380-1400 mc, add Special for FM Emission, change transmitter location and antenna system. Amended to change frequencies from 1300-1320 mc. and 1380-1400 mc. to 1340-1360 mc. and 1400-1420 mc.

W10XPC—Philco Television Broadcasting Corp., area of Washington, D. C., Philadelphia, Pa., and New York, N. Applications Accepted for Filing

Remote Pickup

WDON—Commodore Broadcasting, Inc., area of Decatur, Ill.—Modification of construction permit (BPRE-468, as

(Continued on next page)

modified, which authorized construction of new remote pickup broadcast station) for extension of completion date.

WSIA—Commodore Broadcasting, Inc., Decatur, Ill.—Modification of construction permit (BPRE-68, as modified, which authorized construction of new remote pickup broadcast station) for extension of completion date.

KEGT—Tarrant Broadcasting Co., Portable-Mobile, area of Fort Worth, Tex.—License to cover construction permit (BPRE-472, which authorized change of transmitter, power from 2 watts to 1.75 watts, change from portable-mobile to mobile).

KAAD—Tarrant Broadcasting Co., Mobile area of Fort Worth, Tex.—License to cover construction permit (BPRY-319, which authorized change in transmitter, change power from 40 watts to 100 watts, change from portable-mobile to portable).

NEW—Kenneth Edward Rennekamp, area of Oil City, Pa.—Construction permit for a new remote pickup broadcast station to be operated on 2830 kc., power of 20 watts, emission A3, and hours of operation in accordance with Section 4.403.

Noncommercial Educational

NEW—Board of Education of the City of St. Louis, St. Louis, Mo.—Construction permit for a new non-commercial educational broadcast station to be operated on 42,500 kc., power of 3 KW, emission special, and unlimited hours of operation. Amended to change type transmitter, frequency from 42,500 kc. to "any frequency between 88 and 108 mc.", transmitter location and make changes in antenna system.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Advertising Films—Unfair methods of competition tending to restrain trade and create a monopoly are charged in separate complaints issued by the Commission against four of the nation's largest producers and distributors of commercial advertising films.

The respondents are Ray-Bell Films, Inc. (5495), 2267 Ford Parkway, St. Paul, Minn.; Alexander Film Co. (5496), Colorado Springs, Colo.; United Film Ad Service, Inc. (5497), 2449 Charlotte St., Kansas City, Mo.; and Motion Picture Advertising Service Co., Inc. (5498), 1032 Carondelet St., New Orleans.

CEASE AND DESIST ORDER

Tag Manufacturers Institute, etc.—Thirty-one manufacturers of tags, pin tickets and other marking and pricing devices have been served by the Commission with an order to cease and desist from numerous practices which were found to be "part and parcel of a combination and conspiracy" to fix and maintain uniform prices for their products.

The order is also directed against the industry's trade association, the Tag Manufacturers Institute, 370 Lexington Ave., New York, and Frank H. Baxter, its secretary-treasurer and executive director. (4496)

The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 23, June 9, 1947

Judge Miller's Statement on Congressional Investigation of Musician's Union

The Sub-Committee* To Investigate James C. Petrillo and the American Federation of Musicians (Rep. Carroll Kearns, chairman) has circulated among broadcasting station licensees a questionnaire seeking information concerning the employment of musicians. The information thus gathered is to be used by the Committee in studying the music problem as it relates to the whole industry. We urge prompt reply to the Committee's request.

A few stations have asked NAB to ascertain whether or not call letters and/or ownership are to be revealed by the Committee in its use of this information during hearings.

---

* A sub-committee of the Committee on Education, House of Representatives.

(Continued on page 458)

Board Will Seat Six New Directors, Three Re-elected Members, In September

With the naming of Harold E. Fellows, WEEI, to the NAB Board, six new members of the Board will be seated when it meets in Atlantic City this September. (See 1st District story, p. 458.)

In addition to Mr. Fellows, new Board members elected at their respective district meetings this year are: Henry P. Johnston, WSGN, District 5; Gilmore Nunn, WLAP, District 7; Charles C. Caley, WMBD, District 9; John F. Meagher, KYSM, District 11; and Clyde Rembert, KRLD, District 13.

Three station executives re-elected to serve on the Board are: George C. Coleman, WGBI, District 3; William B. Smullin, KIEM, District 15; and Harry R. Spence, KXRO, District 17.

On the Inside

Features at the First District meeting last week included talks by Massachusetts Governor Bradford and Robert D. Swezey, MBS, who presented a strong argument for the adoption of new standards by the industry. (p. 458)

NAB's Program Department compiling information on radio's participation in the campaign against juvenile delinquency; will provide stations with proven ideas. (p. 460)

Responding to inquiries from member stations regarding the "lottery law," the Legal Department publishes a general guide for day-to-day operation. (p. 459)

Station follow-through is most important factor in building retail volume, Broadcast Advertising Department findings show as a result of its "retail service" activities. (p. 462)

Pointing out that radio is the most important medium of news dissemination, NAB filed a brief with the House Ways and Means Committee opposing the excise tax on radio receivers, a type tax from which other media are exempt. (p. 459)

NAB President Meets with Legislative Group, Concerned Over Early White Bill Hearings

NAB President Justin Miller, again Thursday (5) expressed doubt that the industry would be "fully prepared" for hearings on S. 1333 (the White Bill) after a full day's session with the Association's Legislative Committee.

Judge Miller said that the demanding task of going through the proposed measure, which would amend the Communications Act of 1934, had taken up eight hours of Committee time and that "we have plenty of issues still unresolved."

He said that the Committee approached the task in the belief that any measure adopted should anticipate that radio must be "in fact as well as in spirit" as free as the press.

Hearings on the White Bill are scheduled for June 17 before a subcommittee chairmanned by Sen. Wallace A. White (R-Me.) author of the proposed legislation. Other members of the Senate sub-committee are: Charles W. Tobey (R-N.H.), Edward H. Moore (R-Okla.), Ernest W. McFarland (D-Ariz.) and E. C. Johnson (D-Colo.).

Judge Miller previously had asked for a delay of the hearings until July 1 to afford more time for preparation. The request was denied by the Senate committee.

Following is the text of Judge Miller's wire to Sen. White requesting postponement of the hearings:

"UPON RECEIPT OF WORD THAT HEARINGS ON WHITE BILL HAD BEEN SET COMMENCING JUNE 17, I BEGAN TO CALL REPRESENTATIVE BROADCASTERS TO ARRANGE FOR THEM TO BE PRESENT AT HEARINGS AND ALSO BEGAN TO RECEIVE CALLS FROM THEM. THEIR UNANIMOUS OPINION IS THAT DATES SET PROVIDE SUCH SHORT NOTICE THAT IT IS IMPOSSIBLE TO MAKE NECESSARY PREPARATION

AND ARRANGEMENTS FOR BEING IN WASHINGTON. STRONGLY URGED THAT HEARINGS BE POSTPONED UNTIL FIRST OF JULY. WITH CORDIAL REGARDS."

The Committee has asked the Association to present as early as possible a list of witnesses who will appear in behalf of radio at the hearings. This list will be ready for release within a week, Judge Miller said.

Members of the Legislative Committee present today were: Joe B. Carrigan, KWFT; Wayne Coy, WINX; Herbert Hollister, KBOL; Joseph H. Ream, CBS; Frank M. Russell, NBC; Robert D. Swezey, MBS; and Joseph A. McDonald, ABC, as an observer.

Absent were J. Harold Ryan, WSPD, chairman; Don Elias, WWNC; Clair R. McCollough, WGAL; G. Richard Shafte, WIS; and Louis Wasmer, KGA. O. L. Taylor, KGNC, arrived in Washington for the meeting but was unable to attend due to illness. He was confined to his room at the Carlton Hotel with a respiratory infection.

Engineering Department

Tropical Broadcasting Frequencies a Thorn, As Plenary Session Urges Speedy Decision

The question of what frequency assignments should be made to "Tropical Broadcasting" is proving, as expected, to be one of the thorns in the side of the delegates to the International Telecommunications Conference now in session at Atlantic City (*Current* REPORTS, p. 445). The delay in solving this problem is so critical that a plenary session was held Wednesday (4) to urge the delegates to more speed in reaching a decision.

The chairman requested that all allocations be completed by July 1st; however, it was felt by many delegates that this was an impossible objective. In an effort to unsnarl the problem, a Subcommittee on Tropical Broadcasting was created. This subcommittee, which has been unable, to date, to define "Tropical Broadcasting," spent almost an entire day trying to unscramble the language problem. Although French and English were the official languages, the Spanish-speaking nations, who are the main users of "Tropical Broadcasting" frequencies, were delayed because of a shortage of translators. While the rest of the nations agreed to permit Spanish-speaking nations to use their native tongue, one major power insisted that, if this be permitted, it, too, would use its own language. The Spanish-speaking nations were permitted to proceed in their own tongue after the rest of the nations agreed that by such use a precedent would not be established.

Russia's proposal that she be granted three more votes (for Lithuania, Outer Mongolia and Latvia-Estonia), in addition to the three votes given her under United Nations for USSR, Byelo-Russia and the Ukraine, was the subject of considerable discussion in which no decision was reached.

Judge Miller's Statement on Congressional Investigation of Musician's Union

(Continued from page 457)

We have been assured by Chairman Kearns that owner or call letter identity will not be used in those cases where stations request that this information be held in confidence. Chairman Kearns also has asked us to express to broadcasters his appreciation for the prompt response which already has been manifested.

—*Justin Miller.*

District Meetings

New England Broadcasters Elect Fellows; Need for Code Stressed at Boston Meeting

Harold E. Fellows, general manager, WEEI, was elected to the NAB Board of Directors as the two-day annual meeting of the First District concluded in Boston Tuesday (3). Mr. Fellows succeeds Paul W. Morency, vice president and general manager, WTIC, on the Board. Mr. Morency declined renomination because of the pressure of other business.

With the naming of Mr. Fellows, the new NAB Board will seat six new members when it meets at Atlantic City in September.

With close to 150 radio executives present for the meetings, the Governor of Massachusetts, Robert F. Bradford, emphasized the importance of maintaining a "free radio." "We've seen the evils of a controlled press and radio," he said, and advocated a minimum of government control. He pointed out the flexibility

Legal Department

General Guide on Lottery Law in Day-to-Day Station Operation

In response to a number of inquiries from NAB members about the lottery law as it affects radio broadcasting, there follows a statement by the General Counsel. It is hoped that it will serve as a general guide to stations in their day-to-day operation.

Section 316 of the Communications Act of 1934 provides:

> "No person shall broadcast . . . and no person operating any . . . station shall knowingly permit the broadcasting of, any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, . . . Any person violating any provision of this section shall, upon conviction thereof, be fined not more than $1,000 or imprisoned not more than one year, or both, for each and every day during which such offense occurs."

This section, like the federal statutes forbidding the mailing and the interstate transportation of lottery material, does not define the terms it uses. Consequently, courts, using the common law as a basis, formulate definitions from case to case as they apply the statutes. Obviously, this method make impossible any categorical declaration as to what is and what is not a lottery within Section 316. However, a few principles are reasonably well settled.

The common law defines a lottery as a scheme or plan whereby consideration is paid for the opportunity to win money or prizes, the winner or winners to be determined by lot or chance. The most difficult question in the application of this definition to a particular scheme or plan is whether consideration is paid. In this connection it is generally held that if any money or value must necessarily be paid for a chance to win money or a prize, there is consideration, and the plan is an illegal lottery. This is so notwithstanding the fact that the payment is in fact for merchandise, service, entertainment, etc., and that the amount of the payment would be the same even though there were no chance to win money or a prize.

This rule, adopted by the Supreme Court in *Horner* v. *U. S.*, 147 U. S. 449 (1893), has been followed by the FCC. *In the Matter of WRBL for Renewal of License*, 2 FCC Reports 687 (1936). In that case the station had broadcast information about two plans by which persons purchasing goods, in one case, or admission to an exposition, in the other, received numbered tickets entitling them to participate in drawings and, if they won, to cash and prizes. On the authority of *Horner* v. *U. S.*, the FCC held that these broadcasts were a violation of Section 316 of the Communications Act.

In the same case the Commission also considered a plan similar to the "bank night" scheme. Cash was given away by lot at wrestling matches. Both persons who had purchased tickets, and persons who had registered without paying anything were entitled to participate in the drawings, provided they appeared immediately after their names were called. Winners not at the match where the drawing took place were entitled to free admittance to claim their awards. On the authority of holdings in two cases in U. S. district courts, and the ruling of the Solicitor of the Post Office that such plans were lotteries under the Postal laws, the FCC held this plan to be a violation of Section 316.

In addition the Commission, considering the state lottery laws, took the position that it was contrary to the public interest for a station to violate the spirit of the laws of the state in which it was located.

A year later, *In the Matter of KXL for Renewal of License*, 4 FCC Reports 186, the Commission held that the broadcasting of information about a "Prosperity Club," a scheme similar to the "chain letter," was in violation of Section 316. Persons deposited money with the operator of the plan, on the promise that when 27 others thereafter deposited the same amounts, they would receive 27 times their original deposit. The FCC found consideration in the deposit of money and chance in the uncertainty as to whether others would participate.

As yet Section 316 has not been construed with reference to "give-away" programs. However, the Commission has recently shown considerable concern with these programs. For example, in the Washington FM hearings it first proposed to deny an application on the ground, among others, that the legality of a "give-away" program carried by the applicant was doubtful. While the application was later granted, it was on the specific representation of the applicant that it would discontinue the program if either the Commission or a recognized court found it to be in violation of Section 316.

The membership will of course be advised of further developments in this field. Meanwhile, by way of summary, this much can be said on the basis of the cases at hand.

1. *A station should not broadcast any information about prize plans which involve the payment of money or other value by the listener.*
2. *A station should not broadcast any information about any other type of plan which may be in violation of the letter or spirit of the law of the state in which it operates.*
3. *In case of any doubt a station should consult its attorneys. In this connection, it should be noted that in the* KXL *case, the Commission, in granting the renewal despite its finding of a violation of Section 316, referred to the fact that the station had acted on the advice of its attorney, apparently treating this as evidence of its good faith.*

NAB Files Brief Opposing Excise Tax On Radio Receivers

Opposition to the continued levy of an excise tax on radio receivers was registered by NAB in a brief filed Friday (6) with the House Ways and Means Committee.

(Continued on next page)

NAB's argument that radio receivers were being taxed unjustly, while another media was being subsidized, was threefold: (1) the present tax is discriminatory; (2) it is inconsistent with the design of the Congress as expressed in the Excise Tax Statutes; and (3) it is incompatible with the Constitution.

In arguing the first point the NAB statement read: "Radio is now the most important medium of mass communication in the United States. While there are some 1,700 daily newspapers in existence, there are more than 2,500 radio stations licensed or about to be licensed to broadcast to the general public."

Citing the NORC survey, the brief pointed out: "Sixty-one per cent of those interviewed got most of their daily news from radio, 78 per cent of those expressing an opinion got the fairest news from radio, 94 per cent of those interviewed got the latest news from radio, and 27 per cent of those interviewed got the most complete news from radio."

Continuing, the statement explained that on the average, stations devote about 20 per cent of their broadcasting time to news, and that stations "perform every function performed by the press." Citing several other important functions of radio and its close identity with the press, the brief pointed out the "unjust discrimination to tax radio receivers, the means by which the public receives radio broadcasts, and at the same time to exempt paper, the means by which the public receives newspaper reports. Indeed, the discrimination goes further, for the Congress subsidizes newspapers by permitting them to be carried by mail at less than cost."

Stating that the "tax on radio receivers is completely illogical," the brief cited the Internal Revenue Code which exempts from the tax on telegraph, telephone, radio and cable facilities, "services or facilities utilized in the collection of news for the public press or radio broadcasting, or in the dissemination of news through the public press or by means of radio broadcasting."

In arguing the incompatibility of the tax with the Constitution, the NAB brief cited the unanimous opinion of the Supreme Court which "held unconstitutional a state tax of 2 per cent on the gross receipts from the sale of newspapers." Continuing, the brief declared: "The fact that the tax here is not borne directly by the radio broadcasters or the radio manufacturers does not mitigate its evil, for, as Justice Sutherland said, such taxes are bad not because they take money from people's pockets, but because they serve as a device 'to limit the circulation of information to which the public is entitled in virtue of the constitutional guarantees.'"

In addition to the NAB brief, RMA and FMA filed statements in opposition to the excise tax. TBA presented oral argument and will file its written statement opposing the tax at an early date.

House Subcommittee Hears Testimony On Pending Copyright Bills

On Wednesday (4), the Copyright Subcommittee of the House Judiciary Committee continued its hearings on the copyright bills now pending before the Congress. (*See Current* REPORTS, p. 428). The Committee heard Lewis Frohlich and Deems Taylor of ASCAP, John Schulman representing the Songwriters' Protective Association, and Sidney Wattenberg representing the Music Publishers Protective Association, all in opposition to H. R. 1270. Isabelle Marks of Decca Records, Inc., and Kenneth Raine of Columbia Recording Corp., spoke in opposition to the form in which the bill was drawn on the ground that it did not make clear that the manufacturers of records subject to copyright would be the owners of the copyright.

Don Petty, General Counsel of NAB, was present at the hearing. The next hearing is scheduled for Monday, June 9, at which time Don Petty will file a statement and testify orally on behalf of NAB in opposition to the bill.

Program Department

Stations Use Wide Range of Ideas In Campaign Against Delinquency

Still gathering momentum, the radio industry's campaign against juvenile delinquency promises to result in one of the major contributions toward alleviating the intenseness of the problem in many communities.

NAB's Program Department is now compiling information on station participation throughout the country and is in the process of cataloguing program ideas on the subject. This work is expected to be completed at an early date, following which a check-list of program ideas and suggestions will be sent to all member stations as an aid in augmenting local efforts.

While findings are not yet complete, preliminary conclusions, drawn from study of the material on hand, show that the over-all campaigns being conducted by stations follow three approaches. They are: broadcasts directed at parents; broadcasts directed at children; sponsorship or stimulation of outside activities.

Each of these approaches have proven successful, and one or more may be adapted to fit local conditions. Following are several examples, chosen at random, of programs inaugurated by stations in various sections of the country:

> *Clearwater, Fla.*—Stimulated construction of a "youth center," which stemmed from an idea suggested and promoted by Howard Hartley, WCLE, newscaster. Major campaign on the air utilized the daily news program at 6:15 p.m. This was supplemented by a woman's news program at 1:00 p.m., to enlist the support of mothers as well as children.
>
> The campaign, aided by personal contact work, brought quick action. A local business man offered to construct the necessary building. A citizens committee was formed and governs the project's activities. Original plans included space for a small dance floor, ping pong table and limited room for other activities. Momentum gathered from radio program, however, gained so much support that plans have expanded to include outdoor swimming pool and playground. City and county governments have indicated probability of some financial support.
>
> *Poughkeepsie, N. Y.*—Inaugurated "Hobby Shop" series of broadcasts over WKIP under the auspices of the local Junior League. Round table discussions cover

(Continued on next page)

hobbies such as model airplanes, stamps, model railroads, photography, pets, archery, magic, coins, etc. Programs originate at local Community Chest auditorium, which has recreational facilities for young people. Station reports large audience on hand for weekly broadcast who ask questions of the panel; also, large number of telephone questions are discussed on the program. Series of broadcasts will feature an extensive public exhibit this month, with all hobbies represented.

Raleigh, N. C.—"Youth Takes A Stand" is the title of a series presented by WPTF. The broadcasts, designed to attack the juvenile problem in a positive manner, are presented as forum discussions, with the Rev. Ray Holder, rector, Christ Episcopal Church, as moderator. Participants are teen-agers chosen from local high schools, Boy Scouts, the Y-Teens, 4-H Clubs and local churches. The programs, broadcast each Saturday morning at 10:00 o'clock, cover subjects such as: youth's position in the community; in the home; in the school; in the church; and in business.

Hartford, Conn.—Feeling that an indirect approach to the problem of juvenile delinquency would be most suitable for presentation in its area, WTIC has built a program titled "Mind Your Manners." The program features a panel of youngsters, 9 to 17 years of age, who answer various questions of deportment, table manners, conduct at various types of functions, etc., which are presented by other children, not by adults. Based on the theory that juvenile delinquency stems from disregard of authority and the rights and properties of others, the programs attempt to teach subtly, a proper regard and respect for fellow humans. The series has the *unpublicized* support of the schools, PTA groups, youth clubs, etc.

Portsmouth, Ohio.—The program inaugurated by WPAY follows the three suggested approaches: through parents, children, and outside activities. Through the "1400 Club," platter show, a weekly dance is conducted along with the air program which plays to a studio audience. At the dance, held in a hall provided by the Eagles Lodge, community officials are interviewed, thus giving the younger generation an opportunity to see and hear the people responsible for operating the local government. In cooperation with the Junior Chamber of Commerce, the station promotes the scrap paper drive, proceeds of which are donated to the playgrounds. Through participation in PTA forums, the station stresses the need for parental control in curbing juvenile delinquency. Utilizing its "man on the street" broadcasts, the station asks youngsters pointed questions on youth problems and forwards the answers to the juvenile judge and other interested youth organizations. Nearly every station staff member is active in local organizations which further community efforts in behalf of youngsters.

Miami, Fla.—Last Christmas, WIOD's early morning news commentator, "The Rambler," inaugurated a one-man campaign to provide year-round entertainment for the boys and girls of the Dade County Children's Home. Among results obtained to date are: An invitation from the owner of a local Chinese restaurant to the children and staff for a luncheon on New Year's Eve, 1946. A party at the "Parrot Jungle" in South Miami. A visit, with the Florida Power and Light Company as hosts, to the Miami Air Races in January. A contribution from an anonymous listener who sent $50 to buy goodies for the children at the air races. A five-hour bottom-fishing trip on Saturday, May 4 through the courtesy of a fishing boat captain, who also provided soft drinks, candy, and cookies, while a local cafeteria owner supplied 120 sandwiches and two bushels of boiled eggs.

As a post script, the boat captain has offered to take groups of children fishing every Saturday. The groups —Boy and Girl Scouts, youth clubs, school groups—must sign up through The Rambler.

Phoenix, Ariz.—Eight series of programs have been originating through KOY, in addition to the station's carrying of two network shows directed at the youth. The local programs are aimed at the various group and age levels. Included in the station's schedule are: Junior Town Meeting of the Air; Special Events Quizz; Spelling Bee; Story Book Hour; Parents by Proxy; Uncle Bill; The Safety Rangers; and Teen Agers.

Jackson, Miss.—Station WJDX, after formulating a series of programs dealing with juvenile delinquency, arranged with the two other stations in the city to broadcast the series simultaneously, thus blanketing the entire service area of the three stations. Success of the project was bolstered when the president of the Juvenile Delinquency Council praised the station for undertaking the service.

The above handful of examples provide an inkling of the width of possibilities available to stations in combating the problem of juvenile delinquency within their respective communities.

While over three hundred stations have already submitted information to NAB detailing their programs, Harold Fair, director, program department, would welcome reports from those stations which are conducting campaigns, but have not as yet provided NAB headquarters with the details of their activities.

Research Department

BMB Committee Meets to Discuss For Supplementing Its Study

The BMB Technical Committee met on May 29 to consider several matters of immediate importance to the BMB research program. The matter of chief concern was a plan to supplement the once-a-week data of Study No. 1 by the addition, in Study No. 2, of data which would give a station a valid estimate of its "average *daily* audience." Five methods of accomplishing this have been brought to the attention of the Committee, and these have been narrowed down to two, which are now receiving intensive experimental analysis by the BMB technicians. Once experimentation has determined the feasibility of the methods being considered, a proper recommendation will be made to the BMB Board which, in turn, will determine whether or not Study No. 2 will contain the addition.

The committee heard a presentation by C. E. Hooper, president of the research firm bearing his name, in which he outlined results of experimentation with a new post-card technique for measuring station audiences county-by-county.

Originally the committee had expected to hear details concerning a diary technique Mr. Hooper had developed, but he told the committee that he considered the more recently devised post-card method to be more promising than the diary.

The Committee also heard a complete presentation of the advantages and disadvantages of the Listener Diary as a method for collecting coverage data by Robert Salk of Audience Surveys, Inc.

Other less important matters were also discussed, most of them involving some retabulations of the data of Study No. 1, which will serve as the basis for future BMB releases.

Broadcast Advertising

Note to Managers:

The Broadcast Advertising Department urges that you bring this item to the attention of your Sales Department.

Station Follow-through Pays Dividends In Retail Business

Evidence compiled since the Broadcast Advertising Department inaugurated its new "retail service" to member stations several months ago shows that *follow-through by the stations themselves* is the most important and productive factor in building retail volume.

The work of the Broadcast Advertising Department, its sales aids on retail advertising, and particularly the talks on that subject by Miss Lee Hart, former radio director for Joske's of Texas and now assistant director of Broadcast Advertising at the NAB, are important in getting the activity started. But from then on, it is up to the stations.

Following is a letter received from Eugene Carr, general manager of the Brush-Moore stations in Canton and Portsmouth, Ohio, where Miss Hart spoke two months ago. At that time, Mr. Carr stated that he would keep an accurate record of what happened to retail business on his two stations as a result of this effort. He reports:

"As a direct result of the meeting in Canton, the Halle Brothers Company has signed with WHBC for five quarter-hours a week, 10:00 to 10:15 a.m., sponsoring Carol Adams, director of WHBC's women's programs. *This is the first radio advertising in the history of the Halle Brothers Canton store.* Halle Brothers of Cleveland have had campaigns on the air from time to time, but I believe the campaign for the Canton store is the first one that has been contracted for as a specific promotion tied in with the store's over-all advertising plans.

"The program is beamed to a selected audience on behalf of the home furnishings department, and so far the store is staying right with that theme and with good results. The program has been broadcast to date from WHBC's studios, but now that the telephone strike is settled, we will install a direct line from the store so that one or more broadcasts per week will originate in a special Halle broadcast studio located in the home furnishings department. Women's groups of the city will be invited to attend broadcasts featuring special guests and experts in the home furnishings line.

"Also *as a direct result* of the meeting with Lee Hart, here in Canton, the Kobacker store has purchased daytime quarter-hour programs called 'What's New?' Here again, *the beaming technique was the thing that swung this advertiser from announcements to programs*, as Kobacker's theme within the store is one that constantly features the new and the different type of services and merchandise. Their radio programs feature only the brand new record and transcription releases to carry out the theme of 'What's New?' The copy is beamed to an audience interested in these items and departments and services in the store.

"These two contracts are directly traceable to the meeting which Lee Hart conducted here in Canton. In addition, *there has been a stepped-up interest and additional business in both programs and announcements from some of WHBC's long-time advertisers.*

"At WPAY in Portsmouth, Sears Roebuck bought a program series called 'RFD 1400' (1400 is the station's frequency), from 11:30 a.m. to 12:00 noon, Monday through Friday, *as a direct result* of the Lee Hart meeting. *This new contract gave the radio station 35% of the Sears' advertising budget in Portsmouth.* The client has since made some changes in spreading out the appropriation to more different types of programs but the size of the budget for radio remains the same.

"Also in Portsmouth, *we can attribute a quarter-hour musical clock, three days a week, for the U. S. Laundry; a quarter-hour, Sunday afternoon, for the Herms Floral Shop; a five-minute news series for Walkers Shoe Store, and several announcement schedules to the 'Joske meeting.'*

> *"However, it seems to me, that the most valuable result of these two meetings which Lee Hart conducted for us in Canton and Portsmouth was the immediate improvement in commercial copy. In both cities, the advertisers picked up the 'beaming' theory immediately, and with the assistance of the station staff and the continuity writers, practically all commercial copy began to be very much improved at once. The advertisers now know what we are talking about when we suggest copy changes and copy ideas. Our staff writers have a definite formula to follow in the writing they do for the clients in the two cities. All of this adds up to better selling copy, more results for the advertiser from the time he buys, more satisfied clients and larger appropriations for the radio stations.*

"Again, many thanks to you and to Lee Hart for your assistance to us in this respect.

Cordially,
Eugene Carr
Director of Radio."

Generous as are Mr. Carr's comments to the NAB, Miss Hart emphasized this week that "this business could not have been acquired or held without the excellent follow-through arranged by WHBC and WPAY."

Following the meetings held in the two cities, the stations immediately organized a planned procedure of working on retail accounts. Regular weekly meetings of the sales, program and copy departments were set up. Their purposes are:

a) To analyze and improve the handling of accounts on the air, and

b) To formulate coordinated presentations and working plans for new accounts.

Included in each meeting is careful local interpretation of the Joske Report ("Radio for Retailers"), and individual adaptation of the NAB's three-point plan for making radio more effective for retailers. This three-point plan was developed by Miss Hart and was presented at each of the meetings.

Other evidence received by NAB shows that other stations which have followed-through in similar fashion are finding retailers more receptive to suggestions about beaming programs, choosing the right merchandise to be advertised, formulating definite

(Continued on next page)

copy objectives, and arranging for effective store follow-through, particularly among sales personnel.

"When radio salesmen can sell on the basis of the specific job to be done, and can outline specific plans to show why a certain type of program and copy will be most effective in doing the job, he can inspire the retailer to set specific objectives for his radio advertising," Miss Hart emphasized.

"These objectives in turn will form the basis for continued service from the program and copy departments which will have direction and purpose. If the sales, copy and program departments of all stations would get together for even an hour a week to improve their knowledge of making retail advertising work, they could expect more confidence from the advertiser and better results from his advertising."

All stations that have used the NAB's new "retail service," or are planning to use it in the future, are therefore urged to arrange for this important and necessary follow-through on the part of the station sales, program and copy staffs, as this has been found to be the most important factor in building sales.

Broadcasters Invited to NRDGA Sales Promotion Meeting June 26-27

Members of the NAB are invited to attend the annual convention of the Sales Promotion Division of the National Retail Dry Goods Association, to be held June 26 and 27 at the Palmer House, Chicago.

NAB members will be allowed the "membership rate" for registration and other activities, by virtue of NAB's associate membership in NRDGA. (See enclosed announcement with this issue of REPORTS.)

The program for Thursday, June 26, will consist of a Display Clinic in the morning and an Advertising Fundamentals Clinic in the afternoon, the latter being devoted largely to newspaper techniques.

Friday morning's session will be devoted to retail radio advertising, with the program calling for a Radio Clinic from 9:30 to 11:30 a. m.

Chairman of the panel will be William T. White, sales manager, Wieboldt's, Inc., Chicago. Participants will include Frank E. Pellegrin, director, and Miss Lee Hart, assistant director, of the NAB Department of Broadcast Advertising. Others will be retailers who produced prize-winning radio shows, as judged in the NRDGA's first annual radio contest held last January.

Radio entertainment will be provided by the Chicago stations at the general luncheon Friday.

Pellegrin Slated to Speak At Charlotte Ad Meeting

Frank E. Pellegrin, Director of Broadcast Advertising, will speak on "The People Look at Radio" at a dinner meeting of the Charlotte, N. C., Advertising Club, June 11.

Small Market Stations

Successful Sale of News Programs Reported at District One Meeting

Nine out of ten stations are selling and programming *local news* in NAB District No. 1 according to an informal poll taken among broadcasters from large and small stations at the District meeting in Boston last week (2-3).

Bert Georges, WHEB, Portsmouth, N. H., and Small Market Stations District Chairman, reported that one of his sponsors made a local survey and found that 92% of the local radio audience was listening to one of his sponsored *local news* programs. Sets-in-use were up considerably for the news period. A. E. Spokes, WJOY, Burlington, Vt., described the sale and programming of *local news* at the station, and WJTN, Jamestown, N. Y., with which he was formerly associated. Harold Meyers, WSTC, Stamford, Conn., reported the sponsorship of 40 local news programs weekly.

The majority of stations in the district (70%) employ a staff of three people to write local clients' advertising copy. One person writes all ad copy in 20% of the stations, whereas two copy writers are employed in 10% of the stations. Copy writers in 65% of the stations devote their time exclusively to preparing the commercials. The poll was taken by a showing of hands, following a discussion of "Who Writes the Advertising Copy at Your Station" by Carleton Brown, WTVL, Waterville, Me. Three announcers devote part of their time to writing copy at WTVL, he reported.

"Public Interest Programming Means Good Public Relations" was the topic of a discussion period led by Robert A. Kelly, WKXL, Concord, N. H. Mr. Kelly gave a detailed account of public interest programming at his station. He pointed out how they organized radio councils for 60 women's clubs, a radio club, "Ladies Do You Know Your City"; remote broadcasts from nine elementary schools, debates among high school students, etc.

John Hurley, WNEB, Worcester, Mass., described the work of organizing a sales staff for a new station and his plan of salesmen's compensation. Salesmen were paid salaries equivalent to 7½% of sales; 10% bonuses were paid on all business exceeding the weekly quotas. Station uses two salesmen, it was reported.

Allen Brown, NAB Assistant Director, Department of Broadcast Advertising, who conducted the "Station Operations Forum," related other District No. 1 case histories on practical operations. He reported the sales record of A. E. Spokes, WJOY, with network cooperative programs. The station has 30 ABC co-ops sponsored weekly. The program costs were reported to be approximately 25% of the station's time costs.

The broadcasters were told of Harold Glidden's experience in "Boosting Sales and Station Prestige With

(Continued on next page)

Local Sports" at WAGM, Presque Isle, Me. The non-network station broadcast 43 sponsored play-by-play basket ball games in 13 weeks.

The Small Market Stations session on Tuesday morning (3) was presided over by District Director Paul W. Morency, WTIC, and Small Market Stations District Chairman Bert Georges, WHEB, Portsmouth, N. H.

General

Extensive Exhibit of Equipment Planned for NAB Convention

When NAB members convene at Atlantic City mid-September for their 25th Annual Convention, they will find the largest exhibition of radio equipment and services in the history of NAB membership meetings, according to plans now being made by Arthur Stringer, director of special services.

Plans were being nailed down by Mr. Stringer at Atlantic City last week; space application forms will be mailed to NAB associate members approximately June 15th.

Some 30,000 square feet of space in the Municipal Auditorium (Convention Hall) has been allocated to the exhibition.

Books for Broadcasters

MODERN RADIO, by Kingdon S. Tyler. New York, Harcourt, Brace and Co., c1944. 238 p. illus.

This is a non-technical explanation of how radio works from the time a program originates in a studio until it reaches the listeners' ears. It is designed, not for those who have grown up with a transmitter at hand, but for that vast fringe who have little technical knowledge but want to know enough about air waves and radio tubes and antennas to be intelligent about them.

With the aid of photographs and clear diagrams, the author discusses such topics as studio design, sound effects, frequency modulation, and radar. The book includes things of the present such as different types of microphones and things of the future like colored television. It is readable, clear, and a help to anyone interested in radio.

TELECASTING AND COLOR, by Kingdon S. Tyler. New York, Harcourt, Brace and Co., c1946. 213 p. illus.

After introductory chapters on the history of television and programming for this new medium, Mr. Tyler takes up one by one the various aspects of telecasting. With pictures and diagrams he explains in a non-technical way the electronic tube, the television camera, transmitter, and receiver.

Since colored television will eventually be a routine part of broadcasting, this simple, yet scientific story of its basic principles is invaluable to everyone in the radio field. The book includes a three-page bibliography on television.

District Meetings

New England Broadcasters Elect Fellows; Need for Code Stressed at Boston Meeting

(Continued from page 458)

of radio in keeping abreast of current developments and cautioned the broadcasters "not to let radio become frozen."

Governor Bradford, praising the industry for its cooperation with men in public office, stated that public officials should not abuse the privilege afforded by radio by mixing "politics with public service" on the air.

Standards of Practice

Citing the necessity for a code in the broadcasting industry, Robert D. Swezey, vice president and general manager, MBS, and chairman of the NAB Special Standards of Practice Committee, presented a strong argument for adoption of and adherence to a revised set of standards.

"The difficulties of making appropriate revisions in the code are perfectly obvious," he said. "All of us know them. We are playing with the same basic factors which have been singing their same unalterable songs for years. It is as simple as the scale of C—no sharps—no flats."

Continuing, Mr. Swezey pointed out that "the crucial words in our problem begin with the letter 'C.'

"C stands for our critics," he explained, "who are really more responsible than anyone else for bringing about a consciousness on our part for the need of review and revision of the standards in the industry." Though some of this criticism is "obviously specious," he said, "there is still enough of it which is constructive to warrant our close attention.

"C also stands for crusaders," Mr. Swezey added, "in and outside of the industry who in their impractical way would have us go too far—would persuade us to make drastic changes in our broadcast service so that we would be giving the people not in any appreciable measure what they want but what these minority do-gooder groups think they should have.

"C stands for the chronic commercialist" who gives lip service to the improvement of industry standards, but who complains if such improvement "looks as though it will cost him a dollar."

Carrying on with his point, Mr. Swezey said, "C stands for the cynics in and out of the industry who say 'we can do nothing' or 'they will do nothing.'"

Another C, he continued "stands for cantankerous characters . . . who are disinclined to follow any pattern or guidance . . . [and] will regard any attempt

(Continued on next page)

at Code revision as some sinister plan officiously imposed upon them by others."

Arguing against such thinking, Mr. Swezey flatly said: "If I had thought for a moment that the purpose of the NAB Code Committee was a plot on the part of the networks, the larger stations, or any other stations to impose their wills on the industry, I would not have touched it with a 10½-foot pole."

The sixth C brought out by Mr. Swezey is "the commercial client who has a great stake in radio and whose dollars are actually the life blood of the system." The industry must have the client's intelligent support, he said.

The final "C stands for common sense." That characteristic is vital in meeting and overcoming the problem. Expressing confidence in the industry's common sense, Mr. Swezey concluded: "It is that alone which will enable us to get out a revision of broadcasting standards which will strengthen and protect this industry and enable it better to perform the tremendous service of which it is capable."

The proposed standards are now in the hands of the Redrafting Committee, composed of Ken Dyke, NBC; Roger Clipp, WFIL; and Charles T. Lucey, WRVA. Upon conclusion of their draft, the full Standards Committee will meet again around the middle of this month to continue their work in completing the code.

The New England broadcasters heard Alfred C. Neale, director of research, Federal Reserve Bank of Boston discuss the economic outlook in their area. He said that while a business adjustment is foreseen in the near future there is nothing in the offing on which to base panic—that the outlook for business in New England is good.

Also featured at the meeting was a talk by Al Capp, creator of the comic strip "L'il Abner" who concluded his humorous discourse with a "take off" on daytime serials.

At an informal party on Monday evening, with Boston stations acting as joint hosts, Mr. Morency was honored by broadcasters of the First District when they presented him with a traveling bag.

NAB executives who participated in the meeting include: A. D. Willard, Jr., Kenneth H. Baker, Robert T. Bartley, Allen Brown, Richard P. Doherty, Harold Fair, Royal V. Howard and Frank E. Pellegrin.

[*See Small Market Stations for additional story on District One meeting.*]

First District Resolutions

JUDGE MILLER

Whereas, the National Association of Broadcasters has expanded its areas of activity and usefulness to the broadcasters, particularly in the past eighteen months during which time Judge Justin Miller has served as its President,

Be it resolved, that the members of the first NAB District extend to President Miller and his able staff their deep appreciation and assurance of whole-hearted support.

PAUL W. MORENCY

Whereas, Paul W. Morency, as Director from the First NAB District has served the interests of the broadcasters so faithfully and so well and has given so unstintingly of his time and effort, and,

Whereas, he is voluntarily retiring as the First District Director in September 1947,

Be it resolved, that the broadcasters of this district express to him their sincere thanks for his outstanding accomplishments and record of achievement, not only for them but for the entire radio industry.

BMB

Whereas, there has long been an acute need in the broadcasting industry for a standardized measurement of station coverage, and,

Whereas, the Broadcast Measurement Bureau has been created to supply that need, and,

Whereas, BMB has issued its first report,

Be it resolved, that the broadcasters of the First District commend the Broadcast Measurement Bureau for the contribution it has made in the direction of standardizing station coverage measurement and urge that further study be made of the results of the first report to the end that new and improved techniques of even greater service to the industry may be developed and used in connection with the next survey recommended by the NAB Board to be made in 1949.

BMB DATA

Whereas, it is possible that non-subscribing stations may use BMB data to the detriment of subscribers,

Be it resolved, that the broadcasters of the First NAB District recommend to the BMB, Inc., that the call-letters of non-subscribing stations be eliminated from the next BMB report.

CASH DISCOUNT

Whereas, the broadcasting industry has been urged to adopt the 2% cash discount as a standard practice, and,

Whereas, careful consideration has been given to the proposal,

Be it resolved, that the broadcasters of the First District, do hereby, disapprove the adoption of the 2% cash discount as a standard of practice.

STANDARDS OF PRACTICE

Be it resolved, that the broadcasters of the First NAB District go on record as favoring the need for a revision of the Standards of Practice to the end of providing more intelligent and effective self-regulation and means of enforcing such regulation.

EDITORIALIZING

Whereas, the Federal Communications Commission's decisions in the so-called "Mayflower Case" deprives radio broadcasters of the freedom of speech guaranteed under the United States Constitution,

Be it resolved, that the broadcasters of the First District urge the NAB to take whatever lawful action may be required to bring about a reversal of that decision and to reestablish the right of broadcasters to editorialize or otherwise to express their views in keeping with the constitutional guarantee of freedom of speech.

BMI

Whereas, BMI has been of remarkable assistance in providing broadcasters with a substantial source of good music, and,

Whereas, the continued success of BMI is essential to the protection and growth of the broadcasting industry,

Be it resolved, that the broadcasters of the First District urge upon its members further and continuing efforts to promote the popularity of BMI music by all means at their command, and,

Be it further resolved, that the First District broadcasters commend BMI for its choice of Carl Haverlin as President and assure him of this whole-hearted support.

(Continued on next page)

JOHN SHEPARD III

Whereas, the broadcasters of the First NAB District assembled at the Hotel Somerset, Boston, on June 2 and 3, 1947, are concluding a meeting which has been one of the most interesting, informative and pleasurable held in this District,

Be it resolved, that the thanks of the members be extended to the Convention Committee, under the direction of John Shepard III, whose efforts are responsible for the success of the meeting.

BOSTON STATIONS

Whereas, the members of the First NAB District were guests of Boston Stations WBMS, WBZ, WCOP, WEEI, WHDH, WMEX, WNAC, and WORL at a most enjoyable cocktail party on the occasion of their annual meeting at the Hotel Somerset in Boston on June 2, 1947,

Be it resolved, that the members extend their sincere thanks and appreciation to the host stations, and,

Be it further resolved, that a copy of this resolution be sent to each of the host stations.

District Fifteen Broadcasters to Hold Special Meeting on June 26

A special meeting of 15th NAB District members at Berkeley, Calif., June 26, has been scheduled by District Director William B. Smullin, KIEM, Eureka, Calif. The one-day session will be held in the Bamboo Room of the Claremont Hotel beginning at 10 a.m.

Among other items on the agenda, the district committee chairmen will report. They are Joe Carroll, KMYC, Small Markets; Clyde Coombs, KROY, Employee-Employer Relations; Paul Bartlett, KFRE, Engineering; William Pabst, KFRC, Program; John Elwood, KPO, Public Relations; Linc Dellar, KXOB, Sales Managers; Arthur Westlund, KRE, State Association; C. L. McCarthy, KQW, Legislative; Charles Scott, KTKC, Secretary-Treasurer.

The NAB headquarters staff will be represented by Secretary-Treasurer C. E. Arney, Jr.

Public Interest Programming

Local Stations Called On to Aid In Recruiting Farm Labor

(Story from Office of Government Reports)

The U. S. Department of Agriculture has urgently requested the help of radio stations throughout the country in recruiting farm labor when and wherever it is needed from now until the end of the 1947 harvest season. America's farmers have been asked to plant 357 million acres of crops this year, compared with 345 million acres planted in 1946, with heavy emphasis on crops requiring large amounts of hand labor.

The problem of filling farm jobs with domestic workers is that of bringing the jobs and the prospective workers together. This calls for the full utilization of radio and other communications media in telling prospective workers where the jobs are, how to get there, when their help is needed, how long the work will last, and what conditions of living and employment surround the jobs.

The need for extra seasonal workers will vary widely between crops and between areas, states and communities. Likewise, the type of workers required will

(Continued on next page)

differ. In some jobs women and youth cannot be efficiently utilized because the work is too heavy. Generally the heaviest volume of seasonal work will be in specialized fruit and vegetable, cotton, peanut, potato, hybrid corn and other similar areas. In most of these areas the peak labor need will be as heavy as during war years. In some it may be even heavier. In general farming, dairy and poultry areas there is need for seasonal workers for harvest jobs, as well as men for year-round work. Emergencies in production and harvesting will doubtless develop in many crops and in most states, and there will be continuing need for strong public appeals and local mobilization of workers to save the crops.

Due to the regional and diverse time aspects of the farm labor problems, there will be no farm labor recruiting via national networks unless national emergencies develop. States, counties and communities have the responsibility of filling their specific farm labor needs. For this reason they will welcome the continued cooperation of all local radio stations in disseminating reliable and up-to-the-minute farm labor information which will be provided to them, as needed, by Department of Agriculture county extension services and county and state farm labor offices.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of June 16-22, 1947, by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945, the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing, feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups—such as parent-teacher organizations—actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. (Fact Sheet No. 37)

Buy U. S. Savings Bonds—"Save the Easy Automatic Way"

The U. S. Treasury is conducting its most important stepped-up promotion of U. S. Savings Bonds for 1947 during June and July. The way the public debt is managed will affect the life of every American for years to come, as regards money supply, the price level, business conditions and what the dollar will buy; *and wise management of the debt demands that ownership of U. S. securities be spread as widely as possible among individuals. Beginning June 1, the U. S. Treasury, in cooperation with the banks of America, is inaugurating an easy, automatic method—The Bond-A-Month Plan*—of buying Bonds for the millions of Americans not on regular payrolls. The backbone of the Savings Bonds program is still the Payroll Savings Plan, and, although it is receiving whole-hearted support from industry, recent surveys show that this method now needs additional stimulation. The rate of interest, sound investment value, and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like retirement incomes, education for the children, new homes, the most enjoyable use of leisure time. As an investment, U. S. Savings Bonds are safe, profitable. The effective way to provide for the future is through regular savings. Regular saving is easy and automatic if you sign up for the Payroll Savings Plan where you work, or the Bond-A-Month Plan where you bank. (Fact Sheet No. 11-G)

(4)

Columbia Broadcasting System, Inc.; Matheson Radio Co., Inc.; The Northern Corporation; The Yankee Network, Inc.; Unity Broadcasting Corp. of Massachusetts; Templetone Radio Mfg. Corp.; Massachusetts Broadcasting Co.; Harvey Radio Laboratories, Inc.: for FM facilities in the Boston area.

FCC ACTIONS

GENERAL

At its meeting on May 29, the Commission granted a petition of the Collinson-Wingate Broadcasting Co. for assignment of the call letters KTOP for a new standard broadcast station at Topeka, Kans., not yet in operation.

Prior to May 20, 1946, the Commission had accepted "reservations" for broadcast call letters, but no call letters have since been reserved on request prior to the granting of construction permits. However, reservations made prior to that date continued to be honored. On May 7, 1946, the Monterey Broadcasting Co. requested reservation of KRUZ for a new station, not yet operating, at Santa Cruz, Calif. On January 23, 1947, it asked that this reservation be changed to KTOP. Subsequently, on May 13, 1947, the Mesilla Valley Broadcasting Co. requested assignment of either KTOP or KRUZ for its authorized new station at Las Cruces, New Mexico. In view of the situation, and the particular appropriateness of the letters KTOP for the Topeka station, the Commission granted the Collinson-Wingate petition. In so doing, it points out that while it is not bound either by the Communications Act or its Rules and Regulations to adopt, or to use, any particular method of assigning call letters to broadcast stations, it has long followed a "First Come, First Served" policy. However, since May 20, 1946, it has not been honoring requests for changes in call letters which may have been reserved before that date, and no requests are being accepted prior to issuance of construction permits.

AMPLITUDE MODULATION

AM—Docket Cases

620 KC.

The Commission announces its **Proposed Decision** (B-366) looking towards the grant of the application of **Hanford Publishing Co.** for a new station in **Hanford, Calif.**, to operate on 620 kc., with 1 KW, unlimited time, DA-night (BP-4869; Docket 7783), and denial of application of **Fresno Broadcasting Co.** for the same facilities at **Fresno, Calif.** (BP-5005; Docket 7784)

620 KC.

Adopted a **Memorandum Opinion and Order** denying petition of **Donald Flamm and Metropolitan Broadcasting Service**, for rehearing and reconsideration of the Commission's decision of February 26, 1947 (B-314), granting a construction permit to the Newark Broadcasting Corp., Newark, N. J. (Docket 6190), and denying the applications of the petitioners for construction permits for stations in New York.

630 KC.

The Commission announces a **Proposed Decision** (B-309) looking towards the grant of the application of the American Broadcasting Corp., to change the facilities of station **WLAP, Lexington, Ky.**, from 1450 to 630 kc., power from 250 watts to 5 KW day, 1 KW night, DA. (BP-4102; Docket 6973) and denial of the applications of **Queen City Broadcasting, Inc.**, for a new station in **Cincinnati, Ohio**, to operate on 630 kc., 1 KW-5 KW-LS, unlimited time (BP-4103; Docket 6972), and **Scripps-Howard Radio, Inc., Cincinnati**, to change frequency of station WCPO from 1230 to 630 kc., power from 250 watts to 1 KW-5 KW-LS, unlimited time (BP-3898; Docket 6971).

(Continued on next page)

1050 KC.

The Commission announced its **Final Decision** (B-346) granting the application of **Northern Kentucky Airwaves Corp.**, for a new station in **Covington, Ky.**, to operate on 1050 kc. with 250 watts, daytime only (BP-4522; Docket 7477), and denying application of **The Northern Kentucky Radio Corp.** (BP-4574; Docket 7478), for the same facilities.

1110 KC.

Adopted **Final Decision** (B-351) granting the application of **Tri-City Broadcasting Co.** for a new station in **Newport, Ky.**, to operate on 1110 kc., 1 KW, daytime only (BP-4883; Docket 7716), and denying application of **Moraine Broadcasters, Inc.**, for the same facilities in **Dayton, Ohio.** (BP-4941; Docket 7717)

1280 KC.

Adopted **Final Decision** (B-356) granting application of **Veterans Broadcasting Co., Inc.**, for a new station in **Rochester, N. Y.**, to operate on 1280 kc. with 5 KW, unlimited time, DA (BP-4826; Docket 7669), and denying application of **Rochester Broadcasting Corp.** (BP-3593; Docket 6606), for the same facilities. (Comr. Denny did not participate in any of the aspects of this case.)

1300–1400 KC.

The Commission announces adoption of **Supplemental Proposed Decision** (B-323), proposing to grant application of **Newnan Broadcasting Co.** for a new station at **Newnan, Ga.**, to operate on 1400 kc. with 250 watts, unlimited time (BP-4487; Docket 7442), subject to condition that applicant will not commence operation until station WATL, Atlanta, Ga., has ceased to operate on 1400 kc. in accordance with its existing permit; and that applicant will, within 60 days from final grant, file an application for modification of construction permit specifying a transmitter site and antenna system meeting the requirements of the Commission's Standards; also to grant application of **Volunteer State Broadcasting Co., Inc.** (BP-4531; Docket 7443), for a new station at **Nashville, Tenn.**, to operate on 1300 kc. with 5 KW, unlimited time, DA.

1340 KC.

Adopted **Final Decision** (B-354) granting application of **Bullard, Metcalf & Goodlette,** for a new station in **Hazard, Ky.**, to operate on 1340 kc., 250 watts, unlimited time (BP-4661; Docket 7512), and denying mutually exclusive application of **Hazard Broadcasting System** (BP-4584; Docket 7511), and application of **Universal Broadcasting Co.** (BP-4778; Docket 7583), requesting the same facilities.

1340 KC.

The Commission announces adoption of a **Proposed Decision** (B-364) looking towards the grant of the application of **Williamsport Radio Broadcasting Associates** for a new station in **Williamsport, Pa.**, to operate on 1340 kc. with 250 watts, unlimited time (BP-4549; Docket 7427), and denial of application of **Lycoming County Broadcasting Co.** (BP-4298; Docket 7425), for the same facilities. (Comr. Jett dissented. He favors grant of Lycoming and denial of Williamsport Radio Broadcasting Associates.)

AM—New CP's Granted

560 KC.

The Advance, Inc., Elizabeth City, N. C.—Granted CP for a new station to operate on 560 kc., with 500 watts, daytime only; engineering conditions. (BP-5750)

570 KC.

Douglas Broadcasting Co., Douglas, Ariz.—Granted CP for a new station to operate on 570 kc., 1 KW, daytime only; engineering conditions. (BP-5704)

740 KC.

Olney Broadcasting Co., Olney, Ill.—Granted CP for a new station to operate on 740 kc., 250 watts, daytime only; engineering conditions. (BP-5717)

800 KC.

North Ala. Broadcasting Co., Decatur, Ala.—Granted CP for a new station to operate on 800 kc., 1 KW, daytime only; engineering conditions. (BP-5665)

930 KC.

Charles W. Balthrope, San Antonio, Texas—Granted CP for a new station to operate on 930 kc., 1 KW, daytime only; engineering conditions, and subject to submission of evidence showing severance of interest and connection with other stations. (BP-4375)

970 KC.

Roanoke-Chowan Broadcasting Co., Inc., Ahoskie, N. C.—Granted CP for a new station to operate on 970 kc., 1 KW, daytime only; engineering conditions. (BP-5826)

1050 KC.

F. L. Thornhill, tr/as East Side Broadcasting Co., Kirkland, Wash.—Granted CP for a new station to operate on 1050 kc., 150 watts, daytime; engineering conditions. (BP-5363)

1230 KC.

Auburn Broadcasting Co., Auburn, Ala.—Granted CP for a new station to operate on 1230 kc., 250 watts, unlimited time. (BP-5692)

Alachua County Broadcasting Co., Gainesville, Fla.—Granted CP for a new station to operate on 1230 kc., 250 watts, unlimited time; engineering conditions. (BP-5657)

1240 KC.

The Uncompahgre Broadcasting Co., Montrose, Colo.—Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time. (BP-5708)

1290 KC.

Greater Hartford Broadcasting, Inc., Hartford, Conn.—Granted CP for a new station to operate on 1290 kc., 500 watts, daytime only (Comr. Durr for hearing.) (BP-5728).

1340 KC.

Ridson, Inc., Eveleth, Minn.—Granted CP for a new station to operate on 1340 kc., 250 watts, unlimited time; engineering conditions. (BP-5758)

1400 KC.

Town Talk Broadcasting Co., Santa Paula, Calif.—Granted CP for a new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (BP-5806)

Oneonta Star, Inc., Oneonta, N. Y.—Adopted decision and order granting petition for immediate and final decision in proceeding (Docket 7808), and granted application for a new station to operate on 1400 kc., 250 watts, unlimited time (BP-5114); conditions.

Sikeston Community Broadcasting Co., Sikeston, Mo.—Granted CP for a new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (BP-5664)

1450 KC.

KOKE Broadcasters, Coquille, Ore. (William E. Walsh and Walter L. Read, a partnership)—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (BP-5754)

Eagle Pass Broadcasters, Eagle Pass, Texas—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (BP-5342)

1490 KC.

Fairmont Broadcasting Co., Fairmont, W. Va.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time; engineering conditions. (BP-5680)

(Continued on next page)

AM—Designated for Hearing

1230 KC.

Scott County Broadcasting Co., Sikeston, Mo.—Designated for hearing application for a new station to operate on 1230 kc., 250 watts, unlimited time. (BP-5796)

1380 KC.

Kansas City Broadcasting and Television Co., Kansas City, Mo.—Designated for hearing application for a new station to operate on 1380 kc., 5 KW, daytime only. (BP-5829)

1440 KC.

Catonsville Broadcasting Co., Catonsville, Md.—Designated for hearing application for a new station to operate on 1440 kc., 250 watts, daytime only. (BP-5608)

1480 KC.

Modern Broadcasting Co. of Baton Rouge, Inc., Baton Rouge, La.; KVOL—Evangeline Broadcasting Co., Lafayette, La.—Designated for hearing in a consolidated proceeding application of Modern Broadcasting Co. (BP-5711), for a new station to operate on 1480 kc., 1 KW, daytime only, with application of KVOL to change from 1340 to 1480 kc., increase power from 250 watts to 5 KW-LS, 1 KW night.

1580 KC.

Del Paso Broadcasting Co., North Sacramento, Calif.—Designated for hearing application for a new station to operate on 1580 kc., 250 watts, daytime only. (BP-5769)

AM—Licenses for New Stations Granted

880 KC.

WRRZ—Tar Heel Broadcasting System, Inc., Clinton, N. C.—Granted license for new station; 880 kc., 1 KW, daytime. (BL-2379)

940 KC.

WINZ—Hollywood Broadcasting Co., Hollywood, Fla.—Granted license for new station; 940 kc, 1 KW, daytime, conditions, and to specify studio location at Great Southern Hotel. (BL-2120)

1120 KC.

KCLE—Marti, Inc., Cleburne, Tex.—Granted license for new station; 1120 kc., 250 watts, daytime. (BL-2381)

1230 KC.

KTRF—Harry K. Arneson, Thief River Falls, Minn.—Granted license for new station; 1230 kc., 250 watts, unlimited. (BL-2335)

1240 KC.

WOBT—The Oneida Broadcasting Co., Pelican, Wis.—Granted license for new station; 1240 kc., 250 watts, unlimited. (BL-2348)

1340 KC.

KCNA—Catalina Broadcasting Co., Tucson, Ariz.—Granted license for new station; 1340 kc., 250 watts, unlimited time, and to change studio location locally. (BL-2383)

1360 KC.

KXOL—Ft. Worth Broadcasting Co., Ft. Worth, Tex.—Granted license for new station; 1360 kc., 1 KW, directional antenna—night, unlimited. (BL-2374)

1450 KC.

KWHW—The Altus Broadcasting Co., Altus, Okla.—Granted license for new station; 1450 kc., 250 watts, unlimited, and for change of studio location locally. (BL-2377)

1490 KC.

KCID—Caldwell Broadcasting Co., Inc., Caldwell, Idaho—Granted license for new station, 1490 kc., 250 watts, unlimited time, and to specify studio location. (BL-2398)

KVOU—Uvalde Broadcasters, Uvalde, Tex.—Granted license for new station, 1490 kc., 250 watts, unlimited time, and for change of studio location locally. (BL-2369)

AM—License Renewal

KSIL—Dorrance D. Roderick, El Paso, Tex.—Granted renewal of AM license for the period ending Feb. 1, 1950.

AM—Modifications of CP's Granted

WLAM—The Lawrence Broadcasting Co., Lawrence, Mass.—Granted modification of CP for approval of antenna and transmitter locations. (BMP-2603)

KQV—Allegheny Broadcasting Corp., Pittsburgh, Pa.—Granted modification of CP (BP-3992) to make changes in directional antenna array for daytime operation. (BMP-2695)

WESX—North Shore Broadcasting Co., Salem, Mass.—Granted modification of CP for extension of completion date to 10-9-47. (BMP-2735)

KENT—Frank H. Ford, Shreveport, La.—Granted modification of CP to make changes in vertical antenna, change type of transmitter and change studio location locally. (BMP-2728)

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted modification of CP to change type of transmitter, to change from North Tower to Center Tower for daytime operation, and change studio location locally. (BMP-2677)

WHOW—Cornbelt Broadcasting Co., Clinton, Ill.—Granted modification of CP for approval of antenna and transmitter location. (BMP-2706)

WEWO—Scotland Broadcasting Co., Laurinburg, N. C.—Granted modification of CP for approval of antenna to change type of transmitter and approval of transmitter and studio locations. (BMP-2713)

WRIB—Rhode Island Broadcasting Co., Providence, R. I.—Granted modification of CP to make changes in vertical antenna and transmitting equipment, change transmitter location to end of Water street, East Providence, and studio to Narragansett Hotel, Providence, and extension of completion date to 7-3-47. (BMP-2721)

KPOW—Albert Joseph Meyer, Powell, Wyo.—Granted modification of CP to change type of transmitter. (BMP-2737)

WWPN—Pinnacle Broadcasting Co., Middlesboro, Ky.—Granted modification of CP for approval of antenna, to change type of transmitter, and for approval of transmitter and studio locations. (BMP-2719)

WLOF—Hazlewood, Inc., Orlando, Fla.—Granted modification of CP to change transmitter location to east of Orlovista, Fla. (BMP-2702)

WKAI—The Macomb Broadcasting Co., Macomb, Ill.—Granted modification of CP for approval of antenna, to make changes in transmitting equipment, for approval of transmitter location, and to specify studio location. (BMP-2626)

KXLO—Capital Broadcasting Co., Lewistown, Mont.—Granted modification of CP for extension of completion date to 7-8-47.

WAZF—B. J. Barrier, Jr., H. T. Barrier and H. P. Holmes, Yazoo City, Miss.—Granted modification of CP to change studio location to South Main St., Yazoo City. (BMP-2736)

WELI—Connecticut Radio Foundation, Inc., New Haven, Conn.—Granted modification of CP for extension of completion date to 11-19-47. (BMP-2741)

WAIM—Wilton E. Hall, Anderson, S. C.—Granted modification of CP for extension of commencement and completion dates to 9-15-47 and 12-15-47, respectively. (BMP-2742)

KBOA—Kennett Broadcasting Corp., Kennett, Mo.—Granted modification of CP for extension of completion date to 8-1-47. (BMP-2743)

(Continued on next page)

WNEL—Juan Piza, San Juan, P. R.—Granted modification of CP for extension of completion date to 8-22-47. (BMP-2749)

KFXM—Lee Bros. Broadcasting Co., San Bernardino, Calif.—Granted modification of CP for extension of completion date to 9-14-47. (BMP-2744)

AM—Miscellaneous Actions

Muscogee Broadcasting Co., Columbus, Ga.—Denied petition for a waiver of Rule 1.363 of the Rules and accept for filing application for a new station to operate on 1230 kc., 250 watts, unlimited time.

KWKH—International Broadcasting Corp., Shreveport, La.—Adopted decision and order denying petition for reconsideration directed against the Commission's action of August 29, 1946, granting renewal of license for station WDGY, Minneapolis, for operation on 1130 kc., 5 KW day, 500 watts-LS at Albuquerque.

WDGY—Twin Cities Broadcasting Corp., Minneapolis, Minn.—Adopted order affording WDGY to show cause at a hearing before the Commission, why the existing license of WDGY should not be modified so as to authorize operation on 1130 kc., with 5 KW either daytime only or with directional antenna or other mean to avoid causing interference to the normally protected primary service and the secondary nighttime service of KWKH, and ordered station KWKH be made a party to the proceeding. Ordered further that the hearing to show cause be consolidated with the consolidated hearing on application of WDGY (BP-5429), which requests operation on 1130 kc. with 50 KW, unlimited time, DA, and application of Pontiac Broadcasting Co. (WCAR) for CP to operate on 1130 kc., with 50 KW, unlimited time, DA. (BP-5971; Docket 8364)

Central Utah Broadcasting Co., Provo, Utah—Adopted memorandum opinion and order denying petition for reconsideration and grant of its application (BP-4703) without hearing, and ordered that the consolidated hearing be scheduled for June 23 in Washington, upon applicant's application and those of United Broadcasting Co. (BP-4107) and Ogden Broadcasting Co., Inc. (BP-4553)

WFOY—Fountain of Youth Broadcasting Co., St. Augustine, Fla.—Granted consent to transfer of control over Fountain of Youth Broadcasting Co., from Glenn Marshall, Jr., Ed Norton and Frank King, to J. C. Bell, representing 62.5 shares of stock for a consideration of $100,000. (BTC-536)

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted temporary extension of license for main and auxiliary transmitters for a period of 60 days.

WBBR—Watchtower Bible and Tract Society, Inc., Brooklyn, N. Y.—Granted modification of license to change main studio location to 1111 Woodrow Road, Staten Island, N. Y., during reconstruction of the present studio at Brooklyn. (BML-1252)

WINS—The Crosley Broadcasting Corp., New York, N. Y.—Granted modification of license to operate on 1010 kc., 10 KW night, 50 KW-LS, DA-1, unlimited time, instead of 1000 kc., 50 KW, unlimited time; subject to condition in original grant that licensee satisfy legitimate complaints of blanketing within 250 mv/m contour, including cross modulation.

WNCA—Community Broadcasting Co., Asheville, N. C.—Granted petition, removed from hearing and granted application for transfer of control of WNCA from Community Broadcasting Co. to Jacksonville Broadcasting Corp., WPDQ, Jacksonville, Fla., for a consideration of $80,100. (BTC-529; Docket 8297)

Van Curler Broadcasting Co., Albany, N. Y.—Denied petition for reconsideration of Commission's memorandum opinion and order of April 9, 1947, and for present consideration and grant of its application for a construction permit for a new station on the frequency and power now assigned to WOKO, or for oral argument on such petition. (BP-4395; Docket 7173)

KGLU—Gila Broadcasting Co., Safford, Ariz.—Granted license for change in frequency to 1480 kc., power to 1 KW, installation of new transmitter, and change transmitter location. (BL-2390)

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Granted license for increase in power to 50 KW, installation of new transmitter, changes in DA for day and night use, and change transmitter location. (BL-2404)

KFMJ—Fred Jones Broadcasting Co., Tulsa, Okla.—Granted license which authorized installation of new transmitter. (BL-2422)

WOL—Cowles Broadcasting Co., Washington, D. C.—Granted license for increase in power to 5 KW, installation of new transmitter, and new DA for day and night use, and change transmitter location; conditions. (BL-2065)

WOL—Cowles Broadcasting Co., Washington, D. C.—Granted license covering move of old main transmitter to be used as an auxiliary with 1 KW, DA day and night. (BL-2336)

WTOD—Unity Corp., Inc., Toledo, Ohio—Granted motion to accept late appearance in re application (BP-5071; Docket 8001).

KANS—Kansas Broadcasting, Inc., Wichita, Kansas—Granted petition for leave to amend its application (BP-5159; Docket 7952) so as to specify directional operation daytime instead of non-directional.

Alf M. Landon, d/b as Leavenworth Broadcasting Co., Leavenworth, Kans.—Granted petition for leave to amend its application (BP-5718; Docket 8143), so as to specify the frequency 1410 kc. with 500 watts, daytime only, instead of 1130 kc., 1 KW, day. The amendment was accepted and application as amended removed from the hearing docket.

Sky Broadcasting Service, Kansas City, Mo.—The Commission, on its own motion, removed from the hearing docket application (BP-5373; Docket 8142).

Southern Ill. Broadcasting Co., Inc., Centralia, Ill.—Granted petition to dismiss without prejudice application (BP-4181; Docket 7129).

KFJI—KFJI Broadcasters, Klamath Falls, Ore.—Granted petition for leave to intervene in the hearing on application of KRKD (Docket 8341).

KOVO—KOVO Broadcasting Co., Provo, Utah—Granted petition for leave to intervene in the hearing on application of Public Broadcasting Service, Inc. (Docket 8182); exception noted by counsel for applicant.

Express Pub. Co., San Antonio, Texas—Denied petition requesting dismissal without prejudice of its application (BP-4471, Docket 7391).

Mahoning Valley Broadcasting Corp., Youngstown, Ohio—Granted petition insofar as it requests leave to amend its application (BP-5057; Docket 7709), so as to add to the application a further engineering study regarding interference conditions. Insofar as petition requests removal from the docket, it is denied.

Mahoning Valley Broadcasting Corp., Youngstown, Ohio—Granted petition requesting leave to add to application a statement regarding the applicant's willingness to accept a grant subject to limitations received from certain other applications.

The Voice of Fallen, Fallen, Nev.—Dismissed petition seeking reconsideration of Commission action on March 27, 1947, granting without a hearing application of Reno Newspapers, Inc., to set aside said grant and designate application for consolidated hearing with petitioner's application (BP-5831).

Daily News Television Co., Philadelphia, Pa.—Denied petition requesting the Commission to designate an early hearing date in re its application and that of Penna. Broadcasting Co.

KJAN Broadcasting Co., Inc., Opelousas, La.—Granted petition for leave to amend its application (BP-5143; Docket 8005), so as to show a revised DA array, etc. The amendment was accepted and application as amended, removed from the hearing docket.

WJOL—Joliet Broadcasting Co., Joliet, Ill.—Granted petition for leave to amend its application (BR-591; Docket 6983), so as to change the name of applicant from WCLS, Inc., to Joliet Broadcasting Co.

(Continued on next page)

WDEL, Inc., Wilmington, Dela., et al.—Granted joint petition requesting continuance of consolidated hearing presently scheduled for June 9, and continued same to June 23.

WKMH — Suburban Broadcasters, Dearborn, Mich.—Granted petition for leave to amend its application (BP-5759; Docket 8149), so as to specify unlimited time on 1310 kc. instead of daytime, etc. The amendment was accepted; the record was ordered reopened, and a further hearing scheduled for July 15 in Washington.

Wyandotte News Co., Wyandotte, Mich.—Dismissed petition requesting the Commission to return the application of Suburban Broadcasters for unlimited time on 1310 kc., submitted March 10, 1947.

Cumberland Publishing Co., Pikesville, Ky.—Granted petition to accept late appearance in re its application (BP-5904; Docket 8260).

Woodward Broadcasting Co., Detroit, Mich.—Granted petition for continuance of hearing presently scheduled for June 11 on its application, and continued same to July 8.

Tidewater Broadcasting Corp., Norfolk, Va.—Granted petition for extension of time in which to file exceptions to proposed decision (Docket 7390, et al.), and extended the time to June 18.

WDUK—WDUK, Inc., Durham, N. C.—Granted petition for leave to amend its application (BP-5652; Docket 8396), so as to specify 1310 kc. with 1 KW day, 500 watts night, instead of 1270 kc. 1 KW day, 500 watts night. The amendment was accepted and application as amended was removed from the hearing docket.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Denied petition requesting enlargement of the issues in re the application of WARM (BP-5186; Docket 7851).

KMAC—The Walmac Co., San Antonio, Texas—Granted petition for leave to amend its application (BP-4360; Docket 7983), so as to show a revised daytime directional array.

News Syndicate Co., Inc., New York City—Granted petition for extension of time in which to file a reply brief in the case of the New York FM proceeding, and the time was extended to June 9.

KTHS—Radio Broadcasting, Inc., West Memphis, Ark., et al.—The Commission on its own motion, continued the further consolidated hearing in re Dockets 7086 et al., presently scheduled for June 16, and continued same to June 26.

*The following were authorized construction permits; conditions. (*Note*: Power given is effective radiated power; antenna height is height above average terrain, and channel to be assigned after final proceedings in docket 6768.)*

Arkansas-Oklahoma Broadcasting Corp., Ft. Smith, Ark.—Class B, 33 KW, 740 feet. (BPH-988)

Studebaker Broadcasting Co., San Diego, Calif.—Class B, 16 KW, 300 feet. (BPH-919)

FM Radio and Television Corp., San Jose, Calif.—Class B, 340 KW, 2470 feet. (BPH-929)

KSBR—Radio Diablo, Inc., San Bruno, Calif.—Class B, 250 KW, 2470 feet. (BPH-1018)

Merced Broadcasting Co., Merced, Calif.—Class B, 2.9 KW, 250 feet. (BPH-1072)

WILM-FM—Delaware Broadcasting Co., Wilmington, Dela.—Class B, 20 KW, 500 feet. (BPH-738)

Paul Brake, Miami, Fla.—Class B, 8.5 KW, 275 feet. (BPH-937)

KBUR-FM—Burlington Broadcasting Co., Burlington, Ia.—Class B, 20 KW, 500 feet. (BPH-419)

Radio Asheville, Inc., Asheville, N. C.—Class B, 16.2 KW, 1100 feet. (BPH-998)

Lee Segall Broadcasting Co., Houston, Tex.—Class B, 46 KW, 380 feet. (BPH-743)

The following were authorized construction permits in lieu of previous conditions; channels to be assigned after final proceeding in docket 6768:

WAFM—Voice of Alabama, Inc., Birmingham, Ala.—Class B, 540 KW, 610 feet. (BMPH-362)

KMYC-FM—Marysville-Yuba-City Broadcasters, Inc., Marysville, Calif.—Class B, 4.7 KW, 395 feet. (BMPH-379)

KECA-FM—American Broadcasting Co., Inc., Los Angeles, Calif.—Class B, 290 KW, 2900 feet. (BPH-242)

KVEC-FM—The Valley Electric Co., San Luis Obispo, Calif.—Class B, 16.7 KW, 700 feet. (BMPH-375)

KSFH—Pacific Broadcasting Co., San Francisco, Calif.—Class B, 15.8 KW, 1330 feet. (BMPH-329)

WHMB—Theodore Granik, Washington, D. C.—Class B, 19 KW, 510 feet. (BMPH-313)

WASH—Commercial Radio Equipment Co., Washington, D. C.—Class B, 15 KW, 470 feet. (BMPH-292)

WAVE-FM—WAVE, Inc., Louisville, Ky.—Class B, 15 KW, 300 feet. (BMPH-381)

KFEQ-FM—KFEQ, Inc., St. Joseph, Mo.—Class B, 63 KW, 560 feet. (BPH--414)

WRAL-FM—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Class B, 54 KW, 325 feet. (BPH-861)

WTMA-FM—Atlantic Coast Broadcasting Co., Charleston, S. C.—Class B, 49 KW, 385 feet. (BPH-196)

FM—New Noncommercial Educational CP Granted

The Michigan State College, East Lansing, Mich.—Granted CP for a new station, 90.9 Mc. (No. 215), 1.2 KW, antenna 320 feet (BPED-69). (Applicant proposes a varied program including symphony music, dramatic shows, forum discussions and scientific lectures. Special programs will be broadcast to farmers in that area. Applicant plans to cooperate with the proposed state-wide network which is being developed in Michigan.)

FM—License Renewals and Extensions

WSBF—South Bend Tribune, South Bend, Ind.—Granted renewal of FM license for the period ending June 1, 1948.

WBAM & Aux.—Bamberger Broadcasting Service, Inc., Carteret, N. J.—Granted renewal of FM license for the period ending June 1, 1948.

(Continued on next page)

WABW—Associated Broadcasters, Inc., Indianapolis, Ind. —Extended FM license on a temporary basis to Sept. 1, 1947, pending determination upon application for renewal.

WCAU-FM—Philadelphia Record Co., Philadelphia, Pa.— Extended present FM license for a period of 90 days, on a temporary basis.

FM—Modifications of CP's Granted

WKRG-FM—Giddens & Rester, Mobile, Ala.—Granted modification of CP for extension of completion date to 8-17-47. (BMPH-386)

WRUN—Rome Sentinel Co., Utica, N. Y.—Granted modification of CP for extension of completion date to 8-20-47. (BMPH-385)

WHFB-FM—The Palladium Publishing Co., Benton Harbor, Mich.—Granted modification of CP to change completion date to 8-25-47. (BMPH-209)

WNIQ—Uniontown Newspapers, Inc., Uniontown, Pa.— Granted modification of CP for extension of completion date to 7-28-47. (BMPH-267)

WSAR-FM—The Fall River Broadcasting Co., Inc., Fall River, Mass.—Granted modification of CP for extension of completion date to 11-18-47. (BMPH-373)

WCAC—Wilton E. Hall, Anderson, S. C.—Granted modification of CP for extension of completion date to 12-23-47. (BMPH-388)

WABF—Metropolitan Broadcasting & Television, Inc., New York City—Granted modification of CP for extension of completion date to 12-21-47. (BMPH-384)

KARM-FM—KARM, The George Harm Station, Fresno, Calif.—Granted modification of CP for extension of completion date to 12-7-47. (BMPH-383)

WRBL-FM—Columbus Broadcasting Co., Columbus, Ga.— Granted modification of CP for extension of completion date to 9-1-47. (BMPH-382)

FM—Miscellaneous Actions

Columbia Broadcasting System, Inc., St. Louis, Mo.—Dismissed without prejudice application for a new Class B station (BMPH-63) upon request of applicant.

Farmers and Bankers Broadcasting Corp., Wichita, Kans. —Dismissed conditional grant for Class B station (BPH-380) upon applicant's request.

FM—Applications Accepted for Filing

WKJF—West Virginia Radio Corp., Pittsburgh, Pa.— Modification of construction permit (B2-PH-626, which authorized a new FM broadcast station) to change commencement and completion dates.

WSNJ-FM—Eastern States Broadcasting Corp., Bridgeton, N. J.—Modification of construction permit (B1-PH-510, which authorized a new FM broadcast station) for extension of completion date.

WTAL-FM—Capital City Broadcasting Corp., Tallahassee, Fla.—Voluntary assignment of construction permit to John H. Phipps.

WTAD-FM—Lee Broadcasting, Inc., Quincy, Ill.—Modification of construction permit (B4-PH-185, which authorized a new FM broadcast station) for extension of completion date.

WPDQ-FM—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Modification of construction permit (B3-PH-652, as modified) which authorized a new FM broadcast station, for extension of completion date.

KTUL-FM—Tulsa Broadcasting Co., Tulsa, Okla.—Modification of construction permit (B3-PH-544, which authorized a new FM broadcast station) to change studio location and transmitter site.

WITH-FM—The Times-Herald Co., Port Huron, Mich.— Modification of construction permit (B2-PH-141, which authorized a new FM broadcast station) to make changes in antenna system and change commencement and completion dates. Amended to change type of transmitter and make changes in antenna system.

WKRG-FM—Giddens & Rester, Mobile, Ala. (A partnership composed of Kenneth R. Giddens and T. J. Rester)— Modification of construction permit (BPH-795, as modified) which authorized a new FM broadcast station, to change transmitter site to southeast quarter of Section #3, Mobile, Ala.

KXOK-FM—Star-Times Publishing Co., St. Louis, Mo.— Modification of construction permit (B4-PH-2, as modified) which authorized a new FM broadcast station, for extension of completion date.

To Be Assigned By FCC

NEW—WDUK, Inc., Durham, N. C. (P. O. 205½ West Main)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC.

NEW—The Helm Coal Co., York, Pa. (H. J. Williams, M. E. Cousler, Lowell W. Williams and Edward C. Hale, partners) (Box 266)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and effective radiated power of 17.16 KW.

TELEVISION

TV—Applications Accepted for Filing

WTTG—Allen B. Dumont Laboratories, Inc., Washington, D. C.—Modification of construction permit (B1-PCT-16, which authorized a new commercial television broadcast station) for extension of completion date only.

NEW—Crosley Broadcasting Corp., areas of Cincinnati, Dayton and Columbus, Ohio (P. O. 9th & Elm Sts., Crosley Square, Cincinnati, Ohio)—Construction permit for a new experimental television relay broadcast station to be operated on frequencies to be assigned by the Commission's chief engineer in 6500-7000 mc. band, power of .1 watt, emission A5—special for frequency modulation, and hours of operation unlimited, in accordance with Sections 4.131(b) and 4.163.

NEW—Havens & Martin, Inc., Richmond, Va. (P. O. 3301 W. Broad St., P. O. Box 5229)—Construction permit for a new experimental television relay broadcast station to be operated on 7000-7025 mc., or as may be assigned, power of .1 watt, emission—special for FM, and unlimited hours of operation.

NEW—National Broadcasting Co., Inc., area of Washington, D. C.—License to cover construction permit (BPVB-202, which authorized a new experimental television relay broadcast station).

NEW—The Evening Star Broadcasting Co., area of Washington, D. C.—License to cover construction permit (BPVB-204) for new experimental television relay broadcast station.

MISCELLANEOUS BROADCAST

Actions

Remote Pickup

Billy Averitte Laurie, Portable, area of Jacksonville, Tex. —Granted CP for a new remote pickup station. (BPRY-344)

WAGE, Inc., Portable, area of Syracuse, N. Y.—Granted CP for a new remote pickup station. (BPRY-343)

WBCZ—WHEB, Inc., Portable-Mobile, area of Portsmouth, N. H.—Granted CP to install new transmitter. (BPRE-500)

KFAB Broadcasting Co., Portable-Mobile, area of Omaha— Granted CP for a new remote pickup station. (BPRY-342)

(Continued on next page)

WIHU—The Ludington Broadcasting Co., Portable, area of Muskegon, Mich.—Granted modification of CP for extension of commencement and completion dates to 6-11-47 and 12-11-47, respectively. (BMPRY-34)

WOGR—Ashbacker Radio Corp., Portable, area of Muskegon—Granted modification of CP for extension of completion date to 12-11-47. (BMPRY-33)

KAQW—Central States Broadcasting Co., Omaha, Neb.—Authorized cancellation of remote pickup broadcast station license expiring 11-1-48. (BRRY-247)

Applications

Remote Pickup

NEW—Western Waves, Inc., area of Seattle, Wash. (P. O. 1411 Fourth Ave. Bldg., #1510)—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150 and 2790 kc., power of 20 watts, and emission A3, hours of operation in accordance with Section 4.403.

WEGM—Bamberger Broadcasting Service, Inc., New York, N. Y.—Modification of license to substitute a frequency in the 25-28 mc. band for present assignment of 37.34 mc., to be used with power of 50 watts for orders only; other frequencies 31.62, 35.26, 39.62 mc. to remain the same.

NEW—Eugene P. O'Fallon, Inc., area of Denver, Colo. (P. O. Albany Hotel)—Construction permit for a new remote pickup broadcast station to be operated on frequencies to be assigned in 24-30 mc. band, power of 2 watts, emission A3 (FM), and hours of operation in accordance with Section 4.403.

Noncommercial Educational

KCRW—Santa Monica School Board, Santa Monica, Calif.—Modification of construction permit (B5-PED-66, as modified) which authorized new non-commercial educational broadcast station, to change type of transmitter and make changes in antenna system.

WLSU—Board of Supervisors of the Louisiana State University and Agricultural and Mechanical College, Baton Rouge, La.—Modification of construction permit (B3-PED-53, which authorized a new noncommercial educational broadcast station) to specify frequency as Ch. #219, 91.7 mc., power as 205,000 watts; to change transmitter location, change type of transmitter, and make changes in antenna system. Amended to make changes in antenna system.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Paradise Seed Co., etc.—Misrepresentation in connection with the sale of garden and flower seeds is charged in a complaint issued by the Commission against William A. Frew, trading as Paradise Seed Co., Lancaster County Seed Co., National Investigators and W. Andrew, Paradise, Pa., and Kinzers, Pa. (5499)

NAB Opposes Bill Which Would Permit Artists to Copyright Individual Records

NAB argued against proposed legislation which would permit artists to copyright their individual recordings, when Don Petty, general counsel, testified before the Subcommittee on Patents, Trademarks and Copyrights of the House Judiciary Committee last Monday (9). In his statement, Mr. Petty pointed out that the artists are compensated through contractual arrangements and argued that the bill "is obviously an entirely new concept and a radical departure from copyright principles." Under its reasoning, he said, copyright might just as well be given to highly skilled engineers and other technicians who make recordings.

In his statement, Mr. Petty said:

"The copyright law, unlike the patent law, is designed primarily to prevent the copying of literary and artistic works and not to prevent their use. It was never intended to give a monopoly in ideas. The true definition of *copyright* is the sole right of multiplying copies. The traditional distinction between a patent and a copyright is that the former gives an exclusive right to use while the latter gives an exclusive right to copy. The only exception to this principle is found in Section 1 (e) of the Copyright Act giving the copyright owner of a dramatic work, musical composition, lecture, etc., the exclusive right to reproduce his work by performance.

"This measure attempts to extend this right of performance. The copyright law does not protect the tangible means, such as the ink or the paper or the wax employed to express intellectual creations. Therefore, the playing of an acoustic record cannot under the law or in logic be

NAB Names Representatives, Requests Time To Testify in Hearings on White Bill

The NAB on Friday (13) asked Senator Wallace H. White, chairman of the Senate Committee on Interstate and Foreign Commerce, to allocate time during hearings on the White Bill (S. 1333) for appearances by six members of the NAB staff and six broadcasters who are members of the Association. Hearings on this bill, which would amend the Communications Act of 1934, are scheduled to begin next Tuesday, June 17th.

The NAB staff delegation will be headed by President Justin Miller. With him will be Executive Vice President A. D. Willard, Jr., Don Petty, general counsel; Robert K. Richards, director of public relations; Frank E. Pellegrin, director of broadcast advertising; and Harold Fair, director of the Program Department.

The broadcasters who have signified to NAB their desire to be heard are Campbell Arnoux, president of WTAR, Norfolk, Va.; Harry Bannister, general manager, WWJ, De-

J. Hale Steinman, Pennsylvania publisher and broadcaster, who is chairman of the ANPA Federal Laws Committee. A. D. Willard, Jr., executive vice president of NAB, will participate in the conference.

Also invited are Donald Nelson, president of the Society of Independent Motion Picture Producers; and J. Leonard Reinsch, managing director, WSB, Atlanta, and special radio adviser to the President.

NAB Opposes Bill Which Would Permit Artists to Copyright Individual Records

(Continued from page 479)

an infringement of copyright unless the performance embodied on that record is an infringement. But since the performance on the record is authorized, it cannot be said that the use of that performance is the very way it was intended to be used—in the playing of the record—can be an infringement of copyright."

Mr. Petty went on to say: ". . . since the Supreme Court has held that the making of an acoustic record is not copying, obviously the playing of that record is not copying."

Effect of Proposed Bill

Continuing his statement, Mr. Petty pointed out:

"The only real accomplishment of H. R. 1270 would be the grant of copyright in the *execution* or *rendition* of literary or artistic works and in the physical substances—the paper or wax—on which such executions or renditions are placed. This is obviously an entirely new concept and a radical departure from copyright principles. It has never been thought that the execution or rendition or performance of a musical composition or a dramatic work, whether skilled or unskilled, whether artistic or inartistic, could be the subject of property. Concededly, an ability to execute, render or perform such works skillfully and artistically is a thing of value to its possessor. It is valuable as an ability or skill, such as an attractive voice, competent hands or a strong back. Should the skilled performer have a property right that the skilled mechanic does not have? It is not necessary to distort the principles of the law of property to protect skills. Protection of the ability or faculty is readily achieved by the fact that only its possessor can make it available, and *he makes it available on such terms and conditions as he sees fit.*

Performers Have Contracts

"As a practical matter, skilled and artistic performers of music have been and are now well paid for the use of their talents. Almost without exception all of them make records. With some 42 major record manufacturing companies competing for their ability, for their labor, and for the value of their reputations, they now receive a large fee and in addition, as much as 10% of the sales price of each record for each record sold. With an estimated 400,000,000 records to be produced and sold in 1947, retailing at from 50¢ to $1 per record, it is obvious that performers will receive a large sum from royalties alone. Except in isolated cases, artists and performers recognize that their popularity and financial success is due in no small measure to the broadcasting of their records by radio stations. To maintain and increase their popularity and to stimulate the sale of their records, they send complimentary records to radio stations with specific requests that they be played often; they seek the goodwill of disc jockeys at radio stations by soliciting and making uncompensated personal appearances. In short, radio stations offer the best method of plugging the sale of music and records."

Citing the renewed sales of Ted Weems' recording of "Heartaches," Mr. Petty explained that its regained popularity was attributed to the playing of the record by a disc jockey some ten years after its first short span of popularity. The orchestra leader, the NAB general counsel continued, received a royalty of the records sold originally and is now receiving a continuation of the royalty.

"It is conceded," Mr. Petty declared, "that there would not now be any sale and that the record would have been completely forgotten if a single disc jockey had not played it on the radio one morning. Has the treatment of this record by radio been unfair to the performer?" he questioned.

In summarizing his argument, Mr. Petty said that

the proposed bill "is ambiguous and impractical; it violates the basic principles of the copyright law; it is unconstitutional; performers now control their compensation, as do other skilled persons, by contract; and the proposed legislation violates the Congressional policy which seeks to prevent monopoly."

Engineering Department

Plans for Co-axial Cable Outlined Last Week at Informal Conference

The FCC, in response to Public Notice 7762, heard industry representatives, at an informal Engineering Conference on Tuesday (10), outline their proposed plans of the inter-connection of television stations. Most extensive proposal of common carriers was that of the Bell Telephone System which predicted that by 1951 the principal cities of the United States would be connected by co-axial cables. These circuits are primarily for normal telephone usage but are capable of handling TV channels.

Mr. George Gilman testified that the company had laid 2700 miles of co-axial by October last year and by June of this year, 4000 miles; co-axial cable will be laid hereafter at the rate of 3000 miles per year until, by 1949, 11,000 miles will have been completed. He further pointed out that they are now testing the New York-to-Boston radio links and, in addition, would complete the New York-to-Chicago links by 1949. These circuits would include not only facilities for TV transmission but communication testing and monitoring apparatus also. The Bell System will further connect New York, Washington, Baltimore and Philadelphia this fall in time for football season. Under their plans Richmond, Providence, Albany and Schenectady would be connected in the fall of 1948 by co-axial line. Boston would not be connected by co-axial until 1949; the New York-Chicago circuit will be completed by the end of 1948.

The Bell System submitted a map of their proposed and existing co-axial cables and radio relay routes which, along with proposed Western Union Relay Systems is reproduced herewith.

Network Plans

Three networks, NBC, CBS and ABC, announced that it was their intention to employ common carrier for the dissemination of their television programs. Bell System was subjected to considerable cross-examination in connection with their recently filed rates for TV use of their facilities. Bell System representatives pointed out that their test in conjunction with Western Electric has shown, with present equipment, they can now transmit television pictures for 1000 miles, and, with perfected improvements, they see no ultimate limit to the length of the transmission band. Their radio links will operate, using a newly developed shielded lens antenna, in the band 3700-4200 Mc. and with only 40 Mc. differential between channels at the repeater points. These repeater points will contain many automatic devices to assure uninterrupted service. Bell System felt that these radio circuits would be able to pass a 7.0 Mc. or even wider TV channel. They intend to install 35 repeater stations between New York and Chicago on their radio link. The Boston circuit currently employs seven repeaters.

Western Union Licensed

Western Union announced that they had been granted a patent license from RCA and that they intended to establish radio frequency relays nationally, placing their operating in the 6000 Mc. band. In their testimony they stated that they would enter into commercial contracts with television broadcast stations for services over their network. However, they objected to TV operators using radio relay links unless Western Union was permitted to do likewise.

Dr. T. T. Goldsmith, Jr., of DuMont, estimated that they could operate intercity relays at a cost of $5.00 per month per service mile.

INTERNATIONAL HF CONFERENCE

The date for the opening of the High Frequency (International) Broadcasting Conference was set at Atlantic City last week for August 15.

FCC Limits 30 Kc. Separation Approval to Stations Where Service Does not Overlap

The long-awaited decision of the Commission in regard to 30 Kc. separation for Standard Broadcast stations was handed down Tuesday (10), when the Standards of Good Engineering Practice were amended, permitting 30 Kc. separation (Public Notice 9188) under circumstances where the 25.0 MV/M contours of the stations do not overlap.

The door was not closed, however, to further acceptance of 30 Kc. separation in the future, if sufficient positive evidence is gathered to warrant re-opening the matter. On this subject the Commission said in its report:

"The Commission intends to continue such studies. The special studies undertaken for the purpose of this hearing upon which testimony was adduced were concerned only with the problems of non-selectivity of receivers and of external cross-modulation. Neither of the two studies were conducted for sufficient length of time or over a sufficient portion of the standard broadcast band to permit conclusions to be drawn with complete confidence. In addition the Commission is of the opinion that a study should be undertaken of the many new types of radio receivers on the market since the end of hostilities in 1945 so that the Commission will be informed as to the characteristics of these receivers. In the meantime the Commission believes that relaxation of the standards should not be undertaken in the absence of a showing that radio service will not be deteriorated thereby. On the basis of the evidence adduced at the hearing the Commission is of the opinion that there is no warrant for relaxing the standards beyond the point set forth in the proposed rules. Otherwise, the danger exists that severe deter-

(Continued on next page)

ioration of service may result to many listeners. The Commission intends to continue its studies in the matter and will reopen the matter for further consideration when new data have been collected."

The Commission's order, effective July 17, 1947, states:

"Under the table headed 'Interference Ratios,' which follows Table IV in Section 1, Engineering Standards of Allocation, of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations, insert:

> 'From the above, it is apparent that in many cases stations operating on channels 10 and 20 kilocycles apart may be operated with antenna systems side by side or otherwise in proximity without any indications of interference if the interference is defined only in terms of permissible ratios hereinbefore listed in the Table headed Interference Ratios. As a practical matter, serious interference problems may arise when two or more stations with the same general service area are operated on channels 10, 20 and 30 kilocycles apart.
>
> 'Accordingly, no station will be licensed for operation with less than 40 kilocycles separation from another station, if the area enclosed by the 25 mv/m groundwave contours of the two stations overlap. Frequency separation of 20 kilocycles and 10 kilocycles are considered inappropriate for stations with the same general urban coverage and therefore no station will be licensed for operation with less than 30 kilocycles frequency separation if the area enclosed by the 25 mv/m groundwave contour of either one overlaps the area enclosed by the 2 mv/m groundwave contour of the other.' "

Engineer Suggests Investigation of IRAC During TV Interference Conference

When the two-day FCC-Industry Television Interference Engineering Conference was held last week (10-11), Raymond F. Guy, NBC engineer acting for the TBA Engineering Committee, asked for a breakdown of non-military government usage in the 150-250 Mc. section of allocations, suggesting that perhaps Congress should investigate the activities of IRAC (Interdepartmental [Government] Radio Advisory Committee), and the use being made of these and other frequencies.

Mr. Guy offered the suggestion after trying to obtain detailed data on the governmental usage, pointing out that while industry was required to submit detailed and elaborate information as to utilization of channels, to which he had no objection and deemed proper procedure, the IRAC condoned "block booking" of large chunks of frequencies. Not only this, Mr. Guy said, but in effect there apparently exists no way of determining what use is being made of these valuable channels.

Summary by FCC

Opening the conference, George Sterling, FCC chief engineer, summarized the problem of interference to TV stations. Mr. Sterling stated that it did not now seem practical for other services to share television channels unless such sharing was for emergency services only and then solely in remote areas. He then explained how the 14 and 28 Mc. bands of the amateurs had been causing harmonic and shock interference to television stations, principally centering on Channel 2 (54-60 Mc.).

Mr. Sterling went on to explain that other interference to television stations was developing (diathermy, industrial heating, police, etc.). The Commission, he said, has been conducting tests in both New York and Washington to determine the gravity of the situation and from results so far has found this interference to constitute a serious problem.

In addition, the FCC had analyzed the frequencies above 30 Mc. and found other services made little use of the TV channels. TV interference to other services, the Commission pointed out, was not objectionable. The employment by TV of horizontal polarization, with other services using vertical polarization, had not, however, contributed to the reduction of interference to TV. Likewise, they discovered that the amateurs operating in the 50-54 Mc. band, which is located between TV Channels 1 and 2, had caused about 50 per cent of the complaints registered and that marker beacons adjacent to Channel 5 had caused minor localized objections.

An unexpected development was DuMont's proposal for 10 new television broadcast channels. Dr. Thomas T. Goldsmith, Jr., requested that the 10 new channels should "fall between 108 and 174 Mc. filling the gap between the lower and upper groups of television channels now assigned." Dr. Goldsmith suggested that they "be made available gradually to television within two years, as vacated by other services." Amateurs would retain a small band in the spectrum, making a grand total of 23 channels that would be assignable to commercial television.

Dr. Goldsmith's proposal was preceded by TBA's counsel, Thad Brown, who requested that the Commission "investigate the possibility of obtaining additional frequencies for commercial television broadcasting between the presently assigned Channels #6 and #7 (88 to 174 Mc.), particularly from the standpoint of providing a wider basis for the creation of nationwide competitive television networks."

The hearings concluded with the presentation of various technical information as to interference ratios on both adjacent and co-channel by other users of high frequency space.

FM Department

Withholding of FM Channels Ends Automatically Effective July 1

The FCC announced on Friday (13) the automatic termination of its FM channel reservation policy effective July 1, 1947, and stated that it would consider and act on applications for the "frozen" channels as promptly as possible after the termination date.

At the same time, the Commission announced a waiver of its rules "with respect to any applicant for Class B FM facilities whose application has been de-

(Continued on next page)

nied, or may hereafter be denied, in a comparative hearing (where the applicant was not found to be disqualified), to permit the applicant to file an application for any reserve Class B FM channel prior to the expiration of one year from the effective date of the Commission's order or decision denying his prior application."

With respect to the termination of the freeze, Commissioner Durr took the position that steps should be taken looking towards further extention of the reservation of FM channels.

FCC Adopts FM Rules, Standards and Allocation Plan Proposed in April

The amendments to the rules and engineering standards concerning FM broadcasting announced by the FCC in April were adopted last week, according to a Commission announcement on Friday (13). At the same time, the agency adopted the tentative allocation plan announced in April.

The FM rules and standards and the allocation plan were published in the *NAB Information Bulletin* No. 3 dated April 14.

The Commission stated that with one exception, the rules and standards are identical with the proposals made in April. Following is the exception as announced by the FCC:

"The change modifies Section 4 by adding the provision at the beginning of the paragraph which follows Table II to provide that pending the determination by the Commission of interference ratios for 400 kc and 600 kc channel separation "stations normally will not be authorized to operate in the same city or in nearby cities with a frequency separation of less than 800 kc, provided that stations may be authorized to operate in nearby cities with a frequency separation of not less than 400 kc where necessary in order to provide an equitable and efficient distribution of facilities, and provided further that Class B stations will not be authorized in the same metropolitan district with a frequency separation of less than 800 kc." The change also explains that the Commission is studying various types of present FM receivers to provide data for determining such interference ratios.

"The revised tentative allocation plan is the same as that proposed on April 10, 1947, except that a relatively few changes in the particular channels allocated to certain cities or areas have been made to provide a better use of the frequencies in those cities and areas. No change has been made in the total number of Class B channels allocated to any city or area."

The changes in channel assignments affect the following cities:

California
- Fresno
- Los Angeles
- Salinas
- San Diego
- Santa Barbara
- Stockton

Connecticut
- Hartford
- New Britain

Florida
- Fort Lauderdale
- Orlando
- Palm Beach

Georgia
- Savannah

Illinois
- Aurora
- Carthage
- Chicago
- Waukegan
- Galesburg

Indiana
- Hammond
- Evansville

Iowa
- Burlington

Kentucky
- Bowling Green

Masschusetts
- Fall River
- North Adams

Michigan
- Ann Arbor

Minnesota
- Albert Lea

Nebraska
- Grand Island
- Hastings
- Norfolk

West Virginia
- Berkley
- Charleston

The Commission's announcement also stated:

"Outstanding construction permits and licenses will not be reissued at this time to specify the changed frequency assignments, but instead these changes will be included in succeeding instruments of authorization. In order to minimize the possibility of interference during the transition period, stations which will change frequency must request Commission approval prior to beginning operation on the new frequency. In some metropolitan areas it may be necessary to set a date on which all stations in the areas will be required to change simultaneously to the new frequency assignments. The Commission will assist in resolving any conflicts which may arise in particular areas. It appears, however, that conflicts will be few and that stations now operating may for the most part schedule the change in frequency to meet their particular requirements. It is expected that all changes will have taken place by October 1, 1947."

Program Department

Local Station Contributes Rounded Plan In Industry Drive Against Delinquency

Keen interest in the broadcasting industry's campaign against juvenile delinquency is being evidenced by the reports sent to NAB headquarters from the numerous stations which are attacking the problem in their respective communities.

Last week, a rough preview was published in REPORTS (p. 460), providing a sample of the type of information which will be available to stations through the forthcoming check-list of ideas and programs inaugurated by stations in various sections of the country.

The many outstanding plans originated by radio stations indicate a valuable contribution from the industry in combating the intensity of the problem. The plan adopted by Station KRKO, Everett, Washington, and submitted to the NAB Program Department, is another example of the ingenuity being displayed by local stations to meet community needs.

The overall idea utilizes the station's programming, local movies, theatrical productions and club activities,

(Continued on next page)

in bringing the campaign into the home to influence both parents and children. The campaign is rounding out by encouraging and stimulating community groups to cooperate in providing interesting activities for the community's youth.

Sponsoring the campaign, in addition to the station, are two groups—the Everett Optimist Club and the Everett Dutch Uncles.

Planning

In the early stages of the campaign, local theatre management and radio station executives cooperated in formulating plans for youth activity. The station appealed to the parents and adults with appropriate news stories explaining what was being done in fighting juvenile delinquency. The theatre arranged for a series of pictures, approved by the Parent-Teachers organization.

The next step was to provide an outlet for children with talent by enlisting the aid of a local dance teacher and a singing teacher to work both with large groups and to develop individuals.

To appeal to the youngsters' appetites for prizes and gifts, a local sponsor was interested in the program and prizes such as roller skates, bicycles, tickets to leading attractions, etc., were made available.

Responsibility

To appeal to the youngsters' desire for recognition, the cooperation of the Sheriff's Office was obtained in forming a County Deputy Sheriffs' League. Qualifications for the League were made high.

The full facilities of the Sheriff's Office was turned over to the station to teach the boys crime prevention, patrol car operation, proper use of firearms and criminal identification.

Other Interesting Activities

Arrangements were made by the station to provide trips to sea in cooperation with the Naval Reserve. Another wholesome activity includes Saturday night trips, in cooperation with the Seattle Rainiers baseball team, to see their ball games. Transportation is provided through the School Board, which approved use of school buses to carry some 300 boys to the nearby city.

Beach parties, fishing trips, overnight bivouacs have been planned and dates set for the activities.

A baseball league has been formed in the community and uniforms ordered for the teams. A full roster of sports activities is on the planning table. Individual groups of boys are formed and supervised by Optimist Seniors.

As a guide to all activities, a newspaper is in the process of being edited and a series of radio programs is planned.

Financing

Since such a rounded schedule of activities requires financing, the KRKO program director offered to keep the treasury supplied.

> *No dues . . . no assessments . . . no asking for funds from the boys or local merchants were firm stipulations made by the radio station.*

The entire entertainment staff of KRKO, and other entertainers under the direction of the station program director, offered to play show dates in the area to raise funds for the youth plan activities. The station estimates that by Christmas about $10,000 will have been raised.

Broadcast Advertising

Merchants' Forum Hears Henry Ford II, Clyde Bedell and Lee Hart

Two hundred merchants of Dearborn, Mich., met in the Dearborn Inn Tuesday (10) to attend the Merchants' Forum as guests of WKMH. The theme behind the Forum was, "Let's Get in Business Again."

Fred Knorr, station manager, and Walter Patterson, sales manager, organized the meeting as a "get together" for local merchants. The objective was to create renewed interest and inspiration in the business of the community.

Clyde Bedell, advertising-merchandising consultant, spoke on "The Seven Keys to Retail Profits." Henry Ford II was the luncheon speaker and gave a talk on business trends. Miss Lee Hart, NAB assistant director of Broadcast Advertising, spoke on "Radio for Retailers" and also held a post-Forum round-table discussion on retail advertising with the WKMH station staff.

The meeting not only served its purpose of focusing the merchants' outlook on the constructive steps which they must take in a competitive market, but initiated talk about regular meetings of a similar nature. WKMH officials indicated their interest in working with other local groups to plan organized meetings of a similar nature for the local merchants.

"Radio Advertising" Is Subject of Talk by Brown at AFA Meeting

The Fourth District Advertising Federation of America Convention has been scheduled for June 27-29 at the Macfadden Deauville Hotel, Miami Beach, Florida. The agenda includes speakers representing NAB, American Newspaper Publishers Association, Outdoor Advertising, Inc., and Direct Mail Advertising Association.

The NAB representative will be J. Allen Brown, assistant director of broadcast advertising, who will speak on "Radio Advertising."

Brown will conduct a "Station Operations Forum" at the meeting of North Carolina Broadcasters Association, Morehead City, N. C., June 23-24.

Research Department

STATION ANALYSES

The following tables present the status of all AM, commercial FM and commercial television stations by month through May 31, 1947. These analyses are kept up-to-date as of the beginning of each month and are published once a month in REPORTS.

Women Broadcasters

Frances Farmer Wilder Elected to Head AWB for Two-year Term

Frances Farmer Wilder, CBS, was elected to the presidency of the AWB by the women broadcasters of America in the organization's recent election. She will serve a two-year term from June 1 this year until June 1, 1949.

Other officers elected to serve are: Ruth Crane, WMAL, 1st vice president; Eleanor Hanson, WHK, 3rd vice president; Ann Holden, KGO, 4th vice president; Nell Daugherty, WSTC, secretary; and Norma Richards, WSPD, treasurer. Dorothy Lewis, NAB's coordinator of listener activity, serves the organization as permanent vice president and liaison with Association headquarters.

Books for Broadcasters

RADIO ANNOUNCING, by Art Gilmore and Glenn Y. Middleton. Hollywood, Hollywood Radio Publishers, c1946. 118 p. illus. $2.00.

This breezy, yet practical, book is a welcome addition to the radio shelf where there is practically no literature about announcing. The authors write from experience and intersperse the text with brief biographies of well-known announcers such as Don Wilson and Ken Carpenter.

The would-be announcer is given advice on such topics as good speech, microphone technique, and timing and pacing. There is a chapter on radio terms with pictures of the director's sign language. Exercises for practice are given with each topic. The University of Southern California, Radio Department, has selected this book as the text for the basic course in Radio Announcing.

MASS PERSUASION: The Social Psychology of a War Bond Drive, by Robert K. Merton. New York, Harper and Brothers, c1946. 210 p. $2.50.

This is a detailed study of Kate Smith's third great bond drive in September of 1943 when she broadcast continuously for eighteen hours her appeals to buy bonds. The book contains a careful analysis of the Smith radio broadcasts and a study of Kate Smith's personality which was a big factor in putting the drive over. It also offers information based on long inter-

[2] FCC states that 216 FM stations are now on the air. They include CG, CP and licensed stations. There are 11 TV operating.

* KGKO, Fort Worth, Texas, deleted.

** Includes stations licensed to operate, CP's and CG's.

*** Stations which have been granted construction permits or conditional grants during the preceding month.

CP—Construction permit.

CG—Conditional Grant.

views with 100 New York men and women who heard the broadcast, showing their reactions to this radio appeal.

A serious attempt to find out how mass persuasion works, this book is not simple reading for the layman. It is, however, of great interest to those connected with such a powerful instrument of persuasion as radio.

Public Interest Programming

Radio Saves Strawberry Crop During Southern Illinois Emergency

When the heavy rains came to Southern Illinois early last week, an emergency arose among strawberry growers. It became necessary that the strawberries be picked immediately to avoid complete loss of an important money crop.

Once again radio stepped in with all the speed and power which it has shown repeatedly at such times. Paul F. McRoy, manager of WCIL in Carbondale, was roused from bed early Sunday morning and told of the situation. Emergency bulletins were scheduled immediately; pickers appeared in numbers and the crop was saved.

L. F. Aldrich, area supervisor, College of Agriculture, University of Illinois, wrote WCIL: "We wish to take this means of thanking you. . . . One grower had 19 people come to his patch prepared to pick. We will never know the exact number of people who answered the appeal, but we do know that sufficient workers came to the fields to save the crops from being a loss."

Enlisted Veterans Must File for Terminal Leave Pay by Aug. 31

(Story from office of Government Reports)

Approximately 1,854,000 enlisted veterans of World War II have not yet filed claims for settlements of unused leave under the Armed Forces Leave Act of 1946. This includes both men and women veterans. There are still eligible around 114,000 members of the Coast Guard; 240,000 Marine Corps; 500,000 Navy, and 1,000,000 Army. All applications must be in by August 31, 1947. Eligible veterans may get a terminal leave slip at post offices. This form must be mailed to the proper paying office along with a photostat of discharge certificate. Full information can be obtained on the back of this form. *Important:* Forms for all services are available at post offices and must be filed at the proper paying offices by August 31, 1947. *Enlisted* veterans of all services are eligible.

Through the cooperation of the Army, Navy, Coast Guard and Marine Corps, announcements are being prepared and will be mailed directly to all station managers. Frequent use of these announcements before August 1 will be appreciated.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of June 23-29, 1947 by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

United Nations Charter—Salute Its Second Anniversary

"WE THE PEOPLES OF THE UNITED NATIONS DETERMINED to save succeeding generations from the scourge of war, which twice in our lifetime has brought untold sorrow to mankind . . ." Opening with these grave words, the United Nations Charter was signed at San Francisco on June 26, 1945, by 50 nations. (Five more nations have since signed.) It was ratified the following month by the United States Senate. The occasion of the second anniversary of the United Nations Charter provides *an excellent opportunity to call attention to this vital document and what it means to Americans and the peoples of the world.* Our government and our war Allies had recognized that no one nation acting alone could insure against the outbreak of war in some remote part of the globe; and experience had shown that war, once started, tended to spread until it penetrated everywhere. To preserve peace, an organization on a world-wide scale was necessary in order to attempt to solve through cooperation those problems that might lead to war. 1. Salute the second anniversary of the United Nations Charter. Recall that this document was signed at San Francisco two years ago by 50 nations (55 adhere to it today) and overwhelmingly ratified by the United States Senate. Compare the United Nations Charter with such other historical documents as The Magna Carta, The Declaration of the Rights of Man, The Constitution of the United States, in that it states the determination of the peoples of the world to avoid chaos and live in an order of harmony and law. 2. Indicate the primary purpose of the United Nations as a world organization working towards peace, and stress the vital significance to every individual American of the success of this effort. The maintenance of peace may lie in what the United Nations can accomplish. 3. Point out that the principles embodied in the United Nations Charter—peace, human rights, justice, progress, international cooperation—provide the foundation on which the work of building world peace is being conducted. Whatever the issues before the United Nations, the Charter establishes the principles and ideals which guide in their solution. 4. Urge every American to familiarize himself with the United Nations and its Charter, and to know and respect its efforts toward world peace. (Fact Sheet No. 38)

Help Veterans Beat the Housing Shortage

Well over 2,000,000 newly discharged veterans, whose lives as civilians were interrupted by service in the Armed Forces, are now looking for places to live. Returning war veterans have been hardest hit by the present severe shortage in houses and apartments. The veteran, who by going into the service gave up his house or apartment, or missed the chance to get one during the war years, needs and deserves all possible help in obtaining a home now for himself and his family. Voluntary steps taken by individuals and local communities since the Council advertising campaign began indicates that wide public awareness of the veterans' urgent need for homes, and what private citizens can do about it, can help alleviate the problem of housing our war heroes until an adequate number of new buildings has been completed. Living space, permanent and temporary, has been found for hundreds of thousands of vet-

(Continued on next page)

erans and their families in existing buildings. A great deal of discomfort and actual hardship has been averted through action stimulated by increased consciousness of the housing problem. The need for homes is tremendous. The shortage has been accumulating for years. It takes time for emergency measures to pay off. Urge listeners to help take care of the veteran in the existing housing supply, until enough new homes are ready, by (1) sharing their homes; (2) creating additional living quarters for veterans by remodeling; (3) listing vacancies and houses for sale at their local Veterans Housing Center, so that veterans can get first chance at them; (4) not discriminating against veterans with children. (Fact Sheet No. 4-I)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 16. They are subject to change.

Tuesday, June 17

Further Hearing

(10:00 A. M.)

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—C. P. to include power, etc. **1190 kc.,** 50 KW. Unlimited. DA-Night.

WLIB—WLIB, Inc., Brooklyn, N. Y.—C. P. to include power, etc. **1190 kc.,** DA. 10 KW day, 5 KW night. Unlimited.

Wednesday, June 18

Further Hearing

(10:00 A. M.)

NEW—Wired Music, Inc., Rockford, Ill.—C. P. **1400 kc.,** 250 watts. Unlimited.

NEW—Beloit Broadcasters, Inc., Beloit, Wisc.—C. P. **1380 kc.,** 500 watts. Daytime.

Respondent: WRJN, Racine Broadcasting Corp., Racine, Wisconsin.

Thursday, June 19

Further Hearing

(10:00 A. M.)

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—C. P. to increase power, etc. **1190 kc.,** 50 KW, unlimited; DA-Night.

WLIB—WLIB, Inc., Brooklyn, N. Y.—C. P. to increase power, etc. **1190 kc.,** DA, 10 KW day, 5 KW, night, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

610 KC.

The Commission announced its **Final Decision** (B-334) granting the application of **W. Albert Lee** for new station in **Houston, Texas,** to operate on 610 kc., 5 KW, DA night (BP-4628; Docket 7566), conditions; and a denial of the application of **KTHN, Inc.** (BP-4359; Docket 7565), seeking the same facilities. Commissioner Jett dissented as in the Proposed Decision.

1060 KC.

The Commission announced its **Proposed Decision** (B-371) looking toward the denial of the applications, in their present form, of James A. Noe to change operating assignment of **Station WNOE, New Orleans, La.,** from 1450 kc., 250 watts, unlimited time, to 1060 kc., 50 KW power daytime, 25 KW nighttime, DA night (Docket 6346; BP-3446), and of **Deep South Broadcasting Corp.** for new station in **New Orleans** to operate on 1060 kc., 50 KW day, 10 KW night, DA day and night. (Docket 7117; BP-3687)

1400 KC.

The Commission announced adoption of its **Decision** (B-344) granting the application of Robin Weaver, tr/as **Grenada Broadcasting Co.** for a new station in **Grenada, Miss.,** to operate on 1400 kc., 250 watts, unlimited time (BP-4768; Docket 7577); conditions. At the same time the Commission denied the application of **Birney Imes, Jr.,** seeking the same facilities.

1490 KC.

The Commission announced its **Proposed Decision** (B-361) looking toward the grant of the applications of Clarence E. Faulk, Jr., d/b as **Ruston Broadcasting Co.** (BP-5263; Docket 7889) and **Hope Broadcasting Co.** (BP-5353; Docket 7921) for new stations to operate on 1490 kc., 250 watts, unlimited time, at **Ruston, La., and Hope, Ark.,** respectively. At the same time the Commission proposes to deny application of **Magnolia Broadcasting Co.** (BP-5088; Docket 7797) for new station at **Magnolia, Ark.,** seeking same facilities. The Commission pointed out, however, that "in view of the fact that Magnolia, Ark., has no local radio station and no primary service, the Commission has studied the availability of another facility for that city. We have not been able to find a full time frequency, but have concluded that daytime operation will be feasible on 630 kc., with 1 KW power, and accordingly will entertain an application for these facilities from Magnolia."

AM—New CP's Granted

730 KC.

Goodland Broadcasting Co., Goodland, Kans.—Granted CP for a new station to operate on 730 kc., 1 KW, daytime only; engineering conditions. (BP-5797)

920 KC.

Texas City Broadcasting Service, Texas City, Tex.—Granted CP for a new station to operate on 920 kc., 1 KW, daytime only, engineering conditions. (BP-5860)

960 KC.

Abbeville Broadcasting Service, Inc., Abbeville, La.—Granted CP for a new station to operate on 960 kc., 1 KW, daytime only; engineering conditions. (BP-5674)

970 KC.

Gordon H. Brozek, Marquette, Mich.—Granted CP for a new station to operate on 970 kc., 1 KW, daytime only; engineering conditions. (BP-5430)

1010 KC.

Top of Texas Broadcasting Co., Amarillo, Tex.—Granted CP for a new station to operate on 1010 kc., 1 KW, daytime only; engineering conditions. (BP-5789)

1230 KC.

Yaquina Radio, Inc., Newport, Ore.—Granted CP for a new station to operate on 1230 kc., 250 watts, unlimited time; engineering conditions. (BP-5756)

(Continued on next page)

1240 KC.

Stuttgart Broadcasting Corp., Stuttgart, Ark.—Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time; engineering conditions. (BP-5842)

Taylor-Jacobsen, Montpelier, Vt.—Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time; engineering conditions. (BP-5739)

1320 KC.

Black Hawk Broadcasting Co., Waterloo, Ia.—Granted CP for a new station to operate on 1320 kc., 1 KW, daytime only; engineering conditions. (BP-5809)

1400 KC.

Demopolis Broadcasting Co., Demopolis, Ala.—Granted CP for a new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (BP-5881)

1410 KC.

Music Broadcasting Co., Grand Rapids, Mich.—Granted CP for a new station to operate on 1410 kc., 1 KW, daytime only; engineering conditions. (BP-5804)

1450 KC.

North Missouri Broadcasting Co., Kirksville, Mo.—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (CP-5780)

Sky-Park Broadcasting Corp., Front Royal, Va.—Granted CP for a new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (BP-5849)

1490 KC.

Deland Broadcasting Co., DeLand, Fla.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time; engineering conditions, and provided 1490 kc., is vacated by WTMC which has a CP to move to 1290 kc. (BP-5903)

1540 KC.

FREQUENCY MODULATION

FM—New York Docket Cases

The Commission announced its **Memorandum Opinion** granting the motion of the **News Syndicate Co., Inc.**, to strike from the record in the New York FM cases (B-348) the evidence adduced in these proceedings by the **American Jewish Congress** relating to the content and policies of the New York Daily News and the New York Sunday News. The Commission stated that "the evidence referred to does not have probative value for the purpose of determining the issues of the case. The motion of the News Syndicate Company, Inc., to strike the same has been granted in order that the record may be clear that it has not entered into our decision upon the merits of the applications considered in this proceeding." Commissioner Jett concurred in the result.

Commissioner Durr dissented in a separate opinion, feeling that "the evidence offered by the American Jewish Congress is relevant, competent, material, and has probative value, and the motion of News Syndicate Company, Inc., to strike it from the record should be denied."

The Commission also announced its **Memorandum Opinion and Order** denying petitions of **Metropolitan Broadcasting Service, Frequency Broadcasting Corp.**, and **Radio Projects, Inc.**, requesting the Commission to defer action until after July 1, 1947, in the matter of its decision proposing to deny the application of each petitioner for a Class B FM station in the New York-Northeastern New Jersey Area, and petition of **WLIB, Inc.**, seeking to have the Commission withhold final action on the proposal to deny its FM application until after final action is taken on its pending application for increased AM facilities, or, in the alternative, a grant of its FM application.

In addition, the Commission ordered that oral argument be held on the exceptions filed by the unsuccessful applicants in the New York FM proceedings on June 27, 1947.

FM—Conditional Grants

The following were authorized conditional grants for the type of station indicated, subject to further review and approval of engineering details:

Rome Radio Broadcasting Co., Rome, Ga.—Class A. (BPH-1248)

South Central Broadcasting Corp., Evansville, Ind.—Class B. (BPH-1247)

The McPherson Broadcasting Co., McPherson, Kans.—Class B (in lieu of a Class A grant previously authorized), and Channel No. 251 was allocated to McPherson, Kans. (BPH-1216)

Peoples Broadcasting Corp., Columbus, Ohio—Class B. (BPH-1107)

Capital Radio, Inc., Columbus, Ohio—Class B. (BPH-1157)

Northwest Broadcasting Co., Fort Dodge, Ia.—Class B. (BPH-1251)

KFNF, Inc., Shenandoah, Ia.—Class B. (BPH-1228)

Elmer A. Benson, St. Paul, Minn.—Class B. (BPH-1189)

Midcontinent Broadcasting Co., Sioux Falls, S. D.—Class B. (BPH-1236)

Fanny B. Wilson, Memphis, Tenn.—Class B. (BPH-1229)

Keokuk Broadcasting Co., Keokuk, Ia.—Class B station. (BPH-1221)

WIBM, Inc., Jackson, Mich.—Class B in lieu of Class A facilities formerly authorized. (BMPH-289)

WKNE, Corp., Keene, N. H.—Class B station. (BPH-1137)

Piedmont Carolina Broadcasting Co., Inc., Reidsville, N. C.—Class B station. (BPH-1241)

Western Oklahoma Broadcasting Co., Clinton, Okla.—Class B station. (BPH-1203)

Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Class B station. (BPH-1185)

Radio Anthracite, Inc., Shamokin, Pa.—Class B station. (BPH-1136)

FM—Construction Permits

The following were authorized construction permits; conditions. (Note: Power given is effective radiated power; antenna height is height above average terrain, and channel to be assigned after final proceedings in docket 6768):

The Hartford Times, Inc., Hartford, Conn.—Class B; 4.6 KW; 860 feet. (BPH-233)

Ashland Broadcasting Co., Ashland, Ky.—Class B; 4.4 KW; 200 feet. (BPH-39)

Enterprise Publishing Co., Brockton, Mass.—Class A; 800 watts; 275 feet. (BPH-811)

Leon Podolsky, Pittsfield, Mass.—Class B; 12 KW; 605 feet. (BPH-194)

Bay Broadcasting Co., Inc., Bay City, Mich.—Class B; 32 KW; 420 feet. (BPH-353)

Harry M. Bitner, Manchester, N. H.—Class B; 3.4 KW; 950 feet. (BPH-667)

The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Class B; 3.3 KW; 960 feet. (BPH-793)

Mercer Broadcasting Co., Trenton, N. J.—Class B; 11.3 KW; 300 feet. (BPH-67)

WICA, Inc., Ashtabula, Ohio—Class B; 48 KW; 260 feet. (BPH-170)

WSPR, Inc., Springfield, Mass.—Class B; 14 KW; 570 feet. (BPH-925; docket 7925)

Springfield Broadcasting Co., Springfield, Mass.—Class B; 10 KW; 645 feet. (BPH-1016; docket 7926)

Regional Broadcasting Co., Chicopee, Mass.—Class B; 3 KW; 965 feet. (BPH-1070; docket 7927)

Pynchon Broadcasting Corp., Springfield, Mass.—Ordered that its application (BPH-1127) be retained in the hearing docket (No. 8036).

Union Tribune Publishing Co., San Diego, Calif.—Class B; 48 KW; 845 feet. (BPH-384; docket 7841)

Balboa Radio Corp., San Diego, Calif.—Class B; 20 KW; 425 feet; engineering conditions. (BPH-1054; docket 7842)

Liberty Broadcasting Corp., Atlanta, Ga.—Class B; 20 KW; 500 feet. (BPH-449; docket 7543)

Atlanta Journal Co., Atlanta, Ga.—Class B; 50 KW; 520 feet. (BPH-361; docket 7544)

(Continued on next page)

Atlanta Broadcasting Co., Atlanta, Ga.—Class B; 40.4 KW; 530 feet. (BPH-746; docket 7545)

Wilson and Cope, Atlanta, Ga.—Class B; 49 KW; 940 feet. (BPH-803; docket 7546)

Regents of the University System of Ga. for and on behalf of Georgia School of Technology, Atlanta, Ga.—Class B; 345 KW; 1,755 feet. (BPH-918; docket 7547)

Applications

Noncommercial Educational

KOKU—State University of Oklahoma, Norman, Okla.—Modification of construction permit (B3-PED-41, as modified) which authorized a new noncommercial educational broadcast station, to change transmitter site (geographic coordinates only).

WFUV—Fordham University, New York (Bronx), N. Y.—Modification of construction permit (B1-PED-65, which authorized a new noncommercial educational broadcast station) for extension of completion date.

Remote Pickup Deleted

KRBT—KRIC, Inc., area of Beaumont, Tex. (P. O. 380 Walnut St.)—Construction permit for a new relay station to be operated on 31.22, 35.62, 37.02 & 39.26 mcs., power of 15 watts, emission A3, and hours of operation, unlimited. Deleted, June 4, 1947.

Federal Trade Commission Actions

Complaint

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

United Artists Corp.—In a complaint issued by the Commission, United Artists Corp., 729 Seventh Ave., New York, its president and its controlling stockholders are charged with misrepresentation in the advertising of the British motion picture, "The Life and Death of Colonel Blimp." Individual respondents are Edward C. Raftery, president and general manager, 152 West 42nd St., New York, and Mary Rogers (better known as Mary Pickford), Charles Chaplain and David O. Selznick, all of Beverly Hills, Calif., who are alleged to constitute "substantially all the stockholders" of the respondent corporation and to exercise control over its policies and practices. (5500)

Stipulations

A-M-R Chemical Co., Inc.—The Commission approved a stipulation in which A-M-R Chemical Co., Inc., 985 East 35th St., Brooklyn, N. Y., agrees to discontinue representations that A-M-R Insecticide is equivalent in insect-destroying power to a 7 per cent pyrethrum solution or that it will effect 100 per cent kill and 100 per cent knockdown when used on certain crawling insects such as roaches and water bugs. (7615)

American Exterminators, Inc.—The Commission approved a stipulation in which American Exterminators, Inc., 9th and Race Sts., Cincinnati, agree to stop making certain representations with respect to rat poisons designated "Rat Kisses" and "Rat Baits." (7611)

(Continued on next page)

Esta Liquid Weld Co.—In a stipulation approved by the Commission, Carl Magnussen, formerly trading as Esta Liquid Weld Co., 4124 North 38th St., Omaha, Nebr., agrees to discontinue certain advertising representations in connection with the sale of "Esta Liquid Weld," a product for sealing leaks and cracks in automobile radiators and cylinder blocks. (7614)

R. Gerber and Co., 648 West Randolph St., Chicago, entered into a stipulation with the Commission to cease and desist from representing that a shampoo which does not contain olive oil to the exclusion of all other oils is an olive oil shampoo. (7608)

Ritz Camera Center of Washington, Inc., etc.—The Commission accepted from Ritz Camera Center of Washington, Inc., 618 Twelfth St., N. W., Washington, D. C., and Murray C. Weiss, Lawrence Metzler and Samuel Marcus, copartners, trading as Weimet Film Co., 75 West 45th St., New York, stipulations to cease and desist from selling or offering for sale any photographic films on which the time set for developing has expired unless that fact is revealed by definite statements in clear conspicuous type on the exposed surfaces of the cartons or other outside wrappers. (7609 & 7610)

Tilmer Thompson Hatchery—Tilmer Thompson, trading as Tilmer Thompson Hatchery, Elmore, Minn., and as Famous Chicks, Winnebago, Minn., entered into a stipulation with the Commission to discontinue certain advertising representations in connection with the sale of baby chicks. (7612)

Wang Umbrella Co.—An agreement to disclose the rayon content of umbrella covers has been executed by Julius Wang, trading as Wang Umbrella Co., 13 West 28th St., New York, and approved by the Commission. (7613)

Cease and Desist Orders

S & S Tie Co.—Misrepresentation in the sale of materials, patterns and instructions for making neckties or other articles is prohibited in a cease and desist order issued by the Commission against Joseph Schecter and Arnold Stockenberg, formerly trading as S & S Tie Co., 412 West Sixth St., Los Angeles. White Measure Widely Opposed

NAB, FCC, Stations and Networks Object to Various Provisions of S.1333

Texts of Judge Miller's statement and of the White Bill are contained in accompanying Information Bulletin No. 5.

The President of NAB, the Chairman of the Federal Communications Commission, several members of the NAB staff, the Presidents of three networks, several broadcasting station executives, and a representative of the Chicago Federation of Labor appeared before a special subcommittee of the Senate Interstate and Foreign Commerce Committe last week to oppose parts of the White Bill (S. 1333).

A brilliant display of legislative fireworks developed over the contention by many industry spokesmen, led by NAB President Justin Miller, that radio must be as free as the press. All suggestions that the freedom of press and speech provisions of the Constitution precluded the FCC's concerning itself with radio programming met with belligerent opposition from three members, including the Chairman, of the Committee. In addition to the Chairman, Sen. Wallace H. White, Republican of Maine, they were Democratic Senators Edwin C. Johnson, of Colorado, and Ernest W. McFarland, of Arizona. Other members of the Committee did not make their sentiments known.

Section 326

Judge Miller concentrated most of his testimony on proposed changes in Section 326 of the present Communications Act—the section dealing with censorship. If the proposed amendments are adopted, he stressed, they "will give even greater courage to the FCC to expand its administrative interpretation, and further to encroach upon the rights of the broadcaster in the field of free speech by means of radio communication." *(Complete texts of the NAB President's testimony and of the White Bill have been published in NAB Information Bulletin No. 5, enclosed with this issue of* REPORTS.)

He objected strenuously to elimination of the provision that the FCC shall promulgate no regulation inferfering with the right "of free speech by radio communication."

On the Inside

President Truman withdrew the name of Commissioner Wakefield and nominated Congressman Robert F. Jones, (Rep.) of Ohio, to the FCC. (p. 507)

FCC Chairman Denny, testifying during the hearings on the White Bill, opposed many of the provisions of the proposed legislation. (p. 505)

The International Telecommunications Conference, entering its second month, is making progress in reaching solutions to some of the problems confronting the delegates. (p. 511)

National spot advertising activity continued to climb during May, according to the latest Rorabaugh Report. Renewal business totaled 69 per cent. (p. 512)

A recent study conducted by a trade magazine indicates an increase in sales volume of electrical appliances which may prove beneficial to local stations' sales efforts. (p. 510)

ABC, CBS, MBS Heads Oppose White Bill; Trammell Scheduled to Testify Today

Three network presidents, appearing as witnesses during the hearings on the White Bill last week, registered opposition to the measure. The fourth network president, accepted a postponement until today (23) to offer his statement for the consideration of the Senate group.

The executives who testified included: Edgar Kobak, president, MBS; Frank Stanton, president, CBS; and Mark Woods, president, ABC. Niles Trammell, president, NBC, will be heard today.

A summary of the testimony offered, in order of the appearance of the witnesses, follows:

ABC Executive Testifies First

In the hearings on Thursday, Mark Woods offered a number of suggestions look-

He pointed out: "As the Communications Act now stands, the inclusion of these words . . . clearly indicates legislative intent that the provisions of the First Amendment shall apply to radio broadcasting and shall limit the power of the FCC in its administration of the Act. Elimination of the words will suggest to the FCC that it should no longer consider itself restricted by the Constitutional Amendment. It will suggest to the Courts—if the Courts ever get an opportunity to examine the point—that Congress has changed its mind concerning the applicability of the First Amendment to radio broadcasting. As it now stands, the First Amendment applies to radio broadcasting, and the Act, itself, makes freedom of speech as guaranteed in the First Amendment applicable to radio broadcasting. I am satisfied that if and when the question reaches the Courts, the Courts will decide that radio broadcasting does come within the guaranty of free speech as set out in the First Amendment. However, no Court can help being concerned by the apparent change in intent upon the part of Congress in this respect."

FCC Will Assume Power

Among other objections to the rewording of this section, Judge Miller objected to use of the words "the substance of" in the provision: "The Commission shall have no power to censor, alter, or in any manner affect or control *the substance of* any material to be broadcast. . . ." He suggested that the use of this language would lead the Commission to assume that it did have "some power to censor, alter, affect and control." These words, "the substance of" should, he argued, be stricken from the provision.

In addition to his assertion that governmental control of programming contravenes the First Amendment, Judge Miller took issue with the theory that broadcasting must be controlled closely because of the scarcity of radio frequencies. "Another favorite argument," he said, "for abridging freedom of speech by means of radio is that there is a limited number of frequencies available for this purpose. When this doctrine was first asserted, there may have been some facts to support the scarcity idea; but the facts no longer justify such an argument. There are, today, far more frequencies available than we had any idea of when we first began to regulate radio broadcasting in interstate commerce. At the present time, it is common knowledge that in most communities there are more radio stations operating or licensed to operate than there are newspapers. Indeed, it has been suggested that the number of licenses being issued is so great that it may result in bankruptcy of many licensees."

In his testimony, which lasted some four hours on Wednesday (18), Judge Miller also expressed opposition to the political and public questions, news, and other sections of the bill. He approved provisions of the bill which would facilitate judicial review of Commission decisions, but suggested that they should be expanded even more. (See *Information* BULLETIN No. 5.)

Willard Continues Opposition

A. D. Willard, Jr., NAB executive vice president, pursued the objections to proposed changes in Section 326, concentrating attention on this provision:

> "Provided that nothing herein contained shall be construed to limit the authority of the Commission in its consideration of applications for renewal of licenses to determine whether or not the licensee has operated in the public interest."

Mr. Willard commented:

"The Federal Communications Commission has held for years that the term 'public interest' invests in them the right to examine and evaluate the program policies and programs of radio stations in determining their fitness for the renewal of their licenses. That has been their interpretation of the words 'public interest' in the Act of 1934. Broadcasters are very much concerned over what the Commission's interpretation might be if, as in this bill, they are given the right, in terms, for the first time, to consider programs and business practices as part and parcel of 'public interest' whenever a broadcaster comes before them for a renewal of his license?

"The Federal Communications Commission has constantly maintained that it was the intent of Congress, implicit in the words 'public interest' contained in the Act of 1934, that the Commission should consider the 'over-all' program structure of a radio station in granting the renewal of license. The FCC, in its recent Blue Book, reiterates this assertion of power in terms.

"And the Commission contends that this examination and evaluation of a station's 'over-all' programming is not censorship because it (the Commission) does not pre-censor programs but only reviews them, and because it (the Commission) does not consider single programs on their content but only the 'over-all' program structure or policy.

"If, indeed, that be the intent of Congress—and I devoutly hope that it is not—then the last sentence of Section 16 of the bill, to which I referred at the beginning, would have the effect of writing this assertion of power into the law for the first time."

(Continued on next page)

The NAB executive urged a reversal of the trend toward closer governmental supervision of radio programming, recommending:

"I earnestly believe that we are face to face here with a grave decision—of incalculable importance to our national well being and the future of our democratic institutions. I sincerely believe that Congress must enact a law which makes radio 'as free as the press'—or—stand by and watch the press and motion picture subjected to the same government controls—the same methods of intimidation—the same 'censorship'—as radio suffers today."

Facsimile

In support of this argument he pointed out:

"The same electronic miracles that have brought you radio have a great many more wonders in store. Some weeks ago, in Philadelphia, two newspapers and their affiliated radio stations successfully demonstrated a sustained and near-perfect presentation of facsimile broadcasting. Many top experts in both the journalistic and radio field believe, as I do, that tomorrow's newspaper may be printed daily on a facsimile receiver in your home. When that day comes, the newspapers of America will be subject to the rules and regulations of the Federal Communications Commission. Where will be the freedom of the press which successive Congresses and Courts have protected for 156 years when the regulation prohibiting editorializing applies to the facsimilied newspaper, and when the rule requiring equal opportunity for all sides of public questions becomes law for the American press?

"Incidentally, by the standard applied to radio broadcasting stations, a good many American newspapers would be virtually 100 per cent commercial. Certainly they would not be denied facsimile licenses on this basis?

"I have been urging U. S. editors and publishers to examine carefully the rules and regulations of the Federal Communications Commission in the light of the miracle of facsimile broadcasting. This is a pursuit worthy of every free American's attention."

Mr. Willard also placed the NAB on record as taking "strong issue" with the proposed amendment which would require the FCC to consider the "needs and requirements" of communities in granting licenses. "The authors probably refer," he said, "to economic needs and requirements as well as others."

In contrast with the present situation where the law provides that radio is not a public utility and the Supreme Court has declared accordingly that the Commission may not regulate business aspects of stations, Mr. Willard said:

Economic Control A Threat

"It seems obvious to us that if a government agency has the right and power to protect existing broadcasting facilities in a community against competition and to create artificial quasi utilities, that it must, in turn, have the power to regulate rates, sales prices and so on. I hardly need call to your attention the fact that such power over the economics of a medium of mass communication is a serious threat to its freedom and to freedom of expression. I feel sure that the authors of this bill had no intention of over-riding the Supreme Court decision and, indeed, in Section 16, amending Section 326 of the Act, they evidence an opposite view when they prohibit the Commission from interfering with the business aspects of broadcasting.

"We strongly urge that the words 'giving effect in each instance to the needs and requirements thereof' be deleted and, in their place, the words 'with due consideration to proper engineering standards' be substituted."

Without economic restrictions, Mr. Willard said, we are approaching a situation where there would be no shortage of frequencies—"Then, in our judgment, even the last excuse for certain types of program regulation, which we feel are an infringement upon freedom of speech, would vanish."

In conclusion, Mr. Willard appealed for elimination of the Section calling for detailed financial and program reports. He said: "I cannot understand the necessity for detailed financial reports if the Commission is prohibited from regulating the business aspects of radio, and I cannot understand the need for voluminous program reports if the Commission is prohibited from controlling the substance of any material to be broadcast by any radio broadcasting station."

Public Relations Director

NAB's director of public relations, Robert K. Richards, who followed Mr. Willard to the witness stand, presented a statement "highlighting the corollary development of publishing and broadcasting in the United States. He contended vigorously that "radio broadcasting is governed by the First Amendment to the Constitution and subject, therefore, to the same guarantees of freedom that apply to the press, the pulpit and public assemblies."

"Broadcasting," he said, "will not have attained its full development as an instrument of democracy until the measurement of its performance in the public interest is determined by the people (as in the case of the press) rather than by the licensing authority."

As he traced the parallel between the development of the two media of communication, Mr. Richards observed:

"The importance of this historic relation is to be found in this remarkable development: as the unlicensed press has advanced in its capacity to serve the people, the cause of a free press has advanced as well; BUT as licensed broadcasting stations have advanced in their capacity to serve the people, their freedom has been retarded. . . .

"It cannot be argued logically that one man, a broadcaster, is less capable of serving the public interest than another man, a publisher. Or if this is asserted, then what of the anomalous situation which finds approximately 35% of the broadcasting stations in the country owned by newspapers? Does it follow that one who can operate a newspaper with the public's interest at heart (without "overall review") must be subjected to such "overall review" in the content of his radio programs?"

Truman Statement

That there is bi-partisan agreement that radio must be "As free as the press was recalled to the Committee members by the NAB public relations director. He quoted a statement of President Truman's in which the President said radio "must be maintained as free as the press." From the 1940 Republican platform, he quoted: "The principles of a free press and free speech, as established by the Constitution, should apply to the radio."

(Continued on next page)

Commenting upon the testimony of FCC Chairman Denny recently before the House Appropriations Committee, Mr. Richards said:

"The Commission's Chairman has testified that this phrase public interest permits the estabishment of standards which represent gloss. I understand that gloss has a special meaning to a lawyer, i.e., functions and powers not conferred by law. Five of the seven members of the Commission are attorneys and would be conversant with this definition, one presumes."

Ryan Hits Censorship Provision

Mr. Richards introduced into the record a written statement by J. Harold Ryan, vice president and treasurer of the Fort Industry Company, who was unable to be present. Mr. Ryan qualified himself as a witness "principally as former assistant director of the Office of Censorship, during the war, and only secondarily as a broadcast licensee." Against this background he commented thusly upon the section of the White Bill entitled "Identification of News Sources":

> **"I should like to say as one who has had experience as a censor during time of war—and only in such periods of emergency is censorship of our free media legal in the United States—that Section 18 of S. 1333 is harsher as an instrument of censorship than was the code of wartime practices issued by the Office of Censorship during the war, and by terms of which broadcasters voluntarily governed their operations against releasing information of value to the enemy."**

"To set up, in peacetime," he continued, "a censorship of our greatest means of mass communication that is more severe and restrictive than any censorship observed during wartime is unthinkable and can be fraught with the most dangerous results. I earnestly appeal for the elimination of Section 332(a) and (b) as amended in its entirety."

In reference to Section 326 of the Act, Mr. Ryan commented: "I note with much concern that any mention of the right of free speech which appeared in this original section has been eliminated, and for the sense of security and for the reasons of clarity this phrase should be restored to this section."

Mr. Ryan further objected to inclusion in this section of the proviso that the Commission's authority extends to the length of considering, at renewal time, "whether or not the licensee has operated in the public interest." This doctrine, he said, "has been the means by which the Commission has assumed to exercise control and censorship over the programs of radio stations, and has been the means by which such pseudo-regulations as the Blue Book have been promulgated."

Pellegrin Fights Regulation

Frank Pellegrin, NAB director of broadcast advertising, told the Committee that this proviso would nullify the provision in the bill that Commission does not have power to "regulate the business of the licensee of any radio broadcast station unless specifically authorized in this Act." Under the new law, he said "it is believed the Commission will engage even more actively in regulating the business of the broadcasters."

Mr. Pellegrin argued that the Commission's present practice of requiring stations to specify amounts of time they planned to devote to "commercial" and "sustaining" programs and then comparing "promise with performance" was completely unrealistic. The many variables, such as fluctuating costs of operation and other economic factors, he said, make it "impossible for any broadcaster to set up an arbitrary division of his time into sustaining and commercial, and be sure that he can always continue to operate on a sound basis."

Profit Figures Misleading

The Committee members were cautioned by Mr. Pellegrin against accepting as a basis for legislation some of the profit figures which have been attributed to radio. "It should be pointed out," he said, "that the profit figures which are cited in such instances are based on earnings generally in the period of 1940 to 1945—those years immediately before and during the war when nearly all American business enterprises enjoyed unprecedented prosperity (and when such profits were largely drained off anyway by excess profits taxes of about 90%). This was, furthermore, a period when the licensing and construction of new broadcast stations were frozen. This meant that the relatively few existing stations enjoyed an abnormal prosperity. But one does not find these opponents or critics of the American system citing the income figures of broadcast stations, say, for the period of 1930-40, when many stations operated at a loss, and when some were forced out of business."

Mr. Pellegrin objected also to the wording of the Section dealing with "Network organization," which could, he said, as now written, be construed to cover national radio sales representatives, combinations of one AM and one FM station which broadcast some programs simultaneously, as well as cases where two stations owned by the same person are connected by a line. In this connection, he said: "it is extremely doubtful if it is the intention of the Congress to require these hundreds of licensees to be considered as 'networks,' and to comply with the special regulations required for such operation."

Objection to Political Provision

Both Mr. Pellegrin and Harold Fair, director of the NAB program department, objected to the proposed restrictions on broadcasts by political candidates on the ground that they were contrary to the First Amendment. They argued that no such restrictions were placed on the press or other media of communication.

Mr. Fair stated:

"A further, and more serious objection to this Section 15(c) is the fact that it prohibits any responsible citizen or group from voicing an opinion on such matters without written authorization from a candidate or a political faction. As an example, the Parent Teachers Association could and should be vitally interested in candidates for the local school board, regardless of political affiliation. Such a group would be in a position to know the duties and qualifications of a board member, and their opinions, as voiced by their spokesmen would be of sound value. Yet this law clearly and unequivocably prevents them from using the air for such a purpose."

(Continued on next page)

Addressing himself to Section 326 of the Act, Mr. Fair observed that the proposed changes give "the Commission unlimited authority to determine whether or not an applicant has operated in public interest."

"I realize," he continued, "that a definition of the term 'public interest, convenience, and necessity' is difficult or virtually impossible to achieve. Therefore, the present bill retains this ambiguity which permits such elasticity of interpretation that abuses can still arise. In this present wording I can see no reason to expect relief from those philosophies of the Commission already expressed in the Blue Book other than that relief provided by review and hearings before the Commission or the courts.

"Of equal or greater importance, in my mind, is the fact that the new bill accepts this philosophy and in so doing constitutes a continued threat to the fundamental right of freedom of speech. There is no question as to the reaction of station managers and program managers to these implications. It is only natural that program policies will be formulated that will tend to conform to these philosophies already expounded by the Commission in the Blue Book. Even in my own experience as a program manager, I have many times seen programs of doubtful quality and effectivenes given time on the air simply because they would improve the appearance of the station's program record if and when examined by the Commission."

Paul W. Morency, general manager of WTIC, Hartford, protested the section concerning controversial public issues on the ground that it would "curtail the discussion of public questions rather than to encourage them." He suggested that the proviso requiring that up to double the original amount of time be given to answer points of disagreement would open the door to "a merry-go-round which might go on indefinitely."

Mr. Morency also spoke against those sections of the bill dealing with political broadcasts, identification of news sources, and chain regulation.

In summary he said:

"My general comment on the provisions which I have discussed is that they are detrimental to good community and regional operation because they take away from the flexibility of the individual broadcaster's operation. Flexibility—and inflexibilty, I include timeliness—is one of the great public assets of radio and each step toward inflexibility makes for poorer not better service to the listener."

Campbell Arnoux, president and general manager of WTAR, Norfolk, Va., who, along with Messrs. Ryan and Morency, is a member of the NAB Board of Directors, urged changes in the sections dealing with business regulation, political broadcasts, and discussion of controversial issues.

Provisions of the new law, Mr. Arnoux stated, would "tend to regulate the business of broadcasting in any given community and to regulate the business of broadcasting is to invoke the powers of censorship through the pocketbook."

Pengra Opposes Business Regulation

Basing the major portion of his statement on the regulation of station operation as proposed in the White Bill, Marshall Pengra, KRNR, asserted that the only "regulation that radio needs is open competition in its field." He emphasized the point that listeners "will become the most compelling and exacting regulatory forces that could be devised."

He pointed out the exacting requirements of the FCC in filing of various forms. Referring to the form for renewal application he said: "This information reveals to the FCC how the broadcaster is maintaining those percentages in program time that he originally said he would."

Questioning the value of such procedure he asked: "And what happens if his percentages have changed with changing conditions in his town?"

Such a policy of checking-up he said "is business regulation with a capital B under implied threat of losing a license to broadcast."

Bannister Asks for Simplification

Citing the need for new legislation concerning broadcasting, Harry Bannister, WWJ, asked the Senate Subcommittee to provide a law, but insisted that simplification of requirements was of utmost importance.

"As an over-all observation," he said, "it seems to me that Sections 15, 16 and 17 are too involved and complicated. They could stand a lot of simplification and clarification, else they will tend to promote confusion rather than to diminish it."

He pointed out that while no station was compelled to carry programs dealing with public questions, "we strive always to attract listeners. If enough people are interested in any question, we'll do something about it." He pointed out that no station would want to clutter up its program schedule with long-winded dissertations.

He also pointed out the impracticality of attempting to identify the source of every news item and stated that not only would such detail lose listener interest but would consume much time which could be better devoted to reporting the news.

He stated that while he would "love to have the extra time" provided to local stations by the Bill, such action would be detrimental to the structure of radio, "because the network furnishes its stations with the programs" that build audiences.

ABC, CBS, MBS Heads Oppose White Bill; Trammell Scheduled to Testify Today

(Continued from page 499)

ing toward changes in the provisions of the proposed legislation, and stressed the importance of considering the practical effects of any new legislation.

"One thing we should all bear in mind in the drafting and discussion of this legislation," he said, "is that the broadcasting industry has developed certain practices and policies during the 25-year period of its existence. Those practices and policies should be given due weight," he suggested, "not as standards to be incorporated in a statute, but as substantial assurance that the industry will continue to conduct itself in accordance with those policies without being required by statute to do so."

Questioning the advisability of Congressional action which would permit detailed supervision over the busi-

(Continued on next page)

ness of a station, Mr. Woods stated that he could see no reason "particularly in view of the rapid growth in the number of broadcasting stations in operation, and soon to go into operation . . . why the Congress should place any additional restrictions on broadcast licensees which already go far beyond those which are applicable to publishers of newspapers or magazines and other media of expression." He pointed out that radio stations, like other media which have the same comparative functions "should be equally free in their business operations and in their programming."

In view of the fact that there are more broadcasting stations than newspapers in the country, Mr. Woods pointed out, the need for special controls has decreased and continues to become less and less necessary. Rather that burden the industry with further restrictions, he suggested a review of present restrictions to determine which of them are still necessary.

Financial Reports

Arguing against the provision of the bill which would authorize the Commission to require financial reports, Mr. Woods urged complete elimination of such a requirement on the grounds that this might give the FCC some base "to move toward rate regulation in broadcasting . . ." Mr. Woods offered a specific revision of the section covering the point.

Political Broadcasts

The ABC President opposed the Bill's provision in the matter of political broadcasts during election campaigns pointing out "That a highly commendable degree of impartiality in the treatment of political candidates has been maintained by broadcasters . . . " The legislation proposed, he continued, would create such complexities in station operation as to make the provisions impractical.

He agreed that neither the licensee or the FCC should have the power of censorship over material broadcast, but emphasized that the licensee should be protected from any liability for "libel, slander, invasion of right of privacy, or any similar liability for any statement made in any such broadcast except with respect to statements made by the licensee" or by persons in his employ.

Mr. Woods also opposed the provisions of the White Bill dealing with broadcasts of controversial subjects, announcements giving the source of news stories and limitation of station ownership.

Broadcasting Only Half Free

Frank Stanton, president, CBS, in his testimony on Friday, stated that broadcasting is only half free today. "There is no question in my mind," he asserted, "that broadcasting must be freed from government interference or control if it is to serve its democratic function in our nation."

Calling for a new approach to a Communications Act, the network executive told the Senate Subcommittee, that: "all provisions other than those relating strictly to the allocation of frequencies, the granting of licenses, and the technical operation of broadcasting apparatus" were not appropriate in the Communications Act.

"I am not asking that radio broadcasting be placed above the law," he continued. "Broadcasting is and should be subject to applicable general laws, just as are newspapers, magazines and other businesses. There is no reason why broadcasting, which is not a common carrier or a public utility, should be subject to additional burdens from government interference."

In opposing the provision giving the FCC authority to review overall programming Mr. Stanton said: "Overall program regulation by a government agency which has a life-and-death licensing power must ultimately seep down into specific programs. As a matter of fact," he pointed out, "overall program review . . . can be more dangerous than supervision of specific programs because it is less susceptible to the test of public opinion."

He recommended changing the language of the proposed section so that "there shall be no governmental interference with program content."

Political Broadcasts

Mr. Stanton opposed the provisions of the White Bill dealing with political broadcasts, stating that "fairness cannot be legislated." He reminded the subcommittee that Congress does not regulate the newspaper and magazine stories devoted to candidates for office and insisted that "such regulations with respect to broadcasting are inappropriate."

Because of the detailed provisions of the requirement it "might well have the effect of inducing a large number of stations to refuse to carry political broadcasting at all," Mr. Stanton said, because large and small broadcasters alike would have difficulty in going through a campaign without violating some of the requirements of the proposed Bill.

Mr. Stanton also objected to the provisions of the legislation dealing with controversial questions, stating that "the requirement for twice the number of replies results in a geometric progression which could, conceivably, exhaust the entire broadcast schedule of a station."

While agreeing with the intent of the section requiring identification of news sources, Mr. Stanton felt "that the purpose is best accomplished by voluntary adherence to a high professional standard in the field of news and news analysis just as in the newspaper field." He said that it was impractical for broadcasters to attempt to divulge all news sources in the course of a specific program.

The CBS executive argued that special rules are not required for network broadcasting. He stated that station ownership should not be arbitrarily restricted and opposed the provision of the new legislation which would limit ownership of stations.

"The most unusual feature" of the provision, Mr. Stanton said, "is that the 25 per cent limitation applies to *potential* rather than *actual* listeners."

In concluding his statement, Mr. Stanton said: "Broadcasting is a comparatively young industry, and I urge you to give it full opportunity to develop itself as an outstanding medium of information and entertainment, just as you have the printed press of the country."

(Continued on next page)

Opposition by MBS

Edgar Kobak, president, MBS, affirmed the industry stand in opposition to those provisions of radio legislation which would restrict the freedom of radio.

Taking issue with the stated purpose of Section 16 of the White Bill, Mr. Kobak said: " . . . we believe that it actually confirms and ratifies the very practices by which the Commission has gradually been edging into control of the programs broadcast by radio stations and into control of their business practices."

He suggested that the proponents of the Bill were not completely familiar with the methods employed by the Commission in its encroachments on program control.

"So long as the Commission can threaten radio stations with the loss of their licenses," he said, "if the radio stations fail to conform with the Commission's ideas as to proper program content, the Commission will be able to exercise a censorship of the most effective character."

In his statement, he also registered criticism of "a compulsory division of the Commission into two divisions and the proposed change in the status of the chairman."

Political Broadcasts

Mr. Kobak expressed opposition also to the provisions relating to broadcasts during political campaigns. He said:

"The proposed amendments in Section 15 of the bill relating to political broadcasts are, in part, theoretically good, in part, indifferent and, in part, exceedingly bad. Unless the undesirable provisions are eliminated, the amendments should not, in my opinion, be adopted."

Referring to the new requirement on providing time for the discussion of public questions, Mr. Kobak pointed out that it is virtually impossible to get any agreement "as to what constitutes a controversial issue of public importance, as distinguished from an issue on which only a few cranks disagree. On most issues," he continued, "there are not merely two but many schools of thought." He re-emphasized the point, made by other industry leaders, that broadcasters lean over backwards in trying to get all sides of a question to the public in their programming.

News Sources

Mr. Kobak stated that the identification of news sources "is not merely excessive, but actually impossible." He pointed out that in a fifteen minute news program, the broadcaster regularly gives information derived from a number of sources. He said that citing all the sources would not only be time consuming but would make for dull listening.

He also objected to the provision of the Bill "which would prohibit the broadcasting of a false accusation or charge" as extremely broad and dangerous. He stated that the penalty for any violation is much greater for radio than for other media of mass communications.

Summing up his statement, Mr. Kobak said: "This is a time above all other times in our history when the people of America and Congress as the representatives of the people must zealously scrutinize any change in the law in the light of preservation of constitutional freedoms. I submit that the White Bill in its present form will not bear that scrutiny."

Denny Favors Program Review Provision, But Opposes Many Sections of White Bill

Chairman Charles R. Denny of the FCC, testifying before the Senate Subcommittee in hearings on the White Bill (S. 1333), registered opposition to a number of the provisions of the proposed legislation. Among his objections to the bill are its requirements concerning:

The mandatory separation of the Commission into two divisions;
The Commission's dealing with the economic details of broadcast licensees;
The announcement of source of news stories;
Limitations on political broadcasts;
Multiple ownership of stations;
Broadcasting of controversial issues;

Mr. Denny favored the adoption of that portion of the bill which would give the FCC the right "to review the overall operations of a station in passing upon applications for renewal of licenses. . . ."

In response to a Committee question, Mr. Denny asserted that he did not feel that there was a pressing need for the passage of new legislation at this time.

Commission Divisions

In discussing Section 5 of the proposed bill, Mr. Denny pointed out that it provides for reorganization of the FCC into two independent divisions, the Broadcast Division and the Common Carrier Division. Each division would consist of three members. The Chairman would be the executive officer of the Commission, but could not sit on either division except in case of a vacancy.

"The purpose of this section is stated to be twofold," Mr. Denny said.

"The first is that there are fundamental differences between rate making and public utility concepts, on the one hand, and broadcasting on the other, and having the Commission operate as a unit on all matters creates a tendency on the part of the Commission to confuse the two and to apply the same concepts and philosophies in both fields. The second stated purpose is that the Commission has centered its attention, as well as the attention of its staff, on broadcasting at the expense of the other matters entrusted to the Commission's jurisdiction.

"As to the first point, I have heretofore seen such statements in print both in a trade magazine and in briefs filed by networks during the course of litigation. But I have never seen any facts presented to support the charge."

Continuing, Mr. Denny stated: "I turn now to the second stated purpose of Section 5, namely that broadcasting work demands a disproportionate share of the Commission's efforts. It is true that broadcasting work does require a great amount of time but examination of the Commission's agenda discloses that the Commission is relatively current so far as its common carrier and safety and special services work is concerned. It is in the *broadcast field* that a huge back-

(Continued on next page)

log has accumulated. This has been due to the abnormal broadcast workload that has been thrust upon the Commission since the war. At the present time this backlog consists principally of hearing cases. A division of the Commission would not expedite this work. What is badly needed are more hearing officers.

The FCC staff, Mr. Denny said, "is presently organized into divisions. Thus, in each of the professional departments—Engineering, Law and Accounting—we have a Broadcast Division, and Common Carrier Division, and in addition the Engineering and Law Departments have Safety and Special Services Division.

"Thus far, I have been discussing the reasons which have been advanced for requiring a mandatory division of the Commission and have shown that, in our view, the reasons advanced are not valid. I should now like to discuss the affirmative objections we have to Section 5 of the bill. In the first place, the divisions proposed by Section 5 would be composed of three members each. In our opinion, many of the problems which the Commission must pass upon are too important to be finally resolved by a majority vote of two out of three men. This has been recognized ever since the days of the original Federal Radio Commission. That body had 5 members and did not have the present Commission's common carrier jurisdiction.

"The second difficulty with Section 5 is that it provides for only two divisions—Common Carrier and Broadcasting. In our opinion three divisions are desirable since the work that we are performing in the safety and special services field is as important as in the other two branches referred to.

"The third objection to Section 5 is that it makes it impossible for a member to sit on more than one division and for the Chairman to sit on any division."

Mr. Denny, concluding his argument on the point said that while the Commission was opposed to a mandatory division of its organization, it favored the authority of the present bill which *permits* a division system but does not *require* one. He said that the Commission has a plan for setting up divisional operation and that it proposed to put it on trial this fall.

Economic Factor

Testifying on Section 9 of the White Bill, Chairman Denny said that the Commission felt "that the theory of free competition in broadcasting" has operated satisfactorily, and urged "that this basic theory be left unchanged. But," he continued, "if the [Senate] Committee feels that it should be changed then the precise formula to be applied for restricting competition in the broadcast field should be written into the bill so that we will know just how much of the present theory of free competition is retained and how much is discarded." He asked that the Congress specifically provide in the law a "yardstick to apply in determining how many stations a particular community can properly support."

Introducing his statement on the Section 9 amendment, the FCC chairman pointed out:

"Under Section 307(b) of the Communications Act as presently written, the Commission is required to provide a fair, efficient, and equitable distribution of radio service among the several states and communities insofar as there is demand for the same. Section 9 would delete the requirement as to demand and instead require the Commission to give effect to the needs and requirements of the various communities."

Stating that the purpose of the change was not clear, Mr. Denny said: "The amendment may be construed as requiring the Commission to consider the ability of a community to support an additional radio station when there is no competitive application from another community for that frequency. In the Commission's opinion, this would be an undesirabe change. The Commission has felt that since radio broadcasting is designed to be operated on a basis of free and competitive private enterprise, and is neither a common carrier nor subject to rate and other financial regulations, it was not and should not be part of the Commission's job in licensing radio stations to consider the effect of the licensing of such station on the economic position of existing stations in the same community, or, conversely, the possible impact of such existing stations on the financial position of the applicant. We have insisted that all applicants demonstrate that they have sufficient financial resources to construct and operate a station to insure that the limited number of available radio frequencies will be adequately utilized to give the listening public maximum radio service. We do not go beyond that to consider the possible economic effects of competition. And I should like to point out that if you do require the Commission to take such factors into consideration, you will be going a long way towards vesting existing stations with a property right in their licenses . . ."

Identification of News Source

Opposing Section 18 of the proposed amendment which would require announcement, before and after news broadcasts, stating the source of news and identifying editorial comment, Mr. Denny agreed that the objective was desirable but questioned the practicality of such a requirement. He said:

"It should be kept in mind that the distinction between fact and interpretation of fact is very fine. Even if a station were to utilize solely the reports from one of the national news services, it is clear that it will be a matter of opinion whether any particular report represents an objective reproduction of the event described or also includes subjective coloring reflecting the writer's own viewpoint. Therefore, I am afraid, in actual operation the section would result in either the making of a routine and perfunctory statement at the beginning and end of all news or opinion programs, which would add little if anything to the existing knowledge of radio listeners, or would involve such subtle subjective determinations on the part of the station licensees as to represent little more than the stations own judgment as to the validity and objectivity of the news reports carried over its facilities. Therefore, we think this section should be deleted."

Political Broadcasts

Mr. Denny objected to two important points in the proposed Section 15, which deals with political broadcasts.

In his first objection he said "the licensee would be forbidden during a political campaign to permit the use of his station for or against any candidate for public office excepting the candidate himself, his qualified opponents, persons authorized by them, or authorized representatives of recognized political parties whose candidate's name appears on the ballot. In the Commission's opinion, this represents a serious limitation on free speech," the FCC Chairman stated.

(Continued on next page)

He went on to say that such a limitation would prevent minority parties which were attempting to get on the ballot at the succeeding election from using the radio. In addition, he continued, news commentators and analysts would probably be prevented from using the air during campaigns, unless they eliminated discussion of the candidates or the election from their talks.

Mr. Denny also objected to the provision which would prohibit political broadcasts for a period beginning 24 hours prior to an election and extending through election day. Designed to prevent the making of sensational charges immediately before an election, without giving the opponent an opportunity to answer, the result would not be accomplished, Mr. Denny said, since the same thing could be done if any deadline were written into the Act.

Multiple Ownership

The Commission, said Mr. Denny, objected seriously to the provision limiting ownership of stations so that no person could provide broadcast service to more than 25% of the people in the United States.

Such a policy, the Chairman went on to say, is contrary to proven procedure whereby the Commission determined the merits of ownership on a case-to-case basis, so far as AM broadcasting was concerned. Mr. Denny added however, that in FM, the Commission had adopted a policy of limiting ownership to six stations and in the television field, five stations. He stated that the Commission is prepared to consider a revision of these limitations if an appropriate showing is made.

He said that the 25% rule, if adopted, would lead to unfortunate results. He calculated that under such a rule, a single person could own stations serving the entire population of 20 of the 22 states west of the Mississippi. He also cited the example of an examination of the last one hundred grants by the Commission without a hearing. He pointed out that the population served by these one hundred grants totaled about 24 million and stated that under the provisions of the White Bill it was possible for one applicant to control each of those stations. Mr. Denny stated emphatically that such ownership was not in the public interest.

Continuing, he emphasized the point that, if adopted, the 25% provision would force three of the four networks to divest themselves of key outlets. Such action, he stated, would decrease materially the ability of those networks to provide a high quality of program service.

Controversial Programs

The new bill provides that the licensee shall not be required to devote more than twice as much time in the aggregate to present different views than was made available to the original users of time, and prohibits the licensee and the FCC from censoring any of the material on programs dealing with controversial issues. Mr. Denny suggested for the Commission, that an additional provision should be included "forbidding the licensee to censor material," but at the same time relieving the licensee of responsibility for libel.

Review of Program Service

The Commission, said Mr. Denny, favored adoption of Section 16 of the White Bill, which gives the agency the power to "review the overall operation of a station in passing upon applications for renewal of licenses. . . ."

Following is a portion of Mr. Denny's testimony on this provision of the bill:

"This section would divide Section 326 into two subsections. Subsection (a) provides that nothing in the Act shall be construed to give the Commission the power to regulate the business of any licensee unless otherwise specifically authorized by the law.

"The purpose of this provision is not clear. Historically, the language set forth in proposed subsection (a) is derived from the Supreme Court's opinion in the *Sanders* case and has been relied on by the industry as showing a lack of statutory authority to promulgate the chain broadcasting regulations. The Supreme Court rejected this contention in the network case. The Commission does not claim the right to regulate the business of licensees.

"Subsection (b) would amend the censorship provision of Section 326. The Commission would have no power to censor, alter or control the substance of radio broadcast material or to interfere with the right and duty of the licensee of any such station to determine the type of material to be broadcast. The section, however, would also expressly recognize the right and obligation of the Commission to review the overall operation of a station in passing upon applications for renewal of licenses to determine whether the licensee has in fact operated in the public interest. The section would thus in effect codify the well established rule of the Brinkley and Shuler cases, ... which upheld the Radio Commission's right, under a similar statute, to deny renewal of a station license where a review of the station's past operation indicated that they had not operated in the public interest. I believe that on the whole the new Section 326(b) represents an improvement on the existing law. It makes explicit what is now implicit, namely that there is a distinction between censorship of radio program material, in which the Commission does not and should not indulge, and the consideration of the overall service of a station, including its program service, in determining whether a station has operated in the public interest."

General

Pres. Truman Withdraws Wakefield Nomination, Names Representative Jones Instead

In a surprise move last week President Truman withdrew the nomination of Commissioner Ray C. Wakefield to succeed himself as a member of the FCC. He nominated instead Representative Robert F. Jones, Republican of Ohio.

Congressman Jones, a native of Lima, now represents the Fourth Ohio Congressional District. Prior to his election to Congress, he served as prosecuting attorney of Allen County (1935-1939).

(Continued on next page)

Commissioner Wakefield's term on the FCC expires next week, June 30th.

Woods, Ream, Petty and Roberson Discuss Procedural Aspects of White Bill

On Wednesday, 18, Don Petty, NAB General Counsel, presented to the Committee NAB's views with respect to the procedural sections of the White Bill. He urged four points especially. First, he recommended that insofar as the procedural provisions of the White Bill differed from the corresponding provisions of the Administrative Procedure Act, passed last year, they be amended to guarantee all persons at least as great rights as they now have under the Administrative Procedure Act. In this connection, he referred to several instances in which the language of the White Bill was less comprehensive than that of the Administrative Procedure Act, thus raising the possibility of doubt and confusion in construction on the part of both the Commission and the courts. He pointed out that while the Administrative Procedure Act provides that no subsequent act of Congress shall be construed to modify it in the absence of specific language to that effect, it is impossible for one Congress to bind a later Congress. Consequently, notwithstanding such provision, in the event of any inconsistency between the White Bill and the Administrative Procedure Act the former would necessarily prevail, being the later act.

Second, he urged the inclusion in the White Bill of language to make it clear that all of the guarantees of the Administrative Procedure Act applied to hearings on applications for initial licenses. There is now some doubt on this question as a result of an exception in the Administrative Procedure Act relating to agency licensing procedures generally.

Third, he suggested that S. 1333 be amended to forbid the Commission to employ any attorneys or other persons for the purposes of reviewing cases heard by trial examiners, except such attorneys as might be assigned separately to individual Commissioners. Such a provision was incorporated in the current labor bill and is designed to assure that that part of the Commission's staff engaged in prosecuting and investigatory functions has no influence on or control over Commission decisions.

Fourth, Mr. Petty emphasized particularly the need for assuring broadcasters reasonable certainty in their operations by forbidding the Commission to revoke licenses and to refuse to renew licenses. Under the amendments proposed by NAB, all revocation and renewal proceedings would be by way of suit by the United States Attorney, brought in the United States District Court for the district in which the station operated, upon complaint by the Commission. Such suits would be fully tried on the facts as well as the law under the ordinary rules of procedure governing district courts, and would be appealable to the circuit courts of appeals and thence to the Supreme Court.

Frank Roberson, chairman of the Legislative Committee of the FCC Bar Association, presented the views of that Association on the procedural sections of S. 1333 on Tuesday (17). Mr. Roberson stated that, in accord with the tradition of the Bar Association, neither he nor it took any position with respect to matters of substance.

In general the Bar Association favored the procedural sections of the Bill because they set out in greater detail than the present Act the rules required to be followed by the Commission in hearings on applications. Specifically, they favored that section which would permit the protest of grants of applications, provided that it was amended to give the Commission power to determine whether any particular protest alleged sufficient facts to warrant the Commission in reopening the proceeding.

The Bar Association approved the proposed transfer rule because it would prevent the Commission from following its present practice of requiring the proposed transferor to permit others than the proposed transferee to bid for the facilities and because it would confine the Commission to a consideration of the qualifications of the transferee without regard to the qualifications of the transferor.

The Bar Association commended generally that provision of the Bill which would exempt radio stations from liability for defamation in the case of political broadcasts on the ground that they are forbidden in any event to censor political scripts. However, Mr. Roberson expressed concern that this provision would prohibit stations from requiring the submission of political scripts in advance.

The Bar Association expressed its approval of that portion of the Bill which gives the Commission power to issue declaratory judgments. He suggested, as did Mr. Petty, that the language of the section be reworded so as to make it clear that the Commission could issue declaratory judgments in order to "remove uncertainty." This would mean that broadcasters who were doubtful as to the legality of their conduct under the Act could, in the sound discretion of the Commission, get a declaration by the Commission as to its interpretation of the Act and their conduct in the light of it.

In conclusion, Mr. Roberson approved section 402 of the Bill which requires the Commission, in the event a court, on appeal, sends a case back to it, to make its subsequent decision on the basis of the record made for the appeal, thus precluding it from reopening the proceedings.

On Thursday (19), Mark Woods, president of the American Broadcasting Company, expressed his approval of the suggestions of Don Petty with respect to the procedural sections of S. 1333.

On Thursday (19), Joseph Ream, Executive Vice President of Columbia Broadcasting System, endorsed "the provisions of S. 1333 relating to matters of procedure insofar as those provisions do not detract from the rights of parties conferred by the Administrative Procedure Act of 1946." At the same time, he agreed substantially with NAB that it should be made clear in S. 1333 that all of the rights guaranteed by the Administrative Procedure Act are intended to be retained in S. 1333 without restriction.

MBS President Kobak Urges that Stations Contribute to Edison Foundation Fund

As Radio Division Chairman of the Thomas Alva Edison Foundation fund-raising campaign, Mutual President Edgar Kobak wishes to direct this message to you:

Sometimes I think that most of our woes in radio vis a vis the public result from a simple fact: the war's end left too many voluntary workers out of work. With time on their hands, they have turned their attention to radio—with a vengeance.

I am happy to report that your correspondent, a not-too-willing volunteer worker, is busy as that well-known bird dog—and glad to be this time. To show the fallacy of the above reasoning, however, it does not mean that I am going to leave you radio executives alone. Not by a long shot! In fact, I'm going to ask you to shell out some cash—some of that mossy material the FCC says we've been coining.

Sometime ago I wrote most of you a letter asking you to contribute to the Thomas Alva Edison Foundation. I've heard from a lot of you, and we're on the way toward raising the $125,000 which has been set as the radio industry's part of the $2,590,000 required to carry out the laudable objectives of the foundation.

In view of the rich heritage radio has received from the genius of Edison, I am sure you will agree that our portion of the total subscription is modest indeed. I am equally certain you would not want our industry to fall short of such a reasonable goal.

You're probably asking yourself: What is this Thomas Alva Edison Foundation going to do? To quote a pamphlet published by the foundation:

"The immediate objectives of the Foundation are three-fold: (1) The preservation of Edison's laboratories and library at West Orange, N. J., (2) The establishment there of the Edison Center for Invention, Discovery, and Research, one of the important activities of which will be to study and make available to all scientists the methods developed by Edison in making his own efforts so productive, (3) The restoration of the nation-wide Edison scholastic competition so that fundamental American concepts of life and government —free enterprise, for example—may be instilled in Young America."

In brief, that will give you some idea. There's a lot more to it, of course. With such personages as Mrs. Charles A. Edison as Chairman, Charles F. Kettering as President, and David Sarnoff, John Studebaker, Harvey S. Firestone, Jr., Mary Pickford, and Lenox Lohr among the Trustees, you need have no doubts about the worthiness of the undertaking nor the efficiency with which it will be executed.

If you'd like more information, would you drop me a line at Mutual in New York? Better still, just make out a check to the Thomas Alva Edison Foundation and send it to me.

EDGAR KOBAK.

P.S. Make a note to deduct this contribution from your income tax.

Radio's Big Job

[*The following editorial is reprinted, by permission of the publisher, from the Memphis* Commercial Appeal.]

Miss Barbara Ward, a governor of the British Broadcasting Corporation, has been over here attending meetings of those interested in radio and traveling about observing our radio in action. She is quite evidently a lady of much firmness of mind, and from what we have been able to observe has a slight tendency to rear back and scatter dicta in all directions.

In Columbus recently, for example, Miss Ward said that the survival of free governments rests in the ability of education to catch up with the task of preparing the masses to share in that government. Radio, she pontificated further, will be the principal means by which this mass education will be carried out. American broadcasting, said she, is not meeting that responsibility. These are exceptionally juicy examples of the statement inclusive.

All in all, Miss Ward reminds us a bit of Gilbert & Sullivan's character who resisted all temptations to belong to other nations, and felt it was greatly to his credit that he was an Englishman. At any rate, the notion that radio exists primarily to "educate the masses," whatever that might mean, is properly subject to brisk and sharp challenge. The thesis is no good at all unless one defines "educate" and "masses."

Primarily, we think, the function of radio is to entertain in a land where the means of education with a big E are so various otherwise. We also deny enthusiastically any suggestion that good entertainment is not educational, one way or another. Miss Ward opines that radio has an obligation to "get straight thinking into the poorest of homes." With that we would agree in principle, but if she has in mind something comparable to some of the dreary cultural efforts we have heard from time to time over her own stations, the idea has one bad defect. No one over here would listen to it for more than the few seconds required to switch stations or turn off the receiver.

It is presumable that Miss Ward is thinking in terms of her own experience with her own people, which is apt to be delusive. Radio in Britain and radio over here are by no means the same thing, and of necessity never will be. The lady said, in summing up her impressions of American broadcasting and its responsibility: "I don't see how anyone recognizing the challenge can think they (radio) are doing a good job." By indirection, that is to say, she says "they" are doing a bad job.

It is interesting to recall that B. B. C. listening fell away to small proportions when programs broadcast for the American armed services were available to the British public during the war. No one in his right mind would claim American broadcasting does not have faults and imperfections. The people engaged in it know all that better than anyone, and are earnest in the effort to remedy defects and obtain improvement. By and large, however, it does a pretty good job and should speak up and say so more often than it does.

(Continued on next page)

Information on NAB Convention Mailed to Membership Last Week

Preliminary information on the 25th Annual NAB Convention was mailed last week to member broadcasters all over the nation as the program outline for the meeting takes shape.

The Convention, at Atlantic City, N. J., September 15-18, will be different in several respects from previous meetings. Having outgrown the type of convention held under one roof, the industry this year will utilize the beach city's Convention Hall for meetings and exhibit space, as well as nine hotels for housing.

Most of the country's radio station executives, it is expected, will arrive on the scene Sunday, September 14, to register, and the NAB Board of Directors will meet on that day. The following day, for the first time in convention history, special clinics are scheduled, to discuss in shirt-sleeve sessions these phases of industry activity: broadcast advertising, employee-employer relations, engineering and programming. In addition, all of the NAB standing committees will hold their meetings.

The Convention's initial general session, to be held on Tuesday, September 16, will be featured by the keynote address of NAB President Justin Miller. That evening, the broadcasters will hold their annual banquet in the Convention Hall Ballroom.

General sessions will occupy the three full days of the convention proper, Tuesday through Thursday, and the NAB Board will hold its post-convention meeting on Friday, September 16. At this meeting, the six newly elected District Directors will officially take over their duties as members of the Board.

To accommodate the expected large turnout, NAB has contracted with nine leading hotels in Atlantic City to house the delegates. Association members may register at these specified hotels through NAB headquarters effective immediately. Those who wish accommodations at other hotels must make their own arrangements.

NAB headquarters officials have urged the membership to pre-register for the convention on the forms mailed to station managers, pointing out that time and expense for all concerned will be saved by following such procedure. Pre-registration, the NAB management stated, also carries with it a priority in the processing of hotel registration requests.

Broadcast Advertising

Retail Hardware Stores Expect Sales Increase In Electrical Appliances

Retail hardware stores will sell an important part of the total national sale of major electrical appliances annually, according to a study made by *Hardware Age*.

A survey of hardware merchants reveals they are expecting sales on electric ironers to be 600% greater than 1940. Electric washers sales are expected to be up 200%, refrigerators up 200%, ranges up 700%, and radio sets up 60%. The expected business was given for the first year of normal production.

Major hardware dealers sell such appliances as electric washing machines, ironers, refrigerators, ranges, water heaters, radios, radio-phonograph combinations, vacuum cleaners, freezer cabinets, water systems, and power lawn mowers.

The latest figures show there are 10,000 major hardware retail stores, 30% of which do 72% of the total sales volume.

Radio station sales staffs may find a new awareness of advertising and merchandising among these retailers.

One-Third of Selling Expense Devoted To Advertising, Promotion and Publicity

Radio stations allocate one-third of their selling expenses to advertising, promotion and publicity, a recently completed NAB study shows.

The study, conducted jointly by the NAB Research Department and the Sales Managers Subcommittee on Promotion, is based on information received from 568 NAB member stations of all sizes excluding ten key network stations. It reveals that the stations' total selling expense is 10.6% of *net* revenue. Salaries, wages and commissions account for 5.8%; advertising, promotion and publicity 3.6%; and other selling expense, 1.2%.

A breakdown of the various data indicates:

1. In general, radio stations tend to spend about one-third of their advertising appropriations in efforts to bring themselves to the attention of time-buyers. The remaining two-thirds is spent in attracting and holding their audience.
2. The practice of spending a large proportion of advertising funds on time-buyer promotion is relatively more common in large stations than in regional or local stations.
3. Small stations are relatively more inclined to spend large portions of their advertising money on audience promotion than are the regional or large stations.
4. There seems to be no significant or consistent trend from 1945 to 1946 in the allocations of advertising funds. Slight increases in certain classes of stations are offset by equally small decreases in others.
5. Although the number of no-network and part-time stations reporting was small, there seemed to be little effect of these two factors on the above trends. What effect there is seems to be in the direction of increasing the proportion of the advertising appropriation on efforts to promote the station to time-buyers.

Small Market Stations

Small Markets Group Discusses Problems Of Chain Store Advertising At Meeting

The NAB Small Market Stations Executive Committee which met in Washington, Thursday and Fri-

(Continued on next page)

day (19-20) discussed many operational problems confronting the small stations of the nation. The Committee took up such subjects as selling radio to chain stores in small cities; BMB and small station market data; commercial public interest programs; libel and lottery laws; the White Bill; FCC relief on the operator requirements; municipal governments' taxation of stations; school fees for sports broadcasting; free time requests under threat and duress; independent telephone companies' excessive rates; improving stations' program structures; community leadership; religious programs; station representatives; sale of network cooperatives; syndicated transcribed programs and other matters of particular interest to the management of the small stations.

The Committee urged that broadcasters in every section of the nation renew their efforts to sell the local outlets of national and regional chain stores. It was brought out that local chain store managers have been "passing the buck" with such statements as "we can't do anything locally, you'll have to see our national headquarters." The Committee stated that with nation-wide sales action by some 1500 stations, chain store resistance will be weakened, especially since NAB is constantly telling radio's story to the chain store national headquarters. It was felt that this is an important sales job that requires every station's cooperation.

Fees for School Broadcasts

In discussing the practice by high schools of charging small stations for sports broadcasting privileges, the Committee cautioned stations against bidding against each other. This was felt a bad practice since small stations do not have extensive budgets for broadcasting such public interest services even though they are sponsored.

Cases where schools attempt to make charges should be reported to state associations and to NAB. It was pointed out that these broadcasts increase attendance of games and bring additional revenue to school treasuries. The Committee heartily endorsed NAB Districts 8, 9 and 11 for recent resolutions against paying fees to schools.

Stations were advised to keep weekly records of all public interest programs, both commercial and sustaining.

Following a discussion of BMB and small station market data, the members drew up a resolution to the effect "that a uniform method of radio audience measurement is necessary and desirable; that BMB provides the best available structure; that long range research, experiment and refinements be undertaken along with a Subscriber Service Bureau; that subscription fees be held low and payable more frequently than once a year; that all future studies omit any reference to non-subscribing stations and networks; that subscribing stations be given information on counties in which less than ten per cent of radio homes are reported as audience, subject to rules and regulations as may be promulgated by the Broadcast Measurement Bureau for its publication and use."

A suggestion came from the Committee that small stations should carefully study the religious broadcasting needs of their areas, work with religious organizations to improve their broadcasts, and supervise closely the allotment of time for a balanced program structure.

Stations were advised to check with their State Utility Commissions about excessive rates charged by independent telephone companies.

The Committee discussed the problems incurred by small stations in complying with FCC rules and regulations relative to first class operators. A subcommittee was appointed to present the small broadcasters' case to the FCC.

Harold Fair, program department director, met with the committee and discussed NAB program assistance to small stations. Mr. Fair urged stations to seek qualified program men, explore fully the services of transcription libraries, news wire services, etc. He invited suggestions from all small stations regarding NAB services.

Stations were urged to secure complete information on network cooperative programs and syndicated transcribed shows. Special emphasis was given to the stations' need for experienced farm directors. It was pointed out that farm broadcasts were highly salable by small stations since many of them are located in rural areas.

Committee members who were present for the meeting include: Wayne W. Cribb, KHMO, chairman; Simon Goldman, WJTN; R. Sanford Guyer, WBTM; Lofton L. Hendrick, KRRV; Robert T. Mason, WMRN; Frank R. Mills, WDWS; and Marshall Pengra, KRNR. John F. Meagher, KYSM, committee member who was recently elected to the NAB Board, was also present for the sessions.

Engineering Department

Progress Is Evident As Conference Goes Into Second Month at Atlantic City

With one month of negotiations behind them, the International Telecommunications Radio Conference at Atlantic City this week appeared to be making more progress than has been evident heretofore.

"Tropical Broadcasting", the knot in the allocations structure, still remained unsettled, although the Central American group located between the Tropic of Cancer and the Tropic of Capricorn were coming closer to agreement among themselves. Originally requesting 1750 kilocycles of exclusive space between 4000 and 8000 kc, the American group finally scaled this down durng the week to 750 kc shared. The Indian delegation was expected to find this entirely unsatisfactory.

Despairing of finding any immediate solution in this band of frequencies, astute and witty Chairman Mao of China changed tactics and switched to the higher band. Here an agreement was reached giving International Broadcasting 300 kilocycles of space in the 21000 kc band. This ups the original U. S. delegation's request by 100 kilocycles. Previously an agree-

(Continued on next page)

ment had been reached allocating 200 kilocycles in the 17700-17900 kc band, and 500 kilocycles from 25600 to 261000 kc. It appeared imminent that likewise 300 kilocycles would be allocated in the 15000 kc band. This would also be 100 kilocycles more than the United States' original request.

These agreements, widening the space for International Broadcasting, were expected to ease the admittedly difficult task of allocating the various individual channels at the forthcoming International High Frequency Broadcasting Conference now scheduled for August 15.

Engineers Discuss Plans for Clinic To Be Held at NAB Convention

The Engineering Executive Subcommittee met at New York City on Friday (20) to discuss plans for the upcoming Atlantic City September 15 Engineering Conference to be held in conjunction with the NAB Convention. The discussion of lectures and papers to be presented occupied the major portion of the meeting time.

Present at the meeting, which was presided over by Royal V. Howard, NAB Director of Engineering, were: Raymond F. Guy, Chief of Radio Facilities, NBC; Earl M. Johnson, Chief Engineer, MBS; William B. Lodge, Director of Engineering, CBS; and Frank Marx, Chief Engineer, ABC.

Research Department

National Spot Activity Continues Climb During May, Rorabaugh Report Shows

National spot continued its steady climb during May with strong buying among the seasonals (insecticides, soft drinks, etc.). According to the June issue of the Rorabaugh Report on Spot Radio Advertising, it was also a healthy month for renewal business with 69% of the accounts holding stet schedules. Another 13% showed increases in the use of markets and stations, 8% curtailed, 4% became newly active or resumed their activity in the medium, and 6% cancelled out.

Among the accounts which expanded their lists of markets and stations during May are:

Alligator Cigarettes, Breyer's Ice Cream, Dawson's Beer, Gemma Cooking Oil, Guittard Ground Chocolate, Hyde Park Beer, Kellogg's Corn Soya, Krank's Shavekreem, Lay Potato Chips, Marshall-Wells Paints & Appliances, Martin Rosenberger Wallpaper, Metropolitan Life Insurance, Mobilgas-Mobiloil-Tavern Products & Bug-A-Boo, Musselman's Applpie, Newsweek, Nu-Maid Margarine, Old Gold Cigarettes, Omega & White Ring Flour, Oscar Mayer Meat Products, OZ Ice Cream Mix, Pestmaster, Phillips Soups & Vegetables, Phillips 66 Gas & Oil & Lee Tires, Pillsbury Pie Crust Mix, Rainier Beer & Ale, Ruppert Beer & Ale, Shell Gas & Oil, Southern Dairies Ice Cream, Tenderay Beef, Tootsie Fudge Mix, Tydol & Veedol, Utica Club Beer, Waltham Watches, Ward's Tip-Top Bread, Wheaties, Whiz & Pecan Pete Candy Bars.

Included in the newly active group are:

American Airlines Service, Carbola DDT, Derby Tamales, General Motors Corp. (Allison Engine Div.), Gulfspray, Hires Root Beer, Look Magazine, Nutti Brittle Candies, O-So Grape, Post's Corn Toasties, Savarin Coffee, Skat, Tartan.

Books for Broadcasters

HANDBOOK OF RADIO WRITING, by Erik Barnouw. c1947. 336 p. $3.00. Little, Brown and Company, 34 Beacon Street, Boston.

This is a revised edition, with new examples, of Mr. Barnouw's 1939 book. Brief chapters on the market and the medium as a whole are followed by a detailed discussion of radio writing techniques.

The good examples culled from a great variety of scripts make the book valuable to the new writer who can profitably learn short cuts from Mr. Barnouw's experience.

HOW TO CONDUCT CONSUMER AND OPINION RESEARCH, edited by Albert B. Blankenship. c1946. 314 p. $4.00. Harper and Brothers, 49 East 33rd St., New York 16.

Twenty-nine authorities from business and government offer their views on sampling surveys in operation.

Those in radio will be especially interested in such sections as "The Office of Radio Research" and discussions on the various methods of radio audience measurement: telephone recall, telephone coincidental, personal door-to-door interview, and mail panels. Also of special interest to broadcast advertisers are the chapters on advertising copy, copy testing, and brands. Good graphs and charts accompany the text.

Public opinion is important to free radio. This is a useful study of methods of polling such opinion.

Public Interest Programming

Ad Council Network Campaigns

The following public-interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of June 30-July 6, 1947 by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what mesages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The

Advertising Council, 11 West 42nd Street, New York 18, New York.

Safety on the Highway

The National Safety Council reports: 1) *More deaths in 1946.* The nation's 1946 motor vehicle death toll of 33,500 was 19% greater than the total of 28,076 for 1945—though it was still about 6,500 below the all-time high of 1941. 2) *More driving.* Vehicle mileage in 1946 is estimated at 39% above 1945, 4% above 1941, the previous high year. With more new cars pouring into the market daily, mileage totals will continue to rise—thus multiplying the danger of traffic casualties unless Americans learn to be more careful than ever before. 3) *Inexperienced drivers.* In 1946 there were 45% more traffic deaths in the 15- to 24-year age group than in 1945. Many teen-age drivers have recently returned from the Armed Services; others are new drivers. Teen-age drivers as a rule have a higher accident rate per mile than any other age group. Stress the seriousness of the accident menace, as revealed in National Safety Council statistics. Remind each listener that accidents don't always happen to someone else—that the chances he takes every day are the very ones that are causing our present big accident totals. Make him realize that HE is a potential accident victim, and that he cannot afford to be careless. Stress the safety campaign theme: "BE CAREFUL! THE LIFE YOU SAVE MAY BE YOUR OWN." Point out that there are one or more violations of the law in almost every motor vehicle accident. The National Safety Council—the recognized authority in the field of public safety—believes that obedience to the law is one of the best ways to promote safety on the highway. Every motorist and every pedestrian should obey traffic signs and signals. Drivers should observe safety and other traffic regulations . . . never drive after drinking . . . keep cars in good condition at all times . . . watch for warnings at grade crossings . . . be alert and careful every moment behind the wheel. Urge every motorist and pedestrian actively to support the safety movement in his own community . . . encourage driver training in high schools . . . teach children the rules of safety on the highway, in the home and everywhere. Listeners should be reminded of the extra need for careful driving in order to avoid Fourth of July accidents. (Fact Sheet No. 15-D)

Help Prevent Forest Fires

Our forests and woodlands are vital to the nation's welfare. America needs timber for homes and thousands of other urgent uses . . . water for irrigation, power and domestic use. In the midst of a critical lumber shortage, our natural resources are suffering appalling losses from forest fires, *9 out of 10 of which are man-made.* Figures compiled on forest fires and the damage done by them show that sharp reductions have been achieved as the result of what advertisers have done to alert Americans to the danger of forest fires and how to prevent them. Over 200,000 forest fires annually lay waste an average of 31,000,000 acres of timberland—an area larger than the State of New York . . . destroy enough timber to build 215,000 two-bedroom homes; enough to make 90 million railroad ties or almost 6 million tons of newsprint . . . tie up almost 1 million man-days of labor . . . cripple watersheds on which many people, industries, and cities depend for pure water, power and light . . . cause soil erosion, floods and serious property damage . . . transform playgrounds into charred wastes—destroying wildlife—robbing America of its peace and beauty. MORE gasoline, tires and time in 1947 mean MORE opportunity for MORE Americans to be careless with fire in 1947. Everyone, therefore, should memorize and follow these four rules of forest fire prevention: 1) Crush out cigarette, cigar and pipe ashes. 2) Break matches in two after after using. 3) Drown all camp fires; then stir and drown again. 4) Find out the law before using fire. Remind Fourth of July weekenders of the simple rules for preventing Forest Fires. (Fact Sheet No. 16-C)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 23. They are subject to change.

Monday, June 23

(10:00 A. M.)

NEW—WDEL, Inc., Wilmington, Del.—For FM facilities.

NEW—Wilmington Tri-State Broadcasting Co., Inc., Wilmington, Del.—For FM facilities.

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—For FM facilities.

NEW—York Broadcasting Co., York, Pa.—For FM facilities.

NEW—Reading Broadcasting Co., Reading, Pa.—For FM facilities.

Further Hearing

(10:00 A. M.)

NEW—United Broadcasting Co., Ogden, Utah—C. P. **1490 kc.,** 250 watts, unlimited.

NEW—Ogden Broadcasting Co., Inc., Ogden, Utah—C. P. **1490 kc.,** 250 watts, unlimited.

KCSU—The Central Utah Broadcasting Co., Provo, Utah—C. P. **1490 kc.,** 250 watts, unlimited.

Thursday, June 26

Further Hearing

(10:00 A. M.)

KTHS—Radio Broadcasting, Inc., West Memphis, Ark.—C. P. to include power and move studio. **1190 kc.,** 25 KW night, 50 KW day, unlimited; DA-Night.

NEW—Radio Broadcasting, Inc., Hot Springs, Ark.—C. P. **550 kc.,** 1 KW night, 5 KW day; DA-Night; unlimited.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—C. P. to change frequency, etc. **1090 kc.,** 1 KW night, DA-Night; 1 KW day, unlimited.

NEW—Hot Springs Broadcasting Co., Hot Springs, Ark.—C. P. **1090 kc.,** 50 KW, unlimited. Facilities of KTHS requested.

Friday, June 27

Oral Argument

(Before the Commission en banc, Room 6121, beginning at 10:00 A. M., in the order listed.)

(1)

WBNX Broadcasting Co., Inc.; News Syndicate Co., Inc.; WMCA, Inc.; Debs Memorial Radio Fund, Inc.; Frequency Broadcasting Corp.; American Broadcasting Co., Inc.; Bernard Fein; WLIB, Inc.; Peoples Radio Foundation, Inc.; Metropolitan Broadcasting Service; N. M. U. Broadcasting Co., Inc.; Amalgamated Broadcasting System, Inc.; Unity Broadcasting Corp. of N. Y.; North Jersey Radio, Inc.; Radio Projects, Inc.; North Jersey Broadcasting Co., Inc.; Radio Corp. of the Board of Missions and Church Extensions of the Methodist Church, Inc.—For FM facilities in the New York area.

(Continued on next page)

Golden Gate Broadcasting Corp., San Francisco, Calif.—**1460 kc.**, 5 KW, unlimited; DA-D&D.

Monterey Bay Broadcast Co., Santa Cruz, Calif.—**1460 kc.**, 1 KW, unlimited; DA-N&D.

Cascade Broadcasting Co., Inc., Yakima, Wash.—**1460 kc.**, 1 KW, unlimited.

San Jose Broadcasting Co., San Jose, Calif.—**1500 kc.**, 1 KW, unlimited; DA-N&D.

Mission Broadcasting Co., San Jose, Calif.—**1490 kc.**, 250 watts, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

1450 KC.

The Commission announced adoption of an Order (B-372) granting construction permit to Radio Station **WKEU, Griffin, Ga.**, to change location of its transmitter and studio and install new transmitting equipment, subject to approval of transmitter site and antenna system by the CAA, and upon condition that construction and installation of the station at the new site be carried out in exact accordance with the Commission's Standards.

At the same time **Special Temporary Authority** was granted for a period of 90 days, authorizing station **WKEU** to operate with 250 watts at its present location pending completion of construction at its proposed new site.

Applications for construction permit, license to cover CP and authority to determine operating power by direct measurement (BP-4485; Docket 7213; BL-1827 and BZ-1625; Docket 7211) were dismissed.

1380 KC.

The Commission adopted an Order granting petition of **Beloit Broadcasters, Inc.**, to sever from the consolidated proceeding (Dockets 7964 and 8169) and grant its application (BP-5617; Docket 8169) for a new station in **Beloit, Wis.**, to operate on 1380 kc., 500 watts, daytime only; conditions.

AM—New CP's Granted

570 KC.

Radio Associates, Biloxi, Miss.—Granted CP for new station to operate on 570 kc., 1 KW, daytime only; engineering conditions. (BP-5801)

610 KC.

Treasure State Broadcasting Co., Inc., Butte, Mont.—Granted CP for a new station to operate on 610 kc., 1 KW, unlimited time, DA-night use. (BP-5943). (Action taken June 14).

690 KC.

Radio St. Louis, St. Louis, Mo.—Granted CP for new station to operate on 690 kc., 1 KW, daytime only; engineering conditions. (BP-5859)

Bloom Radio, Inc., Bloomsburg, Pa.—Granted CP for new station to operate on 690 kc., 1 KW, daytime only, using DA; engineering conditions and provided applicant agrees to satisfy legitimate complaints of blanket interference occurring within the 250 mv/m contour. (BP-5914)

860 KC.

Randall County Broadcasting Co., Canyon, Tex.—Granted CP for new station to operate on 860 kc., 250 watts, daytime only; engineering conditions. (BP-5695)

Western Maryland Broadcasting Corp., Norfolk, Va.—Granted CP for new station to operate on 860 kc., 1 KW, daytime only; engineering conditions. (BP-5923)

930 KC.

Columbia-Montour Broadcasting Corp., Bloomsburg, Pa.—Granted CP for new station to operate on 930 kc., 500 watts, daytime only. (BP-5560)

1230 KC.

Newton Conover Broadcasting Co., Newton, N. C.—Granted CP for new station to operate on 1230 kc., 250 watts, unlimited time; engineering conditions. (BP-5847)

1240 KC.

Hickory Hill Broadcasting Co., Thomson, Ga.—Granted CP for new station to operate on 1240 kc., 250 watts, unlimited time. (BP-5800)

1280 KC.

Mid-Carolina Broadcasting Co., Salisbury, N. C.—Granted CP for new station to operate on 1280 kc., 1 KW, daytime only; engineering conditions. (BP-5322)

1340 KC.

Alaska Broadcasting Co., Seward, Alaska—Granted CP for new station to operate on 1340 kc., 250 watts, specified hours (5 p. m. to midnight); engineering conditions. (BP-5902)

The Snowy Range Broadcasting Co., Laramie, Wyo.—Granted CP for new station to operate on 1340 kc., 250 watts, unlimited time; engineering conditions. (BP-5001)

1370 KC.

Gastonia Broadcasting Service, Inc., Gastonia, N. C.—Granted CP for new station to operate on 1370 kc., 1 KW, daytime only; engineering conditions. (BP-5948)

1400 KC.

Ernest H. Warnock, Middlestown, N. Y.—Granted CP for new station to operate on 1400 kc., 100 watts, unlimited time; engineering conditions. (BP-5916)

The Voice of Fallon, Fallon, Nevada—Granted CP for new station to operate on 1400 kc., 250 watts, unlimited time; engineering conditions. (BP-5831)

1430 KC.

Stephens County Broadcasting Co., Breckenridge, Tex.—Granted CP for new station to operate on 1430 kc., 500 watts, daytime only. (BP-5722)

1450 KC.

Charles W. Ingersoll, Ely, Minn.—Granted CP for new station to operate on 1450 kc., 250 watts, unlimited time; engineering conditions. (BP-5930)

AM—Designated for Hearing

1250 KC.

Morristown Broadcasting Co., Morristown, N. J.—Designated for hearing application for new station to operate on 1250 kc., 1 KW, daytime only. (BP-5841)

1340 KC.

Kickapoo Prairie Broadcasting Co., Inc., Springfield, Mo.—Designated for hearing application for new station to operate on 1340 kc., 250 watts, unlimited time. (BP-5823)

1400 KC.

Northeast Ga. Broadcasting Co., Gainesville, Ga.—Designated for hearing application for new station to operate on 1400 kc., 250 watts, unlimited time. (BP-5659)

(Continued on next page)

1460 KC.

Joseph Henry Broadcasting Co., Inc., Albany, N. Y.; Governor Dongan Broadcasting Corp., Albany, N. Y.—Adopted an order setting for further hearing in a consolidated proceeding, on July 14, the following applications: Joseph Henry Broadcasting Co., Inc. (BP-6123); and its application for temporary license to operate station WOKO upon termination of its present authority (BL-2485); Governor Dongan Broadcasting Corp. (BP-6124), Van Curler Broadcasting Corp. (BP-4395), all seeking the facilities of WOKO, Albany, 1460 kc., 5 KW, unlimited time. (Action taken June 12.)

1490 KC.

WLOE—Douglas L. Craddock, Leaksville, N. C.—Designated for hearing modification of license to increase power from 100 to 250 watts, unlimited time. (BML-1253)

AM—Licenses for New Stations Granted

730 KC.

WKSR—Pulaski Broadcasting Co., Pulaski, Tenn.—Granted license for new station; 730 kc., 250 watts, daytime, and to specify studio location. (BL-2427)

WFAK—Charleston Broadcasters, Charleston, S. C.—Granted license for new station; 730 kc., 1 KW; day. (BL-2414)

1010 KC.

WJVB—Jacksonville Beach Broadcasting Co., Jacksonville Beach, Fla.—Granted license for new station; 1010 kc., 250 watts, daytime. (BL-2420)

1170 KC.

KSDJ—Clinton D. McKinnon, San Diego, Calif.—Granted license for new station; 1170 kc., 1 KW-5 KW-LS, DA, unlimited. (BL-2208)

1230 KC.

KPRL—Leslie Henry Hacker, Paso Robles, Calif.—Granted license for new station; 1230 kc., 250 watts, unlimited; conditions. (BL-2135)

KSWS—McEvoy Broadcasting Co., Roswell, N. Mex.—Granted license for new station; 1230 kc., 250 watts, unlimited. (BL-2432)

1290 KC.

WTUX—Fort Frere Broadcasting Co., Inc., Wilmington, Dela.—Granted license for new station; 1290 kc., 500 watts; day. (BL-2382)

1340 KC.

WCVI—Connellsville Broadcasters, Inc., Connellsville, Pa.—Granted license for new station; 1340 kc., 250 watts, unlimited. (BL-2408)

KWRZ—Grand Canyon Broadcasting Co., Flagstaff, Ariz.—Granted license for new station; 1340 kc., 250 watts, unlimited time. (BL-2394)

1350 KC.

WEEK—West Central Broadcasting Co., Peoria, Ill.—Granted license for new station; 1350 kc., 1 KW-DA, unlimited. (BL-2415)

1400 KC.

KKIN—D. O. Kinnie, Visalia, Calif.—Granted license for new station; 1400 kc., 250 watts, unlimited; conditions; and for change of studio location. (BL-2184)

1450 KC.

KSIG—Acadia Broadcasting Co., Crowley, La.—Granted license for a new station; 1450 kc., 250 watts, unlimited. (BL-2389)

KWCJ—Natchitoches Broadcasting Co., Inc., Natchitoches, La.—Granted license for new station; 1450 kc., 250 watts, unlimited, and to specify studio location. (BL-2417)

1490 KC.

WBUD—Morrisville Broadcasting Co., Morrisville, Pa.—Granted license for new station; 1490 kc., 250 watts, unlimited; conditions; and for change of studio location to 12 So. Pa. Ave., Morrisville. (BL-2255)

KICO—Charles R. Love, Calexico, Calif.—Granted license for new station; 1490 kc., 250 watts; unlimited time, and to specify studio location. (BL-2405)

1510 KC.

KTIM—Marin Broadcasting Co., Inc., San Rafael, Calif.—Granted license for new station; 1510 kc., 1 KW, day, and to specify studio location. (BL-2416)

1570 KC.

KAKC—Public Radio Corp., Tulsa, Okla.—Granted license for new station; 1570 kc., 1 KW, day. (BL-2223)

1580 KC.

WWXL—Central Ill. Radio Corp., Peoria, Ill.—Granted license for new station; 1580 kc., 1 KW, day; conditions. (BL-2317)

AM—Modifications of CP's Granted

WLIP—William L. Lipman, Kenosha, Wis.—Granted modification of CP to install a new transmitter; conditions. (BMP-2775)

KSEI—Radio Service Corp., Pocatello, Idaho—Granted modification of CP for extension of completion date to 7-31-47.

WSNJ—Eastern States Broadcasting Corp., NE of Bridgeton, N. J.—Granted modification of CP for extension of completion date to 7-21-47. (BMP-2796)

WCOC—Miss. Broadcasting Co., Inc., Meridian, Miss.—Granted modification of CP for extension of completion date to 6-19-47.

WBIR—Radio Station WBIR, Inc., Knoxville, Tenn.—Granted modification of CP for extension of completion date to 9-24-47. (BMP-2795)

WOV—Wodaam Corp., New York City, N. Y.—Granted modification of CP for extension of completion date to 7-31-47. (BMP-2789) (Auxiliary). Also modification of CP for extension of completion date for main transmitter. (BMP-2788)

WBAT—Marion Radio Corp., Marion, Ind.—Granted modification of CP to change power to 500 watts and install new transmitter. (BMP-2770)

KFH—Radio Station KFH Co., Wichita, Kans.—Granted modification of CP for extension of completion date to 8-14-47. (BMP-2784)

WARK—Antietam Broadcasting Corp., Hagerstown, Md.—Granted modification of CP for approval of antenna and transmitter location, and to specify studio location. (BMP-2694)

Collinson-Wingate Broadcasting Co., Topeka, Kans.—Granted modification of CP for approval of antenna, to change type of transmitter, approval of transmitter location, and change of studio location. (BMP-2764)

WAPX—United Broadcasting Co., Inc., Montgomery, Ala.—Granted modification of CP for extension of completion date to 7-4-47. (BMP-2767)

WLBC—Donald A. Burton, Muncie, Ind.—Granted modification of CP for extension of commencement and completion dates to 9-7-47 and 12-7-47, respectively. (BMP-2779)

WILX—Carolina-Northwest Broadcasting Co., No. Wilkesboro, N. C.—Granted modification of CP to specify studio location. (BMP-2808)

WBEX—Shawnee Broadcasting Co., Chillicothe, Ohio—Granted modification of CP for approval of antenna, to change type of transmitter and for approval of transmitter and studio locations. (BMP-2685)

(Continued on next page)

WJMX—Atlantic Broadcasting Co., Florence, S. C.—Granted modification of CP to change type of transmitter. (BMP-2763)

WGFG—The Southwestern Mich. Broadcasting Co., Kalamazoo, Mich.—Granted modification of CP to change type of transmitter and extend completion date to 12-12-47. (BMP-2754)

WSFC—Southeastern Broadcasting Co., Inc., Somerset, Ky.—Granted modification of CP for approval of antenna, change type of transmitter, approval of transmitter location, and change studio location. (BMP-2632)

WABZ—Albemarle Broadcasting Co., Albemarle, N. C.—Granted modification of CP for approval of antenna, to change type of transmitter, and for approval of transmitter location. (BMP-2608)

WBYS—Fulton County Broadcasting Co., Canton, Ill.—Granted modification of CP to make changes in vertical antenna, to change transmitter location and studio location, and for extension of completion date to 180 days after grant. (BMP-2797)

WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Granted modification of CP to install a new transmitter. (BMP-2802)

WTTH—The Times Herald Co., Port Huron, Mich.—Granted modification of CP to change type of transmitter, and for approval of antenna and transmitter location. (BMP-2765)

KRTN—Southwest Broadcasters, Inc., Raton, New Mex.—Granted modification of CP for approval of antenna and transmitter location. (BMP-2720)

WIMS—Northern Ind. Broadcasters, Inc., Michigan City, Ind.—Granted modification of CP to change type of transmitter and for approval of antenna and transmitter location. (BMP-2725)

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas—Granted modification of CP for extension of completion date to 9-17-47. (BMP-2805)

KELN—Boulder City Broadcasting Co., Ely, Nevada—Granted modification of CP for extension of commencement and completion dates to 6-22-47 and 9-1-47, respectively.

KXXX—Western Plains Broadcasting Co., Inc., Colby, Kansas—Granted modification of CP for approval of antenna, to change type of transmitter, approval of transmitter location, and to change studio location. (BMP-2697)

KIJV—James Valley Broadcast Co., Huron, S. Dak.—Granted modification of CP to make changes in transmitting equipment. (BMP-2811)

WGOV—E. D. Rivers, Valdosta, Ga.—Granted modification of CP to change type of transmitter, make change in DA and mount FM antenna on top of AM tower, and extend completion date. (BMP-2750)

AM—Miscellaneous Actions

Coastal Broadcasting Co., Lakeland, Fla.—Denied petition requesting the Commission to designate an early hearing date on its application and that of WSIR (Dockets 8039 and 8251).

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Denied petition for leave to intervene in the hearing on application of KYUM (Docket 8399); exceptions noted by Counsel for petitioner.

WDAE—Tampa Times Co., Tampa, Fla.—Granted petition for leave to intervene in the hearing on application of WCNT (Docket 8174).

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Granted petition for leave to amend its application (BP-5973; Docket 8339) so as to change applicant from an individual to a corporation.

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted petition to accept late appearance in re application of WRUF (Docket 8335).

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas—Granted petition for leave to amend its application (BP-4353: Docket 7559) so as to specify a modified DA design. The amendment was accepted and application as amended removed from the hearing docket.

Santa Rosa Broadcasting Co., Santa Rosa, Calif.—Granted petition for leave to amend its application (BP-5855; Docket 8247) so as to add to the application a supplemental engineering statement regarding interference conditions, etc. The amendment was accepted. Insofar as petition requests removal from the docket, it was denied.

WRVA—Larus & Bros. Co., Inc., Richmond, Va.—Granted petition for leave to intervene in the hearing on application of WKAX, Birmingham (Docket 8368).

WELI—Connecticut Radio Foundation, Inc., New Haven, Conn.—Granted petition for leave to intervene in the hearing on application of WAAT (Docket 8336).

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted petition for continuance of consolidated hearing in re its application and that of WLEU, presently scheduled for June 25, and continued same to July 28.

Thomas G. Harris, et al., Austin, Tex.—Granted petition for leave to amend application (BP-4355; Docket 7373) so as to specify 1260 kc., with 1 KW, daytime only, instead of 1340 kc., 250 watts, unlimited. The amendment was accepted and application as amended removed from the hearing docket.

KLX—Tribune Bldg. Co., Oakland, Calif.—Denied petition requesting the Commission to strike Issues Nos. 1 and 3 in Hearing Notice upon its application (Docket 8379).

Radio Broadcasting Associates, Houston, Texas—Granted petition for continuance of hearing presently scheduled for June 26 on its application (Docket 7910), and continued same to August 18.

KOPR—Copper Broadcasting Co., Butte, Mont.—Granted request to dismiss without prejudice application for modification of CP (BMP-2567; Docket 8365).

KIFI—Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho.—Granted petition for leave to amend its application (BP-5978; Docket 8343) so as to specify 1060 kc. instead of 550 kc., etc. The amendment was accepted and application as amended removed from the hearing docket.

Treasure State Broadcasting Co., Inc., Butte, Mont.—The Commission on its own motion removed from the hearing docket application (BP-5943; Docket 8366).

KRIC—KRIC, Inc., Beaumont, Texas—Denied petition for leave to reopen the record in the consolidated proceeding in re Docket 7321, et al.

Panhandle Broadcasting Corp., Amarillo, Tex., and Voice of Amarillo, Amarillo, Tex.—Granted petition for extension of time in which to file proposed findings in re their applications (Docket 7575 and 7722), and the time was extended to 20 days after final action on KFDA's application (BP-4353).

George Arthur Smith, Jackson, Tenn.—Granted petition for extension of time in which to file opposition to petition for reconsideration filed by Jackson Broadcasting Co. (Dockets 7487), and the time was extended to and including June 20.

Wired Music, Inc., Rockford, Ill., and Beloit Broadcasters, Inc., Beloit, Wis.—The Commission on its own motion continued the hearing on these applications from June 18 to July 7, 1947.

KSWO—Okla. Quality Broadcasting Co., Lawton, Okla.—Granted license for change in frequency to 1380 kc., increase in power to 1 KW, hours of operation to unlimited; installation of new transmitter and DA for day and night use, and change in transmitter location. (BL-2388)

KWOS—Capital Broadcasting Co., Jefferson City, Mo.—Granted CP to make changes in vertical antenna and mount FM antenna on top of AM tower. (BP-5576)

(Continued on next page)

WBAX—John H. Stenger, Wilkes-Barre, Pa.—Granted license for increase in power to 250 watts, installation of new transmitter, changes in antenna and change in transmitter and studio locations. (BL-2392)

WFBL—Onondaga Radio Broadcasting, Syracuse, N. Y.—Granted license covering installation of an auxiliary transmitter near Collamer, N. Y. (present site of main transmitter), to operate with 1 KW, DA-N, for auxiliary purposes only. (BL-2344)

WHDL—WHDL, Inc., Town of Alleghany, N. Y.—Granted license for old main transmitter to be used as an auxiliary with 250 watts. (BL-2386)

WSLB—St. Lawrence Broadcasting Corp., Ogdensburg, N. Y.—Granted CP to install new vertical antenna and mount FM antenna on AM tower. (BP-6084)

WBEC—Western Mass. Broadcasting Co., Pittsfield, Mass.—Granted license which authorized installation of new transmitter. (BL-2436)

WMIQ—Iron Mountain-Kingsford Broadcasting Co., Iron Mountain, Mich.—Granted CP to install a new transmitter. (BP-6110)

WJOB—South Shore Broadcasting Corp., Hammond, Ind.—Granted CP to install a new transmitter. (BP-6109)

I & E Broadcasting Co., Dayton, Ohio—Granted petition for extension of time within which to file exceptions to the proposed decision (Docket 7586-7587), and the time was extended to and including July 2.

Metropolitan Houston Broadcasting Co., Houston, Tex.—Granted petition for leave to amend its application (BP-5175; Docket 8375), so as to add the names of H. J. Griffith, Frank M. Dowd and Joe H. Torbett as partners in applicant partnership.

Pryor Dillard, Raymondville, Tex.—Granted petition to accept late appearance of petitioner in re his application. (BP-5468; Docket 8157)

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted petition for leave to intervene in the hearing on application of WAAF. (BP-4796; Docket 8400)

Monterey Bay Broadcasting Co., Santa Cruz, Calif.—Granted petition for leave to intervene in the hearing on application of KORE. (BP-5470; Docket 8008)

WRIB—R. I. Broadcasting Co., Providence, R. I.—Granted petition to accept late appearance in re its application for modification of CP. (BMP-2479; Docket 8298)

(Continued on next page)

on 1520 kc., power of 250 watts, and unlimited hours of operation.

NEW—Lake County Broadcasting Corp., Hammond, Ind.—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 5 KW, daytime hours of operation with directional antenna.

NEW—Monroe Publishing Co., Monroe, Mich.—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts, and daytime hours of operation.

NEW—Floral City Broadcasting Co., Monroe, Mich.—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts, and daytime hours of operation.

1580 KC.

NEW—Benlee Broadcasting Co., Patchogue, N. Y.—Construction permit for a new standard broadcast station to be operated on 1580 kc., power of 250 watts, and daytime hours of operation.

AM—Application Dismissed

1450 KC.

KGFF—KGFF Broadcasting Co., Inc., Shawnee, Okla.—Modification of construction permit (B3-P-5312, which authorized installation of new vertical antenna) to mount FM antenna on AM tower, and change transmitter location and for extension of completion date. Dismissed June 11, 1947, request of attorney.

AM—Application Received and Dismissed

1360 KC.

WGFG—The Southwestern Michigan Broadcasting Co., Kalamazoo, Mich. (Harold F. Gross)—Modification of construction permit (B2-P-4335, as modified, which authorized a new standard broadcast station) for extension of completion date. Dismissed June 11, 1947, request of applicant.

AM—Application Returned

1240 KC.

KBMY—Billings Broadcasting Co., Billings, Mont. (Don C. Foote, John W. Foote, Robert E. Mulvaney, Willard Mulvaney, Horace S. Davis, and Rockwood Brown, Co-Partners)—Authority to determine operating power by direct measurement of antenna power. Incomplete.

FREQUENCY MODULATION

FM—Docket Cases

The Commission announces its **Proposed Decision** (B-373) looking toward the grant of the applications of **Unity Broadcasting Corp. of Pennsylvania, Independent Broadcasting Company**, and **Franklin Broadcasting Corp.** (Dockets 7643, 7645 and 7818) for Class B FM stations in **Philadelphia, Pa.**, each grant for 20 KW effective radiated power, with antenna height of 500 feet above average terrain, subject to CAA approval of antenna structure location and height, and specific channel assignments to be made at a later date. At the same time the Commission proposes to continue similar application of **Patrick Joseph Stanton** in a hearing status (Docket 7646), and to dismiss similar application of **WDAS Broadcasting Station, Inc.** (Docket 7640) without prejudice to any action that company, through its present ownership, might take with respect to applying for FM facilities in Philadelphia.

The Commission announces adoption of an Order (B-332), making final its decision in the **Chicago FM** cases, granting construction permits for Class B stations in Chicago, as follows (power is effective radiated power, antenna is height above average terrain):

1. **Amalgamated Broadcasting System, Inc.**—Channel No. 290, 105.9 mc.; 19 KW; 520 feet (BPH-674; Doc. 7136).

2. **American Broadcasting Co., Inc.**—Channel No. 234, 94.7 mc.; 15 KW; 595 feet (BPH-221; Doc. 7137).

3. **Balaban & Katz Corp.**—Channel No. 242, 96.3 mc.; 17 KW; 665 feet (BPH-729; Doc. 7138).

4. **Chicago Federation of Labor**—Channel No. 282, 104.3 mc.; 22 KW; 575 feet (BPH-120; Doc. 7139).

5. **Drovers Journal Publishing Co.**—Channel No. 278, 103.5 mc.; 12.5 KW; 600 feet (BPH-174; Doc. 7140).

6. **UAW-CIO Broadcasting Corp. of Ill.**—Channel No. 286, 105.1 mc.; 20 KW; 500 feet (BPH-441; Doc. 7142).

7. **National Broadcasting Co., Inc.**—Channel No. 266, 101.1 mc.; 25 KW; 600 feet (BPH-137; Doc. 7146).

8. **Radio Station WGES**—Channel No. 230, 93.7 mc.; 20 KW; 490 feet (BPH-609; Doc. 7151).

9. **WJJD, Inc.**—Channel No. 262, 100.3 mc.; 17 KW; 545 feet (BMPH-75; Doc. 7152).

10. **Radio Station WSBC**—Channel No. 270, 101.9 mc.; 31 KW; 420 feet, conditions (BPH-716; Doc. 7153).

FM—Conditional Grants

Continental Broadcasting Co., Atlantic, Iowa—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1120)

Evangeline Broadcasting Co., Inc., Lafayette, La.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details. (BPH-1254)

Western Carolina Radio Corp., Shelby, N. C.—Authorized conditional grant for a Class B station, subject to further review and approval of engineering details, and allocated Channel No. 241 to Shelby. (BPH-1242)

FM—Modifications of CP's Granted

WSNJ-FM—Eastern States Broadcasting Corp., Bridgeton, N. J.—Granted modification of CP for extension of completion date to 7-31-47. (BMPH-428)

WMBS-FM—Fayette Broadcasting Corp., Uniontown, Pa.—Granted modification of CP for extension of commencement and completion dates to 4-15-47 and 10-15-47, respectively. (BMPH-358)

WLSU—Board of Supervisors of La. State University, etc., Baton Rouge, La.—Granted modification of CP to specify frequency as Channel #219, 91.7 mc., power as 205 KW; change transmitter location and change type of transmitter and make changes in antenna system. (BMPED-53)

WHYN-FM—The Hampden-Hampshire Corp., Holyoke, Mass.—Granted modification of CP for extension of commencement and completion dates to 6-29-47 and 9-29-47, respectively. (BMPH-423)

WGNC-FM—F. C. Todd, Gastonia, N. C.—Granted modification of CP for extension of completion date to 8-31-47. (BMPH-420)

WNYC-FM—City of New York, Municipal Broadcasting System, New York City—Granted modification of CP for extension of completion date to 12-25-47. (BMPH-418)

WEHS—WHFC, Inc., Chicago, Ill.—Granted modification of CP for extension of completion date to 12-25-47 (BMPH-426)

WTAD-FM—Lee Broadcasting, Inc., Quincy, Ill.—Granted modification of CP for extension of completion date to 9-30-47. (BMPH-429)

WPEN-FM—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted modification of CP for extension of completion date to 12-24-47. (BMPH-425)

KALE-FM—KALE, Inc., Portland, Ore.—Granted modification of CP for extension of completion date to 12-18-47. (BMPH-397)

(Continued on next page)

WDNC-FM—Durham Radio Corp., Durham, N. C.—Granted modification of CP for extension of completion date to 9-8-47. (BMPH-452)

KPRA—Pacific Radio Advertising Service, Portland, Ore.—Granted modification of CP for extension of completion date to 8-6-47 (BMPH-372)

KDNT-FM—Harwell V. Shepard, Denton, Tex.—Granted modification of CP for extension of completion date to 12-16-47 (BMPH-422)

KMED-FM—Mrs. W. J. Virgin, Medford, Ore.—Granted modification of CP to extend completion date to 9-1-47. (BMPH-175)

WFBR-FM—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted modification of CP for extension of completion date to 12-30-47. (BMPH-408)

KLTI—R. G. LeTourneau, Longview, Tex.—Granted modification of CP to change studio and transmitter locations, and change commencement and completion dates to 10 days from date or grant and 90 days thereafter, respectively. (BMPH-392)

WFNS-FM—Burlington-Graham Broadcasting Co., Burlington, N. C.—Granted modification of CP to make changes in antenna system. (BMPH-321)

KXOK-FM—Star-Times Publishing Co., St. Louis, Mo.—Granted modification of CP to extend completion date to 1-3-48. (BMPH-433)

FM—Channel Assignments to Proposed Grantees

The Commission adopted a Supplement to Proposed Decision in the New York FM proceeding, specifying the following frequency and channel assignments to the proposed grantees:

WMCA, Inc.—Channel No. 222—92.3 mc.

News Syndicate Co., Inc.—Channel No. 286—105.1 mc.

Unity Broadcasting Corp. of New York—Channel No. 278—103.5 mc.

American Broadcasting Co., Inc.—Channel No. 238—95.5 mc.

North Jersey Broadcasting Co., Inc.—Channel No. 282—104.3 mc.

Adopted a Supplement to Proposed Decision, in the Bridgeport-Danbury, Conn., proceeding, specifying the following frequency and channel assignments to the proposed grantees:

Bridgeport Herald Corp.—Channel No. 248—97.5 mc.

Harold Thomas—Channel No. 260—99.9 mc.

Harry F. Guggenheim—Channel No. 268—101.5 mc.

Adopted a Supplement to Proposed Decision, in the Philadelphia FM proceeding, specifying the following channel assignments and frequencies to the proposed grantees:

Franklin Broadcasting Corp.—Channel No. 291—106.1 mc.

Unity Broadcasting Corp. of Pa.—Channel No. 279—103.7 mc.

Independence Broadcasting Co.—Channel No. 287—105.3 mc.

FM—Miscellaneous Actions

American Jewish Congress, New York City, N. Y.—Granted petition for extension of time within which to file exceptions to the Proposed Decision of the Commission granting application of News Syndicate Co., Inc., for a new FM station (BPH-87; Docket 6175), and the petitioner was granted leave to file exceptions in this matter on or before June 20, 1947.

News Syndicate Co., Inc., New York, N. Y.—Dismissed the motion of petitioner to strike the exceptions, request for oral argument and brief filed May 20, 1947, by the American Jewish Congress (Doc. 6175); and granted motion for time to reply to exceptions, etc., to Proposed Decision; extended to June 26, 1947, the time within which the News Syndicate Co., Inc., may file a reply to the exceptions of the American Jewish Congress.

News Syndicate Co., New York City, N. Y.—Denied petition for review of the action of the Motions Commissioner which granted the American Jewish Congress leave to file exceptions in the New York FM proceeding. (Action taken June 14.)

Mayflower Broadcasting Co., Huntington, W. Va.—Granted applicant's request to vacate the CP authorized for a new Class A FM station (BPH-951) "due to change in the plans of the company."

Keystone Broadcasting Corp., Harrisburg, Pa., et al.—Granted joint petition in part, for continuance of consolidated hearing on FM applications (Dockets 8291-92-93) presently scheduled for June 23, and continued same to July 7.

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—Granted petition requesting the Commission to accept Supplemental Exceptions and a Memorandum Brief filed June 6, in re its FM application (BPH-112; Docket 6178).

FM—Applications Accepted for Filing

NEW—Shroyer Radio Corp., Shamokin, Pa. (P. O. 1016 North Shamokin street)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned in the 100 mc. band and effective radiated power of 1 KW.

WEAW—North Shore Broadcasting Co., Inc., Evanston, Ill.—Modification of construction permit (B4-PH-608, which authorized a new FM broadcast station) for extension of completion date.

WJBC-FM—Bloomington Broadcasting Corp., Bloomington, Ill.—Modification of construction permit (B4-PH-236, which authorized a new FM broadcast station) for extension of completion date.

WLAL—United Garage and Service Corp., Lakewood, Ohio—Modification of construction permit (B2-PH-562 which authorized a new FM broadcast station) to change type of transmitter, effective radiated power to 1 KW and make changes in antenna system.

WFMO—Fidelity Media Broadcasting Corp., New Jersey, N. J.—Modification of construction permit (B1-PH-325, as modified) which authorized a new FM broadcast station for extension of completion date.

WMRC-FM—Textile Broadcasting Co., Greenville, S. C.—Modification of construction permit (B3-PH-317 as modified) which authorized a new FM broadcast station for extension of completion date.

WEW-FM—St. Louis University, St. Louis, Mo.—Modification of construction permit (B4-PH-37 as modified) which authorized a new FM broadcast station for extension of completion date.

KGBS-FM—Harbenito Broadcasting Co., Inc., Harlingen, Texas—Modification of construction permit (B3-PH-319, as modified) which authorized a new FM broadcast station for extension of completion date.

Claudia T. Johnson, Austin, Texas—Voluntary assignment of conditional grant to Texas Broadcasting Corporation.

KWFT-FM—Wichita Broadcasters, Wichita Falls, Texas (Joe B. Carrigan, Mrs. Joe B. Carrigan, P. K. Smith, trustee, P. K. Smith and Mrs. Claude M. Simpson, Jr.)—Modification of construction permit (B3-PH-994 which authorized a new FM broadcast station) to change frequency to channel #260, 99.9 mc., antenna height above average terrain, effective radiated power to 9.7 KW and make changes in antenna system.

Northeast Georgia Broadcasting Co., Gainesville, Ga. (P. O. Gainesville, Ga.)—Construction permit for new FM broadcast station (Class A) to be operated on frequency channel #265, 100.9 mc., effective radiated power of 304 watts and antenna height above average terrain 254 feet.

(Continued on next page)

WMCK-FM—Mon-Yough Broadcasting Co., McKeesport, Pa.—Modification of construction permit (B2-PH-910, as modified which authorized a new FM broadcast station) for extension of completion date.

Syndicate Theatres, Inc., Wabash, Ind. (P. O. 57½ North Main Street, Franklin, Ind.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC, ERP of 31.6 KW.

WKIL—Kankakee Daily Journal Co., Kankakee, Ill.—Modification of construction permit (B4-PH-717 as modified, which authorized a new FM broadcast station) for extension of completion date.

KWIN-FM—Rogue Valley Broadcasting Co., Inc., Ashland, Ore.—Modification of construction permit (B5-PH-1030 which authorized a new FM broadcast station) for extension of commencement and completion dates.

WIP-FM—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (B2-PH-1060, which authorized a new FM broadcast station) to make changes in antenna system and change commencement and completion dates.

KGNC-FM—Plains Radio Broadcasting Co., Amarillo, Tex.—Modification of construction permit (B2-PH-529, which authorized a new FM broadcast station) for extension of commencement and completion dates.

NEW—The Bethesda Free Church of Minneapolis, Minn., Minneapolis, Minn. (P. O. 2600 East 38th St.)—Construction permit for a new FM (Class B) broadcast station to be operated on frequency to be assigned by FCC with effective radiated power of 2278 watts.

KROC-FM—Southern Minnesota Broadcasting Co., Rochester, Minn.—Modification of construction permit (B4-PH-363, which authorized a new FM broadcast station) for extension of commencement and completion dates.

FM—Application Returned

WBNY-FM—Roy L. Albertson, Buffalo, N. Y.—Modification of construction permit (B1-PH-602, as modified which authorized a new FM broadcast station) for extension of completion date. Incomplete.

TELEVISION

TV—New Experimental CP's Granted

Havens & Martin, Inc., Richmond, Va.—Granted CP for new experimental television relay broadcast station. (BPVB-203)

Crosley Broadcasting Corp., Portable-Mobile, area of Cincinnati, Dayton and Columbus—Granted CP for a new experimental television relay station. (BPVB-205)

TV—Experimental CP Deleted

W1XDZ—Cherry & Webb Broadcasting Co., near Providence, R. I.—Construction permit for a new experimental television broadcast station to be operated on frequency to be assigned by FCC in band from 480-920 mc., power not to exceed 1 KW, emission special for color television and unlimited hours of operation. Deleted June 12, 1947.

TV—Miscellaneous Actions

W3XHC—Allen B. DuMont Labs., Inc., Portable-Mobile, area of Washington, D. C.—Granted license for new experimental television relay station. (BLVB-87)

Nat'l Broadcasting Co., Inc., Portable-Mobile, area of Washington, D. C.—Granted license for new experimental television relay station. (BLVB-85)

The Evening Star Broadcasting Co., Mobile, area of Washington, D. C.—Granted license for new experimental television relay broadcast station. (BLVB-86)

WXDP—The St. Louis University, St. Louis, Mo.—Granted modification of CP for extension of commencement and completion dates to 6-3-47 and 12-3-47. (BMPVB-164)

WOI-TV—Iowa State College of Agr. and Mechanic Arts, Ames, Iowa—Granted modification of CP for change of transmitter location, and to change antenna system. (BMPCT-63)

KSD-TV—The Pulitzer Publishing Co., St. Louis Mo.—Granted modification of CP for extension of completion date to 9-11-47. (BMPCT-67)

WOIC—Bamberger Broadcasting Service, Inc., Washington, D. C.—Granted modification of CP for extension of completion date to 12-23-47. (BMPCT-66)

WWJ-TV—The Evening News Assn., Detroit, Mich.—Granted modification of CP for extension of completion date to 12-9-47. (BMPCT-69)

Television

Philco Television Broadcasting Corp.—Granted construction permits (BPVB-193, 194, 195, 196 and 197) to change frequencies, emissions, transmitter locations and antenna systems of the following 5 experimental television relay stations: W10XP, W10XPB, W10XPC, W3XPL and W3XPF, to 1340-1360 mc. and 1400-1420 mc. (subject to change in accordance with proceedings in Docket 6651); A5, A3, Special for FM; locations: Philadelphia and New York, N. Y., to provide a two-way microwave radio link system between New York and Philadelphia for the purpose of experimenting with a multiple hop television inter-city relay system. It is planned to relay programs from WNBT, New York, to WPTZ in Wyndmoore, near Philadelphia, with a repeater at Mount Rose, N. J. It is also planned to do the same from the studios of WPTZ in Philadelphia, to WPTZ transmitter, and then to New York, with a repeater stop at Mount Rose again. Provisions are also being made to connect with other circuits such as one to WRGB at Schenectady.

General Electric Co.—Granted authority to retain Class I experimental license for stations W2XCH, W2XIE, W2XNR, W2XNS, for equipment design and testing purposes; issued an experimental television broadcast license for stations employing the same equipment to operate in accordance with 4.101(b).

TV—Applications Accepted for Filing

WABD—Allen B. DuMont Laboratories, Inc., New York, N. Y.—Modification of construction permit (BPCT-177) to request new aural transmitter and to install new antenna; to change designation of maximum power output of visual transmitter.

W9XBB—Balaban and Katz Corp., area of Chicago, Ill.—License to cover construction permit (BPVB-191) which authorized installation of new visual transmitter, changes in frequency, power, emission and antenna system.

KSTP-TV—KSTP, Inc., St. Paul, Minn.—Modification of construction permit (B4-PCT-130, as modified, which authorized a new commercial television broadcast station) for extension of commencement and completion dates.

WTVR—Havens and Martin, Inc., Richmond, Va.—Modification of construction permit (B2-PCT-29, as modified, which authorized a new commercial television broadcast station) for extension of completion date.

W2XQW—Allen B. Du Mont Laboratories, Inc., area of New York, N. Y.—License to cover construction permit (BPVB-189) which authorized a new experimental television relay broadcast station.

W3XHD—Allen B. Du Mont Laboratories, Inc., area of Washington, D. C.—License to cover construction permit (BPVB-187) which authorized a new experimental television relay broadcast station.

WNBT—National Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (BPCT-169 as modified) which authorized a new commercial television broadcast station.

(Continued on next page)

W2XNJ—North Jersey Broadcasting Co., Inc., Clifton, N. J.—Modification of construction permit (BPVB-177) which authorized a new experimental television broadcast station) for extension of commencement and completion dates.

WTVW—The Evening Star Broadcasting Co., Wash., D. C.—Modification of construction permit (B1-PCT-141, as modified, which authorized a new commercial television broadcast station) for extension of completion date.

NEW—The Yankee Network, Inc., Boston, Mass. (P. O. 21 Brookline Ave.)—Construction permit for a new commercial television broadcast station to be operated on Ch. #7, 174-180 mc., with power of 5 KW, visual and 2.5 KW, aural.

WRTB—Raytheon Manufacturing Co., Waltham, Mass.—Modification of construction permit (B1-PCT-102, as modified, which authorized a new commercial television broadcast station) for extension of commencement and completion dates.

MISCELLANEOUS BROADCAST

Actions

Remote Pickup

Kenneth Edward Rennekamp, Mobile, area of Oil City, Ia.—Granted CP for new remote pickup station. (BPRY-345)

KBWZ—Western Waves, Inc., Mobile, area of Seattle, Wash.—Granted CP for a new remote pickup broadcast station. (BPRY-346)

WSIA—Commodore Broadcasting, Inc., Decatur, Ill.—Granted modification of CP for extension of completion date to 7-24-47. (BMPRE-66)

WDON—Commodore Broadcasting, Inc., Decatur, Ill.—Granted modification of CP for extension of completion date to 7-24-47. (BMPRE-65)

WENM—The Evening News Association, Mobile, through United States (P. O. Detroit, Mich.)—Low frequency relay station, operating on frequency of 1606, 2022, 2102 and 2758 kc., power of 100 watts and A-3 emission. Deleted June 10, 1947.

KBWZ—Evergreen Broadcasting Corp., area of Seattle, Wash. (P. O. 2102 Smith Tower)—Relay broadcast station operating on 1622, 2058, 2150 and 2790 kc., power of 20 watts with A3 emission. Deleted June 10, 1947.

Noncommercial Educational

WUOM—The Regents of the Univ. of Mich., Ann Arbor, Mich.—Granted modification of CP for extension of completion date to 12-16-47. (BMPED-65)

KOKU—State Univ. of Okla., Norman, Okla.—Granted modification of CP to change transmitter site. (BMPED-63)

KSUI—The State Univ. of Iowa, Iowa City, Iowa—Granted modification of CP for extension of completion date to 10-16-47. (BMPED-62)

KCRW—Santa Monica School Board, Santa Monica, Calif.—Granted modification of CP to change type of transmitter and make changes in antenna system. (BMPED-64)

Developmental CP Deleted

W3XOL—Cowles Broadcasting Co., Wheaton, Md. (P. O. 1627 K Street, Wash., D. C.)—Construction permit for a new developmental broadcast station to be operated on frequency between 485-600 mc. as assigned by the FCC and special emission for television with power of 3 KW. Deleted June 9, 1947.

Applications

Noncommercial Educational

KRVM—School District #4, Lane County, Oregon, Eugene, Ore.—Modification of construction permit (B5-PED-68, as modified) which authorized a new noncommercial educational broadcast station to change type of transmitter and make changes in antenna system.

WBGO—The Board of Education of Newark in the County of Essex, Newark, N. J.—Modification of construction permit (B1-PED-50, as modified) which authorized a new noncommercial educational broadcast station for extension of completion date.

WBGO—The Board of Education of Newark in the County of Essex, Newark, N. J.—License to cover construction permit (B1-PED-50, as modified) which authorized a new noncommercial educational broadcast station.

Remote Pickup

WRGF—Miami Broadcasting Co., area of Miami, Fla.—Modification of construction permit (B3-PRE-471, which authorized a new remote pickup broadcast station) for extension of completion date.

KPLM—Emporia Broadcasting Co., Inc., area of Emporia, Kans.—License to cover construction permit (BPRY-341) which authorized a new remote pickup broadcast station.

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Gevertz Buying Corp., etc.—Violation of the brokerage section of the Robinson-Patman Act is alleged in a complaint issued by the Commission against Gevertz Buying Corp.; Madeline Gevertz and Charles R. Gevertz as officers of the corporation and as individuals trading as Charles R. Gevertz Stores; and Clifford Spitzer and Violet Prager Spitzer, copartners, trading as Pacific Exporting Co., all of 170 Fifth Ave., New York. (5501)

STIPULATIONS

Brown & Williamson Tobacco Corp.—The Commission accepted from Brown & Williamson Tobacco Corp., Louisville, Ky., a stipulation to cease and desist from advertising that Raleigh cigarettes are "right for the throat." The corporation also agrees to discontinue any other representation to the effect that Raleigh's have been adapted to or made suitable for the throat so that the smoke from such cigarettes is beneficial to the throat or less harmful to the throat than the smoke from other cigarettes. (7618)

Nash & Kinsella Laboratories, Inc., 800 East Big Bend Road, Kirkwood, Mo., entered into a stipulation with the Commission to cease and desist from representing that application of N & K DDT Insecticide Paint to screens, light bulbs and fixtures will provide fly and mosquito control for an entire house, or that one or two applications of the product will control flies or mosquitoes for an entire year. (7617)

Niagara Units, Inc.—An agreement to discontinue numerous representations as to the therapeutic properties and effectiveness of mechanical massage devices designated Niagara Health Units has been accepted by the Commission from Niagara Units, Inc., 15 East 47th St., New York, and its president, Edwin H. Tompkins. (7616)

CEASE AND DESIST ORDERS

E. H. Roberts Portrait Co., 1000 Holmes St., Kansas City, Mo., its officers and 17 of its representatives and sales agents

(Continued on next page)

have been ordered by the Commission to cease and desist from practices tending to mislead and deceive the purchasing public with respect to the nature of their business and the quality and value of tinted or colored enlargements and miniatures of photographs, as well as frames for such reproductions. (4692)

Mohawk Chemical Products, Inc.; Bainbridge, Kimpton & Haupt, Inc.—An order to cease and desist from misrepresentation of a fluid designated "Sten-O-Fren," which is recommended for use on rubber products such as typewriter platens, has been served by the Commission on Mohawk Chemical Products, Inc., 1420 Cahill St., Philadelphia, and Bainbridge, Kimpton & Haupt, Inc., 218 Greenwich St., New York. (5200)

COMPLAINT DISMISSED

Sal-Fayne Corp.—The Commission dismissed its complaint charging Sal-Fayne Corp., 801 Patterson Blvd., Dayton, Ohio, with disseminating advertisements which fail to reveal the danger that may result from overdosage of Sal-Fayne, a medicinal preparation recommended for the relief of neuralgia and headache pains and muscular aches. (5241)

CASE DISMISSED

Mid-Continent Petroleum Corp.—A complaint charging Mid-Continent Petroleum Corp., Tulsa, Okla., with misrepresentation in the sale of "D-X" motor fuel was dismissed by the Commission on the ground that the charges "were not sustained by the greater weight of the evidence." (4065)

Leaders of Mass Communications Media Meet to Discuss Threats to Freedoms

Representatives of the broadcasters, magazine publishers, book publishers, newspaper publishers, and motion pictures met Thursday (26) in an all-day session at the invitation of NAB President Justin Miller. They were received by President Truman at the White House.

Threats to their fundamental freedoms and to individual rights under the First Amendment of the Constitution, which provides that "Congress shall

(Continued on page 528)

Trammell Reveals High Speed Transmission, Opposes White Bill at Senate Hearing

Opening Monday's testimony at the White Bill hearings, Niles Trammell, president, NBC, pointed up the importance of a radio as free as the free press, when he announced the development by RCA, of ULTRAFAX, a new high-speed communications system which he said "could transmit twenty 50,000-word novels from New York to San Francisco in only 60 seconds."

Continuing, Mr. Trammell explained: "Each printed page is treated as a frame of a television picture, and each page is flashed in rapid succession. At the receiving end, the pages are reproduced by new high-speed photograpic processes for quick delivery."

The NBC executive said that radio's regulatory body should be given definite limits and forbidden to go beyond those limitations "so as to assure no interference with the rights of a free radio. We believe," he continued, "the Commission should be denied any authority involving control of the program service that the American people are to receive."

On the Inside

Proposals to utilize 540 Kc for broadcast assignment was adopted Friday by the delegates to the International Communications Conference at Atlantic City. (p. 531)

Charging ASCAP with violations of the anti-trust laws, the U. S. Attorney General has filed a suit against the music licensing organization because of its agreements with foreign licensing groups. (p. 531)

At its recent meeting, the BMB Board decided to suspend its plans for a study in 1948. A plan for financing the organization on a long-term basis is being considered. (p. 532)

Testimony by NAB President Justin Miller before the Senate subcommittee on the White Bill has received the commendation of a number of leading broadcasters. (p. 536)

AFM President James C. Petrillo was subpoenaed to appear on July 7, before a subcommittee of the House Labor Committee investigating the musicians' union. (p. 529)

Taft-Hartley Act Requires Analysis; Supreme Court Upholds Lea Act

The following is a preliminary summary of the provisions of the Taft-Hartley Act which become law, over the President's veto, last week. A condensed summary of the Supreme Court decision upholding the constitutionality of the Lea Act, is also published for membership information.

The passage of the Labor-Management Relations Act of 1947 (Taft-Hartley Act) has prompted widespread concern by broadcasters over their new rights and responsibilities. To answer these questions, a comprehensive analysis of general radio problems arising under the Act is being prepared by the NAB and a special bulletin will be distributed to all members for the general information of station managers

(Continued on page 528)

Membership to Vote on Proposal That FM, TV, FX Have Board Representation

Three moves affecting FM activities at the NAB were announced Friday (27).

A plan which would give the newer radio services, FM, television, and facsimile, direct representation on the NAB Board of Directors will be submitted to the membership of the organization in the near future for a referendum vote, association officials said. This proposed change in the structure of the NAB policy-making body was approved, in the form of an amendment to the by-laws, at the last meeting of the Board.

The amendment under consideration would provide for four new directors-at-large: one each from FM stations in Class A, FM station in Class B, television stations and facsimile stations. The provisions for this particular type of representation be-

make no law . . . abridging the freedom of speech or of the press," were reviewed.

The individual members of the group agreed to report the result of their deliberations to the Boards of Directors of their respective associations.

Among those present were: Melville Minton, president, American Book Publishers Council; Harry F. West, managing director, American Book Publishers Council; David W. Howe, president, American Newspaper Publishers Association; Colonel James Hale Steinman, chairman of the ANPA Federal Laws Committee; Kenneth Clark, director of information, Motion Picture Association; Donald S. Russell, attorney, Motion Picture Association; Judge Justin Miller, president, NAB; A. D. Willard, Jr., executive vice president, NAB; William L. Chenery, chairman of editorial committee, National Publishers Association; Donald Nelson, president, Society of Independent Motion Picture Producers.

Paul Miller, assistant general manager, Associated Press, attended as an observer.

Taft-Hartley Act Requires Analysis; Supreme Court Upholds Lea Act

(Continued from page 527)

and attorneys. The employee-Employer Relations Committee and the General Counsel will meet on July 21 to evaluate the probable effects of the new labor law and the Lea Act upon the industry. *Until there has been further clarification of the Taft-Hartley Act as regards radio broadcasting, it is advisable that broadcasters continue to operate under the terms of their existing contracts and new contracts should be entered into very cautiously. In each of the latter cases, facts will tend to vary. For this reason, broadcasters and their attorneys should study the law in relation to the individual facts pertaining.*

Regarding possible changes in station policy as a result of the Supreme Court's decision on the Lea Act, broadcasters should bear in mind that: (1) all proceedings under the Act are within the jurisdiction and supervision of the United States District attorney; (2) any contemplated changes in present practices should be discussed thoroughly with the station's attorney; (3) although the industry has long awaited the Supreme Court's ruling, it is most feasible that, at this time, new steps should be taken with caution and hasty decisions be avoided.

This Taft-Hartley Act is long and complex; its full impact will be gradual rather than immediate; its basic significance as applied to certain areas of problems will require NLRB rulings and even court decisions. However, the following conclusions and summarization of principal provisions may be drawn at this time:

1. The Act, in no way, reduces or eliminates the employer's obligation to bargain collectively if the majority of his employees elect this method of labor-management relationship. As a matter of fact, the Act prescribes and defines the minimum responsibilities of both unions and management in their collective bargaining negotiations.

2. The full effect of the Taft-Hartley Act will not be felt by many employers for some time to come; for those who already have union contracts in effect, the general status quo of the contract will prevail until the termination date of the agreement.

3. Closed-shop and union-shop provisions in operation at the time of the passage of the Act are not affected until the expiriation or renewal of the contract. However, except as perpetuated during the remaining life of existing contracts, the Act specifically outlaws the closed shop—hiring through the union and hiring limited to union members. The union shop, characteristic of AFRA contracts, is permitted but with the stipulation that: (a) the majority of all employees, in the bargaining unit, must select this type of union security in a secret ballot; (b) new employees shall have 30 days' grace before joining the union; (c) no employee shall be denied membership in the union except according to the same terms and conditions applicable to all other union members. Any union security provisions signed within 60 days of the passage of the Act remain effective for a period of not more than one (1) year.

5. "Secondary boycotts" are made illegal. Interpretation of this term and further clarification of the provision will be needed before it is possible to evaluate its full meaning as applied to what broadcasters commonly call "unfair station or secondary boycott" practices and demands in the industry.

6. The Act preserves the right to strike and picket. However, definite restrictions are imposed including: (a) a 60-day cooling off period; (b) a ban upon strikes to force a company to cease doing business with another company (secondary boycott); (c) the outlawing of strikes to force an employer to recognize one union if another union has been certified as the appropriate bargaining agent, and (d) certain limitations upon jurisdictional strikes.

7. "No-strike clauses" in contracts take on a new significance. The Taft-Hartley Act enables an em-

(Continued on next page)

ployer to secure an injunction and collect damages if the union strikes in violation of the contract.

8. The new law requires the NLRB to isolate professional and craft employees into separate bargaining units, unless a majority of the professionals vote for their inclusion with the craft employees. Because the definition of "professionals" in the radio industry has never been fully and clearly defined, even by the Wage and Hour Division, the full significance of this point regarding the coverage of actors, singers, writers, directors and perhaps certain announcers and musicians is, for the moment, problematical.

9. Employers are no longer required to extend the collective bargaining process to supervisors and independent contractors.

10. The Act makes it an unfair labor practice for a union to force and coerce an employer to pay money for services not actually performed (featherbedding). The full implication of this "anti-featherbedding" provision to broadcasting is very ambiguous. NRLB and court decisions will be needed to establish rules by which broadcasters, and other employers, may be guided. However, it does seem obvious that payment for "standby" musicians or other employees who are not "actually performing services" may not be required by unions. This would seem to preclude wage payments to certain "standbys" for the purpose of avoiding jurisdictional conflict such as has happened in some television broadcasts, and on certain network originations at affiliate stations where the latter's union differed from that of the network.

11. Health and welfare funds are made subject to a variety of restrictions. Currently this is of little concern to most broadcasters.

12. Even where collective bargaining prevails, individual employees, or groups of employees, now have the right to adjust their grievances direct with the employer, without the intervention of union representatives, so long as the adjustment is not inconsistent with the terms of the union contract.

13. Employers are now permitted to petition the NLRB for an election whenever "one or more individuals or labor organizations have presented to him a claim to be recognized as the appropriate representative." This will enable the employer to take the initiative to determine his collective bargaining responsibility whenever a demand is made that he recognize a certain union.

14. If a union fails to secure a majority vote in an election, it must wait twelve (12) months for another election.

15. Other important provisions of the Act relate to: (a) freedom of speech by employers (much the same as currently prevails in NLRB rulings); (b) good standing of union membership—largely determined by union constitution and by payment of dues; (c) enlargement of the NLRB to five (5) members; (d) limitations placed upon strikes which create a national emergency and imperil national health and safety, and (e) suits by and against labor organizations for violation of contracts—it should be noted that the Act makes certain actions illegal but makes other actions "unfair labor practices" subject to NLRB procedure.

Supreme Court Upholds Lea Act; Case Returned to Chicago District Court

The long-awaited Supreme Court decision in the case charging James C. Petrillo with violation of the Lea act was announced last Monday (23) when the Court upheld the constitutionality of the Act. The Court, by a 5 to 3 decision, held that the legislation was constitutional on its face and reversed the earlier decision of Judge La Buy of the District Court in Chicago. The case now will go back to Chicago for further proceedings on the sufficiency of the criminal information filed by the government and for a trial on the merits.

Since there had been no evidence taken, the Court expressly refrained from deciding whether in applying the statute to peaceful picketing the constitutional right of free speech would be infringed. However, the Court did hold that the law is not invalid on the grounds that it was excessively vague, or denied equal protection of the law.

Justice Reed, joined by Justices Murphy and Rutledge, dissented on the ground that the definition of crime was vague and uncertain.

Pertinent excerpts of the majority opinion follow:

"Two general principles which concern our disposition of appeals involving constitutional questions have special application to this case: We have consistently refrained from passing on the constitutionality of a statute until a case involving it has reached a stage where the decision of a precise constitutional issue is a necessity . . . And in reviewing a direct appeal from a District Court . . . our review is limited to the validity or construction of the contested statute . . .

"First. One holding of the District Court was that, as contended here, the statute is repugnant to the due process clause of the Fifth Amendment because its words, 'number of employees needed by such licensee,' are so vague, indefinite and uncertain that 'persons of ordinary intelligence cannot in advance tell whether a certain action or course of action would be within its prohibition . . . ' . . .

"Clearer and more precise language might have been framed by Congress to express what it meant by 'number of employees needed.' But none occurs to us, nor has any better language been suggested, effectively to carry out what appears to have been the Con-

(Continued on next page)

Labor Committee to Hear Petrillo

James C. Petrillo, president, AFM, was subpoenaed to appear before a labor subcommittee of the House next Monday (7), it was announced by Congressman Fred A. Hartley, (R) N. J., chairman of the House Labor Committee.

Rep. Hartley said the subpoena was issued on April 11 based on a number of "complaints which had been made concerning the unfair practices of Mr. Petrillo and the American Federation of Musicians."

The subcommittee, of wich Rep. Carroll D. Kearns, (R) Pa., is chairman, has started an investigation of the musicians' union.

gressional purpose. The argument really seems to be that it is impossible for a jury or court ever to determine how many employees a business needs, and that, therefore, no statutory language could meet the problem Congress had in mind. If this argument should be accepted, the result would be that no legislature could make it an offense for a person to compel another to hire employees, no matter how unnecessary they were, and however desirable a legislature might consider suppression of the practice to be.

"The Constitution presents no such insuperable obstacle to legislation. We think that the language Congress used provides an adequate warning as to what conduct falls under its ban, and marks boundaries sufficiently distinct for judges and juries fairly to administer the law in accordance with the will of Congress . . . The language here challenged conveys sufficiently definite warning as to the proscribed conduct when measured by common understanding and practices. The Constitution requires no more.

"Second. It is contended that the statute denies equal protection of the laws to radio-broadcasting employees as a class, and, for this reason, violates the due process clause of the Fifth Amendment. This contention, raised by the motion to dsimiss, and sustained by the District Court as a ground for holding the statute unconstitutional as written, is properly before us, and we reach this equal protection ground, for the same reason that we decided the question of whether the section was unconstitutionally vague and indefinite.

"In support of this contention it is first argued that if Congress concluded that employment by broadcasting companies of unneeded workers was detrimental to interstate commerce, in order to be consistent, it should have provided for the punishment of employers, as well as employees who violate that policy. Secondly, it is argued, the Act violates due process because it singles out broadcasting employees for regulation while leaving other classes of employees free to engage in the very practices forbidden to radio workers. But it is not within our province to say that because Congress has prohibited some practices within its power to prohibit, it must prohibit all within its power. Consequently, if Congress believes that there are employee practices in the radio industry which injuriously affect interstate commerce, and directs its prohibitions against those practices, we could not set aside its legislation even if we were persuaded that employer practices also required regulation . . . Nor could we strike down such legislation, even if we believed that as a matter of policy it would have been wiser not to enact the legislation or to extend the prohibitions over a wider or narrower area. Here Congress aimed its law directly against one practice—compelling a broadcasting company to hire unneeded workers . . .

"Third. Respondent contends here, and the District Court has held, that the statute abridges freedom of speech by making peaceful picketing a crime. It is important to note that the statute does not mention picketing, peaceful or violent . . . Thus, rather than holding the statute as written to be an unconstitutional violation of the First Amendment, the District Court ruled on the statute as it was proposed to be applied by the information as it then read . . . We do not decide whether the allegations of the information, whatever shape they might eventually take, would constitute an application of the statute in such manner as to contravene the First Amendment. We only pass on the statute on its face; it is not in conflict with the First Amendment.

"Fourth. The District Court held, and it is argued here, that the statute, as sought to be applied in the information, violates the Thirteenth Amendment which prohibits slavery and involuntary servitude . . . For the reasons given with reference to the picketing specification, therefore, we consider the Thirteenth Amendment question only with reference to the statute on its face. Thus considered, it plainly does not violate the Thirteenth Amendment. Whether some possible attempted application of it to particular persons in particular sets of circumstances would violate the Thirteenth Amendment is a question we shall not pass upon until it is appropriately presented."

Membership to Vote on Proposal That FM, TV, FX Have Board Representation

(Continued from page 527)

come effective whenever there are twenty-five active members from the category of stations concerned in the membership of NAB.

These additions to the Board, along functional lines, were provided, an official of the Association pointed out, so that the newer services might automatically be given proper representation as they develop and expand.

Another proposed amendment to the NAB by-laws, which was submitted to membership referendum recently, would change the classification of network members from active to associate and delete the present provisions for automatic representation of networks on the Board.

Other than the network directors, there are presently twenty-three members of the NAB Board, seventeen representing the geographical districts of the Association, and six directors-at-large, two each from large, small, and medium-sized stations.

Asch Becomes FM Committee Chairman

Second of the three changes affecting NAB's FM activities was the appointment of Leonard Asch as chairman of the NAB FM Executive Committee. Mr. Asch, a pioneer among FM broadcasters and long-time operator of FM station WBCA at Schenectady, N. Y., an FM station without AM affiliation, succeeds Walter J. Damm, general manager of WTMJ-FM, Milwaukee, who resigned the chairmanship, but will continue to serve as a member of the Committee.

Bartley Resigns

NAB announced also the resignation of Robert T. Bartley as director of the NAB FM Department. Mr. Bartley submitted his resignation on May 28th, requesting that it become effective on July 1st. Association officials stated that a successor to Mr. Bartley would be named in the near future.

The retiring FM Director has served as an NAB staff member since September, 1943. He served as director of government relations until that post was abolished last year.

The proposed amendment to the by-laws providing for additional directorships reads as follows:

"DIRECTORS-AT-LARGE. There shall be ten Directors-at-Large, two from large stations, two from medium

(Continued on next page)

stations, two from small stations and one each from FM stations in Class B, FM stations in Class A, television stations, and facsimile stations, provided, that the directorships-at-large from these classifications shall be filled when there are at least twenty-five active members in such classifications respectively."

Legal Department

ASCAP, Cited by Attorney General, Charged with Anti-Trust Violation

The Attorney General of the U. S. filed a civil suit on Monday (23) charging that ASCAP's agreements with foreign licensing societies were in violation of the anti-trust laws.

The agreements in question are with 25 other music licensing societies which control the performance rights to all or nearly all of the copyrighted music of thirty countries.

The complaint alleged that through a confederation of the 25 societies, each is allotted a specific country in which it has the exclusive right to license music. No member of the confederation is permitted to deal with a non-member society, and the nationals of any one country are not permitted membership in the society of any other country. To enforce the agreements, a commission has been established for the purpose of investigating complaints of violations and recommending disciplinary action to the confederation, which in turn is authorized to censure, fire or expel member societies. As a result of these agreements, it is charged that "ASCAP and the co-conspirators" have procured monopolies in the territories assigned to them of virtually all of the world's musical compositions not in the public domain; denied other musical performing rights societies access to such music, thereby seriously affecting their ability to enter or remain in business; and retarded the introduction of foreign music in the United States.

The court is asked to decree generally that the agreements are in violation of the anti-trust laws, and to enjoin ASCAP from doing anything to continue, revive or renew them. Specifically the complaint asked that: (1) ASCAP be required to accept rights from foreign societies only if they are made available on a non-discriminatory basis to other American societies, (2) that it be enjoined from granting rights under its own repertoire to foreign countries on condition that they refuse to deal with other American societies, and (3) that it be enjoined from belonging to any organization whose rules prevent members from licensing performing rights to non-members, limit membership to a single society for any particular territory, or prevent any American society from marketing its rights freely in foreign trade.

Engineering Department

International Conference Agrees to Use Of 540 Kc. for Broadcast Services

The International Telecommunications Conference agreed Friday (27) to widen the broadcast band to include the frequency 540 kc for assignment to the broadcast services. Other countries, led by England, India and France, proposed to widen the band to include the assignment of 530 kc, with the French proposing that 520 kc be assigned at interior locations. The U. S. delegation clung tenaciously to its stand that 530 kc could not be allocated in this country due to possible interference being caused to the International Distress Frequency of 500 kc (490-510 kc) (NAB REPORTS, May 19, 1947). A compromise was finally reached when it was agreed that the European nations and India could assign 530 kc. France will also employ 520 kc where interference would not be caused to the Distress channel.

This agreement, while it apparently closes the door on U. S. employment of 530 kc, opens the way for 540 kc in the North American region. However, FCC hearings will have to be held to determine whether the channel should be classed as local, regional or clear. Before any assignments can be made regional agreements will have to be negotiated. This will undoubtedly come up at the North American Regional Engineering meeting in Havana scheduled for November 1. The general NARBA conference, where the final decision would be made, has been set for sometime after the first of the year.

Now operating on 540 kc with 50,000 watts power is Canadian station CBK at Watrous, Saskatchewan. The NARBA Executive Series (No. 136) between the United States and Canada provided, in addition to certain protection requirements, that "when, as and if a substitute broadcast channel acceptable to the Canadian Government is made available for this station, Canada agrees to discontinue the use of 540 kc for this purpose." However, in view of the complexities of finding another channel that would meet these requirements, the possibilities of CBK being shifted would appear to be fraught with difficulties. Several proposals have been made for the employment of this channel, ranging from a group of 50-watt stations scattered throughout the country to high-power installations.

ITC Delegates Schedule Extra Sessions Attempting to Meet July 1 Deadline

Delegates to the International Telecommunications (Radio) Conference at Atlantic City, faced with the July 1 deadline for the official opening of the Plenipotentiary Conference, scheduled extra sessions last week to try to complete its work on time. However, while a great deal of agreement has been reached by the delegates on other services, "Tropical Broadcast-

(Continued on next page)

ing" was still undecided, not only as to the number of channels to be allocated but as to its definition. While originally a tentative agreement had been reached providing "Tropical Broadcasting" with 750 kc's of space on a shared basis, Cuba and Mexico objected to what they considered insufficient channels.

Agreement Reached to Provide 50 Kc.'s More in 6000 Kc. Band

In the long-range international broadcast channels, agreement has been reached to provide 250 kc's of space in the 6,000 kc band. This would provide an additional 50 kc's of space over that previously allocated in the Cairo Agreement. In the 11,000 and 9,000 kc international broadcast bands no agreement of any kind has been reached. In the 15,000 kc band the U. S. delegation has agreed to a 50 kc widening, from the Cairo allotment of 200 kc to 250 kc, while other nations are insistent on 100 kc's additional.

Recent Heavy Sun Spot Count Believed Cause for Unusual FM Reception

With the greatest number of sunspots ever recorded, long-range FM reception over unusual distances has been reported during the past two months. This condition, according to the Bureau of Standards, will continue until November and then decrease again until 1954 in the sun's regular eleven-year cycle of outbursts.

These eruptions of the sun cause heavy ionization of the upper reaches of the earth's atmosphere and cause FM signals that would ordinarily penetrate through the ionosphere and into outer space to be confined to the earth. This phenomenon has caused Texas stations to be heard on the East Coast and one report from Australia indicates that numerous U. S. FM broadcast stations are being heard there.

The Bureau of Standards reports that the number of sunspots in May of this year reached the highest recorded point, since recordings were started in 1750, when the average for May was tabulated at 205.1. The highest previous Zurick number occurred in 1778 when the total was 155. The peak number occurred on May 25, 1947, when the daily number ran to 315, by far the highest ever observed. While complete tabulation has not been made for June, it is believed that this number is down under May, although still higher than expected. After November the number of sunspots should decrease, reaching a low in 1954, and may not reach the same high for decades. The long-range reception of FM signals is believed to be, perhaps, by F-layer ionospheric transmission and in other cases may be caused by sporadic E-transmission. Over extremely long distances such transmission may be via a combination of both F and sporadic E-layers. This transmission is generally of a spotty nature and of short duration and may, on occasion, cause long-range interference during the next few months and apparently will occur only in the middle of the day.

Previous extreme peaks occurred, in addition to 1778, in the years 1787, 1837, 1848 and 1870. In these years the Zurick numbers exceeded 120. Peak years in this Century occurred in 1905 (64 numbers); 1917 (104 numbers); 1928 (80 numbers); and 1937 (118 numbers).

Research Department

BMB Board Considers Financing Plan, Postpones Projected 1948 Study

Following the NAB Board of Directors' recommendation that BMB be put on a firm and permanent financial basis, and that its projected 1948 study be delayed until 1949, all of BMB's standing committees held one or more meetings to discuss the details of the NAB suggestions.

On conclusion of the committee sessions, the BMB Board met on June 20, and decided to suspend operations on the 1948 study pending consideration by the NAB Board of a plan prepared by the BMB Finance Committee and the NAB Liaison Committee composed of Leslie C. Johnson, WHBF; Paul W. Morency, WTIC; G. Richard Shafto, WIS; and William B. Way, KVOO.

In keeping with the NAB recommendation, the plan which these two groups proposed, and which the BMB Board approved in principle, includes a long-term plan of financing BMB on a monthly subscription basis, and postpones the second study which had been set for next year.

Upon incorporation of several additional suggestions into the plan, it will be circulated among the NAB Board members. If approved, the BMB will take immediate steps to put the plan into action by subscription solicitation.

Program Ratings

The BMB Board adopted the recommendation of its Research Department not to enter the field of program ratings at present. Instead, the Board decided to make a long range experimental study and analysis of current and proposed rating procedures as an integral part of its overall experimentation in all fields of radio measurement.

In view of this decision, the BMB Board informed C. E. Hooper, Inc., that it could not consider his offer to sell his rating service to BMB at this time.

Other action taken at the BMB Board meeting included the re-election of J. Harold Ryan as its chairman; Justin Miller, Paul West and Fred Gamble as first, second and third vice-chairmen, respectively; Hugh Feltis, president and Roger Clipp, secretary. In addition, the Board's Executive Committee was enlarged by the election of Joseph Allen to represent ANA and Leonard Bush to represent AAAA, thereby giving each of the three associations two members each on the committee.

Board members present were J. Harold Ryan, Fort Industry Company; Paul West, ANA; Roger Clipp, WFIL; Frederic R. Gamble, AAAA; Leonard T. Bush, Compton Advertising; Carlos Franco, Young &

(Continued on next page)

Rubicam; Linnea Nelson, J. Walter Thompson; C. Burt Oliver, Foote, Cone & Belding, D. E. Robinson, La Roche & Ellis; Joseph M. Allen, Bristol-Myers; Lowry Crites, General Mills; Albert S. Dempewolff, Celanese Corporation; Donavan B. Stetler, Standard Brands; Hugh M. Beville, Jr., NBC; E. P. H. James, MBS; Robert T. Mason, WMRN; Hugh Terry, KLZ.

Guests present were John Griffin, legal counsel, Kenneth Baker, NAB; Eric Haase, ANA; Harold Beckjordan, AAAA.

Members of the BMB staff present were Hugh Feltis, president; John Churchill, director of research and Philip Frank, executive secretary.

NAB Research Group Plans New Study This Year on Listener Reaction

A discussion of questions to be included in the new public opinion study of listener reaction to radio featured the recent meeting of the special subcommittee of the NAB Research Committee, it was announced Friday (27).

The new study was approved earlier this year by the NAB Board of directors which authorized an appropriation to defray the cost of field work for the study.

The subcommittee, Hugh Beville, NBC, chairman, at its meeting in New York recommended that the field work for the new study be conducted in November of this year in order that its results will be comparable to the first NORC study, field work for which was conducted in November, 1945.

While the NAB Research group did not make a final decision as to which organization would conduct the field work, or the form in which the results would be presented, it considered in detail all the questions asked in the 1945 interview, deleting some from the new study and adding others which relate to problems not covered in the first study.

The subcommittee plans to meet again at an early date to reconsider some of the latter points, and to make definite and specific recommendations for the conduct of the study.

Members of the subcommittee, appointed by Carl Burkland, chairman of the Research Committee, in addition to Mr. Beville, are: Dr. Paul Lazarsfeld, Columbia University; Elmo Wilson, CBS; and Earl Winger, WDOD. Also present at the meeting were William Zurflieh, NBC, and Kenneth Baker, NAB director of research.

Program Department

Multi-Organization Meeting on Delinquency Arranged by Minnesota Radio Council

Complying with NAB President Justin Miller's request that the broadcasting industry inaugurate or stimulate local campaigns against juvenile delinquency, the Minnesota Radio Council, in a recent meeting received the cooperation of state and local government officials, civic organizations, local advertising agencies and radio stations, in an overall discussion of plans to combat the problem.

Theodore B. Knudson, Judge of the Minneapolis Municipal Court, who represented Governor Youngdahl stated that the Minnesota Youth Commission plans to consult the various state courts as to program needs in combatting juvenile delinquency and that a work shop is to study the causes of delinquency. He emphasized that delinquency prevention is not a job for the police, probation officers or the courts.

Max Karl, production manager and educational director, WTCN, discussed some of the methods by which radio can help fight the problem. He pointed out that communities must recognize the symptoms of delinquency and stated that radio stations exist to help through dissemination of news and through special programs.

Dr. Tracy F. Tyler, Council vice president, and moderator for the meeting discussing radio programs now being aired said "some programs need touching up." However, he continued, there are many good programs and people should make an effort to listen to them.

Judge Blames Home Influence

Municipal Court Judge Earle W. Lyons told the group that radio and movies often are blamed when the fault is really in the home. He pointed out that there are many good programs both on the radio and in the movies. He cited a plan adopted in Los Angeles where groups of students review and evaluate films for other young people to see. "Trashy types of film" he said "are boycotted."

He also told the group of a youngster in trouble who agreed under questioning that movie and radio stories were the cause of his difficulty, yet under continued questioning, the boy could not recall a single movie or radio program in particular.

Betty Girling, KUOM, said: "Democracy can come out in every script, without mentioning the words democracy, fascist or communist." She pointed out the importance of a radio station of receiving letters and post cards from listeners commenting on various programs, reminding the group that only when the public makes demands does it get what it wants.

Mrs. George W. P. Heffelfinger, Council president, in answer to the question: What is a good program for children?, suggested a series based on dramatizations of books.

Pressure Groups

Dorothy Spicer, public relations director, KSTP, said that from time to time pressure groups send in criticisms of murder and crime programs, but fail to offer constructive suggestions. She said that one of the basic problems stemmed from groups who sign petitions without knowledge of the facts. "We can't listen to your station day or night," they say "because you have crime and horror all the time."

Miss Spicer pointed out that when that particular complaint was received, there was one-half hour of crime stories in 147 hours of broadcasting on her station.

Broadcast Advertising

Newspaper Association Spends More on Sales Promotion Than NAB's Entire Budget

There can be no doubt that newspapers are putting on the heat in competition for the advertising dollar and intend to maintain the pace. This fact is reflected in *The Advertiser's* coverage of the recent ANPA convention.

Commenting on the high-powered campaign to increase newspaper lineage, on which the publisher's association is reported to have spent three-quarters of a million dollars during the past year, the magazine says:

"If the Bureau fell short of any of its objectives for the past year, lack of ample funds was the reason. Operating on $725,000, when $1,000,000 was the figure required for the full expansion program, the Bureau hopes to make its quota through a revised dues plan. If the successes of the present year are in proportion to last year's accomplishments, few newspaper publishers will want to grumble at the raised ante. Advertising will certainly approve."

[EDITOR'S NOTE: NAB's budget for 1947 for all purposes *was approximately $650,000. Its Broadcast Advertising Department operates on a fraction of that amount.*]

Gordon Gray Named to Serve With NAB Retail Advisory Group

Gordon Gray, WIP, has been appointed to the Sales Managers Retail Advisory Subcommittee of the NAB by William D. Murdock, subcommittee chairman, it was announced last Monday (23).

Mr. Gray, prior to joining WIP, was manager of the Kansas City office of the Katz Agency, and later was general manager of Stations KOIL-KFOR.

General

Trammell Reveals High Speed Transmission, Opposes White Bill at Senate Hearing

(Continued from page 527)

Stressing the point to the Senate subcommittee, Mr. Trammell stated: "No agency should ever be permitted by the threat of revocation of a license or denial of renewal, to intimidate broadcasters as to the kind of program service they must render to the public."

He opposed the section of the White Bill requiring identification of news sources labelling such a provision as a "secondary censorship" similar to the type practiced by the Nazis before the war. He also argued against the bill's requirements regarding political broadcasts and discussion of public interest questions stating that the requirements are impractical and an infringement of free speech.

"The authority to refuse to renew a license because of the nature of programs that have been broadcast," he stated, "is a form of censorship much more powerful than the blue pencilling kind of censorship. It permits the Commission a tremendously wide latitude in determining what the listeners of the country may hear or may not hear. It gives the Commission most persuasive power of suggestion as to the programs it feels should be broadcast. No licensee can feel free to ignore such suggestions when to do so would jeopardize the continuation of his license. This is a much greater power than the power to delete."

Mr. Trammell pointed out: "The broadcaster is responsive to the turn of a dial or the flip of a switch. If he is left free from control by the government, public preference will determine the programs which he broadcasts."

Station Operation Can't Be Legislated

Congress bears a great responsibility in writing a new radio law, Don S. Elias, WWNC, stated at the hearings on Monday (23) and "must make certain that the power to license does not become the power to throttle."

He agreed that there was need for new radio legislation but stressed the importance of establishing "the essential freedom of radio against even the suspicion —not to say, the accomplished fact—of governmental censorship or manipulation."

Speaking both as a newspaper publisher and a broadcaster, Mr. Elias said that "the legislative effort to regulate and control political broadcasts and discussions of controversial issues will be the cause of much confusion, controversy and dissatisfaction on the part of the public and the broadcasters. The answer to every problem which arises in the day-to-day operation of radio simply cannot be spelled out in a legislative enactment," he continued.

Tuesday Sessions

A statement from Aeronautical Radio, Inc., asked for equal status under Commission organization for special services. While limiting its statement to problems of aviation safety, the organization felt that similar safety factors could and should be applied to marine, railroad, etc., communications.

Rolf Kaltenborn, son of the network commentator, spoke on behalf of a "committee for non-partisan radio" supporting Section 17 of the proposed White Bill. He felt that the provisions of the section should be made even stronger than it reads in the Bill and proposed that time for political broadcasting should be balanced all year-round.

Rear Admiral S. C. Hooper (ret.), electronics consultant and former Naval Communications director, suggested adding to Sec. 326 of the Bill, a provision for polling the listening audience of a station when it comes up for renewal of license to permit the public to express its opinion on the station's performance.

The Rev. Sam Morris, spokesman for the National Temperance and Prohibition Council, urged that legislation be enacted which would prohibit the advertising of any alcoholic beverages over the air.

(Continued on next page)

He was followed by Elizabeth A. Smart, WCTU, who also asked that broadcasters be prohibited from carrying advertising of alcoholic beverages.

Criticizing the policy of some broadcasters who do not sell time for religious broadcasts, the Rev. Dale Crowley, representing the National Religious Broadcasters, Inc., asked the Senate Committee to "provide a specific clause in Section 9 of this proposed amendment to the Communications Act to the effect that the licensee of every radio frequency be obliged to provide time for religious broadcasts without discrimination as to time of day or night on their broadcasting schedule."

Wednesday Testimony

Appearing on Wednesday, Bill Henry, president of the Radio Correspondent's Association, opposed provisions of the bill dealing with news. He said:

"We agree heartily with the importance of pinning responsibility for accuracy on broadcasters of news, analysis and comment.

"We agree that the listening public has a right to be informed as to the identity of the broadcaster, his responsibility, and the nature of his broadcast.

"We believe that responsible stations and networks are already doing these things, not only as a matter of duty to the public, but also for their own benefit.

"We believe, as a matter of principle, that broadcasting should be as free of regulation as the press and we oppose any regulation beyond that already in existence."

Mr. Henry told the committee that his association felt that the provision of the bill requiring identification of news sources if applied generally, is meaningless and, if applied literally or harshly, would have the effect of destroying the continuity and listenability of news, analysis and commentary programs and would trespass on the well-established right of responsible reporters to protect confidential sources of legitimate news. We believe that Section 332A is both unnecessary and unworkable and believe it should be eliminated.

He also urged clarification and enlargement of the provision of the bill which exempts news broadcasts and descriptions of current events from the restrictions on political broadcasts and discussion of controversial issues.

Other witnesses who appeared on Wednesday were Dr. Edwin H. Armstrong, Richard W. Hubbell of Hubbel and Associates, and Stanley Fulkner, attorney representing the Voice of Freedom Committee.

Dr. Armstrong recounted his efforts of the past eleven years to establish FM broadcasting and told the Committee, "it is doubtful if more than 1% of the population of the country enjoy its benefits." He concluded: "I believe the reason to be the abuse of the regulatory power."

Richard Hubbel urged the Committee to provide for 17 year licenses, commenting:

"In my opinion this grant of stability to the radio and television industry would have an immediate and electric effect on the expansion of television services to the general public. I believe it will hasten the investment of new capital in television."

Mr. Fulkner argued against the bill on the grounds that it restricted freedom of speech but asked that the FCC be given power to see that "liberal" commentators continue to be heard.

Friday Session

After a recess from Wednesday until Friday morning, the Subcommittee resumed by listening to statements submitted by Senator Glen H. Taylor, (D) Idaho, Fulton Lewis, Jr., Edmund Craney, Bernard K. Johnpoll, WYOS; Arnold Petersen, secretary of the Socialist Labor Party and Susan B. Anthony, Progressive Citizens of America.

Sen. Taylor stated that he favored provisions which would free radio stations from liability in political broadcasts.

Lewis proposed that all commentators be required to maintain records, for public inspection, which would show their sources of income, past employment and organization membership.

He also argued that it would be impractical for commentators and newsmen to comply with the requirements of the bill providing for identification of news sources.

Edmund Craney, operator of stations in Spokane, Portland, Butte, Helena and Bozeman, supported generally the provisions of the proposed legislation. He favored the section dealing with network-station relations which would provide for a two-hour option in each three-hour period of time, but stated that it is "not a matter of major concern to me."

Commenting on the amendment to Section 326 of the present Act, Mr. Craney said the new provision "is a definite improvement."

Mr. Johnpoll said that "news commentators should be forced, during election campaigns, to yield as much time to rebuttal as they may take in behalf of a particular man or party." He favored the section of the bill which divides the FCC's activities into two separate divisions. Mr. Johnpoll suggested that the new legislation include a provision which would "order the FCC to increase the band spread from 540 kc to 1650 kc."

Socialist Labor Party

Arnold Petersen, in a statement filed on behalf of the Socialist Labor Party, opposed the bill on the grounds that it would not permit on the air those political candidates whose names did not appear on a ballot. The organization also objected to the provision which would limit ownership of stations to coverage of not more than 25 per cent of the population.

Representing the Progressive Citizens of America, Susan B. Anthony, said that the organization did not feel that the bill "is an answer to the problems of the public, the radio broadcasting industry or the critics of the present" Act.

NAB Testimony on White Bill Receives Wide Industry Approval

[*Editor's Note: Reaction to NAB's presentation of testimony before the Senate Sub-Committee holding hearings on the White Radio Bill—S. 1333—is reflected in the following letters, released to the press last week by their authors. Judge Miller testified before the Senate committee Wednesday, June 18.*]

From Frank Stanton, President, CBS, to Members of NAB Board

I have just come up from Washington for the afternoon, taking advantage of a short recess in the Senate Subcommittee hearings on the White Bill to clean up some things which have accumulated at Columbia while I've been attending the hearings. But before I get into them, I would like to give you my first-hand impressions of the NAB appearances before Senator White's committee.

As you may know, the NAB had six witnesses: Justin Miller, Jess Willard, Don Petty, Bob Richards, Frank Pellegrin and Harold Fair. Justin led off yesterday for the industry and was on the stand the greater part of the day. He did a magnificent job; he was forthright and logical, and did not retreat from the position that radio should have equal rights with the press. Having followed closely three previous hearings on radio legislation before committees of Congress, this was the first time that broadcasters took the offensive with a solid position to back it up. I urge you to read his full statement when it reaches you.

Because I am convinced of the soundness—and the necesisty—of maintaining that radio should not be discriminated against, I am mighty glad that we have this kind of forceful leadership. The rest of the NAB boys did well too. Even though we may not get the kind of legislation we want at this session—or even the next—it is reassuring to know that, for the moment at least, we are not going in for appeasement and compromise. I just hope that broadcasters will give Justin the kind of backing he deserves and must have.

You may have gathered from the above that I think we have something to be proud of. That's right. I wanted to drop you this note to let you know how I feel about what I saw and heard, even though some faint hearts may not agree.

From Edgar Kobak, President, MBS, to Judge Miller

I'll bet your ears have been burning ever since you appeared before the Senate Sub-Committee on the White Bill. They ought to be good and red and hot.

What more can I say. We are proud of you and we are proud to be a part of NAB.

From Niles Trammell, President, NBC, to Justin Miller, President, NAB

Immediately after you completed your testimony on the White Bill I congratulated you on the position you had taken in advocating and defending the basic rights of broadcasters. I am now placing this commendation in a letter so that I may be on record with the members of your Board of Directors to whom I am sending a copy.

As you stated, free speech, as contemplated by the first amendment to the Federal Constitution, has not been analyzed with sufficient care by witnesses testifying at previous radio hearings. The fight for fundamental freedom never has been an easy one. It took one hundred years to establish freedom of the press. Our fight has just begun.

I want, also, to express my approval of the entire NAB presentation before the Senate Sub-Committee. All of your witnesses, including those from the independent stations, did exceedingly well.

I hope you will call upon me for every encouragement and assistance I can give you in what we must consider as the primary issue now facing our industry.

From T. A. M. Craven, Vice President, Cowles Broadcasting Co., to Mr. Trammell

I appreciate tremendously your transmitting to me a copy of your letter of June 23 to Justin Miller.

I consider his statement before the Sub-Committee of the Senate a masterly presentation of the broadcasters just cause. It is the first presentation that I have heard or seen which treats the subject in a convincing manner. This statement does not detract in any way from those who preceded Justin Miller in the past because those of us who have previously testified were correct in spirit but not sufficiently equipped in constitutional law to speak convincingly.

The fact that you, Frank Stanton, Edgar Kobak, Mark Woods, as well as other leaders in the industry, supported Justin Miller so effectively, added great weight to the cause of broadcasters.

It is my opinion that broadcasters have real cause for alarm. I have felt this for a long time. Until we can secure legislation which makes radio as free as the press, I fear that the great value of radio as an instrument of mass communication, may gradually deteriorate. As you know, this single factor is one that I have recognized over the years. This is a factor for which I fought so ineffectively while a member of the Communications Commission.

From Campbell Arnoux, President, WTAR, to Judge Miller

May I take this means to tell you how greatly I admired the magnificent way in which you carried the ball for the radio industry at the Senate Interstate Commerce Committee hearing last week.

I never expect to hear a more brilliant or finer piece of testimony and we should all be extremely grateful to you especially under the almost impossible difficulties of preparation or organization in the few days available.

I only wish every member of NAB could have been present in person and have had the privilege of hearing you.

From Theodore C. Streibert, President, WOR, to Judge Miller

Your statement at the hearing on the White Bill will unquestionably be referred to later as the first step in a change in the whole philosophy of radio legislation and regulation. That is not to say that it may not be a long time coming, as I presume you fully anticipate, but I just wanted to let you know that the appreciation of it can be evidenced to you here and now.

French Radio, Interested in American Shows, Seeks to Broaden Program Exchange

[*The following statement is published at the request of Mr. Jacques Meyer, Deputy Director General of the National French Broadcasting System (Radio Diffusion) who is now visiting the United States as a member of the French Delegation, International Telecommunications Conference, Atlantic City.*]

AMERICAN BROADCASTERS:

About five months ago, France and the United States inaugurated a program-exchange system which was intended to create a greater understanding between our peoples.

At the present time, the French Broadcasting System is sending six transcribed programs weekly to the United States. Three of these programs are popular in nature, and three of them are more cultural. All are performed by leading French radio artists and designed for use on American broadcasting systems.

(Continued on next page)

Over one thousand of these records are shipped weekly to about 200 American stations and about 60% of these stations are scheduling them regularly. So you in America are hearing about France—her music, her customs, her people, their daily lives.

Now we would like for American stations to send us more recorded programs so that we can broadcast them throughout our land on Radio Diffusion. We want programs which will be representative of those areas in which your stations are located.

If you would like to join in this effort, which is especially needed with the curtailment in Voice of America broadcasts, please write our New York office, the North America French Broadcasting System, at 501 Madison Avenue. Miss Steinberg, there, will answer inquiries. We are anxious to continue this relationship with American broadcasters and make it even more effective.

JACQUES MEYER,
Deputy Director General,
National French Broadcasting System.

Oregon, Washington Broadcasters Discuss White Bill at Joint Meeting

The largest contingent of Oregon and Washington broadcasters ever attending a semiannual, joint session of the two state associations, assembled in Portland on Monday, June 16, to hear Robert C. Coleson, assistant to the president of NAB, discuss developments on the White Bill.

One hundred twenty-five station managers and staff personnel registered for the one-day meeting, according to Frank Coffin, KGW, Portland, secretary-treasurer of the Oregon State Broadcasters' Association, who handled arrangements and reservations.

Ray Morgan, of the Raymond Morgan Advertising Agency in Hollywood, highlighted the morning session with his agency-angled comments on "What We Want From Radio." Morgan urged "better cooperation from radio stations in furnishing information to agencies," and cited several examples of successful programs which sell for the advertiser. "All stations should spend more time and exert greater effort to develop more live talent shows," according to Morgan.

Representing Judge Justin Miller, Mr. Coleson told the Northwest radio people: "We cannot hope for perfect legislation. We *can* hope to improve the existing law, particularly when that law has been distorted by its administrators."

C. E. Arney, Jr., secretary-treasurer, NAB, explained the organization's departmental structure and pointed out the assistance which NAB is prepared to give broadcasters. He discussed the actions taken by the NAB Board of Directors at their May 21-22 meeting.

Frank H. Loggan, KBND, Bend, and Tom Olsen, KGY, Olympia, presidents of the Oregon and Washington State Broadcasters' Associations respectively, presided over the joint meeting with the assistance of Toastmaster Leith Abbott, head of Foote, Cone and Belding's office in Portland.

Other speakers taking part in the day-long confab were: Harry Spence (KXRO, Aberdeen), NAB district director, who conducted a BMB Round Table; Bob Priebe, KRSC, Seattle, "I'm in the Black with FM"; Ed Adams, of the University of Washington faculty, discussed "Education for Radio"; Ted Cooke, KOIN, Portland, outlined "Programs That You Can Sell."

In his comments welcoming the broadcasters to Portland, Mayor Earl Riley congratulated Oregon radio stations on their 100% membership in the Oregon State Broadcasters Association, and cited this move as a step in the right direction toward serving public need and demand of the broadcasting industry. This accomplishment was announced by OSBA President Frank Loggan at the Monday meeting. James Mount, KXL, Portland, served as program chairman for this, the second joint meeting of Oregon and Washington State associations during 1947.

Among resolutions adopted were these:

Resolved, that this combined meeting of the Oregon-Washington Broadcasters thank Robert Coleson and C. E. Arney for their analysis of the White-Wolverton Bill, and NAB for their work in connection with the hearings on this Bill, and urge all broadcasters in Oregon and Washington to inform themselves fully on the provisions of the Bill so that they may supply their Senators with such information.

Whereas, the radio stations in Washington and Oregon believe there is a growing need for industry control of the standards by which station audiences and listening are measured, be it resolved that Broadcast Measurement Bureau be commended for the progress in that direction so far evidenced and that they be encouraged to continue.

Books for Broadcasters

TELEVISION TECHNIQUES, by Hoyland Bettinger. c1947. 237 p. $5.00. Harper and Brothers, 49 East 33rd St., New York 16.

This is an excellent and comprehensive television manual. The author, a consultant on television planning and production, writes from first-hand experience. He is interested more in the basic principles of good video programming than in the quick tricks.

A dramatic plot is built before your eyes with a sample scenario, and sequences from the manuscript and production script. A variety show is followed through. Such topics as pictorial composition, lighting, and the integration of film with live productions are considered. Clear line drawings point up the text.

The book is basic, dealing with the psychological and aesthetic aspects of television's own special techniques. It will be helpful to sponsors, writers, actors, producers, and studio crews.

BROADCASTING MUSIC, by Ernest LaPrade. c1947. 236 p. $2.50. Rinehart and Company, 232 Madison Ave., New York 16.

Music over the air has come a long way since Caruso sang in *Pagliacci* over "wireless telephone" in 1910. This book traces briefly the beginnings of musical

(Continued on next page)

broadcasting and then is chiefly concerned with musical program building and production.

The sample continuities and diagrams of set-ups are especially useful. Definitions of terms throughout the book will be a help to beginners—"cataloguing clerks," SESAC, "high fidelity"—though all controversial matters in the music field are carefully sidestepped. The book gives a good picture of the attention to detail which gives network broadcasting of music its high standards.

Public Interest Programming

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 7-13, 1947 by The Advertising Council and the Advertising Liaison Division of the Office of Government Reports (formerly OWMR). Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and the more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945 the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school systems is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. Though the schools of America are closed in July and August, the urgency of the crisis in our schools makes it necessary to keep this subject before the public. During the summer months plans should be made to assure that when schools open in the fall they should be more adequately staffed and have improved equipment, buildings, supplies, etc. Your program can help bring this improvement about by stressing the serious plight of our schools, what a deterioration in American education means to our boys and girls and to our nation, and what listeners can do now to overcome the crisis. (Fact Sheet No. 37)

United America—Group Prejudice—A Post War Menace

To divide the United States along racial and religious lines, and so to conquer it was the chief hope of our enemies during the war. In fact, it was the possibility that America could be thus weakened and disintegrated by conflict between group and group that gave the Axis the courage to embark on its catastrophic adventure. This Axis strategy was defeated. *But today we cannot afford division any more than we could during the war.* We have two great tasks before us: (1) to build a peaceful world; (2) to press forward on the home front to high production and prosperity. The achievement of both these goals becomes immeasurably more difficult if America is torn by racial and religious strife. A divided America seems weak in the eyes of the world and is disabled as a force for peace; nor can it successfully carry out great harmony among our various racial and religious groups that was the source of our strength in war. What makes the danger of division especially acute at the present time is that many real problems now confront the American people—problems of housing for veterans and other civilians, jobs for the returning serviceman, strikes, shortages of food and household goods, rising costs of living. In the midst of postwar dislocations and unrest, when everyone naturally seeks to discover the causes and cures for what troubles him, the "scapegoat" technique of blaming all difficulties on one group or another is not likely to pay off well. Political quacks and adventurers belonging to the "lunatic fringe" of American life seek to gain adherents and make easy money for themselves by diverting citizens from their real problems and attacking some racial or religious group as being "at the bottom of" the shortages, the strikes, or the rising prices. People who, out of indifference to American principles of racial and religious freedom, and "undecided" about prejudice, or who might support hate campaigns against Protestants or Jews, Catholics or Negroes, are potential confederates or dupes of such subversive forces. No one can prevent people from being prejudiced or hating their neighbors. We can, however, (1) recognize such antagonisms for what they are: *a danger to the nation that is particularly acute in the midst of postwar dislocations and unrest;*

(Continued on next page)

(2) isolate such antagonisms and quarantine them, prevent them from spreading and infecting the whole community; malicious slanders against groups of fellow Americans cannot be respected as "honest opinions"; (3) guard ourselves and our families against the danger of contracting prejudices and passing them on, however innocently—we can refuse to listen to or spread stories which discredit members of any race or religion—we can make sure that we judge our fellowmen by the character of their lives alone, and not on the basis of their race or religion—we can keep our children from absorbing prejudice. (Fact Sheet No. 31)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, June 30. They are subject to change.

Monday, June 30

(Before Commissioners Walker, Wakefield and Durr in Room 6121 at 10:00 o'clock A. M.)

In re Applications of Press Wireless, Inc., for modification of licenses to permit the handling of administrative press messages.

In re Applications of Press Wireless, Inc., for modification of licenses to permit the handling of deferred commercial messages. (Ricksville, N. Y., and Los Angeles, Calif.)

Made Intervenors: The Western Union Telegraph Company
RCA Communications, Inc.
Commercial Pacific Cable Company
All American Cables & Radio, Inc.
Commercial Cable Company
Mackay Radio & Telegraph Co., Inc.

Tuesday, July 1

Further Hearing

(10:00 A. M.)

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—C. P. to increase power, etc. **1190 kc.**, 50 KW, unlimited; DA Night.

WLIB—WLIB, Inc., Brooklyn, N. Y.—C. P. to increase power, etc. **1190 kc.**, DA, 5 KW night, 10 KW day, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

1230 KC.

The Commission announces its **Final Decision** (B-355) granting the application of **Allentown Broadcasting Corporation** for a new station in **Allentown, Pa.**, to operate on 1230 kc., 250 watts, unlimited time (BP-4374; Docket 7180); conditions. At the same time the Commission denied the mutually exclusive applications of **Easton Publishing Co.** (BP-4212; Docket 7179), for new station at **Easton, Pa.**, **Steel City Broadcasting Co. of Bethlehem, Pa., Inc.** (BP-4428; Docket 7181) for new station at **Allentown, Pa.**, both requesting 1230 kc., 250 watts, unlimited time, and application of **Associated Broadcasters, Inc.**, to change frequency of Station WEST, **Easton, Pa.**, from 1400 kc. to 1230 kc., operating with 250 watts power, unlimited time.

AM—New CP's Granted

980 KC.

Stanley S. Beaubaire, Oreville, Cal.—Granted CP for a new station to operate on 980 kc., 1 KW; daytime only; engineering conditions. (BP-5640)

1240 KC.

Cambridge Company, Cambridge, Md.—Granted CP for new station to operate on 1240 kc., 100 watts, unlimited time. (BP-5838)

Bryan Broadcasting Co., Bryan, Texas—Adopted an Order granting application for a new station to operate on 1240 kc., 250 watts, unlimited time. (BP-4767; Docket 7776)

1250 KC.

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted CP to increase daytime power from 1 to 5 KW, change type of transmitter and make change in antenna, operating on 1250 kc., 1 KW night. (BP-3752)

1360 KC.

Puritan Broadcast Service, Inc., Lynn, Mass.—Granted petition to reconsider action in designating application for hearing; removed from hearing docket, and granted CP for new station to operate on 1360 kc., 500 watts daytime only; engineering conditions and also subject to any interference from WOCB. (BP-5117; Docket 7802)

1490 KC.

Waynesboro Broadcasting Corp., Waynesboro, Va.—Granted CP for a new station to operate on 1490 kc., 250 watts, unlimited time; engineering conditions. (BP-6065)

AM—Modifications of CP's Granted

WIBS—Jose E. del Valle, Santurce, P. R.—Granted modification of CP for approval of directional antenna. (BMP-2710)

KGVN—Grass Valley-Nevada City Broadcasters, Inc., Grass Valley, Cal.—Granted modification of CP to increase power from 100 watts to 250 watts, for approval of transmitter location and antenna system and for change in transmitting equipment. (BMP-2506)

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted modification of CP for extension of completion dates. (BMP-2832; BMP-2844)

AM—Designated for Hearing

690 KC.

The Naugatuck Valley Broadcasting Corp., Ansonia, Conn.—Designated for hearing application for a new station (BP-5926), to operate on 690 kc., 1 KW, daytime only, and ordered that stations WOR and WNBC, New York, be made parties to the proceeding.

1230 KC.

Oral J. Wilkinson, Murray, Utah—Designated for hearing application for new station to operate on 1230 kc., 250 watts, unlimited time (BP-5392), in consolidated proceeding with application of Weber County Service Co. requesting same frequency at Ogden, Utah (BP-5462); made KOVO and KVNU parties to this proceeding.

(Continued on next page)

Utica Observer Dispatch, Inc., Utica, N. Y., and Hanna Broadcasting Co., Utica, N. Y.—Designated for consolidated hearing applications for new stations to operate on 1230 kc., 250 watts, unlimited time. (BP-6015; BP-6129)

1230-1240 KC.

Hector Reichard, Aguadilla, Puerto Rico—Designated for hearing application for new station to operate on 1240 kc., 250 watts, unlimited time (BP-5952) to be consolidated in hearing on applications of Jorama Fer Radio Corp. and Caguas Radio Broadcasting Co., for new stations at Caguas, P. R., on 1240 kc. and 1230 kc., respectively.

1340 KC.

Wabash Broadcasting Co., Inc., Lafayette, Ind.—Designated for hearing application for new station to operate on 1340 kc., 250 watts, unlimited time (BP-6037); made WJOL, WSOY, WLBC and WTRC parties to this proceeding.

Howdy Folks Broadcasters, Tulsa, Okla.; Donald W. Reynolds, Okmulgee, Okla.; Muskogee Broadway Broadcasting Co., Muskogee, Okla.—Designated for consolidated hearing the three applications (BP-5853), (BP-5871), and (BP-5918), respectively, each seeking a new station to operate on 1340 kc., 250 watts, unlimited time, in their respective cities.

1400 KC.

Radio Greenville, Greenville, Ala.; The Greenville Broadcasting, Co., Greenville, Ala.—Designated for consolidated hearing applications for new stations to operate on 1400 kc., 250 watts, unlimited time. (BP-6025; BP-6094)

1460 KC.

Pellegrin and Smeby, Detroit, Mich.—Designated for hearing application for a new station (BP-5805), to operate on 1460 kc., 500 watts, daytime only; and ordered that station WJBK be made a party to the proceeding.

1490 KC.

Radio Courier, Inc., East Liverpool, Ohio—Designated for hearing application (BP-6092) for a new station to operate on 1490 kc., 250 watts, unlimited time, in a consolidated proceeding with applications of Western Pennsylvania Broadcasting Corp. (Docket 8170), East Liverpool Broadcasting Co. (Docket 8171), and United Broadcasting Corp. (Docket 8348)

William Courtney Evans, Dover, Del.—Designated for hearing application (BP-5927) for a new station to operate on 1490 kc., 250 watts, unlimited time, and ordered that WBAB, Atlantic City, and WTOP, Washington, be made parties to the proceeding.

AM—License Renewals

WJHL—WJHL, Inc., Johnson City, Tenn.—Granted renewal of license for period ending May 1, 1950. (BR-988)

WJBO—Baton Rouge Broadcasting Co., Inc., Baton, Rouge, La.—Granted renewal of license for period ending May 1, 1950. (BR-446)

WISN—Hearst Radio, Inc., Milwaukee, Wisc.—Granted renewal of license for main and auxiliary, to May 1, 1950.

AM—License Extensions

Licenses for operation of following stations extended upon a temporary basis to October 1, 1947, pending final determination upon applications for renewal of licenses, for the reasons shown:

WKPA, New Kensington, Pa.—(Renewal application not filed in complete form within the time required by Rule 1.320);

WEDC, Chicago, Ill.; KARK, Little Rock, Ark.; KFJZ, Fort Worth, Texas, and WAIT, Chicago, Ill.—(Pending consideration of information requested of licensees under Sec. 308(b) of the Act);

KWBC, Fort Worth, Tex.; WDEL, Wilmington, Del.; WFLA, Tampa, Fla.; WRC, Washington, D. C.; WTTM, Trenton, N. J., and WFNS, Burlington, N. C.—(Pending further engineering study);

KXOX, Sweetwater, Texas—(Pending consideration of information furnished under Rule 1.341);

WNOE, New Orleans, La.—(Pending further consideration of applicant's qualifications);

KOB, Albuquerque, N. M.—(Pending final action in Dockets 6584 and 6585);

WJOL, Joliet, Ill.; WTEL, Philadelphia, Pa.—(Renewal applications in hearing);

WOV & Aux., New York, N. Y.—(Pending final outcome of litigation involving transfer of control of licensee corporation);

WKBW, Buffalo, N. Y.—(Pending action of the Commission in conformity with the Mandate of the U. S. Court of Appeals, District of Columbia);

WABY, Albany, N. Y.—(Pending consideration of and final action upon application for transfer of control of licensee corporation).

Licenses for operation of following stations extended upon a temporary basis to October 1, 1947, for the reasons shown:

KRSC, Seattle, Wash.—(Pending consideration of information requested of licensee under Section 308(b) of the Act);

KHJ, Los Angeles, Calif.—(Pending final action in Dockets 7398, 7399, 7615, 7616, 7680).

AM—Miscellaneous Actions

C. Thomas Patton, Oakland, Cal.; Pittsburg Broadcasting Co., Pittsburg, Cal.—Granted petitions insofar as each requests severance of petitioners' applications from the consolidated proceeding; insofar as petitions request immediate grants of their respective applications, they are denied. Further ordered that the record in Docket 7766, C. Thomas Patton, and the record in Docket 7956, Pittsburg Broadcasting Co. be reopened and that each application be designated for further separate hearing at times and places to be set by subsequent order of the Commission.

KSJO—Santa Clara Broadcasting Co., San Jose, Cal.—Denied application for Special Service Authorization to operate at night with 250 watts, non-DA, on frequency 1590 kc. (BSSA-162)

WGBS—The Fort Industry Co., Miami, Fla.—Granted CP to increase power from 10 KW to 50 KW with DA day and night; change nighttime DA array, and change transmitter site; conditions. (BP-4393).

WTBC—Tuscaloosa Broadcasting Co., Tuscaloosa, Ala.—Granted CP to change frequency from 1450 to 1230 kc., and install a new vertical antenna to support an FM antenna; engineering conditions. (BP-5960)

Tytex Broadcasting Co., Tyler, Texas; Tyler Broadcasting Co., Tyler, Texas—Denied requests for waiver of hearing in Dockets 8058 and 8040, without prejudice to requests being renewed if both applicants amend their respective applications re joint exhibit supplying information relative to extent of interference with Eastland proposal. (Docket 5688)

Central Broadcasting, Inc., Independence, Kans.—Granted petition to remove from the hearing docket and grant application (BP-5751; Doc. 8136) for a new station to operate on 1010 kc., 250 watts, daytime only; engineering conditions, and subject to the further condition that J. Nelson Rupard sever all connection with station KTSW, both as to stock ownership and management. Further ordered that petition for waiver of hearing be dismissed.

KTBC—Claudia T. Johnson (assignor); Texas Broadcasting Corp (assignee), Austin, Texas—Granted consent to assignment of license of Station KTBC from Claudia T. Johnson to Texas Broadcasting Corp., in which Mrs. John-

(Continued on next page)

son will be president, a director and own 398 out of the 400 shares of class A stock and all of the 100 shares of class B stock (BAL-611)

KGEM—Idaho Broadcasting Co., Boise, Idaho—Denied petition requesting leave to intervene in the proceeding upon application of KGDM, Stockton (Docket 8185); exceptions noted by counsel for petitioner.

Queen City Broadcasting, Inc., Cincinnati, Ohio—Granted petition for extension of time in which to file exceptions to the Proposed Decision (Dockets 6971 et al), and the time was extended to and including July 8. (Action taken June 23.)

The following action was taken by Commissioner Hyde on June 20:

KTHS—Radio Broadcasting, Inc., West Memphis and Hot Springs, Ark.—Granted petition for continuance of further hearing scheduled for June 26, in re Docket 7086, et al, and continued same to July 22.

WBCM—Bay Broadcasting Co., Inc., Bay City, Mich.—Granted petition to dismiss without prejudice its application (BP-5662; Docket 8352).

The Tower Realty Co., Cumberland, Md.—Granted petition for leave to amend its application so as to specify 100 watts instead of 250 watts power. (BP-5940; Doc. 8424)

KXRO—KXRO, Inc., Aberdeen, Wash.—Granted petition for leave to amend its application (BP-5568; Doc. 8374) so as to add revised engineering data respecting the use and availability of the proposed transmitter site.

WIAC—Radio Station WIAC, Inc., San Juan, P. R.—Granted petition for leave to intervene in the hearing on applications of The Patriot Co., and WHP, Inc. (Doc. 6884 and 7115)

Okefinokee Broadcasting Co., Waycross, Ga.—Granted petition for leave to amend its application (BP-5513; Doc. 8063) so as to change status of applicant from an individual to a partnership.

The Patriot Co., Harrisburg, Pa.—Granted petition for leave to amend its application (BP-4091; Doc. 6884), so as to show a revised directional antenna array, etc.

The Joseph Henry Broadcasting Corp., Albany, N. Y.—Granted petition for leave to amend its application (BP-6123; Doc. 8439) so as to show a reduction in voting stock ownership of Raymond M. Curtis from 50% to 44.4%. Also granted in part, petition to transfer hearing now scheduled for July 14, from Washington to Albany, N. Y., to be heard there commencing that date.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio—Dismissed petition requesting reconsideration of the Commission's action of April 29 granting, without hearing, application of WWNC for modification of construction permit.

Wharton County Broadcasting Co., El Campo, Texas—Granted petition for leave to amend its application (BP-5611; Doc. 8312) so as to request 1390 kc., with 500 watts, day only, instead of 1490 kc., 250 watts, unlimited time. The amendment was accepted and application, as amended, was removed from the hearing docket.

AM—Applications Accepted for Filing

550 KC.

WCON—The Constitution Publishing Co., Atlanta, Ga.—Modification of construction permit (B3-P-4086, as modified, which authorized a new standard broadcast station) for extension of completion date.

560 KC.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—License to cover construction permit (B2-P-3943, as modified) which authorized increase in power, new transmitter, directional antenna for night, and change in transmitter site and authority to determine operating power by direct measurement of antenna power.

570 KC.

WWNC—Asheville Citizen-Times Co., Inc., Asheville, N. C.—License to cover construction permit (B3-P-2644, as modified) which authorized installation of directional antenna for night use, increase power, installation of new transmitter, and move transmitter location, and authority to determine operating power by direct measurement of antenna power.

580 KC.

KSAC—Kansas State College of Agriculture and Applied Science, Manhattan, Kansas—Modification of construction permit (B4-P-4874, which authorized increase in power, installation of new transmitter and vertical antenna, and change in transmitter location) for extension of completion date.

600 KC.

KXSA—San Angelo Broadcasters, San Angelo, Tex. (Glen H. McClain, E. H. Rowley, James A. Clements, L. M. Rice, Frank Monroe Dowd, and Joe H. Torbett, a partnership)—Modification of construction permit (BP-5906, which authorized a new standard broadcast station) for extension of commencement and completion dates.

620 KC.

WRBC—Rebel Broadcasting Co., Jackson, Miss. (Chas. H. Russell, W. B. McCarty, T. E. Wright and C. A. Lacy, a limited partnership)—Voluntary assignment of construction permit to Rebel Broadcasting Co.

740 KC.

KLIK—Balboa Radio Corporation, San Diego, Calif.—Modification of construction permit (B5-P-4981, as modified, which authorized a new standard broadcast station) for extension of completion date.

NEW—Tri-Cities Broadcasting Co., Tullahoma, Tenn. (Raymond L. Prescott, Jr., and Henry L. Wilson, a partnership) (P. O. Box 411, Tullahoma, Tenn.)—Construction permit for a new standard broadcast station to be operated on 740 kc., power of 250 watts, and daytime hours of operation.

WFFV—Radio Virginia, Inc., Richmond, Va.—Modification of construction permit (B2-P-5067, as modified, which authorized a new standard broadcast station) to change frequency from 720 to 740 kc.

800 KC.

WIBK—Independent Broadcasting Corp., Knoxville, Tenn.—Modification of construction permit (B3-P-5000, as modified, which authorized a new standard broadcast station) to change type of transmitter, to make changes in vertical antenna, and change name of applicant from Independent Broadcasting Corp. to Independent Broadcasting Co.

900 KC.

WOTW—Nashua Broadcasting Corp., Nashua, N. H.—Modification of construction permit (B1-P-4746, which authorized a new standard broadcast station) to change type of transmitter, to make changes in vertical antenna, and to specify studio location.

WSWN—Seminole Broadcasting Co., Belle Glade, Fla.—Modification of construction permit (B3-P-5258, which authorized a new standard broadcast station) to change transmitter location and to specify studio location.

910 KC.

WFDF—Flint Broadcasting Co., Flint, Mich.—Voluntary transfer of control of licensee corporation from Howard M. Loeb and Frederick S. Loeb to Trebit Corp. (150 shares of common stock—100%.)

940 KC.

WESA—Monongahela Valley Broadcasting Corp., Charleroi, Pa.—Modification of construction permit (B2-P-5601, which authorized a new standard broadcast station) for approval of antenna, transmitter and studio locations.

(Continued on next page)

960 KC.

KGKL—KGKL, Inc., San Angelo, Texas—License to cover construction permit (B3-P-4502, as modified) which authorized a change in frequency, increase in power, install new transmitter and directional antenna for night use, and change transmitter, and authority to determine operating power by direct measurement of antenna power.

KOOL—Maricopa Broadcasters, Inc., Phoeniz, Arizona—License to cover construction permit (B5-P-4053) which authorized a new standard broadcast station and specify studio location as Hotel Adams, Phoenix, Ariz., and authority to determine operating power by direct measurement of antenna power.

970 KC.

WWSW—WWSW, Inc., Pittsburgh, Pa.—Modification of construction permit (B2-P-3055, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna, and change in transmitter location) for approval of directional antenna for day and night use, to change type of transmitter and change transmitter location from 1½ miles north of McKees Rocks Boro, Stowe Twp., Pa., to S. W. corner of junction West View, in Ross Twp., Pa. Amended to make changes in directional antenna system.

1000 KC.

WSCR—Lackawanna Valley Radio Broadcasting Co., Scranton, Pa. (Dahl W. Mack, James J. Doherty, Sr., and Eugene L. Burke, a partnership)—License to cover construction permit (B2-P-5213, as modified) which authorized a new standard broadcast station, and to specify studio location, and authority to determine operating power by direct measurement of antenna power. Amended to change name of application from Dahl W. Mack, James J. Doherty, Sr., and Eugene L. Burke, a partnership, d/b as Lackawanna Valley Radio, to Lackawanna Valley Broadcasting Co.

1050 KC.

NEW—Albert B. Pyatt, Garden City, Kansas—Construction permit for a new standard broadcast station to be operated on 830 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 830 kc., to 1050 kc.

1060 KC.

KIFI—Eastern Idaho Broadcasting and Television Co., Idaho Falls, Idaho—Construction permit to change frequency from 1400 to 550 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use, and change transmitter location. Amended to change frequency from 550 to 1060 kc., and make changes in night time directional antenna pattern.

1090 KC.

KEVR—Western Waves, Inc., Seattle, Wash.—Modification of license to change corporate name from Western Waves, Inc., to King Broadcasting Co.

1190 KC.

WBUY—Davidson County Broadcasting Co., Lexington, N. C. (Omar G. Hilton and Greeley N. Hilton)—Authority to determine operating power by direct measurement of antenna power.

1210 KC.

WWSO—Radio Springfield, Inc., Springfield, Ohio—Modification of construction permit (B2-P-5220, which authorized a new standard broadcast station) to increase power from 250 watts to 1 KW, change type of transmitter, and for approval of antenna and transmitter location and to specify studio location. Amended to change power from 1 KW daytime to 250 watts daytime, and change type of transmitter.

1220 KC.

WRIB—R. I. Broadcasting Co., Providence, R. I.—License to cover construction permit (B1-P-5046, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1230 KC.

WCLO—Southern Wisconsin Radio, Inc., Janesville, Wis.—Construction permit to make changes in vertical antenna and mount FM antenna on AM tower.

KWTC—Mojave Valley Broadcasting Co., Barstow, Calif. (A partnership of William T. Brown, Burton C. Boatright and Robert E. Reno)—Modification of construction permit (B5-P-4960, as modified, which authorized a new standard broadcast station) for extension of completion date.

KWTC—Mojave Valley Broadcasting Co., Barstow, Calif. (a partnership of William T. Brown, Burton C. Boatright and Robert E. Reno)—Modification of construction permit (B5-P-4960, as modified, which authorized a new standard broadcast station) to change transmitter and studio locations. Amended to make changes in transmitting equipment.

NEW—KDAK, Inc., Sioux Falls, S. Dak. (P. O. % F. G. Warren, 355 Boyce Building, Sioux Falls, S. Dak.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1240 KC.

KVRC—Arkadelphia Broadcasting Co., Arkadelphia, Ark. (Cecil W. Cupp, sole owner)—Modification of construction permit (B3-P-5607, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

WRTA—Thompson Broadcasting Co., Altoona, Pa. (Roy F. Thompson)—License to cover construction permit (B2-P-3703, as modified) which authorized a new standard broadcast station, and authority to determine operating power by direct measurement of antenna power.

KDEC—Telegraph Herald, Decorah, Iowa—License to cover construction permit (B4-P-4579) which authorized a new standard broadcast station, and for change of studio location.

NEW—Jasper Broadcasting Co., Jasper, Texas (A. B. Rhodes, B. G. Lindsey, C. V. Lindsey, Joe H. Tonahill, Joe J. Fisher and Jep S. Fuller, a partnership) (P. O. % Ross Bohannon, Attorney at Law, 1517 Commerce St., Dallas, Texas)—Construction permit for a new standard broadcast station to be operated on 1240 kc., power of 250 watts and unlimited hours of operation.

1290 KC.

KITO—San Bernardino Broadcasting Co., Inc., San Bernardino, Calif.—Modification of construction permit (B5-P-3908, as modified, which authorized a new standard broadcast station) to change type of transmitter and for extension of completion date.

1340 KC.

KWSD—Shasta Cascade Broadcasting Corp., Mt. Shasta, Calif.—License to cover construction permit (B5-P-5274, as modified) which authorized a new standard broadcast station, and authority to determine operating power by direct measurement of antenna power.

WHHM—WHHM Broadcasting Co., Memphis, Tenn. (Herbert Herff)—Voluntary assignment of license to Mid-South Broadcasting Corp.

NEW—Thomas G. Harris, individually and as trustee for Coleman Gay, James P. Alexander, E. G. Kingsbery, Rex D. Kitchens, Spencer J. Scott and Hardy C. Harvey, Austin, Texas—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts, and unlimited hours of operation. Amended to change frequency from 1340 to 1260 kc., power from 250 watts to 1 KW, daytime hours of operation from unlimited to daytime; change type transmitter.

WKGN—East Tennessee Broadcasting Co., Knoxville, Tenn. (Clarence Beaman, Jr.)—Modification of construction permit (B3-P4127, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and transmitter location and to specify studio location.

(Continued on next page)

WCMI—The Ashland Broadcasting Co., Ashland, Ky.—Authority to determine operating power by direct measurement of antenna power.

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Modification of construction permit (B4-P-5252, which authorized changes in vertical antenna and mount FM antenna on AM tower) for extension of commencement and completion dates.

WMID—Mid-Atlantic Broadcasting Co., Atlantic City, N. J.—License to cover construction permit (B1-P-5185, as modified) which authorized a new standard broadcast station and for change of studio location and authority to determine operating power by direct measurement of antenna power.

NEW—Bert Williamson, Martinez, Calif.—Construction permit for a new standard broadcast station to be operated on 1330 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 1330 to 1340 kc. and change hours of operation from daytime only to unlimited.

1350 KC.

WGAD—Coosa Valley Broadcasting Co., Gadsden, Ala. (E. L. Roberts)—License to cover construction permit (B3-P-4596, as modified) which authorized a new standard broadcast station and for change of studio location and authority to determine operating power by direct measurement of antenna power.

1360 KC.

KREL—Tri-Cities Broadcasting Co., Goose Creek, Texas—Modification of construction permit (B3-P-4706, which authorized a new standard broadcast station) to change type of transmitter, to make changes in directional antenna, and to specify studio location.

NEW—El Dorado Broadcasting Co., Eldorado, Kansas (Tom Potter)—Construction permit for a new standard broadcast station to be operated on 1360 kc., power of 250 watts, and daytime hours of operation. Amended to change power from 250 watts to 1 KW, and change type of transmitter.

1380 KC.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Modification of construction permit (B3-P-3965, which authorized increase power, install new transmitter and directional antenna for night use, and change transmitter location) for extension of completion date.

1390 KC.

WWOD—Old Dominion Broadcasting Corp., Lynchburg, Va.—License to cover construction permit (B2-P-3978, as modified) which authorized a new standard broadcast station, and specify studio location, and authority to determine operating power by direct measurement of antenna power.

1400 KC.

KGFN—'49er Broadcasting Co., Grass Valley, Calif. (John G. Colling, Carlton G. Thomas, John Edwin Keegan, Harold W. Westbrook, Earl J. Caddy and Robert T. Ingram, a partnership)—License to cover construction permit (B5-P-5077, as modified, which authorized a new standard broadcast station, and authority to determine operating power by direct measurement of antenna power.

KYAK—Yakima Broadcasting Corp., Yakima, Wash.—Modification of construction permit (B5-P-5099, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna, transmitter and studio locations.

WHDF—Upper Michigan Broadcasting Co., Houghton, Mich.—Modification of construction permit (B2-P-5580, which authorized installation of new vertical antenna, and change in transmitter and studio locations) for approval of antenna and transmitter location and to specify studio location.

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Authority to determine operating power by direct measurement of antenna power.

1420 KC.

NEW—Fannin County Broadcasting Co., Bonham, Texas (Frank Svoboda)—Construction permit for a new standard broadcast station to be operated on 1420 kc., power of 250 watts and daytime hours of operation. Amended to change power from 250 watts to 1 KW and change type of transmitter.

1440 KC.

KFDA—Amarillo Broadcasting Corp., Amarillo, Texas—Construction permit to change frequency from 1230 to 1440 kc., increase power from 250 watts day and night to 5 KW day and 1 KW night, install new transmitter and directional antenna night use, change transmitter location. (Facilities to be relinquished by KGNC.) Amended to modify night time directional antenna pattern.

1450 KC.

WASK—WFAM, Inc., Lafayette, Ind.—Modification of construction permit (B4-P-4827, as modified, which authorized installation of new vertical antenna and mounting FM antenna on AM tower, and change in transmitter location) to install new transmitter and for extension of completion date.

NEW—Myrtle Beach Broadcasting Co., Myrtle Beach, S. C. (P. O. % E. E. Stone, Box 1031, Florence, S. C.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation.

1470 KC.

WLAM—The Lewiston-Auburn Broadcasting Corp., Lewiston, Maine—Modification of construction permit (B1-P-5146, which authorized a new standard broadcast station) to change type of transmitter to make changes in ground system, and to specify studio location.

WWOK—Drohlich Brothers, Flint, Mich. (Albert S. Drohlich and Robert A. Drohlich)—License to cover construction permit (B2-P-4151, as modified), which authorized a new standard broadcast station and specify studio location and authority to determine operating power by direct measurement of antenna power.

1480 KC.

WABB—Mobile Daily Newspapers, Inc., Mobile, Ala.—Modification of construction permit (B3-P-5523, which authorized a new standard broadcast station) to make changes in directional antenna system and to mount FM antenna on AM tower.

KTBS—Radio Station KTBS, Shreveport, La. (Allen D. Morris, Prentiss E. Furlow and George D. Wray, Sr., a partnership)—Voluntary assignment of license to Radio Station KTBS, Inc.

WHOM—Atlantic Broadcasting Co., Inc., Jersey City, N. J.—Modification of license to change main studio location from Jersey Journal Building, Journal Square, Jersey City, N. J., to 29 West 57th Street, New York, N. Y.

WHOM—Atlantic Broadcasting Co., Inc., Jersey City, N. J.—Modification of construction permit (BP-5521, which authorized increase in power, installation of new transmitter and directional antenna for day and night use and change in transmitter location) to change transmitter location from approximately 8.7 miles north of Jersey City in Ridgefield Park Township, N. J., to approximately 8.1 miles north of Jersey City in Ridgefield Park Township, N. J.

1490 KC.

WHBS—The Huntsville Times Co., Inc., Huntsville, Ala.—Authority to determine operating power by direct measurement of antenna power.

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Voluntary assignment of license to Victor C. Diehm, E. H. Whitney, Hilda M. Deisroth and George M. Chisnell, a co-partnership, d/b as Hazleton Broadcasting Company.

(Continued on next page)

WLCX—Bermac Radio, Inc., LaCrosse, Wis.—License to cover construction permit (B4-P-5288, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

NEW—Itasca Broadcasting Co., Grand Rapids, Minn. (P. O. 2 E. Third St.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation.

1520 KC.

KOMA—KOMA, Inc., Oklahoma City, Okla.—License to cover construction permit (B3-P-4080, as modified), which authorized increase in power, installation of new transmitter and directional antenna for night use and change transmitter location and authority to determine operating power by direct measurement of antenna power.

1560 KC.

KSWI—Nonpareil Broadcasting Co., Council Bluffs, Iowa—License to cover construction permit (B4-P-5153, as modified), which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WTNS—Coshocton Broadcasting Co., Roscoe, Ohio—Modification of construction permit (B2-P-5491, which authorized a new standard broadcast station) to change studio location from Roscoe, Ohio, to 114 North Sixth Street, Coshocton, Ohio. Amended to change type of transmitter.

NEW—Texas Star Broadcasting Co., areas of Harris and Houston Counties, Texas (Roy Hofheinz and W. N. Hooper) (P. O. 5th Floor, Southern Standard Bldg., Houston, Tex.) —Construction permit for a new remote pickup broadcast station to be operated on 152.87 mc., power of 50 watts, emission FM, and hours of operation in accordance with Section 4.403.

NEW—John H. Stenger, Jr., area of Wilkes-Barre, Pa. (P. O. 85 West Union St.)—Construction permit for a new remote pickup broadcast station to be operated on 152.75 mc., power of 10 watts, emission A3, and hours of operation in accordance with Section 4.403.

NEW—John H. Stenger, Jr., area of Wilkes-Barre, Pa. (P. O. 85 West Union St.)—Construction permit for a new remote pickup broadcast station to be operated on 152.75 mc., power of 10 watts, emission A3, and hours of operation in accordance with Section 4.403.

NEW—Texas Star Broadcasting Co., areas of Harris and Houston Counties, Texas (Roy Hofheinz and W. N. Hooper) (P. O. 5th Floor, Southern Standard Bldg., Houston, Tex.) —Construction permit for a new remote pickup broadcast station to be operated on 25.28 mc., power of 50 watts, emission FM, and hours of operation in accordance with Section 4.403.

Federal Trade Commission Actions

Complaints

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Corn Products Refining Co., New York, and its subsidiaries, Corn Products Sales Co., a New Jersey corporation, and Corn Products Sales Co., a Massachusetts trust.

A. E. Staley Manufacturing Co. and its subsidiary, Staley Sales Corp., both of Decatur, Ill.

Clinton Industries, Inc., St. Louis, and three subsidiaries: Clinton Sales Co., Clinton, Iowa; Bliss Syrup and Preserving Co., Kansas City, Mo.; and D. B. Scully Syrup Co., Inc., Chicago.

Anheuser-Busch, Inc., St. Louis, and three subsidiaries: A. A. Busch and Co., Inc., A. A. Busch and Co. of Massachusetts and Southern Syrup Co., Inc.

Union Starch & Refining Co., Columbus, Ind., and its subsidiary, Union Sales Corp.

Penick and Ford, Ltd., Inc., New York; American Maize-Products Co., New York; The Hubinger Co., Keokuk, Iowa; and National Starch Products, Inc., New York, also trading as Piel Brothers Starch Co. and National Adhesive Corp.

Nineteen companies (listed above) which are said to account for 95 percent of the corn derivatives manufactured and sold in the United States are charged by the Commission with engaging in a combination and conspiracy to fix and maintain the prices, terms and conditions of sale of their products with the result that competition in the industry has been suppressed. (5502)

Arkansas Peanut Co.—Use of lottery methods in the sale of peanuts is charged in a complaint issued by the Commission against John E. Haynes, trading as Arkansas Peanut Co., 327 Quichita Ave., Hot Springs, Ark.

The complaint alleges that the respondent sells to dealers assortments of peanuts so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when sold to the purchasing public. (5503)

Stipulations

Korby Sportswear, Inc.—The Commission approved a stipulation in which Korby Sportswear, Inc., 1410 Broadway, New York, agrees that in branding, labeling or selling wearing apparel containing rayon, it will clearly disclose the rayon content. (7619)

(Continued on next page)

James L. Cook, N. 223 Post St., Spokane, Wash., entered into a stipulation with the Commission to discontinue advertising that a medicinal preparation designated "Gluc-O-Dine" is effective in the treatment or cure of sinusitis, head colds, headaches or catarrh, or that it possesses any therapeutic value in the treatment of bronchitis or bronchial asthma in excess of such palliative relief as may be afforded through a temporary liquefaction of mucuous secretions in the respiratory tract.

Cook does business under the trade names, Roy Cook: Roy Cook, Drugs; Cook's Drug Store; Cook's Drug Stores; and Cook's Number 2, according to the stipulation. (7620)

Modified Order

United Buyers Corp.—The Commission has modified its 1941 cease and desist order in the United Buyers Corp. brokerage case to make its prohibitions "more explicit."

The order forbids United Buyers Corp., Chicago, together with its officers, directors and former wholesaler-stockholders, to accept brokerage fees or any compensation in lieu thereof on the purchase of grocery products in violation of the Robinson-Patman Act. It is also directed against seven "representative" sellers who were found to have paid brokerage to the buyer respondents. (3221)

Commission Notifies FM Licensees of Procedure for Change in Frequency Assignments

Supplementing its amendments to the rules and standards for FM Broadcasting stations adopted on June 12, the FCC on Tuesday (1) issued certain instructions to those stations whose frequency assignments have been changed. (REPORTS, p. 483.)

Following is the text of the announcement sent by the FCC:

"Outstanding construction permits and licenses will not be reissued at this time to specify changed frequency assignments, but instead these changes will be included in succeeding instruments of authorization.

"Stations now in operation on previous frequency assignments may continue operation thereon pending conversion of equipment to new assignments, provided such operation does not result in objectionable interference to stations operating on newly assigned frequencies or stations which request authority to begin operation. The Commission will assist in resolving any conflicts which may arise in particular areas. In instances where stations are required because of interference to change frequency earlier than planned, advice thereof will be given 30 days or more previous to the required change.

"It appears, however, that such conflicts will be few, and stations now employing temporary antennas may desire to continue operation without change of frequency pending installation of their regular antennas. While such procedure is approved, the Commission desires that stations changing frequency do so at the earliest practicable date. It is expected that all changes will have taken place by October 1, 1947.

"The Commission wishes to know the expected date of operation on the new assignment of all FM stations either now on the air or planning to begin operation within the next few months. This information will be of assistance to the Commission and should be submitted as soon as prac-

NAB Membership Approves Associate Status For Networks By 629-28 Referendum Vote

By a referendum vote of 629 to 28, the NAB membership has approved a change of network status in the Association permitting radio chains to hold associate, rather than active, membership in the industry organization.

With the change, effective Tuesday (1), the four national networks hold simultaneous membership in the Association for the first time.

The result of the referendum, conducted and audited by Ernst & Ernst, New York accounting firm, was received at NAB headquarters Monday (30). The amendment to the NAB by-laws authorizing the change in network status, and the plans for the referendum, were approved by the NAB Board of Directors when it met in Washington May 21-22.

An immediate effect of the new by-law is the retirement from the Board of Frank M. Russell, vice president, NBC, who has served as a director for seventeen years, Frank Stanton, president, CBS, and Edgar Kobak, president MBS, who has been sitting with the Board as an observer. Mr. Russell's tenure establishes a record for Board service.

While the Association's new rules do not permit networks to have permanent Board representation, network officials may be invited to sit as observers from time to time. The new by-law does not obviate the possibility of a network employee being elected to serve as a district director, or a director-at-large, through election while standing as a candidate representing a network-owned station.

The revised by-law article governing membership in the NAB, which also calls for certain changes in membership eligibility for

groups of stations jointly owned, on which the membership voted, follows:

ARTICLE III

SECTION 1. *Classes of Membership.* The members of this Association shall consist of two classes, active and associate.

A. *Active Definition.* Any individual, firm or corporation which is engaged in the operation of a broadcasting station or which holds a construction permit for such a station within the United States or its dependencies shall, subject to the approval of the Board of Directors as hereinafter provided, be eligible to active membership in the Association to the extent of one membership for each station which it operates; provided, where an individual, firm or corporation operates two or more stations he or it shall be ineligible for membership for the lesser station or stations with respect to dues classification, as hereafter provided, unless the larger station or stations with respect to dues classification is in membership.

Whenever active membership is in the name of a firm or corporation, such firm or corporation shall certify to the Secretary-Treasurer of the Association the name of an owner, partner, an officer, or an executive whose time is devoted principally to the broadcasting business of such firm or corporation and such individual may represent, vote and act for the member.

Each active member shall be entitled to one vote for each active membership, and shall be entitled to participate in all affairs of the Association.

B. *Associate Definition.* Any individual, firm or corporation engaged in any business or profession connected with broadcasting but not such as to come within the requirements for active membership shall, subject to the approval of the Board of Directors, be eligible to associate membership in the Association. An associate member shall not be entitled to any vote *(except as a member of a committee to which he has been duly appointed).*

ticable. Before commencing actual operation on the new frequency, notice should be sent to the Commission and a letter or telegram of authorization will be issued."

Employee-Employer Relations

Three Major Provisions of Taft-Hartley Act Became Effective with Enactment of Law

The following analysis of the Taft-Hartley Act supplements the preliminary summary published in REPORTS *last week (p. 527). A full legal analysis of the Act, now being prepared, will be furnished to all members in the near future.*

Footnotes on Taft-Hartley Act—

1. Broadcasters should be cognizant of the "time table" of the Taft-Hartley Act.

Upon enactment of the law, only three major provisions became effective: (1) suits by and against unions were permissible under certain circumstances; (2) the Government possessed authority to enjoin major strikes jeopardizing national health and safety; and (3) restrictions were placed on the signing of new contracts providing for certain types of health and welfare funds.

Not until 60 days after the passage of the Act do the principal provisions in the new law take effect. However, new contracts signed prior to August 23, 1947 may include closed shop and other provisions otherwise outlawed by the Act and made unfair labor practices. Such new contracts signed within the sixty-day period remain operative for not more than one year. Contracts now in effect and not renewed during the sixty-day period remain effective until their termination or renewal date.

2. Contrary to the above "time table" for the Taft-Hartley Act, it should be appreciated that the Lea Act is currently in effect and has been in effect since April, 1946. The Supreme Court decision (June 23) merely substantiated the constitutionality of this legislation. Undoubtedly many broadcasters and the AFM have deferred certain operational decisions pending the outcome of the WAAF case before the Supreme Court.

3. It has been reported in the press that officials of the AFL have expressed the opinion that unions will not agree to "no-strike" clauses in future contracts. The reason offered was that "such clauses have, in the past, been concessions made by unions which obtained closed shop conditions" now outlawed by the Taft-Hartley Act. However, it should be noted that "no-strike" clauses have been common among unions which preferred the union shop to the closed shop type of union security.

(Continued on next page)

The obvious reason why many unions will now try to avoid "no-strike" clauses is the added obligation and penalty which the Taft-Hartley Act places upon violations of contracts by unions. Hitherto "no-strike" clauses have meant relatively little if a union saw fit to disregard them. Yet, in all fairness, it should be borne in mind that many unions adhered to the letter and spirit of such clauses when they were written into the contract.

4. Management leaders in radio and other industries are advising against precipitous and hasty actions which may create a cumulative wave of industrial strife. While the Taft-Hartley Act has rectified many long-standing abuses and has placed management and labor on a more equal footing within the collective bargaining process, business leaders are aware that with their newly obtained rights goes the responsibility to promote genuine industrial peace. It will take some time to fully clarify the application of the Taft-Hartley Act to the problems of radio, and other industries. Furthermore, the Act now opens the way for a substantial change in the machinery of administering the federal labor policy. In the meantime, ill-advised actions may prove detrimental to both the company concerned and its industry.

FCC Announces Data on Average Salaries Paid Broadcasting Personnel

Total scheduled compensation for 34,831 employees working in the radio industry in February 1947 was $2,408,246, or an average salary of $69.14 per week, according to statistics released last week by FCC. Excluding executive, supervisory and non-staff personnel, 24,513 broadcast employees in February of this year received an average of $60.92 per week, as against average weekly compensation of about $58.00 to comparable employees takehome reported in the 1945 survey of the Commission.

Based on data submitted by networks and affiliate stations on Schedule 13, the FCC report discloses the following average scheduled compensation for February 1947 for selected employee classifications:

SCHEDULED COMPENSATION

Full-time Staff Employees for Week Beginning Feb. 1, 1947

	914 AM Stations Compensation	*7 Networks and 924 AM Stations* Compensation
Announcers	$59.17	$61.95
Singers	64.94	66.22
Musicians	69.40	86.95
Writers	43.82	47.14
News Personnel	65.96	69.31
Engineers (Transmitter & Studio)	63.71	67.77
Salesmen	91.46	96.62

ITU Representatives Double Efforts To Unscramble International Agreements

With the Plenipotentiary Conference opening one day late (2) and the Radio Conference continuing with its work, the International Telecommunications Union doubled its efforts at Atlantic City to try and wind up its unscrambling of International agreements.

IN THE OFFING

Public Relations Executive Committee	**July 17-18**	**Washington, D. C.**
Employee-Employer Relations Committee	**July 21**	**Washington, D. C.**
Special Standards of Practice Committee	**July 22**	**Washington, D. C.**
Educational Standards Committee	**July 28**	**Washington, D. C.**
NAB Convention	**Sept. 15-18**	**Atlantic City, N. J.**

Last week the Allocations Committee (in Document 463R-E) finally adopted for exclusive broadcasting use the frequency 540 kc and cleared for broadcasting in the European region and India the channel 530 kc (*Current* REPORTS, p. 531). In all other regions except India the 530 kc channel will be used for mobile. Barring unforeseen circumstances, these allocations to Standard Broadcasting will be written into the international regulations in about one month's time.

The fate of 520 kc for broadcasting in the European region was undecided when, after some discussion in which the delegates of France, Australia, the United Kingdom, USSR and the United States took part, it was agreed that a small group should endeavor to draft a note covering the question of European broadcasting stations in the band 515-525 kcs. The delegate of France then made the following statement: "The French Delegation considers that it is not correct to deny to duly authorized broadcasting stations whose operation has not impaired the operation of the alarm and distress signal (500 kc) the right to continue working under the same conditions between 515 and 525 kcs."

However, France did not insist in her views of using the channel 520 kc, and, pending the drafting of a note, this problem was deferred.

The High Frequency Allocation Session of the Conference continues to be bogged down, although some progress is being made. While the 15.0, 17.0, 21.0 and 25.0 mcs bands have been agreed on in subcommittee under Dr. Y. Y. Mao of China, the whole allocations structure between 6.0 and 17.0 mcs continues to be a bone of contention. The problem has been passed on by Dr. Mao to Sir A. Stanley Angwin of the United Kingdom, chairman of the main Allocations Committee.

Committee 5 on Tropical Broadcasting has recommended the following minimum frequency requirements:

6 to 8 Mcs, 250 Kc,
8 to 10 Mcs, 250 Kc,
10 to 12 Mcs, 150 Kc.

Subcommittee C then recommended that "the (actual) frequency distribution of these channels should be

(Continued on next page)

made by the (August 15) High Frequency Broadcasting Conference on a technical basis, taking into account the minimum figures proposed above." With these consolidated proposals, delegates to the Conference felt that at long last some progress on tropical broadcasting was being made.

Legal Department

FCC Prefers Local Group, Proposes Denial Of License Transfer to Original Assignee

In a proposed decision released Tuesday (1), involving two applications for consent to the assignment of the license of Station KMED of Medford, Oregon, the Commission denied the request of the original assignee and granted the request of the intervening assignee.

Following the procedure first announced in the Avco case of last year, and now incorporated in Section 1.321 of the FCC rules and regulations, the successful applicant had filed a competing application after notice of the proposed sale of the station had been published, as required by the Commission's rules. The basis of the Commission's choice was that the intervening applicant was in a better position because of his first-hand knowledge of the community to plan a program service more likely to serve the local needs.

Referring to the respective offers of the two applicants, the FCC said:

> "The Commission is mindful of the fact that minor differences exist in the respective offers to Mrs. Virgin, including the fact that Mr. Gibson has offered to personally endorse the notes representing the balance due on the purchase price, while no similar guarantee has been made by the stockholders of Medford Broadcasting Corporation. However, we do not view this and other minor differences in the proposal as constituting a substantial variance in the terms and conditions of the agreement submitted by Gibson. On the contrary, these are matters which the licensee and the preferred applicant can settle by negotiation, if they desire to do so . . . The Commission's sole concern herein is the determination of which applicant is best qualified to operate in the public interest, and having made this determination in favor of Medford Broadcasting Corporation, it is now wholly a matter for the present licensee to determine whether or not she desires to assign the license and construction permit to the preferred applicant at the price agreed upon and upon what specific conditions."

FCC Cites "Business Ethics" of Applicants In Proposed Denial for Facilities

The Commission, in a proposed decision released Tuesday (1), tentatively granted the application of Narragansett Broadcasting Company to operate on 1400 kc, with 250 watts power, in Fall River, Massachusetts.

In choosing among three applicants for the same facilities, two from New Bedford, and one from Fall River, the Commission first concluded that the requirements of Section 307 (b) of the Communication's Act requiring a fair and equitable distribution of facilities were so closely balanced as not to warrant a preference of one city over the other.

It then concluded that the Fall River applicant was to be preferred because it proposed greater integration of ownership and operation. In addition, the Commission referred to the fact that some of the officers of one of the New Bedford applicants had been involved in legal proceedings on charges of unfair trade practices and that one of them had been found guilty of violations of the Robinson-Patman Act and had been convicted in a criminal proceeding under the anti-trust laws.

Referring to the Mester Case in which a three-judge court in New York denied an assignment of license to a proposed assignee who had been involved in litigation, the Commission said that "these proceedings reflect on the business ethics and moral values of the individuals involved and in a competitive hearing such as this, should be considered adversely to the applicants involved."

News

District 2 Holds Second News Clinic; Stations Report Improved Standards

The second all-day radio news clinic conducted by NAB District No. 2 was held in Utica, N. Y., Friday, June 27. Previously District Director Michael R. Hanna, general manager, WHCU, Ithaca, had appointed E. R. Vadeboncoeur, chairman, NAB radio news committee, and vice president WSYR, Syracuse, general clinic chairman and he presided.

Thirteen months ago the first New York state radio news clinic was held in the same city. In the intervening months standards of radio news were reported improved at most stations and news bureaus with from two to six men were established by at least three stations.

The proven technique of conducting radio news clinics which has gradually evolved since the first clinic in Springfield, Illinois, in 1945, was followed. Prepared papers, assigned to newsmen by Chairman Vadeboncoeur, were read, and questions followed. As is generally the case, all broadcasters participated in the discussions.

By-Products of Radio News

George O'Connor, fulltime radio news editor of WINR, Binghamton, gave four examples of "Community Service and Promotion as a By-Product of Radio News." Mr. O'Connor came to WINR when it went on the air, August 1946, after returning from Navy service. Previously, he had ten years experience on Binghamton newspapers, the last several years as swing editor . . . which means that he knows the community.

(Continued on next page)

Station WINR comments editorially, daily. One-third of all programs are local. Never uses a story more than three times; and there is a new lead on every story used more than once.

Giving air credit to sources and persons, says Mr. O'Connor, pays big dividends. Wire recorder is big help, too, and is used daily. Mr. O'Connor runs his department without staff assistance; is able to do so because of his long experience in getting the news in Binghamton.

Regional News. "Last year's radio news clinic convinced us," said Harvey Sanderson, WFBL, Syracuse, "that we should look into regional and state coverage. We did so and now broadcast a strictly New York State show, twice daily.

Four regional correspondents are tied into WFBL newsroom with teletypes. They are located in Auburn, Cortland, Oswego and Rome. They are regular newspapermen. Teletype is supplemented with special deliveries. Correspondents report twice daily in advance of the 9:00 a.m. and 5.45 p.m. state news shows and at such other times as news indicates.

As for listeners, Mr. Sanderson said that the 5:45 p.m. show, which is in competition with children's serials, has a Hooper of 4.4 in the city of Syracuse, alone. Similar figures are unavailable from rural areas but mail with favorable comment has been received in large amounts.

The four regional correspondents receive from $15 to $20 weekly from radio station. Fixed teletype cost is $10 per station per month. One station tends to exceed minimum. Saving over telegraph, however, is substantial. Some eleven stringers are stationed at other points.

Write to Be Heard. David Kessler, news editor, WHAM, Rochester, is a veteran of over 20 years in the newspaper field. He discussed "Radio Newswriting and Re-Writing."

In his opinion the fields are so different that "I constantly re-examine the conceptions of radio writing, news gathering and presentation. One thing is frequently forgotten at stations—radio news must be heard, not read. Many good color words, good for papers, are bad for radio."

Mr. Kessler stressed the simplicity of writing for the ear. "No word on radio must cause a single listener to pause to identify it," he said. "A short pause for mental identification tends to cause the listener to lose the trend of thought."

Referring to press association copy, he referred to it as raw material—copy written for general consumption, which in turn creates a need for adaptability by the individual stations. Every effort should be made to get a local angle on these stories. Outside of big national or international news events, this is often possible. While wire services are doing an excellent job, he said, you can't accept the copy as it is if the station wants to have individuality. And the job of avoiding repetition in radio news is the job of the radio news editor. Then came a discussion of subdividing copy for broadcast according to national, international and local versus the broadcast of stories according to their importance. Mr. Kessler favored the latter procedure. He said that on the average, one-half of the WHAM news shows are local news and that the average ranges from 40% to 70%.

The station pays listeners $2 per tip, though sometimes as much as $3 to $5 is paid for an outstanding tip. The staff does the work in all cases. Not only has this arrangement been valuable to WHAM as a source of news, but it has promotional value and, additionally, tends to make a news-conscious audience.

How Radio News Pays Off. Si Goldman, general manager, WJTN, Jamestown, presented a paper on "How Radio News Pays Off."

"In disseminating news and information almost instantaneously," said Mr. Goldman, "radio is providing public service of the utmost importance and responsibility. Broadcasting news is the greatest single service a radio station performs."

"At WJTN, we have always believed in the premise that 'news pays off'—with community loyalty, maximum audiences and success for the sponsor." Then Mr. Goldman discussed the news operation at WJTN. "Since 1940 when the two local papers merged," said Mr. Goldman, "the local newscast over WJTN has grown to 4 broadcasts a day, 7 days a week—all sponsored."

In addition, WJTN broadcasts a number of other station originated news programs, all sponsored, and network co-ops, also sponsored. News editor of the station is the Buffalo Courier-Express correspondent, who began the first local news show in 1940. In addition, there are 2 full-time reporters.

WJTN maintains a schedule of charges for news presentation. On United Press news charge is 25% of time charge. The charge is 50% of time charge for a purely local news show. 40% of time facilities is charged if the show is a combination of local, national and international.

Referring to saleability of news programs, Mr. Goldman stated that station has a waiting list for every one of its news programs—local, national and co-op. With local newscasts, the stations will accept a one-day cancellation and not lose a single minute's revenue.

Mr. Goldman said that from news programs the station gets some of its best success stories. Ratingwise, every one of the station's news programs is "right on top."

Broadcast Advertising

RETAIL BUSINESS

NRDGA Clinic Cites Radio Success In Accomplishing Advertising Objectives

In line with the "how-to-do-it" pattern of the NRDGA Sales Promotion Clinic held June 26-27 at the Palmer House, Chicago, the special radio session highlighted case histories which showed how radio can accomplish specific advertising objectives for its sponsors.

William T. White, sales manager, Wieboldt Stores,

(Continued on next page)

Chicago, was chairman of the Radio Clinic. Leading retailers who are using radio with outstanding success outlined their specific sales promotion problems and the resulting objectives which were given to their use of radio. With the use of transcribed program excerpts, each showed how the time and type of program chosen allowed them to beam their advertising to the specific groups of listeners they were most anxious to attract to their stores. Commercial copy excerpts and results were cited to show how these programs were reaching their objectives.

Wieboldt Programs "Part of Store." Mr. Lawrence H. Foster, sales promotion manager, The Fair, Chicago, reviewed the success of his use of an early morning newscast. Miss Myrtle Green, Wieboldt Stores, Chicago, gave a step by step analysis of the manner in which Wieboldt's builds radio programs so they are a part of the store instead of just sponsored by the store. She used as her example, the "Melody Lane" program, one of two Wieboldt programs which were given honorable mention in the NRDGA Radio Contest awards. She showed how "Melody Lane" completely characterizes the store, adds fashion authority to the store's advertising and brings specific sales results to fashion departments.

Mr. Hugh Muncy, farm director, and Miss Elizabeth Gahre, promotion manager of KXEL, Waterloo, Iowa, outlined the James Black Dry Goods Company's NRDGA grand prize-winning program, "RFD 1540." They showed how a program built around community interests can broaden a store's trading area and bring increased item and departmental sales results.

Mr. Julian N. Trivers, publicity director, Wm. Hengerer & Company, Buffalo, discussed "Early Date at Hengerer's," another prize winner of the NRDGA radio program contest. He pointed to sales and goodwill results which can be gained from locally-produced, in-store audience participation programs.

"How," by Hart. Miss Lee Hart, assistant director of Broadcast Advertising for NAB, gave specific examples to show advertising managers how they could plan and direct their use of radio in a way which would make results from radio measurable, both in terms of items sold and in terms of increased departmental sales.

Comments from the promotion and advertising experts who heard the radio session, indicate that this down-to-earth presentation of radio's ability to meet specific advertising objectives created new interest in radio as a potent promotional tool for retail business.

Public Interest Programming

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of July 14-20, 1947, by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving teaching positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war, however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945 the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous, and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: (a) Join and work with local groups actively concerning themselves with the problems of better education. (b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. Though the schools of America are closed in July and August, the urgency of the crisis in our schools makes it necessary to keep this subject before the public. During the summer months plans should be made to assure that when schools open in the fall they should be more adequately staffed and have improved equipment, buildings, supplies, etc. Your program can help bring this improvement about by

(Continued on next page)

stressing the serious plight of our schools, what a deterioration in American education means to our boys and girls and to our nation, and what listeners can do now to overcome the crisis. (Fact Sheet No. 37)

Buy U. S. Savings Bonds— "Save the Easy Automatic Way"

The U. S. Treasury is conducting its most important stepped-up promotion of U. S. Savings Bonds for 1947 during June and July. The way the public debt is managed will affect the life of every American for years to come, as regards money supply, the price level, business conditions and what the dollar will buy; *and wise management of the debt demands that ownership of U. S. securities be spread as widely as possible among individuals. Beginning June 1, the U. S. Treasury, in cooperation with the banks of America, is inaugurating an easy, automatic method—The Bond-A-Month Plan*—of buying Bonds for the millions of Americans not on regular payrolls. The backbone of the Savings Bonds program is still the Payroll Savings Plan, and, although it is receiving whole-hearted support from industry, recent surveys show that this method now needs additional stimulation. The rate of interest, sound investment value, and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like retirement incomes, education for the children, new homes, the most enjoyable use of leisure time. As an investment, U. S. Savings Bonds are safe, profitable. The effective way to provide for the future is through *regular* savings. Regular saving is easy and automatic if you sign up for the Payroll Savings Plan where you work, or the Bond-A-Month Plan where you bank. (Fact Sheet No. 11-G)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 7. They are subject to change.

Monday, July 7

(10:00 A. M.)

NEW—Keystone Broadcasting Corp., Harrisburg, Pa.—For FM facilities.

NEW—York Broadcasting Co., York, Pa.—For FM facilities.

NEW—Reading Broadcasting Co., Reading, Pa.—For FM facilities.

Further Hearing

(10:00 A. M.)

NEW—Wired Music, Inc., Rockford, Ill.—C. P., **1400 kc.**, 250 watts, unlimited.

Respondent: WRJN, Racine Broadcasting Corp., Racine, Wisconsin.

Further Hearing

(Before Commissioner Walker, 10:00 A. M.)

WTOL—The Community Broadcasting Co., Toledo, Ohio—Renewal of license, **1230 kc.**, 250 watts, unlimited.

NEW—Public Service Broadcasters, Inc., Toledo, Ohio—C. P., **1230 kc.**, 250 watts, unlimited.

Tuesday, July 8

(10:00 A. M.)

NEW—Woodward Broadcasting Co., Detroit, Mich.—C. P., DA, **840 kc.**, 5 KW, DA, daytime.

Intervenor: WHAS, Courier-Journal and Louisville Times Co., Louisville, Kentucky.

Further Hearing

(10:00 A. M.)

NEW—The Patriot Co., Harrisburg, Pa.—C. P., **580 kc.**, 5 KW, unlimited, DA-night.

WHP—WHP, Inc., Harrisburg, Pa.—C. P., **580 kc.**, 5 KW, unlimited, DA-night.

WARM—Union Broadcasting Co. (WARM), Scranton, Pa.—C. P., **590 kc.**, 1 KW, unlimited, DA-night and day.

WBAX—John H. Stenger, Jr. (WBAX), Wilkes-Barre, Pa.—C. P., **590 kc.**, 1 KW, unlimited, DA-night and day.

Intervenors: Columbia Broadcasting System, Inc.
WTAG, W. T. A. G., Inc., Worcester, Mass.
WIAC, Radio Station WIAC, Inc., San Juan, Puerto Rico.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

590 KC.—610 KC.—1240 KC.

The Commission announces its **Proposed Decision** (B-374) looking toward the grant of the following applications:

Penn Thomas Watson to change operating assignment of **Station WGTM, Wilson, N. C.**, from 1340 kc., 250 watts, unlimited time, to 590 kc., 5 KW, subject to the filing within 60 days and approval of an application for modification of CP setting forth a modified daytime proposal such as made by this applicant at the hearing, including data with respect to the new site (BP-3848; Docket 6866);

Roanoke Broadcasting Corp. to change operating assignment of **Station WSLS, Roanoke, Va.**, from 1240 kc., 250 watts, unlimited, to 610 kc., 1 KW, unlimited time, subject to filing within 60 days and approval of an application for modification of CP, setting forth a proposal for 610 kc. with power of 1 KW, DA-2, such as that made at the hearing (BP-4095; Docket 6869);

Lynchburg Broadcasting Corp. to change operating assignment of **Station WLVA, Lynchburg, Va.**, from 1230 kc., 250 watts, unlimited time, to 590 kc., 1 KW, subject to condition that it protect the daytime operation of **Station WGTM, Wilson, N. C.**, on 590 kc., in accordance with Commission's Standards of Good Engineering Practice and comply with the Standards in all other respects, and further subject to filing within 60 days and approval of an application for modificatoin of CP setting forth a proposal for operation on **590 kc.** with 1 KW power, DA-2, such as that made at the hearing (BP-4096; Docket 6870);

Virginia Broadcasting Corp. for a new station at **Roanoke, Va.**, to operate on 1240 kc., 250 watts, subject to filing within 60 days and approval of an application for modification of CP setting forth operation on the frequency 1240 kc. with 250 watts power, and subject to these facilities being vacated by Roanoke Broadcasting Corp. (BP-3964; Docket 6969);

(Continued on next page)

At the same time the Commission proposes to deny the applications of Eastern Carolina Broadcasting Co. to change assignment of **Station WGBR, Goldsboro, N. C.,** from 1400 kc., 250 watts, unlimited, to 590 kc., 5 KW, unlimited time (BP-3914; Docket 6867) and of Jonas Weiland to change assignment of **Station WFTC, Kinston, N. C.,** from 1230 kc., 250 watts, unlimited, to 590 kc., 5 KW, unlimited time (BP-3827; Docket 6868). (Commissioners Wakefield, Webster and Durr not participating.)

620 KC.

The Commission announces its **Final Decision** (B-366) granting the application of the **Hanford Publishing Company** for a new station at **Hanford, California,** to operate on 620 kc., 1 KW, unlimited time, DA night (BP-4869; Docket 7783), and denying the application of **Fresno Broadcasting Co.,** seeking the same facilities with DA both day and night, at **Fresno, Calif.** (BP-5005; Docket 7784).

790 KC.

The Commission announces its **Final Decision** (B-340) granting the application of **Central Broadcasting Company** to increase power of **Station WEAU, Eau Claire, Wisconsin,** from 5 KW day, 1 KW, with DA, at night, to 5 KW day and night, with DA, operating on 790 kc., subject to CAA approval of transmitter site and antenna system (BP-4312; Docket 7216), and granting the application of **Lubbock County Broadcasting Co.,** for a new station at **Lubbock, Texas,** to operate on 790 kc., 5 KW day, 1 KW night, subject to the condition that applicant will file within 60 days an application in conformity with the Standards of Good Engineering Practice for modification of permit specifying daytime power of 5 KW in lieu of 1 KW (BP-4062; Docket 7334). At the same time the Commission denied the application of **Plains Radio Broadcasting Co.** to change operating assignment of **Station KFYO, Lubbock, Texas,** from 1340 kc., 250 watts, unlimited time, to 790 kc., 5 KW, DA night (BP-4391; Docket 7335). (Commissioners Webster and Walker not participating; Commissioners Denny and Jett voted for a grant of the application of KFYO and a denial of Lubbock County Broadcasting Co. application.)

(The Commission had previously issued an order severing and granting the applications of KTHT and Veteran's Broadcasting Co., both at Houston, Texas (Dockets 7333 and 7336, respectively).

1220 KC.

The Commission adopted **Memorandum Opinion and Order** denying petition of **Allen T. Simmons** for rehearing directed against Commission action of April 25 and issued May 22, 1947, granting application of WGAR Broadcasting Co. to increase power of WGAR, Tallmadge, Ohio, from 5 to 50 KW, DA, and denying application of WADC to increase power from 5 to 50 KW, DA, and change frequency from 1350 to 1220 kc. The petition requested that the Decision and Order be set aside; that further hearing be afforded petitioner and that after such hearing petitioner's application be granted. (B-283)

1330 KC.—1340 KC.

The Commission announces its **Final Decision** (B-339) granting the application of Gillette Burton and Jesse Gilbert Burton, Jr., d/b as **Burton Broadcasting Company** for a new station at **Mobile, Alabama,** to operate on 1340 kc., 250 watts, unlimited time (BP-4233; Docket 7314), and denying the applications of **Gulf Broadcasting Co., Inc.,** requesting the same facilities at Mobile and the application of **Mobile Broadcasting Co.** requesting 1330 kc., 5 KW day, 1 KW night, DA, at Mobile (BP-3728; Docket 7313 and BP-3828; Docket 7482, respectively).

1400 KC.

The Commission announces its **Proposed Decision** (B-369) looking toward the grant of the application of **Narragansett Broadcasting Co.** for new station at **Fall River, Mass.,** to operate on 1400 kc., 250 watts, unlimited time; conditions (BP-4409; Docket 7312) and denial of applications of **Southeastern Massachusetts Broadcasting Corp.** (BP-4185; Docket 7053) and **Bay State Broadcasting Co.** (BP-4201; Docket 7054) seeking the same facilities at **New Bedford, Mass.**

1440 KC.—FM

The Commission announces its **Proposed Decision** (B-375) looking toward the consent to the assignment of license of **Standard Station KMED** and **CP for new FM station, in Medford, Oregon,** from Mrs. W. J. Virgin to the Medford Radio Corp., the competing applicant, and a denial of the assignment of license to the original proposed transferee, **Gibson Broadcasting** (Dockets 7928; 7929); conditions.

1450 KC.

The Commission announces its **Proposed Decision** (B-363) looking toward the grant of the application of **Coast Ventura Company** for a new station at **Ventura, California,** to operate on 1450 kc., 250 watts, unlimited time, contingent upon approval of antenna site and antenna system by the CAA (BP-3725; Docket 6839).

At the same time the Commission proposes to deny the mutually exclusive application of **Ventura Broadcasters, Inc.** (BP-3807; Docket 6840).

Commissioner Wakefield voted for a grant of the application of Ventura Broadcasters, Inc., and denial of Coast Ventura Company because of the greater integration of ownership and operation proposed by Ventura Broadcasters, Inc.

1480 KC.

The Commission announces its **Final Decision** (B-291) granting the application of **Radio Wisconsin, Inc.,** for a new station at **Madison, Wisconsin,** to operate on 1480 kc., 1 KW, unlimited time, DA (BP-3809; Docket 6940), and denying the application of **Edwin Mead** seeking the same facilities at **Rockford, Ill.** (BP-4729; Docket 7599). The grant to Radio Wisconsin, Inc., is subject to approval of transmitter site and antenna system by the CAA. The Commission stated it is not now acting on the application of Radio Wisconsin for leave to amend so as to request operation with 5 KW daytime rather than 1 KW because it does not presently have sufficient engineering data upon which to make a proper determination whether the application should be granted but will entertain a petition from this applicant for modification of CP requesting daytime operation with 5 KW power.

1490 KC.

The Commission announces its **Final Decision** (B-299) granting the application of the **Elgin Broadcasting Company** for a new station at **Elgin, Ill.,** to operate on 1490 kc., 250 watts, unlimited time, conditions (BP-3833; Docket 6962). At the same time the Commission denied the applications of **Village Broadcasting Co., Oak Park, Ill.** (BP-4075; Docket 6963); **Vincent G. Cofey, Elgin, Ill.** (BP-4381; Docket 7154), **Community Broadcasting Co., Oak Park, Ill.** (BP-4382; Docket 7155), each seeking new stations in the cities indicated, on 1490 kc., 250 watts, unlimited time, and **Beloit Broadcasting Co.,** seeking new station at **Beloit, Wis.** (BP-4161; Docket 6964), on 1490 kc., 100 watts power.

AM—New CP's Granted

900 KC.

Antigo Broadcasting Co., Antigo, Wisc.—Granted CP for new station to operate on 900 kc., 250 watts, daytime only; conditions. (BP-6024)

910 KC.

Tri-Borough Broadcasting Co., Apollo, Pa.—Granted CP for new station to operate on 910 kc., 1 KW, daytime only; conditions. (BP-5710)

930 KC.

The Daily News Broadcasting Co., Bowling Green, Ky.—Granted CP for new station to operate on 930 kc., 1 KW, daytime only; conditions. (BP-6050)

1230 KC.

Benton County Broadcasters, Kannewick, Wash.—Granted CP for new station to operate on 1230 kc., 250 watts, unlimited time. (BP-5701)

(Continued on next page)

Pocono Record, Inc., Stroudsburg, Pa.—Granted CP for new station to operate on 1350 kc., 1 KW, daytime only; conditions. (BP-5951)

AM—Designated for Hearing

1340 KC.

The Montana Network, Missoula, Mont.—Designated for hearing application for new station to operate on 1340 kc., 250 watts, unlimited time. (BP-6022; Docket 8438)

1490 KC.

WTOM—Fred O. Grimwood, Bloomington, Ind.—Designated for hearing application to change facilities from 1490 kc., 100 watts, unlimited time, to 1490 kc., 250 watts, unlimited time and for extension of date for commencement and completion of construction (BMP-2669; Docket 8451); ordered WDAN, Danville, Ill.; WKBV, Richmond, Ind., and WOMI, Owensboro, Ky., be made parties to proceeding.

AM—Miscellaneous Actions

WHAS—WHAS, Inc., Louisville, Ky.—Granted petition of WHAS for interim relief praying that the Commission postpone the effective date of its action of November 14, 1946, granting without hearing application of Oklahoma Agricultural and Mechanical College, Stillwater, Okla., for construction permit, and recall or set aside its action of April 16, 1947, granting without hearing application of Oklahoma Agricultural and Mechanical College for modification of CP; ordered that the actions be suspended, pending the decisions of the United States Court of Appeals of the District of Columbia in **L. B. Wilson, Inc.** v. **Federal Communications Commission** (No. 9434) and **WJR—The Good Will Station, Inc.** v. **Federal Communications Commission** (No. 9495) and further order of the Commission, since it appears that the questions presented in this matter are substantially the same as those involved in above-mentioned litigation.

WLW—Crosley Broadcasting Corp., Cincinnati, Ohio—Granted petition of WLW for interim relief praying that the Commission postpone the effective date of its action of December 5, 1946 granting without hearing the application of Middle West Broadcasting Co., Inc., St. Paul, Minn., for construction permit; ordered that the action of December 5, 1946 be suspended pending the decisions of the United States Court of Appeals in **L. B. Wilson, Inc.** v. **Federal Communications Commission** (No. 9434) and **WJR The Good Will Station, Inc.** v. **Federal Communications Commission** (No. 9495), and further order of the Commission, since it appears that the questions presented in this matter are substantially the same as those involved in above-mentioned litigation.

KTTR—Show-Me Broadcasing Co., Rolla, Mo.—Granted modification of CP to change frequency from 1340 kc. to 1490 kc., operating with 250 watts unlimited time. (BMP-2771)

KXEO—Audrain Broadcasting Corp., Mexico, Mo.—Dismissed petition requesting reconsideration of Commission's action of April 10, granting application of Show-Me Broadcasting Co. for new station to operate on 1340 kc., since above action renders issues moot.

WTAL—WTAL-FM—Capital City Broadcasting Corp. (assignor); John H. Phipps (assignee), Tallahassee, Fla.—Granted consent to voluntary assignment of license and CPs from Capital City Broadcasting Corp. to John H. Phipps, president, director and sole stockholder of licensee. (BAPL-24)

WLAK—Radio Station WLAK (Assignor); Lakeland Broadcasting Corp. (Assignee), Lakeland, Fla.—Granted consent to voluntary assignment of license from S. O. Ward, an individual, trading as Radio Station WLAK, to Lakeland Broadcasting Corp. in which Ward owns 99.65% of stock. (BAPL-26)

WNOC—Norwich Broadcasting Co., Norwich, Conn.; WGAT—Central Broadcasting Co., Utica, N. Y.—Granted consent to voluntary assignment of licenses of WNOC from The Norwich Broadcasting Co., a partnership composed of H. Ross Perkins and J. Eric Williams, to H. Ross Perkins, and of WGAT from The Central Broadcasting Co., a partnership composed of same two individuals, to J. Eric Williams (i.e., dissolution of two partnerships to result in each partner becoming sole owner and licensee of a station). (BAL-605; -606)

KDSH—Queen City Broadcasting Co. (assignor); Boise Valley Broadcasters, Inc. (assignee), Boise, Idaho—Granted consent to assignment of permit of KDSH and conditional grant of permit for associated FM station, from Queen City Broadcasting Co. to Boise Valley Broadcasters, Inc., which will be controlled by assignor; condition. (BAL-608)

WLOF—George W. Gibbs (transferor); Walter C. Shea and Wm. J. Sears (transferees), Orlando, Fla.—Granted consent to voluntary transfer of control of license of Station WLOF from George W. Gibbs to Walter C. Shea and Wm. J. Sears for $40,000 for 50% interest. (BTC-546)

Southland Broadcasting Corp., No. Miami Beach, Fla.—Granted petition for leave to amend its application (BP-5510; Doc. 8041) so as to specify 1580 kc. instead of 1000 kc., etc. The amendment was accepted and application as amended removed from the hearing docket.

Mary W. Martin, Ft. Lauderdale, Fla.—The Commission on its own motion removed from the hearing docket application. (BP-5808; Docket 8148)

San Pedro Printing and Pub. Co., San Pedro, Cal.—Granted petition to dismiss without prejudice its application for a new FM station (BPH-488; Docket 8318)

WIAC—Radio Station WIAC, Inc., San Juan, P. R.—Granted petition for leave to intervene in the hearing on application of Foundation Co. of Washington. (BP-4997; Docket 8279)

Hanover Broadcasting Co., Hanover, Pa.—Granted petition for waiver of rules and accepted petitioner's written appearance in re its application. (BP-5658; Doc. 8200)

WKAX—Courier Broadcasting Service, Inc., Birmingham, Ala.—Granted petition to dismiss without prejudice its application (BP-5464; Docket 8368), subject to the right of reinstatement under the provisions of Sec. 1.365(c) of the Rules.

Woodward Broadcasting Co., Detroit, Mich.—Granted petition for continuance of hearing upon its application (BP-5827; Docket 8167), presently scheduled for July 8, to August 20.

Keystone Broadcasting Corp., Harrisburg, Pa., et al.—Granted joint petition for continuance of further consolidated hearing presently scheduled for July 7, to August 11.

Charles M. Meredith, Silverdale, Pa.—Granted petition for leave to amend his application (BP-5625; Doc. 8092) so as to specify 1570 kc. with 250 watts, daytime only, instead of 1370 kc., 1 KW, daytime. The amendment was accepted and application as amended removed from the hearing docket.

Radio Anthracite, Inc., Pottstown, Pa.—The Commission on its own motion removed from the hearing docket application. (BP-5582; Docket 8091)

The Commission on July 2 adopted an order granting joint petition of **United Broadcasting Co.** and **Ogden Broadcasting Co., Inc., Ogden, Utah**, requesting the Commission grant petitioners leave to withdraw their joint petition for recon-

(Continued on next page)

sideration filed Aug. 22, 1946, and dismiss its order in response thereto, dated 11/29/46, setting aside grant made without hearing on August 1, 1946 of application of **Central Utah Broadcasting Co.** for new station at **Provo, Utah,** to operate on 1490 kc., 250 watts, unlimited (BP-4703; Docket 7959); severed said application from consolidated proceeding with petitioners' applications, removed from hearing docket and reinstated grant of August 1, 1946 to Central Utah Broadcasting Co.; closed record in consolidated proceeding held on petitioners applications in June 1946.

WNOE—James A. Noe, New Orleans, La.—Granted petition for extension of time within which to file exceptions to the Commission's proposed decision in re applications in Dockets 6346 and 7117, and the time was extended to and including August 4.

Wired Music, Inc., Rockford, Ill.—The Commission on its own motion continued the hearing on application (Docket 7964) presently scheduled for July 7 to July 21.

AM—Applications Accepted for Filing

730 KC.

State Teachers College at West Chester, Pa.—Granted CP for new station to operate on 91.3 mc. (No. 217); 2.4 KW; 255 ft. (BPED-49)

FM—Applications Accepted for Filing

WNHC-FM—Elm City Broadcasting Corp., New Haven, Conn.—Modification of construction permit (B1-PH-670, which authorized a new FM broadcast station) for extension of completion date.

WJHP-FM—The Metropolis Co., Jacksonville, Fla.—Modification of construction permit (B3-PH-385, which authorized a new FM broadcast station) for extension of completion date.

KFXD-FM—Frank E. Hurt and Son, Nampa, Idaho (A partnership composed of Frank E. Hurt and Edward P. Hurt—Modification of construction permit (B5-PH-807, which authorized a new FM broadcast station) for extension of completion date.

KSEI-FM—Radio Service Corp., Pocatello, Idaho—Modification of construction permit (B5-PH-512, which authorized a new FM broadcast station) for extension of completion date.

WOWO-FM—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Construction permit to change frequency to Channel 241, 96.1 mc.; specify type of transmitter, change transmitter site, specify antenna height above average terrain as 504 feet; effective radiated power as 16.9 KW, and specify antenna system.

WJWD—The Capital Broadcasting Co., Annapolis, Md.—Modification of construction permit (B1-PH-781, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WJDX-FM—Lamar Life Insurance Co., Jackson, Miss.—Modification of construction permit (B3-PH-735, which authorized a new FM broadcast station) to change antenna height above average terrain to 602 feet; effective radiated power to 102 KW, and make changes in antenna system.

KBON-FM—Inland Broadcasting Co., Omaha, Nebr.—Modification of construction permit (B4-PH-390, as modified) which authorized a new FM broadcast station for extension of completion date.

WHKY-FM—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Modification of construction permit (B3-PH-714, which authorized a new FM broadcast station) for extension of completion date.

WHIS-FM—Daily Telegraph Printing Co., Bluefield, W. Va.—Modification of construction permit (B2-PH-571, which authorized a new FM broadcast station) for extension of completion date.

KPNI-FM—Peninsula Newspapers, Inc., Palo Alto, Calif.—Modification of construction permit (B5-PH-539, as modified, which authorized a new FM broadcast station) for extension of completion date.

WRC-FM—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (B1-PH-166, as modified, which authorized a new FM broadcast station) for extension of completion date.

WINX-FM—WINX Broadcasting Co., Washington, D. C.—Modification of construction permit (B1-PH-783, as modified, which authorized a new FM broadcast station) for extension of completion date.

WCJT—WHAS, Inc., Louisville, Ky.—Modification of construction permit (B2-PH-88, as modified), which authorized a new FM broadcast station for extension of completion date.

WGAN-FM—Portland Broadcasting System, Inc., Portland, Maine—Modification of construction permit (B1-PH-116, as modified), which authorized a new FM broadcast station for extension of completion date.

WGUY-FM—Portland Broadcasting System, Inc., Bangor, Maine—Modification of construction permit (B1-PH-338, as modified), which authorized a new FM broadcast station for extension of completion date.

WLAV-FM—Leonard A. Versluis, Grand Rapids, Mich.—Modification of construction permit (B2-PH-264, which authorized a new FM broadcast station) for extension of completion date.

WFBG-FM—The Gable Broadcasting Co., Altoona, Pa.—Modification of construction permit (B2-PH-543, as modified), which authorized a new FM broadcast station for extension of completion date.

WGPA-FM—The Bethlehems' Globe Publishing Co., Bethlehem, Pa.—Modification of construction permit (B2-PH-615, as modified), which authorized a new FM broadcast station for extension of completion date.

WNIQ-FM—Uniontown Newspapers, Inc., Uniontown, Pa.—Modification of construction permit (B2-PH-736, as modified), which authorized a new FM broadcast station for extension of commencement and completion dates.

KFBA—Frontier Broadcasting Co., Cheyenne, Wyo.—Modification of construction permit (B5-PH-541, which authorized a new FM broadcast station) for extension of completion date.

WRVA-FM—Larus & Brother Co., Inc., Richmond, Va.—Modification of construction permit (B2-PH-973, as modified), which authorized a new FM broadcast station for extension of completion date.

NEW—Earl C. Hankamer, Houston, Texas (P. O. 1411 Commerce Building)—Construction permit for a new FM broadcast station (Class B) to be operated on 92.1 to 103.9 mc. band, ERP of 2,890 watts.

95.1 MC.—#236

WEW-FM—St. Louis University, St. Louis, Mo.—Modification of construction permit (B4-PH-37, as modified), which authorized a new FM broadcast station to change frequency to Ch. #236, 95.1 mc.; effective radiated power to 68.8 KW, antenna height above average terrain to 530

(Continued on next page)

feet; make changes in antenna system and change commencement and completion dates.

Noncommercial Educational

WHA-FM—State of Wisconsin-State Radio Council, Madison, Wisc.—Modification of construction permit (B4-PED-59 as modified) which authorized a new noncommercial educational broadcast station for extension of completion date.

To Be Assigned by FCC

NEW—Joe L. Smith, Jr., Charleston, W. Va. (P. O. 608 Woodlawn Ave., Beckley, W. Va.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and effective radiated power of 24.5 KW.

NEW—Andave Radio Co., Milwaukee, Wis. (P. O. Room 623, Century Bldg., 808 North Third St.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC with effective radiated power of 36.9 KW.

NEW—Nashua Broadcasting Corp., Nashua, N. H. (P. O. 142 Main St.)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 1 KW and antenna height above average terrain 256.25 feet.

NEW—Harry D. Fornari, Mineola, N. Y. (P. O. 41 West 96th St., New York, N. Y.)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC.

FM—Application Returned

The Southwestern Baptist Theological Seminary, Fort Worth, Texas—Construction permit for a new FM broadcast station (Class B) to be operated on 92.1 to 103.9 mc. band. Returned June 30, 1947: Charter not properly certified and notarized.

TELEVISION

TV—Amendment to Rules

The Commission adopted an amendment to Section 3.606 of its Rules so that Channel No. 9 is withdrawn from the Detroit metropolitan area in the table showing the allocation of television channels to metropolitan districts in the United States, effective immediately. This action was taken in order to honor the reservation by the Dominion of Canada of Channel No. 9.

TV—License Extension

The Commission on June 26 directed that the licenses for the operation of the following stations be extended upon a temporary basis to October 1, 1947, for the reasons stated:

W2XBD, General Electric Co., Schenectady, N. Y.—(Pending further engineering study);

W2XMT, Metropolitan Television, Inc., New York, N. Y.—(Pending further accounting study).

TV—Applications Accepted for Filing

WTTG—Allen B. Dumont Laboratories, Inc., Washington, D. C.—Modification of construction permit (B1-PCT-16 as modified, which authorized new commercial television broadcast station) to change type of transmitter and make changes in antenna system.

W3XBR—The Conestoga Television Association, Inc., Lancaster, Penna.—Construction permit for reinstatement of (construction permit B2-PVB-165 which authorized a new experimental television broadcast station frequencies that may be assigned by the Commission's Chief Engineer from time to time, Power—200 watts (peak), Emission A3, A5 and Special for Television, hours of operation in acordance with Section 4.4(A), transmitter location) to specify frequencies in 590-610 mc. band; to change power from 200 watts (peak) to 500 watts; to change emission from A3, A5 and Special for Television to Vis. A5 and Aur. A3; and to change type of transmitter.

TV—Application Dismissed

NEW—Radio Station WOWO, Inc., Area of Omaha, Neb.—Construction permit for a new experimental television relay broadcast station to be operated on frequencies of 6775 to 680 mc, power of 1 watt visual with A5 Visual Emission.

Federal Trade Commission Actions

There were no complaints, stipulations, nor cease and desist orders issued during the past week.

Membership To Vote In Referendum On Changes Proposed In NAB By-Laws

NAB member stations will vote on a number of changes in the organization's By-Laws starting this week. The changes, adopted by the Association's Board of Directors at its last meeting, have been the subject of intensive study by members of the NAB staff, Board subcommittees and the Board itself over a period of six months.

The material for the referendum was today turned over to Ernst & Ernst, Inc., New York accounting firm, which has been commissioned by the NAB Board to conduct the voting.

Ernst & Ernst will mail to the entire NAB active membership the revised By-Laws, together with the charter and a ballot. The members will be asked to vote on the By-Laws, Article by Article, and upon the Charter as a whole.

The present NAB By-Laws were adopted originally in 1938, and amended from time to time in the intervening years. Because of the numerous amendments, the arrangement of the By-Laws is confusing and a complete revision was agreed upon. A special subcommittee of the Board has held several meetings to discuss the By-Laws from the standpoint of their adaptability to present-day conditions.

One major change on which the membership will vote in the forthcoming referendum is the removal from the By-Laws of the definitions of the boundaries of the 17 districts. The requirement for 17 districts remains, but under the proposed change the matter of determining the areas to be included within the 17 districts would be subject to the action of the Board. This, it is believed, will bring about a desirable flexibility.

Another recommended change would adjust the income brackets upon which dues are based. A study of

(Continued on page 565)

On the Inside

Listeners to the MBS program *Opinion-Aire*, voting by telephone calls, agreed overwhelmingly that "radio is doing a good job." With more than 2000 calls made, 86.4% voted affirmatively. (p. 566)

Responding to a call from the Civil Service Commission for aid in recruiting applicants for positions with the Atomic Energy Commission, radio stations helped pull over 14,000 replies. (p. 567)

As of July 1, the monthly tabulation of radio stations reveals a total of 2,779 AM, FM and TV stations authorized. (p. 567)

The FCC indicated last week that the establishment of rules and standards for Facsimile is not far distant. The Radio Technical Planning Board submitted proposals for standards recently. (p. 566)

A definition for "tropical broadcasting" was submitted, and recommendations for band allocations were made at the International Radio Conference in Atlantic City last week. (p. 565)

Senate Confirms Representative Jones To Post As FCC Commissioner

Congressman Robert F. Jones (R) Ohio, was unanimously confirmed by the Senate late Friday afternoon as Commissioner on the FCC.

Commissioner Jones was named to replace Ray C. Wakefield when President Truman withdrew the latter's nomination several weeks ago (*Current* REPORTS, p. 507).

Senate confirmation came after lengthy hearings had been conducted by a subcommittee of the Interstate and Foreign Commerce Committee. The full committee approved Mr. Jones' nomination during its executive meeting last Thursday.

Petrillo Tells House Subcommittee Union May Make Records, Pull Network Musicians

James C. Petrillo, president, AFM, testified for two days last week (7-8) before a special subcommittee of the House Labor Committee which had been set up to investigate charges that the union leader dictated to his union and to the industries with which his union deals.

After the two days of the hearing, the subcommittee recessed, without setting a date for resumption, to study the testimony received.

Major points brought out in the hearing include:

¶ AFM may not renew contracts with recording companies and may enter the recording business itself.

¶ Network musical broadcasts may not be permitted by the union after February 1, 1948.

¶ Petrillo may meet with educators and others to discuss broadcasts by amateurs.

Petrillo's testimony, interlarded frequently with

wisecracks and broad humor, was interrupted by the testimony of several witnesses who indicated that their legitimate activities were restricted either directly by the union or by the belief that their activities would be restricted.

Among the witnesses was George Jennings, Director of Radio for the Chicago public school system. The school radio, Jennings testified, never broadcasts instrumental music played by students in the belief that such broadcasts are in violation of the by-laws of the Chicago local. The activities of Jennings's school radio system are confined exclusively to broadcasts in the schools. He stated that broadcasts by school choirs and orchestras were discontinued because no money was available for standby fees.

In rebuttal, Petrillo, who is also head of the Chicago local, commented that he "never heard anything about this before." The union chieftain's attorney, Joseph Padway, stated, for the purpose of the record, that this matter had never been brought to the attention of the Chicago local of the AFM.

Petrillo also testified on the recent festival held in Montreal, Canada, at which permission was denied festival officials to make a recording of the performance of the winning band without payment of standbys. According to Mr. Riccardi, Petrillo's assistant in charge of recordings, the Montreal local informed him that the recordings were to be sold at a price of $1.00. Mr. Riccardi testified that he had personally seen the newspaper advertisements offering the records for sale at this price. Under these circumstances, Riccardi stated, he felt justified in prohibiting the making of the recordings unless standbys were hired. Under questioning by Congressman Barden he stated that he would make a similar ruling in the future if the same situation arose.

These, and similar incidents, Petrillo declared, have been grossly exaggerated in the public press. A questionnaire distributed earlier in the year by his office, he testified, disclosed that in 1946, 3,234 amateur programs of all types were broadcast over the air. The great majority of AFM locals, according to the AFM chief, do not interfere with amateur broadcasts at all.

A highlight of the hearing was the statement by Petrillo that he would meet with music educators, broadcasters and other interested persons in order to establish mutually satisfactory standards to govern broadcasting by amateur musicians. Under the Lea Act, Petrillo stated, the AFM cannot interfere with amateur and school band broadcasts.

Recordings

On the question of recordings, Petrillo's attitude was firmer. Upon the expiration of the present contracts with the recording companies, he stated, the contracts will not be renewed. Both the companies and the union are dissatisfied with the agreements, he argued, and under these circumstances he saw little use in renewing them. The issue is not entirely decided, it appears, since Petrillo indicated a hope that the recording companies would devise some solution to their problems which would be satisfactory to the union.

Network Music Broadcasts

During the course of the hearing, Petrillo announced that on February 1, 1948, he would not renew existing contracts with the networks and apparently would order all musicians to cease performing on network music broadcasts. After that date, Petrillo said, if a station wants to broadcast the music of Harry James or Toscanini it would have to bring the artist to its microphone. All such broadcasts will be permitted solely on a local basis.

Quotas

Petrillo's testimony revealed a number of other items of particular interest to broadcasters. Quotas, he indicated, are set by locals and not by his office. According to Petrillo, the operations of the AFM are conducted on a decentralized basis. Central headquarters of the union, however, has assumed control over the following matters: (1) recordings; (2) traveling bands; (3) television; (4) network amateur broadcasts; (5) FM. On all other matters, the musicians union president indicated, the locals exercise complete sovereignty, administering their controls and calling their own strikes. A large measure of control is apparently exercised by national headquarters, however, because, according to Petrillo, he can and does intervene in the affairs of a local when: (1) there is an appeal from the decision of a local; (2) a local seeks support of the national office in the course of a strike or the threat of a strike.

Local By-Laws

Replying to a question by Representative Nixon, Petrillo denied that copies of the by-laws of both the national and local union, when incorporated in union agreements, are not made available to broadcasters. Mr. Padway, Petrillo's attorney, remarked that if the by-laws are not made available to broadcasters, they may be secured by writing national headquarters of the union in Chicago.

(Continued on next page)

Acting as spokesman for the union, Padway also denied that future, as yet unwritten, union by-laws are ever incorporated in contracts, and insisted that contracts with the musicians union contain only by-laws as of the date the contract is signed.

Membership to Vote in Referendum on Changes Proposed in NAB By-Laws

(Continued from page 563)

the inequities existing in the present schedule was made by the NAB Research Department and the schedule was rewritten to product a parity between the classifications and eliminate the sudden jumps in dues that occur under the present schedule. The authority to determine the annual dues applicable to each class remains, as it is the present By-Laws, subject to the action of the Board.

In this connection, another proposal relates to those persons or firms operating an AM and an FM station in the same community in association or identically programmed. In such cases the combined income of both operations may be used in determining the dues bracket into which his operation falls.

Another major recommendation has to do with the method of nominating District Directors. Under the present By-Laws, District Directors are both nominated and elected at district meetings. Under the proposal to be voted upon, the nomination would be by referendum ballot, with the right also to nominate from the floor at the meeting, but the election would take place at a district meeting. As in the present By-Laws, the Directors from the even-numbered districts would be elected in even years and the Directors from the odd-numbered districts would be elected in odd years, and all serve for a term of two years.

The Board has submitted alternative proposals for the nomination and election of Directors-at-Large. This provision would increase the possible number of Directors-at-Large from six to ten. In addition to the two directors-at-large each, representing large, medium and small stations now provided for, there would be added a director-at-large from FM Class A stations, FM Class B stations, television stations and facsimile stations. There is a provision which would require that there must be at least 25 stations in any classification in NAB membership in order to qualify for a member on the Board. The Board unanimously recommended this change.

However, upon the method of nominating and electing the Directors-at-Large, there was a division of viewpoints. The majority view, embodied in Proposal No. 1 on the ballot, calls for the nomination and election of all Directors-at-Large by the active member stations in each classification. For example, the large stations only would participate in nominating four from among their number for the two positions on the Board and in electing two from the four thus nominated.

The minority view, embodied in Proposal No. 2, calls for only the nomination of the Directors-at-Large by those within the respective classification and the election would be participated in by all active members in all classifications. For example, the large station membership would nominate at least four from their number for the two large station Directorships and from among those thus nominated the entire membership would decide which two are to be elected.

The revised By-Laws more clearly define the responsibilities and authority of the Board of Directors and of the President and Secretary-Treasurer, who are the elective officers of the Board. The other changes are of a minor character and are incorporated in order to bring about greater clarity and simplification.

The proposed revisions in the Charter are submitted in order to make that document conform to the changed By-Laws. There is no substantive change in these provisions, but they must be approved by the membership in order to comply with the laws of the State of Delaware, the state in which NAB is incorporated.

It is expected that the mailing of this referendum will be made the latter part of next week, or the first part of the following week, and the ballots must be returned to Ernst & Ernst postmarked not later than midnight of August 8. This gives approximately three weeks to each member to determine his vote.

Atlantic City Conference Behind Schedule; Tropical Broadcasting Recommendations Made

Sad faces were paramount among the foreign delegates at the Atlantic City International Radio Conference last week when long-time reservations home had to be cancelled because various committees failed to reach world-wide agreement on schedule.

Last week, however, Subcommittee C on Tropical Broadcasting, under Chairman Dr. H. van der Veen of the Netherlands East Indies delegation, after having met thirteen times, presented a guidance paper on Tropical Broadcasting for the main Allocations Committee. The Subcommittee turned in a definition of Tropical Broadcasting as: "A type of broadcasting using frequencies higher than the standard broadcast band for internal, national use in the (tropical) zone where it can be shown that due to difficulty of high atmospheric noise levels and propagation, it is not possible to furnish economically a more satisfactory service through the use of low, medium or very high frequencies." The Subcommittee went on to define the various tropical zones of the world and to delineate

(Continued on next page)

as the boundary for the American region the zone between the Tropics of Cancer and Capricorn, with certain extensions.

Subcommittee C then recommended that the following bands be allocated for tropical broadcasting: 200 Kc's shared (broadcasting priority) between 1.5 and 2.85 Mc's; in the American region an additional band was proposed of 200 Kc's shared, broadcasting priority, between 2.85 Mc and 4.0 Mc; other parts of the world will have 300 Kc's, unqualified, in this same band; between 4.0 and 6.0 Mc's in the American region, 260 Kc's shared, broadcasting priority, and in other parts of the world 300 Kc's, unqualified. Between 6.0 and 8.0 Mc's and between 8.0 and 10.0 Mc's 250 Kc's each, unqualified. Over 10.0 Mc's, 150 Kc's on an unqualified world-wide basis would be allocated.

Lower Cost Combinations May Be Possible Through Use of Electronic Circuit

Using the printed electronic circuit developed originally for the wartime radio proximity fuses, the National Bureau of Standards announced last week that, as a result of their experiments, a combination phonograph amplifier, AM receiver, FM receiver and Television set is now considered a possibility for the immediate future at a considerable cost reduction over existing equipment. Each circuit in the cabinet would be a separate sub-assembly built in plug-in fashion. These and other prospective uses of printing circuit techniques appear in the July issue of *Domestic Commerce.*

FCC Indicates Establishment of Standards For Facsimile After Further Tests

Indications that the Commission will soon establish facsimile on a regular broadcast basis, at the conclusion of further tests, were contained in the Commission's Release No. 9783 last Tuesday (8). At the present time, the Commission stated, facsimile broadcasting is on an experimental basis and, as yet, it has not established rules and standards, although the Radio Technical Planning Board recently submitted its proposal for standardization.

Believing that further operations and comparisons should be conducted, the Commission pointed out that the main difference of opinion now existing in the establishment of the proposed standards is whether 8.2″ and 4.1″ scanning lines should be provided at the same line rate of 105 lines per inch.

General

Listeners to MBS Program, Voting by Phone, Say Radio Is Doing a Good Job

Answering the question "Is Radio Doing a Good Job?", an overwhelming majority of listeners to the MBS program *Opinion-Aire* voted "yes" after listening to the network's June 25th program.

The series of programs, presenting both sides of current public interest questions, offers a "Prosecution witness" and counsel and a "defense witness' and counsel. In addition a studio jury votes on the specific question discussed during the half-hour program.

On the program dealing with radio, Carl Haverlin, president, BMI, presented the case for broadcasting. His counsel was Sydney Kaye. The "prosecution" was handled by Llewellyn White, radio director for the Committee on Freedom of the Press and of Radio, one of radio's most outspoken critics. His counsel was Ben Gross, radio editor, New York *Daily News.*

86.4% Vote Yes

With more than 2000 listeners in five selected cities responding the results of the audience reaction to the program's question reveal an interesting comparison with the results of the NORC study. Listener response shows that 86.4 percent of those who telephoned voted that radio is doing a good job, while 13.6 percent of the listeners voted "no."

According to the NORC study, listener answers to a similar question resulted in 82 percent of the responses indicating a listener reaction that radio is doing an excellent or good job.

Program Procedure

MBS stated that the mechanics of its program are as follows: the cities where the telephone responses are solicited are selected secretly, with no advance publicity released. This is to eliminate the possibility of pressure groups organizing to vote in a given way. Persons who happen to be listening to the Mutual station in those selected cities are advised at the start of the program that they may vote "yes" or "no" on the question, by calling a certain telephone number. Voting continues for exactly one hour from the time the program goes on the air. Trends in the telephone balloting are gathered at the end of twenty minutes. The total vote is announced on the program the following week.

Following is a city-by-city breakdown of the vote in the five cities selected to answer the question "Is Radio Doing a Good Job?"

City	Percent Yes	Percent No
Miami, Fla.	77	23
Huntington, W. Va.	94	6
Wilkes-Barre, Pa.	89	11
Hastings, Neb.	75	25
Emporia, Kan.	97	3

The network reported that a total of 2,203 telephone votes were registered in the five cities.

News

Committee Recommends Papers on Radio News As Aids to Better Performance

Eight papers on radio news read at the NAB-Kansas City, Mo., clinic, April 16, have been distributed to stations and CP's. The NAB radio news

(Continued on next page)

committee believes their reading will contribute further to raise the standards of radio news.

Titles and speakers of the papers contained in the brochure were:

- Radio News Department Starts with Management—Buryl Lottridge, Vice President, WOC, Davenport.
- Value of News to Radio Stations—Wayne W. Cribb, General Manager, KHMO, Hannibal, Mo., and Chairman NAB Small Market Stations Executive Committee.
- Use of Wire Recorder—William Ray, Director of News and Special Events, WMAQ-NBC, Chicago.
- Building Every Newscast for a Particular Audience—Bruce Palmer, News Director, WKY, Oklahoma City.
- Farm News—Phil Evans, Farm Director, KMBC, Kansas City.
- Radio Rewriting—Soren Munkhof, Director of News, WOW, Omaha.
- Correspondents for Individual Radio Stations—Jack Shelley, News Editor, WHO, Des Moines.
- Value of a News Editor to a Radio Station—Ken Miller, News Director, KVOO, Tulsa.

[1] Non-commercial CP included.

[2] FCC states that 238 FM stations are now on the air. They include CG, CP and licensed stations. There are 11 TV operating.

* License for WCPS, Tarboro, N. C., set aside.

** Includes stations licensed to operate, CP's and CG's.

*** Stations which have been granted construction permits or conditional grants during the preceding month.

CP—Construction permit.

CG—Conditional Grant.

Public Interest Programming

Broadcasters Obtain Outstanding Results In Pulling Response for Atomic Commission

This is a story of how broadcasting came to Uncle Sam's rescue, and in 2½ days converted a seemingly hopeless situation into an outstanding success. The job was done by 185 stations in fourteen states west of the Mississippi.

The Beginning

U. S. Civil Service Commission called on NAB June 17; said that an emergency existed; that efforts to secure 10,000 applications for job of Security Inspector for the United States Atomic Energy Commission were doomed to failure—unless radio could perform a seeming miracle.

Next day a telegram explaining the nature of the emergency was sent stations in western cities where it was known that application blanks were on hand in post offices. It also contained an announcement which, it was suggested, be broadcast as frequently as possible Thursday, Friday and to 4:00 p.m. on Saturday, June 21. Copy was purposely written to discourage curiosity seekers.

The End

So immediate was listener response that over 5,000 applications were tabulated Monday, June 23, with that day's mail still unopened. Applications totalled over 14,000 at the end of the count on June 30.

Appreciation

Official acknowledgement and appreciation for industry assistance has been voiced by Harry B.

(Continued on next page)

Mitchell, president, United States Civil Service Commission, Washington, in a letter to Arthur Stringer, NAB staff. Said Mr. Mitchell in part:

"During the week of June 17, after our usual recruiting methods had failed to produce enough eligibles for Security Inspectors for the Atomic Energy Commission, we found it necessary to call on NAB . . .

"NAB, as it did throughout the war period, responded promptly and effectively . . . In the three days following, we received over 5,000 applications and at "the end of the recruiting period, more than enough applications were on hand to fill the need.

"I want to express the deep appreciation of the United States Civil Service Commission for this generous cooperation which proved so valuable in solving one of our recruiting problems. Your Association and member stations throughout the war were an invaluable aid to the Federal Government and once again, in peacetime, it has proven of marked value in securing personnel to help protect vital security measures . . ."

Ad Council Brochure Mailed To Broadcasters This Week

In observing its 5th year of service, the Advertising Council recently published its annual report reviewing its work and revealing some of its plans for the next year of operation.

The details highlighted in the publication should be of interest to all station operators. A copy of the booklet "Business Steps Up Its Candle Power" is included with this week's mailing of REPORTS.

Vets Administration Thanks Industry For Work on GI Insurance Drive

The Veterans Administration expressed its gratification to broadcasters last week, through the NAB, for the industry's cooperation in providing information on the reinstatement of GI Insurance. At the same time the VA stated that the campaign, originally scheduled to terminate August 1, this year, will continue until Jan. 1, 1948.

A spokesman for the agency pointed out that while the pressure of the campaign is eased by changing the deadline for reinstatement, the industry can render exceptionally fine service by continuing the information campaign on National Service Life Insurance. While large numbers of veterans have taken advantage of the availability of reinstatement, many others are still eligible.

Ad Council Network Campaigns— Week of July 21-27, 1947

The following public interest campaigns have been given top priority on Network and National Spot Allocations Plans during the week of July 21-27, 1947 by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

Safety on the Highway
(with Farm Safety Week supplement)

The National Safety Council reports: 1) *More deaths in 1946.* The nation's 1946 motor vehicle death toll of 33,500 was 19% greater than the total of 28,076 for 1945—though it was still about 6,500 below the all-time high of 1941. 2) *More driving.* Vehicle mileage in 1946 is estimated at 39% above 1945, 4% above 1941, the previous high year. With more new cars pouring into the market daily, mileage totals will continue to rise—thus multiplying the danger of traffic casualties unless Americans learn to be more careful than ever before. 3) *Inexperienced drivers.* In 1946 there were 45% more traffic deaths in the 15-,to 24-year age group than in 1945. Many teen-age drivers have recently returned from the Armed Services; others are new drivers. Teen-age drivers as a rule have a higher accident rate per mile than any other age group. Stress the seriousness of the accident menace, as revealed in National Safety Council statistics. Remind each listener that accidents don't always happen to someone else—that the chances he takes every day are the very ones that are causing our present big accident totals. Make him realize that HE is a potential accident victim, and that he cannot afford to be careless. Stress the safety campaign theme: "BE CAREFUL! THE LIFE YOU SAVE MAY BE YOUR OWN." Point out that there are one or more violations of the law in almost every motor vehicle accident. The National Safety Council—the recognized authority in the field of public safety—believes that obedience to the law is one of the best ways to promote safety on the highway. Every motorist and every pedestrian should obey traffic signs and signals. Drivers should observe safety and other traffic regulations . . . never drive after drinking . . . keep cars in good condition at all times . . . watch for warnings at grade crossings . . . be alert and careful every moment behind the wheel. Urge every motorist and pedestrian actively to support the safety movement in his own community . . . encourage driver training in high schools . . . teach children the rules of safety on the highway, in the home, everywhere. *This allocation falls during Farm Safety Week, July 20-26.* Programs with rural audiences may want to devote their safety message to this theme. Attached to the Fact Sheet is a supplement describing Farm Safety Week and its goal. Accidents on the farm and to rural folk amount to a serious human and economic menace. Lives may be saved and much misery averted by alerting farm families to the need for taking time out during Farm Safety Week to discuss how they can live and work safely during the coming year. The family should learn three things: 1. What hazards menace their lives at home, at work and on the highway—e.g., falls cause more than one-third of fatal farm accidents; one out of five fatal farm-work accidents happen when handling livestock. 2. What each member of the family can do to eliminate as many of these hazards as possible—make home repairs, put safety shields on farm equipment, be careful on the highway, and at all times. 3. That carelessness on the part of any member of the family perils the lives and happiness of all. (Fact Sheet No. 15-D)

Keep on Saving Used Fats

Despite the recent decline in prices being paid for used fats by many butchers, the need for fat salvage continues to be as urgent as ever. The Advertising Council has been assured by the Fat Salvage Committee and the Department of Agriculture that the world supply of fats is still nowhere near the amount needed to satisfy the demand. As a result of the desperate fat shortage the following appeals have been issued: "America's homemakers have saved and turned in over 600 million pounds of used cooking fats since 1942. This is an average of nearly 20 pounds for each family in the United States. It is a record of which every woman can be proud. However, it is still necessary to conserve every pound of fat, since the over-all fat supply situation is little better now than it was last year when we were desperately short, particularly of industrial fats. Manufacture of many of the

(Continued on next page)

things we all use and wear in our daily lives requires industrial fats or the products of industrial fats. Used cooking fats turned in by American women have been and continue to represent an important part of our total industrial fats supply. Every pound of salvaged fat helps meet the need." [*Signed*] *Clinton P. Anderson, Secretary of Agriculture.*—"Thanks to patriotic American women, over 600 million pounds of used fats have been added to U. S. supplies of industrial fats since August, 1942. These 600 million pounds were vitally important, not only to the United States, but to the entire world. Fats and oils, both food fats and industrial fats, are in critically short supply, practically everywhere. Total world production of fats and oils in 1947 will be one-sixth less than in pre-war years. But at the same time, there are many more mouths to feed and a tremendous job of reconstruction and rehabilitation to be done. In the face of this great world-wide shortage of fats and oils, it is obviously most necessary to conserve every possible pound of fat. American women can make a real contribution to the welfare of their own country and to the recovery of the rest of the world by saving and turning in their used cooking fats." [*Signed*] *D. A. FitzGerald, Secretary-General, International Emergency Food Council.* Housewives can actually help themselves to get the peacetime products they want and need in greater abundance, and sooner, by keeping up their good work in salvaging fats. They are asked to:—Save every drop of used fat by draining pans, skimming soups and gravies, melting down trimmings of meat left on platters and plates.—Pour immediately into the salvage can those fats which can't be reused.—Reuse those suitable for cooking and salvage whatever is left.—Turn in the fat salvage container to their meat dealers promptly. (Fact Sheet No. 19-D)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 14. They are subject to change.

Monday, July 14

At Albany, N. Y.

(Court Room No. 1, Federal Bldg., 10:00 A.M.)

NEW—Van Curler Broadcasting Corp., Albany, N. Y.—C. P. **1460 kc.**, 5 KW, unlimited, DA-night.

NEW—The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—C. P. **1460 kc.**, 5 KW, unlimited, DA-night and day.

NEW—Governor Dongan Broadcasting Corp., Albany, N. Y. —C. P. **1460 kc.**, 5 KW, unlimited, DA-night and day.

NEW—The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—For license to operate on the present facilities of WOKO. **1460 kc.**, 500 watts, night, 1 KW LS, unlimited.

Tuesday, July 15

Further Hearing

(10:00 A. M.)

NEW—Wyandotte Broadcasting Co., Wyandotte, Mich.—C. P. **1310 kc.**, 250 watts, daytime.

NEW—Wyandotte News Company, Wyandotte, Mich.—C. P. **1310 kc.**, 250 watts, daytime.

WKMH—Suburban Broadcasters, Dearborn, Mich.—C. P. **1310 kc.**, 1 KW, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

630-1490 KC.

At the same time the Commission released an **order** making final its Proposed Decision (B-361) in re **Magnolia Broadcasting Company** et al, to the extent of granting the applications of **Ruston Broadcasting Company, Ruston, Louisiana,** and **Hope Broadcasting Company, Hope, Arkansas,** to operate on 1490 kc., 250 watts power, unlimited time; and granting the application of Magnolia Broadcasting Company, Magnolia, Arkansas, to operate on 630 kc., 1 KW, daytime only, in lieu of the original request for 1490 kc., 250 watts, unlimited time (Docket Nos. 7797, et al).

1300-1400 KC.

Adopted an Order making final Supplemental Proposed Decision (B-323), granting application of **Newman Broadcasting Co.,** for a new station at **Newman, Ga.,** to operate on 1400 kc., with 250 watts, unlimited time; conditions (BP-4487; Docket 7442), and the application of **Volunteer State Broadcasting Co., Inc.,** (BP-4531; Docket 7443), for a new station at **Nashville, Tenn.,** to operate on 1300 kc., with 5 KW, unlimited time, DA.

1450 KC.

The Commission made **final,** in a decision released today, its **Proposed Decision** (B-250), as modified by its Supplemental Proposed Decision, in the consolidated proceeding of the applications of **The Sandusky Broadcasting Company** (Docket No. 7003); **Lake Erie Broadcasting Company** (Docket No. 7004); and **The Bay Broadcasting Company** (Docket No. 7172). In its final decision, the Commission granted the application of Lake Erie Broadcasting Company for a new station at Sandusky, Ohio, to operate on the frequency 1450 kc. with power of 250 watts, unlimited time, and denied the mutually exclusive applications of The Sandusky Broadcasting Company and The Bay Broadcasting Company.

1460-1490-1500 KC.

The Commission announces its **Final Decision** (B-357) granting the applications of **Monterey Bay Broadcast Company** for a new station at **Santa Cruz, Calif.,** to operate on 1460 kc., 1 KW, unlimited time, DA, (BP-4150; Docket 6952), and of **San Jose Broadcasting Company** for a new station at **San Jose, Calif.,** to operate on 1500 kc., 1 KW, unlimited time, DA, (BP-3921; Docket 6955), and denial of the applications of **Golden Gate Broadcasting Co., San Francisco,** to change frequency of station KSAN from 1450 to 1460 kc., and increase power from 250 watts to 5 KW, unlimited time, DA (BP-3913; Docket 6949); **Cascade Broadcasting Co., Inc., Yakima, Wash.,** to increase power of station KTYW from 500 watts to 1 KW, and application of **Mission Broadcasting Co.,** for a new station in **San Jose, Calif.,** to operate on 1490 kc., 250 watts, unlimited time. (BP-4266; Docket 7023).

The denial of the application of Cascade Broadcasting Co. (BP-3889; Docket 6953), to increase power of KTYW is without prejudice to the filing of an application for construction permit on the frequency 1460 kc., specifying a directional antenna giving protection to the operations of the grants made herein, and to station KINY, Juneau, Alaska, and other existing broadcast stations, and otherwise in conformity with the Standards of Good Engineering Practice.

(Continued on next page)

AM—New CP's Granted

910 KC.

Orangeburg Radio Co., Orangeburg, S. C.—Granted CP for new station to operate on 910 kc., 1 KW, daytime only; engineering conditions; and subject to the further condition that Frank B. Best, Jr., dispose of his interest in WRNO, Orangeburg. (BP-5955)

1140 KC.

Lincoln Operating Co., Miamia, Fla.; Sun Coast Broadcasting Corp., Coral Gables, Fla.—Granted motion of Lincoln Operating Co. to reconsider Commission action in designating application for hearing, remove from hearing docket and grant; said application for new station was granted (1140 kc., 5 KW, 10 KW-Ls, DA-2, unlimited (BP-4903; Docket 7874), subject to any interference resulting from WKAX, and approval of transmitter site and antenna system by CAA; and accepted application of Sun Coast Broadcasting Corp. to dismiss its application (BP-5811; Docket 8155).

1150 KC.

News-Journal Corp., Daytona Beach, Fla.—Granted CP for new station to operate on 1150 kc., 1 KW, daytime only; engineering conditions. (Commissioner Durr voting for hearing.) (BP-6057)

1230 KC.

The Wiregrass Broadcasting Co., Enterprise, Ala.—Granted CP for new station to operate on 1230 kc., 250 watts, unlimited time; engineering conditions and provided that no operation shall commence until the outstanding CP of WDLP, Panama City, Fla., for 590 kc., is covered by a license. (BP-6075)

1240 KC.

Ishpeming Broadcasting Co., Ishpeming, Mich.—Granted CP for new station to operate on 1240 kc., 250 watts, unlimited time. (BP-5699)

1340 KC.

Kosciusko Broadcasting Co., Koscuisko, Miss.—Granted CP for new station to operate on 1340 kc., 250 watts, unlimited time; engineering conditions. (BP-6066)

Oroville Mercury Co., Oroville, Calif.—Granted CP for new station to operate on 1340 kc., 250 watts, unlimited time; engineering conditions and also subject to condition that operation not be commenced until after subject frequency is vacated by KCRA. (BP-6082)

1350 KC.

Norwalk Broadcasting Co., Norwalk, Conn.—Granted CP for new station to operate on 1350 kc., 500 watts, daytime only; engineering conditions. (BP-6070)

1420 KC.

Arecibo Broadcasting Co., Arecibo, Puerto Rico—Granted CP for new station to operate on 1420 kc., 1 KW power and non-directional antenna; engineering conditions and also subject to condition that operation not be commenced until after the subject frequency is vacated by WPRP. (BP-5047; Docket 7807)

1470 KC.

Pauls Valley Broadcasting Co., Pauls Valley, Okla.—Granted CP for new station to operate on 1470 kc., 250 watts, daytime only. (BP-6052)

1600 KC.

Publix Broadcasting Service of Charlotte, Inc., Charlotte, N. C.—Granted CP for a new station to operate on 1600 kc., 1 KW, daytime only; engineering conditions. (BP-5276)

AM—Frequency Changes

740 KC.

WXGI—Radio Virginia, Inc., Richmond, Va.—Granted modification of CP to change frequency from 720 to 740 kc.; also granted modification of CP for transmitter site. (BMP-2870; BMP-2667)

860 KC.

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Granted license for change in frequency to 860 kc., increase in power to 5 KW, night, 10 KW-LS, change hours of operation to unlimited, install new transmitter and DA for night use and change transmitter location. (BL-2443)

1260 KC.

KVSF—New Mexico Broadcasting Co., Santa Fe, N. Mex.—Granted license covering installation of new transmitter, new vertical antenna, move of transmitter and studio location, and change frequency to 1260 kc., increase power to 1 KW. (BL-2441)

AM—License Renewals and Extensions

KRSC—Radio Sales Corp., Seattle, Wash.—Granted renewal of license for period ending May 1, 1950. (BR-70)

WJAC—WJAC, Inc., Johnstown, Pa.—Granted renewal of license for period ending August 1, 1950. (BP-345)

WNEX—Macon Broadcasting Co., Macon, Ga.—Granted renewal of license for period ending August 1, 1950. (BP-1215)

WWJ-Aux.—The Evening News Association, Detroit, Mich.—Directed that the license for operation of WWJ be extended upon a temporary basis to August 1, 1947, pending receipt of renewal application. (Action taken 6/26)

AM—Designated for Hearing

830-850 KC.

KWKW—Southern California Broadcasting Co., Pasadena, Calif.; Orange County Broadcasting Co., Santa Ana, Calif.—Granted petition of KWKW to designate for consolidated hearing its application with that of Orange County Broadcasting Co., and the application of KWKW (BP-3710) to change frequency to 830 kc. and increase power to 5 KW daytime only, was designated for consolidated hearing with application of Orange County Broadcasting Co. (BP-5936) for a new station to operate on 850 kc., 1 KW, daytime only.

930 KC.

Charlotte News Publishing Co., Charlotte, N. C.; William J. Brennan, Winston-Salem, N. C.; Walter Olin Nesbit, Charlotte, N. C.; Surety Broadcasting Co., Charlotte, N. C.—Adopted Memorandum Opinion and Order designated for hearing in consolidated proceeding with each other and with application of T. Julian Skinner, Jr., Charlotte, N. C. (Docket 8286), applications of Charlotte News Publishing Co. (930 kc., 5 KW, unlimited, DA-2), Brennan (940 kc., 5 KW, D) Nesbit (930 kc., 1 KW, D), and Surety Broadcasting Co. (930 kc., 1 KW, 5 KW-LS, DA-N, unlimited) (Files Nos. BP-3952; 6068; 6074; 6088).

1230 KC.

Clarence J. and Bernice M. McCredie, a partnership, Wenatchee, Wash.—Granted petition requesting that its application for a new station (BP-6062) to operate on 1230 kc., 250 watts, unlimited time, be designated for hearing; and ordered that KXLE, Ellensburg, Wash., be made a party to this proceeding.

1260 KC.

Thomas G. Harris, et al, Austin, Texas, and Williamson County Broadcasting Co., Taylor, Texas—Designated for consolidated hearing, applications for new stations to operate on 1260 kc., 1 KW, daytime only, at Austin and Taylor, respectively. (BP-4355; BP-6139)

1270 KC.

Radio Calumet, Inc., Gary, Ind.—Designated for hearing application (BP-6131) for a new station to operate on 1270

(Continued on next page)

kc., 500 watts, daytime only, in a consolidated proceeding with application of Steel City Broadcasting Co. (Docket 8178), 1260 kc., 250 watts, daytime only. Denied petition of Steel City Broadcasting Co. requesting reconsideration and grant of its application without hearing.

1280 KC.

WDSU—Stephens Broadcasting Co. (assignor), International City Broadcasting Corp. (assignee), New Orleans, La.—Designated for hearing application for consent to assignment of license of AM station WDSU and WDSU-FM from Stephens Broadcasting Co. to International City Broadcasting Corp. (BAL-596)

1340 KC.

Abilene Broadcasting Co., Abilene, Tex.; Citizens Broadcasting Co., Abilene, Tex.—Ordered that the record in this proceeding (Dockets 7367 and 7483) be reopened and that the applications be designated for further hearing on July 28, 1947, at Washington to: (1) determine whether the petition of Abilene Broadcasting Co. for leave to amend its application to show removal of Gene L. Cagle as an officer, director and stockholder of applicant corporation, and to retain application as amended in the hearing docket; (2) to determine whether applicant corporations, or their respective officers, directors and stockholders, are legally, financially and otherwise qualified to construct and operate the proposed stations, and (3) to determine on a comparative basis which, if either, of the applications in the proceeding should be granted. (Action taken by the Commission June 28.)

1380 KC.

Radio Lakewood, Lakewood, Ohio, and United Garage & Service Corp., Lakewood, Ohio—Designated for consolidated hearing applications of Radio Lakewood for new station to operate on 1380 kc., 250 watts, daytime only (BP-5949), and United Garage and Service Corp., seeking the same frequency with 500 watts power, daytime. (BP-6156)

1400 KC.

Weldon Lawson, Sequin, Tex.—Designated for hearing application (BP-4991) for a new station to operate on 1400 kc., 250 watts, unlimited time, in a consolidated proceeding with application of Tri-County Broadcasting Co. (Docket 8371), requesting a new station at Luling, Texas, on 1420 kc., 1 KW, unlimited, DA-night.

Norman Broadcasting Co., Norman, Okla.; H. J. Griffith Broadcasting Co., Norman, Okla.—Designated for consolidated hearing the application of Norman Broadcasting Co. (BP-5839) with application of H. J. Griffith Broadcasting Co. (BP-5861), both requesting 1400 kc., 250 watts, unlimited time.

1450 KC.

Lewis Service Corp., Weston, W. Va.—Designated for hearing application for new station to operate on 1450 kc., 250 watts, unlimited time. (BP-6054)

AM—Licenses Granted for New Stations

650 KC.

WJSW—Altoona Broadcasting Co., Altoona, Pa.—Granted license for new station; 650 kc., 250 watts, daytime; conditions. (BL-2321)

710 KC.

WTPR—Kentucky Lake Broadcasting System, Inc., Paris, Tenn.—Granted license for new station; 710 kc., 250 watts, daytime. (BL-2463)

730 KC.

WPIT—Liberty Broadcasting Co., Pittsburgh, Pa.—Granted license for new station; 730 kc., 1 KW, daytime, and to specify studio location. (BL-2459)

750 KC.

KSEO—Democrat Printing Co., Durant, Okla.—Granted license for new station; 750 kc., 250 watts; daytime. (BL-2421)

800 KC.

WWPF—Palatka Broadcasting Co., Palatka, Fla.—Granted license for new station; 800 kc., 250 watts, daytime only; conditions. (BL-2301)

890 KC.

KBYE—State Broadcasting Co., Oklahoma City, Okla.—Granted license for new station; 890 kc., 1 KW, daytime. (BL-2407)

1110 KC.

WHIM—Inter-City Broadcasting Co., Providence, R. I.—Granted license for new station; 1110 kc., 1 KW, daytime, and specify studio location. (BL-2393)

1190 KC.

WKOX—Suburban Broadcasting Co., Framingham, Mass.—Granted license for new station; 1190 kc., 1 KW, daytime only. (BL-2401)

1230 KC.

WHBT—The Harriman Broadcasting Co., Inc., Harriman, Tenn.—Granted license for new station; 1230 kc., 250 watts, unlimited time. (BL-2435)

KDLK—Del Rio Broadcasting Co., Del Rio, Tex.—Granted license for new station; 1230 kc., 250 watts, unlimited time. (BL-2387)

1260 KC.

WGWR—Asheboro Broadcasting Co., Asheboro, N. C.—Granted license for new station; 1260 kc., 1 KW, daytime. (BL-2467)

1340 KC.

WNBN—Midwestern Broadcasting Co., Bear Creek Twp., Mich.—Granted license for new station; 1340 kc., 250 watts, unlimited time. (BL-2413)

WJRI—John P. Rabb, Lenoir, N. C.—Granted license for new station; 1340 kc., 250 watts, unlimited time. (BL-2347)

1380 KC.

KPBX—WCPZ Broadcasting Co., Beaumont, Tex.—Granted license for new station; 1380 kc., 1 KW, daytime. (BL-2455)

1400 KC.

WGNH—General Newspapers, Inc., Gadsden, Ala.—Granted license for new station; 1400 kc., 250 watts, unlimited time. (BL-2453)

WCTT—The Corbin Times-Tribune, Corbin, Ky.—Granted license for new station; 1400 kc., 250 watts, unlimited time. (BL-2430)

1450 KC.

WCCP—Carter C. Peterson, Savannah, Ga.—Granted license for new station; 1450 kc., 250 watts, unlimited time. (BL-2081)

1490 KC.

WKLV—Frank W. Wagner, Blackstone, Va.—Granted license for a new station to operate on 1490 kc., 250 watts, unlimited time. (BL-2445)

WHAV—The Haverhill Gazette Co., Haverhill, Mass.—Granted license to cover CP for new station; 1490 kc., 250 watts, unlimited time, and to specify studio location. (BL-2364)

WIKC—I. K. Corkern, Bogalusa, La.—Granted license for new station; 1490 kc., 250 watts, unlimited time. (BL-2456)

WEAR—Gulfport Broadcasting Co., Inc., Pensacola, Fla.—Granted license for new station; 1490 kc., 250 watts, unlimited time, and for change of studio location. (BL-2368)

(Continued on next page)

1510 KC.

KCTX—Golden West Broadcasting Co., Childress, Tex.—Granted license for new station: 1510 kc., 250 watts, daytime, and to specify studio location. (BL-2440)

1580 KC.

KLOU—Frank R. Gibson, Lake Charles, La.—Granted license for new station: 1580 kc., 1 KW-DA, unlimited time, and to specify studio location. (BL-2458)

1590 KC.

KATL—Texas Broadcasters, Houston, Tex.—Granted license for a new station; 1590 kc., 1 KW-DA, unlimited time. (BL-2447)

AM—Modifications of CP's Granted

WSB—The Atlanta Journal Co., Atlanta, Ga.—Granted modification of CP for extension of completion date to 9-2-47. (BMP-2841)

WSBT—The South Bend Tribune, South Bend, Ind.—Granted modification of CP to change type of transmitter and for extension of completion date to 180 days after grant. (BMP-2819)

KVON—Napa Broadcasting Co., Napa, Calif.—Granted modification of CP to change type of transmitter. (BMP-2833)

WDNE—West Virginia Radio Corp., Elkins, W. Va.—Granted modification of CP for approval of antenna, change type of transmitter, for approval of transmitter and studio locations. (BMP-2651)

KELP—Paso Broadcasting Co., El Paso, Tex.—Granted modification of CP for approval of antenna and transmitter location, and to specify studio location. (BMP-2723)

KLIK—Balboa Radio Corp., San Diego, Calif.—Granted modification of CP for extension of completion date to 10-7-47. (BMP-2839)

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted modification of CP for extension of completion date to 8-15-47. (BMP-2840)

WCAZ—Superior Broadcasting Service, Inc., Carthage, Ill.—Granted modification of CP for extension of completion date to 9-18-47. (BMP-2845)

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted modification of CP for extension of completion date to 7-9-47.

WHAS—WHAS, Inc., Louisville, Ky.—Granted modification of CP for extension of completion date to 7-14-47. (BMP-2842)

KPSC—Sun Country Broadcasting Co., Phoenix, Ariz.—Granted modification of CP for extension of completion date to 9-25-47. (BMP-2846)

WONO—Oneonta Broadcasting Co., Oneonta, N. Y.—Granted modification of CP for approval of antenna and approval of transmitter and studio locations. (BMP-2652)

KRIO—Valley Broadcasting Assn., Inc., McAllen, Tex.—Granted modification of CP for extension of completion date to 7-2-47. (BMP-2837)

KTRE—Forest Capital Broadcasting Co., Lufkin, Tex.—Granted modification of CP to change type of transmitter. (BMP-2835)

WADE—Anson Radio and Broadcasting Co., Wadesboro, N. C.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to change studio location. (BMP-2777)

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted modification of CP for extension of completion date to 9-1-47. (BMP-2834)

WRFD—Peoples Broadcasting Corp., Columbus, Ohio—Granted modification of CP for extension of completion date to 9-8-47. (BMP-2827)

WPTO—The Miami County Broadcasting Co., Inc., Piqua, Ohio—Granted modification of CP for approval of antenna, and of transmitter and studio locations. (BMP-2726)

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted modification of CP for extension of completion date to 1-25-48. (BMP-2821)

KWFT—Wichita Broadcasters, Wichita Falls, Texas—Granted modification of CP to make changes in DA and mount antenna on SE tower, and for extension of completion date to 12-7-47. (BMP-2818)

WJEL—Champion City Broadcasting Co., Springfield, Ohio—Granted modification of CP to specify power of 500 watts, change type of transmitter, make changes in vertical antenna and mount FM antenna on top of AM tower. (BMP-2859)

WHCC—Smoky Mountain Broadcasters, Inc., Waynesville, N. C.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to change studio location. (BMP-2745)

WEAS—E. D. Rivers, Jr., Decatur, Ga.—Granted modification of CP for approval of antenna, to change type of transmitter and for approval of transmitter location and studio location. (BMP-2673)

WHHT—Harold H. Thoms, Durham, N. C.—Granted modification of CP, to change transmitter location (Geographic coordinates change) description remains Durham, N. C. (BMP-2829)

WLAM—The Lewiston-Auburn Broadcasting Corp., Lewiston, Maine—Granted modification of CP to change type of transmitter, make change in ground system, and specify studio location. (BMP-2850)

KRUN—Runnels County Broadcasting Co., Ballinger, Texas—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter locations and to specify studio location. (BMP-2838)

WKNS—Kinston Broadcasting Co., Kinston, N. C.—Granted modification of CP for approval of antenna and transmitter location, and to specify studio location. (BMP-2755)

WASK—WFAM, Inc., Lafayette, Ind.—Granted modification of CP for extension of completion date to 8-1-47. (BMP-2861)

WEXT—Andave Radio Co., Milwaukee, Wis.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to specify studio location. (BMP-2760)

WIBK—Independent Broadcasting Corp., Knoxville, Tenn.—Granted modification of CP to change type of transmitter, make changes in vertical antenna, and change name of applicant from Independent Broadcasting Corp to Independent Broadcasting Co. (BMP-2855)

WJDA—The Asher Broadcasting Service, Inc., Quincy, Mass.—Granted modification of CP for approval of antenna, to change type of transmitter, and for approval of transmitter location. (BMP-2716)

WOTW—Nashua Broadcasting Corp., Nashua, N. H.—Granted modification of CP to change type of transmitter and make changes in vertical antenna, and to specify studio location. (BMP-2847)

KSAC—Kansas State College of Agriculture, etc., Manhattan, Kans.—Granted modification of CP for extension of completion date to 9-21-47. (BMP-2864)

KWTC—Mojave Valley Broadcasting Co., Barstow, Calif.—Granted modification of CP for extension of completion date to 9-19-47. (BMP-2862)

WCON—The Constitution Publishing Co., Atlanta, Ga.—Granted modification of CP for extension of completion date to 2-6-48. (BMP-2865)

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Granted modification of CP for extension of commencement and completion dates to 9-15-47 and 2-15-48, respectively. (BMP-2863)

(Continued on next page)

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted modification of CP for extension of completion date to 12-14-47. (BMP-2860)

San Fernando Valley Broadcasting Co., San Fernando, Calif.—Granted modification of CP to change directional antenna array for daytime use. (BMP-2761)

WNAO—The News and Observer Publishing Co., Raleigh, N. C.—Granted modification of CP to make changes in directional antenna, mount FM antenna on top of AM tower, and change transmitter location; engineering conditions re radiation. (BMP-2801)

AM—Miscellaneous Actions

KONP—Radio Pacific, Inc., Port Angeles, Wash.—Granted license covering installation of new transmitter. (BL-2384)

KAKC—Public Radio Corp., Tulsa, Okla.—Granted construction permit to mount FM antenna on AM tower. (BP-6093).

KLUF—The KLUF Broadcasting Co., Inc., Galveston, Tex.—Granted construction permit to mount FM antenna on AM tower. (BP-6117)

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Ia.—Granted construction permit to install new vertical antenna and mount FM antenna thereon. (BP-5920)

KNET—Palestine Broadcasting Corp., Palestine, Tex.—Granted license for increase in power to 250 watts, and installation of new transmitter. (BL-2418)

WKRZ—Kenneth Edward Rennekamp, Oil City, Pa.—Granted construction permit to install a new vertical antenna, mount FM antenna on AM tower and change transmitter and studio locations. (BP-6011)

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Granted license covering change in frequency to 810 kc., power to 1 KW, hours of operation to daytime, and change type of transmitter and change transmitter site. (BL-2403)

WORD—Spartanburg Broadcasting Co., Spartanburg, S. C.—Granted construction permit to install a new vertical antenna and mount FM antenna on AM tower. (BP-6039)

KEVR—Western Waves, Inc., Seattle, Wash.—Granted modification of license to change corporate name from Western Waves, Inc., to King Broadcasting Co. (BML-1257)

WEXL—Royal Oak Broadcasting Co., Royal Oak, Mich.—Granted construction permit to install new vertical antenna and mount FM antenna on AM tower. (BP-6087)

KMED—Mrs. W. J. Virgin, Medford, Ore.—Granted construction permit to increase daytime power from 1 KW to 5 KW and install a new transmitter, operating on 1440 kc., provided applicant agrees to satisfy legitimate complaints of blanket interference occurring within the 250 mv/m contour. (BP-5968)

KCSM—James L. Frank, Colorado Springs, Colo.—Granted petition to accept for filing application for modification of construction permit specifying a transmitter site and antenna system.

WMIK—The Middlesboro Broadcasting Co., Middlesboro, Ky.—Granted petition for reinstatement of construction permit (BP-4036) for a new station on 560 kc., 500 watts, daytime only, which was granted Dec. 5, 1946. Said application was reinstated in full force and effect, subject to condition that petitioner, within 60 days from date of action, file an application for modification of permit specifying a transmitter site and antenna system meeting the requirements of the standards.

WTNS—Coshocton Broadcasting Co., Roscoe, Ohio—Granted consent to change studio location of station WTNS from Roscoe to Coshocton, Ohio. (BMP-2729)

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Granted authority to delete all records relative to construction permit (BP-4813) and modification of permit (BMP-2393), granted June 18, 1946 and Jan. 16, 1947, respectively.

WKRZ—Kenneth Edward Rennekamp, Oil City, Pa.—Granted license which authorized installation of new transmitter. (BL-2442)

KGBS—Harbenito Broadcasting Co., Harlingen, Tex.—Granted license covering installation of new vertical antenna with FM antenna mounted on top. (BL-2474)

WKDK—Newberry Broadcasting Co., Newberry, S. C.—Granted license covering installation of new transmitter. (BL-2423)

KVOS—KVOS, Inc., Bellingham, Wash.—Granted license to cover construction permit for increase in power to 1 KW, installation of new transmitter and DA for day and night use, and change in transmitter location. (BL-2460)

WWON—Associated Electronics Enterprises, Woonsocket, R. I.—Granted license covering installation of new transmitter. (BL-2452)

WWON—Associated Electronics Enterprises, Woonsocket, R. I.—Granted license to use old main transmitter at present location of main transmitter, for auxiliary purposes only, with 250 watts. (BL-2451)

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted license for increase in power to 50 KW, installation of new transmitter and DA for night use, and change in transmitter location. (BL-2504)

KMA—May Broadcasting Co., Shenandoah, Iowa—Granted request to withdraw as a party respondent in the proceeding in re application of Independent Broadcasting Co. (Docket 6734), and dismissed the petition requesting enlargement of issues in this proceeding.

WJR—WJR, The Goodwill Station, Inc., Detroit, Mich.—Dismissed petition requesting the Commission to redesignate for hearing the application of Publix Broadcasting Service of Charlotte, Inc. (BP-5276; Docket 7902)

Wilmington Tri-State Broadcasting Co., Inc., Wilmington, Del.—Granted petition for leave to amend its application (BP-5873; Docket 8280) so as to change Exhibit C attached to the application to show deletion of Pearle K. Largent as a director of applicant corporation.

KLO—Interstate Broadcasting Corp., Ogden, Utah—Dismissed petition requesting the Commission to reconsider its action of April 10 so as to remove one of the conditions of the grant of petitioner's application (BP-5032), or, in the alternative, to set aside its action granting application of KVNI and designate both applications for comparative hearing.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted petition to dismiss without prejudice its application. (BP-5269; Docket 8275)

Van Curler Broadcasting Corp., Albany, N. Y.—Granted petition for leave to amend its application (BP-4395; Docket 7173) so as to show deletion of Samuel K. Aronowitz as Secretary, Director and 10% stockholder of applicant corporation.

Morristown Broadcasting Co., Morristown, N. J.—Granted petition insofar as it requests leave to amend its application (BP-5841; Docket 8436) so as to specify 500 watts instead of 1 KW power, etc., and to remove application as amended from the hearing docket. Insofar as petition requests grant of application without hearing, it is dismissed.

Wyandotte Broadcasting Co., Wyandotte, Mich.—Granted petition to dismiss without prejudice its application (BP-5055; Docket 7755).

WFBM, Inc., Indianapolis, Ind.—Dismissed petition requesting reconsideration of the Commission's order of June 13 retaining in a hearing status petitioner's application for FM station. (BPH-252; Docket 7032)

Pryor Dillard, Raymondville, Texas—Granted petition for leave to amend his application (BP-5468; Docket 8157) so as to specify the frequency 1380 kc. instead of 1340 kc. The amendment was accepted and application as amended removed from the hearing docket.

WBYS—Fulton County Broadcasting Co., Canton, Ill.—Granted petition for leave to withdraw its appearance in the proceeding upon application of Western Illinois Broadcasting Co. (BP-5478; Docket 8261)

(Continued on next page)

Alabama-Georgia Broadcasters, Inc., Eufaula, Ala.—Denied petition requesting the Commission to reopen the record in the consolidated proceeding upon its application and that of Andrew College Broadcasting Co. (Dockets 7953 and 7954), for the purpose of receiving into the record evidence relating to the population residing within a certain area.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted petition for continuance to Sept. 15 of the consolidated hearing presently scheduled for July 28 in re Dockets 8160 and 6913.

WJOL—Radio Station WJOL, Joliet, Ill.—Denied petition to reconsider order of the Commission designating for further hearing its application for renewal of license. (Docket 6983)

WSPA-WSPA-FM—A. B. Taylor (transferor), Surety Broadcasting Co. (transferee), Spartanburg Advertising Co. (licensee), Spartanburg, S. C.—Granted consent to transfer of control of Spartanburg Advertising Co. from A. B. Taylor to Surety Broadcasting Co., for a consideration of $450,000. (BTC-544)

WORD-WORD-FM—Spartanburg Broadcasting Co. (assignor) The Spartan Radiocasting Co. (assignee), Spartanburg, S. C.—Granted consent to assignment of license from Spartanburg Broadcasting Co., a partnership, to The Spartan Radiocasting Co., a corporation, for a consideration of $85,000. (BAL-597)

KEX—Westinghouse Radio Stations, Inc., Portland, Ore.—Dismissed petition requesting reconsideration of the Commission's action of April 29 in granting without hearing the application of Yumesa Broadcasting Co. (BP-5726)

Pekin Broadcasting Co., Inc., Pekin, Ill.—Granted petition for leave to amend its application (BMP-2561; Docket 8342) so as to specify a revised directional antenna array, etc.

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Granted petition for leave to withdraw its appearance in the proceeding upon application of Inter-City Advertising Co., Greensboro, N. C. (Docket 8372)

Miami Broadcasting Co., Miami, Okla.—Granted petition for leave to amend its application for CP (BP-4987; Docket 7810) so as to show a revised DA array, etc. The amendment was accepted and application removed from the hearing docket.

Modern Broadcasting Co., Baton Rouge, La.—Granted petition for leave to amend its application (BP-5711; Docket 8418) so as to request 1460 kc. instead of 1480 kc., etc. The amendment was accepted and application was removed from the hearing docket.

KVOL—Evangeline Broadcasting Co., Inc., Lafayette, La.—The Commission on its own motion removed from the hearing docket application of KVOL. (BP-5668; Docket 8417)

WJJD—WJJD, Inc., Chicago, Ill.—Dismissed petition for leave to intervene in the hearing on application of Pekin Broadcasting Co., Inc. (Docket 8342)

Des Moines Broadcasting Corp., Des Moines, Ia.—Dismissed petition requesting the Commission to accept late its written appearance in re application of Pekin Broadcasting Co., Inc.

WWNR—Rahall Broadcasting Co., Inc., Beckley, W. Va.—Adopted Memorandum Opinion and Order denying petition of WWNR for reconsideration directed against action of Commission granting without hearing application of Daily Telegraph Co. to increase power of station WHIS, Bluefield, W. Va., to 5 KW, install new transmitter, and install a DA for night use. (BP-5431)

Jackson, Alton Stewart and Ross Bohannon, a partnership)—Modification of construction permit (B3-P-5497, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and transmitter location, and to change studio location.

1080 KC.

KSCO—Radio Santa Cruz, Santa Cruz, Calif. (Charles Vernon Berlin, Fred D. McPherson, Jr., and Mahlon D. McPherson, a partnership)—Modification of construction permit (B5-P-5105, which authorized a new standard broadcast station) to increase power from 1 KW day to 500 watts night, 1 KW day; change hours of operation from daytime to unlimited time, and install directional antenna for night use.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—License to cover construction permit (B1-P-5052, as modified) which authorized installation of new transmitter and authority to determine operating power by direct measurement of antenna power.

1190 KC.

KYSC—Yumesa Broadcasting Co., Yuma, Ariz.—Modification of construction permit (BP-5726, which authorized a new standard broadcast station) to make changes in directional antenna.

1230 KC.

KOTN—Universal Broadcasting Corp., Pine Bluff, Ark.—Construction permit to change frequency from 1490 to 1230 kc., and make changes in transmitting equipment. Contingent upon KGHI being assigned 1250 kc.

WHIR—Commonwealth Broadcasting Corp., Danville, Ky.—Modification of construction permit (B2-P-4040, which authorized a new standard broadcast station) to specify power of 250 watts, to change type of transmitter, and for approval of antenna and transmitter location.

KVWN—Voice of Western Colorado, Inc., Grand Junction, Colo.—Modification of construction permit (B5-P-5461, which authorized a new standard broadcast station) to change type of transmitter, and for approval of antenna and transmitter location.

KSLO—KOLA Broadcasting Co., Opelousas, La. (a copartnership composed of Hugh O. Jones, William E. Jones and Mrs. Sarah Stewart Jones)—Modification of construction permit (B3-P-4917, which authorized a new standard broadcast station) to change type of transmitter, and for approval of antenna and transmitter location.

KXLO—Capital Broadcasting Co., East of Lewistown, Mont.—License to cover construction permit (B5-P-4479, as modified) which authorized a new standard broadcast station, and specify studio location, and authority to determine operating power by direct measurement of antenna power.

WHUC—The Colgren Broadcasting Co., Hudson, N. Y. (Robert P. Strakos and John F. Kearney, a partnership)—Modification of construction permit (B1-P-5131, which authorized a new standard broadcast station) to make changes in vertical antenna.

KTHT—Texas Star Broadcasting Co., Houston, Tex. (Roy M. Hofheinz and W. N. Hooper)—Modification of construction permit (B3-P-4361, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change in transmitter location) to change from employing directional an-

(Continued on next page)

tenna for night use to directional antenna for both day and night use (DA-2), to increase power from 1 KW night, 5 KW day, to 5 KW day and night, and change transmitter location from Chocolate Bayou Rd., near Almeda Genoa Rd., south of Houston, Texas, to town, of Precinct #8, near Deerpark, Harris County, Texas.

KXO—Valradio, Inc., El Centro, Calif.—License to cover construction permit (B5-P-4469, as modified) which authorized installation of new transmitter, new vertical antenna and ground system, and change in transmitter and studio locations, and authority to determine operating power by direct measurement of antenna power.

KXO—Valradio Inc., El Centro, Calif.—Modification of construction permit (B5-P-4469, as modified, which authorized installation of new transmitter, new vertical antenna and ground system, and change in transmitter and studio locations) to change studio location from Main Street, El Centro, California to Fourth St. extended, approximately one-fourth mile South of city limits of El Centro, California.

KVOC—Natrona County Tribune, Casper, Wyoming—Voluntary assignment of license to KVOC Broadcasting Co.

WWNF—Wayne M. Nelson, Inc., Fayetteville, N. C.—Modification of construction permit (B3-P-4951, which authorized a new standard broadcast station) to change type of transmitter and for approval of antenna and transmitter location.

KWTX—Beauford H. Jester, Waco, Tex. (Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levey, Ross M. Sams and Davis Stribling—Voluntary assignment of license to KWTX Broadcasting Co.

KGON—John H. Fitzgibbon, Roy Jarman and Temple V. Ehmsen, Oregon City, Ore.—License to cover construction permit (B5-P-4432, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1240 KC.

KAVR—Montana Broadcasters, Havre, Mont. (Jessica L. Longston, C. V. Zaser, Edward J. Jansen and L. Berenice Brownlow)—Voluntary assignment of license to KAVR, Inc.

KRAL—Rawlings Broadcasting Co., Rawlings, Wyo.—Modification of construction permit (B3-P-4961, as modified, which authorized a new standard broadcast station) for extension of completion date.

KBMY—Billings Broadcasting Co., Billings, Mont. (Don C. Foote, John W. Foote, Robert E. Mulvaney, Willard Mulvaney, Horace S. Davis and Rockwood Brown)—Authority to determine operating power by direct measurement of antenna power.

KFMO—Oscar C. Hirsch, near Flat River, Mo.—License to cover construction permit (B4-P-5192, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WHIN—Star Broadcasting Co., Inc., Geneva, N. Y.—License to cover construction permit (B1-P-3979, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1250 KC.

WREN—The Wren Broadcasting Co., Topeka, Kans.—Modification of construction permit (B4-P-3625, which authorized increase in power, installation of directional antenna for day and night use, and change transmitter and main studio locations) for approval of directional antenna system, to change type of transmitter, and to specify the studio location.

WDVA—Virginia-Carolina Broadcasting Corp., Danville, Va.—License to cover construction permit (B2-P-4113, as modified) which authorized a new standard broadcast station and to specify studio location and authority to determine operating power by direct measurement of antenna power.

1260 KC.

KPOW—Albert Joseph Meyer, Powell, Wyoming—License to cover construction permit (B5-P-4166, as modified) which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change transmitter and studio location, and authority to determine operating power by direct measurement of antenna power.

1270 KC.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Modification of construction permit (B5-P-4383, as modified, which authorized increase in power, installation of new transmitter, and change studio location) for extension of completion date.

1280 KC.

WOV—Wodaam Corporation, New York, N. Y.—License to cover construction permit (B1-P-5086, as modified) which authorized to make changes in transmitting equipment of auxiliary transmitter.

WOV—Wodaam Corporation, New York, N. Y.—License to cover construction permit (B1-P-5049, as modified) which authorized to make changes in transmitting equipment. (Main Transmitter.)

KNAK—Granite District Radio Broadcasting Co., Salt Lake City, Utah—Modification of construction permit (B5-P-4582, which authorized change in frequency, increase in power, changes in transmitting equipment and vertical antenna) to install directional antenna for night use, and change transmitter location.

WCMN—Caribbean Broadcasting Corp., Arecibo, Puerto Rico—License to cover construction permit (BP-4564, as modified) which authorized a new standard broadcast station and specify studio location and authority to determine operating power by direct measurement of antenna power.

1330 KC.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—License to cover construction permit (B5-P-4343, as modified) which authorized an increase in power, installation of new transmitter and directional antenna for day and night use; and authority to determine operating power by direct measurement of antenna power.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—License to use old main transmitter at 3725 Chesapeake avenue, Los Angeles, Calif. (present location of main transmitter), to be used for auxiliary purposes with power of 1 KW and authority to determine operating power by direct measurement of antenna power.

1340 KC.

WMLT—Dublin Broadcasting Co., Dublin, Ga.—Construction permit to install new vertical antenna and mount FM antenna on AM tower.

WLDY—O. J. Falce, Ladysmith, Wis.—Modification of construction permit (B4-P-5561, which authorized a new standard broadcast station) for approval of antenna, transmitter and studio locations.

WRHI—York County Broadcasting Co., Rock Hill, S. C. (Ernest H. Carroll, Virginia B. Carroll, James S. Beaty, Jr. and William C. Beaty)—Construction permit to make changes in vertical antenna, and mount FM antenna on AM tower.

KIJV—James Valley Broadcast Co., Huron, S. D.—License to cover construction permit (B4-P-4228, as modified) which authorized a new standard broadcast station and for change of studio location and authority to determine operating power by direct measurement of antenna power.

1370 KC.

KEEN—United Broadcasting Co., San Jose, Calif. (A co-partnership composed of George Mardikian, George Snell, Barnard Floyd Farr, S. A. Melnicoe and Alfred Aram)—License to cover construction permit (B5-P-4061, as modified) which authorized a new standard broadcast station

(Continued on next page)

and authority to determine operating power by direct measurement of antenna power.

KEEN—United Broadcasting Co., San Jose, Calif. (a partnership composed of George Mardikian, George Snell, Barnard Floyd Farr, S. A. Melnicoe and Alfred Aram)—Modification of construction permit (B5-P-4061, as modified, which authorized a new standard broadcast station) to change studio location.

1380 KC.

NEW—United Garage and Service Corp., Lakewood, Ohio (P. O. 2020 West Third street, Cleveland, Ohio)—Construction permit for a new standard broadcast station to be operated on 1380 kc., power of 500 watts and daytime hours of operation.

WKJG—Northeastern Indiana Broadcasting Co., Inc., Fort Wayne, Ind.—Modification of construction permit (B4-P-4063, which authorized a new standard broadcast station) for extension of completion date.

1400 KC.

WATL—Atlanta Broadcasting Co., Atlanta, Ga. (J. W. Woodruff)—Authority to determine operating power by direct measurement of antenna power.

WDWS—Champaign News-Gazette, Inc., Champaign, Ill.—Authority to determine operating power by direct measurement of antenna power.

KAYS—KAYS, Inc., Hays, Kans.—Modification of construction permit (B4-P-5354, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

WJQS—Mississippi Broadcasting Co., Inc., Jackson, Miss.—License to cover construction permit (B3-P-3642, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WDUZ—Green Bay Broadcasting Co., Green Bay, Wisc.—License to cover construction permit (B4-P-4272, as modified) which authorized a new standard broadcast station and for change of studio location, and authority to determine operating power by direct measurement of antenna power.

WNOC—Norwich Broadcasting Co., Norwich, Conn. (A partnership composed of H. Ross Perkins and J. Erick Williams)—License to cover construction permit (BP-6014) which authorized installation of new transmitter.

KWLK—Twin City Broadcasting Corp., Long View, Wash.—License to cover construction permit (B5-P-5369) which authorized to make changes in vertical antenna and mount FM antenna on top of AM tower and authority to determine operating power by direct measurement of antenna power.

1420 KC.

KTJS—T. J. Shriner, Hobart, Okla.—License to cover construction permit (B3-P-5108) which authorized a new standard broadcast station, and authority to determine operating power by direct measurement of antenna power.

1450 KC.

WASK—WFAM, Inc., Lafayette, Ind.—Construction permit to install old main transmitter at R. R. 5, McCarty Lane, near Lafayette, Indiana, to be used for auxiliary purposes only, with power of 250 watts.

WGUY—Portland Broadcasting System, Inc., Bangor, Me.—Modification of construction permit (B1-P-5207, as modified, which authorized a new standard broadcast station) to change name of applicant from Portland Broadcasting System, Inc., to Guy Gannett Broadcasting Services.

WILX—Carolina-Northwest Broadcasting Co., North Wilkesboro, N. C. (Edney Ridge and Hadley Hayes)—License to cover construction permit (B3-P-4953, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

WILX—Carolina-Northwest Broadcasting Co., Wilkesboro, N. C. (Edney Ridge and Hadley Hayes)—Voluntary assignment of construction permit to Carolina-Northwest Broadcasting Company.

WHSC—Hartsville Broadcasting Co., Hartsville, S. C.—Modification of license to change studio location from just East of U. S. Highway 15, and ½ mile South of city limits of Hartsville, South Carolina, to College Avenue Community "B" Building, Hartsville, South Carolina.

KSGM—The Donze Co., Ste. Genevieve, Mo. (Norbert Bernard Donze and Elmer Lawrence Donze, a partnership)—License to cover construction permit (B4-P-5155, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1490 KC.

WJVW—Joe V. Williams, Jr., Chattanooga, Tenn.—Modification of construction permit (B3-P-4816, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and transmitter location and to specify studio location.

NEW—Forrest City Broadcasting Co., Inc., Forrest City, Ark. (P. O. Box 655, Forrest City, Ark.)—Construction permit for a new standard broadcast station to be operated on 1490 kilocycles, power of 250 watts and unlimited hours of operation.

KXOA—Sacramento Broadcasters, Inc., Sacramento, Calif.—Authority to determine operating power by direct measurement of antenna power.

1510 KC.

KIMO—The Blue Valley Company, Independence, Mo. (Frank E. Fowler, Craig Siegfried, Cedric Siegfried and Charles Siegfried, a partnership)—Modification of construction permit (B4-P-4597, which authorized a new standard broadcast station) to change type of transmitter and to make changes in vertical antenna.

WKAI—The Macomb Broadcasting Co., Macomb, Ill.—License to cover construction permit (B4-P-4887, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

1520 KC.

NEW—Lake County Broadcasting Corp., Hammond, Ind. (P. O. 137 and Grover Ave., Hammond, Ind.)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 5 KW, directional antenna and daytime hours of operation.

NEW—Frank A. Gandia, Rio Piedras, Puerto Rico (P. O. Gonzales Padin Building, San Juan, Puerto Rico)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts, and unlimited hours of operation.

1560 KC.

WENA—Ramon Agudo, Bayamon, Puerto Rico—Modification of construction permit (BP-5679, which authorized a new standard broadcast station) to change type of transmitter, for approval of antenna and transmitter location and to specify studio location.

KBOO—Hill County Broadcasting Co., Hillsboro, Tex. (R. W. Calvert, W. N. Furey and Ross Bohannon, a partnership)—Modification of construction permit (B3-P-5503, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

1570 KC.

WLOU—Louisville Broadcasting Corp., Louisville, Ky.—Modification of construction permit (B2-P-5548, which authorized a new standard broadcast station) for approval of antenna, transmitter and studio locations.

1580 KC.

NEW—Benlee Broadcasting Co., Patchogue, N. Y. (Benjamin Moskowitz and Lee Morrison, a partnership)—Con-

(Continued on next page)

struction permit for a new standard broadcast station to be operated on 1580 kc., power of 250 watts and daytime hours of operation.

AM—Application Dismissed

Woodland Broadcasting Co., Woodland, Calif. (P. O. 1217 26th St., Sacramento, Calif.)—Construction permit for a new standard broadcast station to be operated on 1020 kc., power of 250 watts, and daytime hours of operation. Dismissed July 2, 1947—Request of applicant.

AM—Application Returned

Bessemer Broadcasting Co., Bessemer, Ala. (Jesse E. Lanier, S/Sgt. Jack Warden, Crawford J. Bass and Walter G. Petty, Jr., a partnership) (P. O. 1824 Second Ave., Bessemer, Ala.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation. Returned July 3, 1947—Incomplete.

AM—Applications Tendered for Filing

610 KC.

W. Albert Lee, Houston, Tex.—Modification of construction permit to make changes in directional antenna system, operating with power of 5 KW, unlimited hours of operation and directional antenna for night use on 610 kc.

KVNU—Cache Valley Broadcasting Co., Logan, Utah—Modification of construction permit to modify the night time directional antenna system, using 1 KW, unlimited hours and directional antenna for night use only on 610 kc.

690 KC.

WCYB—Appalachian Broadcasting Corp., Briston, Va.—Construction permit to increase power from 5 to 10 KW, daytime hours of operation and install new transmitter.

750 KC.

WKOP—The Binghamton Broadcasters Binghamton, N. Y. (Andrew Jarema and Frank H. Altdoerffer, a partnership)—Consent to assignment of construction permit to The Binghamton Broadcasters, Inc.

930 KC.

WRRF—Tar Heel Broadcasting System, Inc., Washington, N. C.—Construction permit to change hours of operation from daytime to unlimited, power from 5 KW daytime to 1 KW night, 5 KW day, and install directional antenna for night use.

940 KC.

WINZ—Hollywood Broadcasting Co., Hollywood, Fla.—Modification of construction permit to specify a new transmitter location and install directional antenna for daytime use, using power of 1 KW, unlimited hours and directional antenna on 940 kc.

WIPR—Puerto Rico Communications Authority, Rio Piedras, P. R.—Modification of construction permit to change studio location from Rio Piedras, P. R., to Stop 22, San Juan, P. R.

950 KC.

NEW—Winchester Broadcasting Corp., Winchester, Va.—Construction permit for a new standard broadcast station to be operated on 950 kc., power of 1 KW, and daytime hours of operation.

960 KC.

NEW—R. G. LeTourneau, near Longview, Tex.—Construction permit for a new standard broadcast station to be operated on 960 kc., power of 5 KW, and daytime hours of operation.

1010 KC.

NEW—Mohawk Broadcasting Co., Mason City, Ia.—Construction permit for a new standard broadcast station to be operated on 1010 kc, power of 1 KW, and daytime hours of operation.

1150 KC.

WFNS—Burlington-Graham Broadcasting Co., Burlington, N. C.—Construction permit to change hours of operation from daytime to unlimited, power from 1 KW daytime to 1 KW day and night, and install directional antenna for night use.

1230 KC.

KBST—The Big Spring Herald Broadcasting Co., Big Springs, Tex.—Construction permit to change frequency from 1490 to 1230 kc, using 250 watts and unlimited hours of operation. (Request 1230 kc being vacated by KCRS.)

1290 KC.

KITO—San Bernardino Broadcasting Co., Inc., San Bernardino, Calif.—Modification of construction permit to increase power from 1 KW to 5 KW, install a new transmitter and make changes in the directional antenna system, using directional antenna day and night and unlimited hours on 1290 kc.

1320 KC.

WNGO—Kentucky Broadcasting Co., Mayfield, Ky. (H. M. Suthard and P. M. Mullins)—Consent to assignment of license to West Kentucky Broadcasting Co., Inc.

1330 KC.

NEW—Charles River Broadcasting Co., Waltham, Mass. (a partnership consisting of L. P. Liles, J. R. Hoffler and R. C. O'Hare)—Construction permit for a new standard broadcast station to be operated on 1330 kc., power of 1 KW, and daytime hours of operation.

1340 KC.

WHAT—Independence Broadcasting Co., Inc., Philadelphia, Pa.—Modification of license for change in the hours of operation from one-third share time to equal time sharing with Station WTEL.

NEW—Guthrie Broadcast Corp., Guthrie, Okla.—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 1 KW, and daytime hours of operation.

NEW—Marietta Broadcasting Co., Parkersburg, W. Va.—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

NEW—San Luis Obispo Broadcasting Co., San Luis Obispo, Calif. (James L. Harris, S. H. Frowein, Aram S. Rejebian and Emma Widman)—Construction permit for a new standard broadcast station to be operated on 1340 kc., power of 250 watts and unlimited hours of operation.

1400 KC.

KCOL—Northern Colorado Broadcasting Co., Fort Collins, Colo. (Douglas D. Kahle, John L. Hitchock, Wilbur E. Rocchio, general partners; Warren D. Brainard, limited partner)—Consent to assignment of license to The Northern Colorado Broadcasting Co., a Colorado corporation.

1520 KC.

WKBS—Eastern Broadcasting Co., Oyster Bay, N. Y.—Modification of construction permit to change proposed location of transmitter and studio from Oyster Bay, New York, to West Hempstead, New York, using 250 watts power, daytime hours on 1520 kc.

FREQUENCY MODULATION

FM—Frequency Assignments

WMOH-FM—Fort Hamilton Broadcasting Co., Hamilton, Ohio—103.5 mc. (channel 278).

WFOB—Laurence W. Harry, Fostoria, Ohio—105.5 mc. (channel 288).

WMRC-FM—Textile Broadcasting Co., Greenville, S. C.—94.9 mc. (channel 235).*

WCIL-FM—South Illinois Broadcasting Partnership, Inc., Carbondale, Ill.—100.7 mc. (channel 264).

---

*WMRC-FM operation on channel 235 prior to March 1, 1948, will be contingent on clearance of image frequency interference in present aeronautical navigational aid receivers.

FM—Conditional Grants

The following were authorized conditional grants for the type of station indicated, subject to further review and approval of engineering details:

Shroyer Radio Corp., Shamokin, Pa.—Class A; 107.1 mc. (channel 1296). (BPH-1274)

Idaho Radio Corp., Idaho Falls, Idaho—Class B. (BPH-1269)

FM—Construction Permits

The following stations were authorized construction permits; conditions. (Note: power given is effective radiated power; antenna height is height above average terrain.)

Deep South Broadcasting Corp., New Orleans, La.—Class B; 93.7 mc. (No. 229); 40 KW; 420 feet. (BPH-1097)

Texoma Broadcasting Co., Wichita Falls, Tex.—Class B; 94.1 mc. (No. 231); 9.5 KW; 370 feet. (BPH-941)

Sun Country Broadcasting Co., Phoenix, Ariz.—Class B; 98.5 mc. (No. 253); 8 KW; 106 feet. (BPH-1040)

Beatrice Cobb, Morganton, N. C.—Class A; 94.3 mc. (No. 232); 880 watts; 66 feet. (BPH-1095)

KWIK-FM—Burbank Broadcasters, Inc., Burbank, Calif.—Class A; 94.3 mc. (No. 232); 530 watts; minus 470 feet. (BPH-1061)

WVAY—Valley Broadcasting Co., Lanett, Ala.—Class B; 102.9 mc. (No. 275); 10 KW; 330 feet. (BPH-920; BMPH-143)

Carter C. Peterson, Savannah, Ga.—Class B; 95.5 mc. (No. 238); 7.1 KW; 270 feet. (BPH-1001)

James Cullen Looney, Edinburg, Tex.—Class A; 104.9 mc. (No. 285); 690 watts; 225 feet. (BPH-1043)

KPO-FM—National Broadcasting Co., Inc., San Francisco, Calif.—Class B; 99.7 mc. (No. 259); 45 KW; 1,220 ft. (BPH-164)

WGBG-FM—Greensboro Broadcasting Co., Inc., Greensboro, N. C.—Class B; 100.3 mc. (No. 262); 36 KW; 400 ft. (BPH-360)

Press-Union Publishing Co., Atlantic City, N. J.—Class B; 100.7 mc. (No. 264); 13 KW; 310 feet. (BPH-595)

WPAD-FM—Paducah Broadcasting Co., Inc., Paducah, Ky.—Class B; 96.9 mc. (No. 245); 17 KW; 335 feet. (BPH-460)

The following were authorized construction permits in lieu of previous conditions:

KOMB—Consolidated Broadcasting Corp., Ltd., Los Angeles, Calif.—Class B; 101.9 mc. (No. 270); 10.5 KW; 2,740 feet. (BMPH-391; BPH-258)

WIP-FM—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Class B; 93.3 mc. (No. 227); 20 KW; 430 ft. (BMPH-466; BPH-1060)

WBAP-FM—Carter Publications, Inc., Fort Worth, Tex.—Class B; 100.5 mc. (No. 263); 50 KW; 435 feet. (BPH-622)

WORD-FM—Spartanburg Broadcasting Co., Spartanburg, S. C.—Class B; 100.5 mc. (No. 263); 14 KW; 500 ft. (BPH-788)

WMFR-FM—Radio Station WMFR, High Point, N. C.—Class B; 99.5 mc. (No. 258); 38 KW; 350 feet. (BMPH-327; BPH-359)

WHNM—Home News Publishing Co., New Brunswick, N. J.—Class A; 93.5 mc. (No. 228); 580 watts; 120 ft. (BPH-299)

FM—Miscellaneous Actions

WHBL—Press Publishing Co. (assignor), WHBL, Inc. (assignee), Sheboygan, Wis.—Granted assignment of license of AM station WHBL and conditional grant of WHBL-FM from Press Publishing Co. to WHBL, Inc., a corporation owned by same persons; no money involved. (BAL-603; BAPH-34)

Southern California Associated Newspapers, Glendale, Cal.—Granted petition for leave to amend its application for FM station (BPH-490; Docket 8319) so as to specify a Class B station in Los Angeles instead of a Class A in Glendale. The amendment was accepted and application removed from hearing docket.

FM—Modifications of CP's Granted

WHHM-FM—WHHM Broadcasting Co., Memphis, Tenn.—Granted modification of CP for extension of commencement and completion dates to 5-18-47 and 11-18-47, respectively. (BMPH-341)

WCNB—News-Examiner Co., Connersville, Ind.—Granted modification of CP for extension of commencement and completion dates to 6-29-47 and 9-29-47, respectively. (BMPH-478)

WBOE—Cleveland City Board of Education, Cleveland, Ohio—Granted modification of CP for extension of completion date to 11-29-47. (BMPH-68)

KFXD-FM—Frank E. Hurt & Son, Nampa, Idaho—Granted modification of CP for extension of completion date to 1-7-48. (BMPH-489)

WGPA-FM—The Bethlehem's Globe Pub. Co., Bethlehem, Pa.—Granted modification of CP for extension of completion date to 10-1-47. (BMPH-500)

KSEI-FM—Radio Service Corp., Pocatello, Idaho—Granted modification of CP for extension of completion date to 7-31-47. (BMPH-493)

WJHP-FM—The Metropolis Co., Jacksonville, Fla.—Granted modification of CP for extension of completion date to 10-18-47. (BMPH-488)

WRC-FM—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of CP for extension of completion date to 10-15-47. (BMPH-499)

WNHC-FM—Elm City Broadcasting Corp., New Haven, Conn.—Granted modification of CP for extension of completion date to 9-1-47. (BMPH-496)

KBON-FM—Inland Broadcasting Co., Omaha, Neb.—Granted modification of CP for extension of completion date to 11-6-47. (BMPH-492)

WCJT—WHAS, Inc., Louisville, Ky.—Granted modification of CP for extension of completion date to 11-25-47. (BMPH-502)

KSFO-FM—The Associated Broadcasters, Inc., San Francisco, Calif.—Granted modification of CP for extension of completion date to 9-14-47. (BMPH-449)

WKIL—Kankakee Daily Journal Co., Kankakee, Ill.—Granted modification of CP for extension of time to 8-20-47 in which to construct new FM station. (BMPH-469)

KOMO-FM—Fisher's Blend Station, Inc., Seattle, Wash.—Granted modification of CP for extension of time to 12-16-47 in which to construct new FM station. (BMPH-415)

WROV-FM—Radio Roanoke, Inc., Roanoke, Va.—Granted modification of CP for new FM station to extend completion date to 1-20-48. (BMPH-484)

(Continued on next page)

WMCK-FM—Mon-Yough Broadcasting Co., McKeesport, Pa.—Granted modification of CP for new FM station to extend completion date to 9-16-47 (BMPH-465)

WAIR-FM—WAIR Broadcasting Co., Winston-Salem, N. C.—Granted modification of CP for new FM station to extend completion date to 8-21-47. (BMPH-471)

WNDR-FM—Syracuse Broadcasting Corp., Syracuse, N. Y.—Granted modification of CP for new FM station to extend completion date to 9-15-47. (BMPH-474)

WMBR-FM—Florida Broadcasting Co., Jacksonville, Fla.—Granted modification of CP for new FM station to extend completion date to 9-25-47. (BMPH-481)

WBNY-FM—Roy L. Albertson, Buffalo, N. Y.—Granted modification of CP for new FM station to extend completion date to 10-27-47. (BMPH-476)

KFSD-FM—Airfan Radio Corp., Ltd., San Diego, Calif.—Granted modification of CP for new FM station to extend completion date to 12-5-47. (BMPH-480)

KROC-FM—Southern Minnesota Broadcasting Co., Rochester, Minn.—Granted modification of CP for extension of commencement and completion dates to 8-1-47 and 2-1-48. (BMPH-470)

KOMA-FM—KOMA,, Inc., Oklahoma City, Okla.—Granted modification of CP for extension of commencement and completion dates to 6-1-47 and 10-28-47, respectively. (BMPH-354)

FM—Applications Accepted for Filing

WMMW-FM—Silver City Crystal Co., Meriden, Conn.—Modification of construction permit (B1-PH-666 as modified) which authorized a new FM broadcast station for extension of commencement and completion dates.

WNDB—News-Journal Corp., Daytona Beach, Fla.—License to cover construction permit (B3-PH-408, which authorized a new FM broadcast station). Amended to change antenna details.

KTFI-FM—Radio Broadcasting Corp., Twin Falls, Idaho—Modification of construction permit (B5-PH-462, which authorized a new FM broadcast station) for extension of completion date.

WIRL-FM—Illinois Valley Broadcasting Co., Peoria, Ill. (Edward J. Altorfer, John M. Camp, John H. Altorfer, Katherine A. Swain and Timothy W. Swain)—Modification of construction permit (B4-PH-938, which authorized a new FM broadcast station) to specify transmitter site and antenna system.

KIMV—Hutchinson Publishing Co., Hutchinson, Kans.—Modification of construction permit (B4-PH-349 as modified) which authorized a new FM broadcast station, for extension of completion date.

WSVA-FM—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Modification of construction permit (B2-PH-812 as modified) which authorized a new FM broadcast station, for extension of completion date.

WOPI-FM—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—License to cover construction permit (B3-PH-676) which authorized a new FM broadcast station.

KQV-FM—Allegheny Broadcasting Corp., Pittsburgh, Pa.—Modification of construction permit (B2-PH-556 which authorized a new FM broadcast station) for extension of commencement and completion dates.

WCAP-FM—Radio Industries Broadcast Co., Asbury Park, N. J.—Modification of construction permit (B1-PH-961 as modified) which authorized a new FM broadcast station for extension of completion date.

WQQW-FM—Metropolitan Broadcasting Corp., Washington, D. C.—Voluntary assignment of construction permit to Radio Station WQQW, Inc.

WGUY-FM—Portland Broadcasting System, Inc., Bangor, Me.—Modification of construction permit (B1-PH-338 as modified) which authorized a new FM broadcast station to change corporate name to Guy Gannett Broadcasting Services.

WJPG-FM—Green Bay Newspaper Co., Green Bay, Wis.—Modification of construction permit (B4-PH-147, as modified) which authorized a new FM broadcast station to change studio location.

WCAE-FM—WCAE, Inc., Pittsburgh, Pa.—Modification of construction permit (B2-PH-228, as modified) which authorized a new FM broadcast station, for extension of completion date.

WGAN-FM—Portland Broadcasting System, Inc., Portland, Me.—Modification of construction permit (B1-PH-116, as modified) which authorized a new FM broadcast station to change corporate name to Guy Gannett Broadcasting Services.

WMIN-FM—WMIN Broadcasting Co., St. Paul, Minn.—Modification of construction permit (B4-PH-256, which authorized a new FM broadcast station) to change type of transmitter and make changes in antenna system.

Channel #242

NEW—Mercantile Broadcasting Co., Miami Beach, Fla. (P. O. 420 Lincoln Road) (Alan Henry Rosenson, Leo Robinson and Yvette Rosenson)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 242, ERP of 13.4 KW, and antenna height above average terrain 150 feet.

Channel #238

NEW—Key Broadcasting Corp., Baltimore, Md. (P. O. 1031 Cathedral street)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 238, 95.5 mc., ERP of 20 KW, and antenna height above average terrain 500 feet.

Channel #263

NEW—Edge & Korsmeyer, Jacksonville, Ill. (Milton Edge and Edgar J. Korsmeyer) (P. O. Fox Illinois Theatre building)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 263, 100.5 mc., ERP of 3 KW, and antenna height above average terrain 218 feet.

98.0 MC.

NEW—Atlantic Broadcasting Co., Inc., New York, N. Y. (P. O. 29 West 57th St.)—Construction permit for a new FM broadcast station (Class B) to be operated on 98.0 mc., and ERP of 7.2 KW.

To Be Assigned by FCC

NEW—Crosley Broadcasting Corp., New York, N. Y. (P. O. Crosley Square, 9th and Elm streets, Cincinnati 2, Ohio)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC, ERP of 10.5 KW. and antenna height above average terrain 637 feet.

NEW—San Gabriel Valley Broadcasting Co., Monrovia, Calif. (P. O. % Herbert Herzenberg, 635 Norumbega Drive)—Construction permit for a new FM broadcast station to be operated on frequency to be assigned by FCC, ERP of 166 watts and antenna height above average terrain 1222 feet.

NEW—Southwest Iowa Broadcasting Co., Creston, Ia. (P. O. % Station KSIB, Creston, Ia.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC, ERP of 94.7 KW.

NEW—Kennett Broadcasting Corp., Kennett, Mo.—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 306 watts.

NEW—Union Broadcasting Co., Elizabeth, N. J. (P. O. 1218 Fairmont avenue)—Construction permit for a new FM broadcast station (Class A) to be operated on frequency to be assigned by FCC, ERP of 1 KW, and antenna height above average terrain 153 feet.

NEW—San Diego Broadcasting Co., Inc., San Diego, Calif. (P. O. United States National Bank building)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and antenna height above average terrain 500 feet.

(Continued on next page)

NEW—On The Air, Inc., St. Louis, Ill. (P. O. 519 Vine St., Evansville, Ind.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC, and ERP of 33.6 KW.

FM—Application Returned

Howard Payne College, Brownwood, Tex. (P. O. Brownwood, Tex.)—Construction permit for a new FM broadcast station (Class B) to be operated on 92.1 to 103.9 mc. band, ERP of 2890 KW. Returned June 30, 1947. Charter not properly certified.

FM—Application Dismissed

Mississippi Valley Broadcasting Co., St. Louis, Ill. (a partnership) (Myles H. Johns, Penrose H. Johns, William F. Johns, and William F. Johns, Jr.) (P. O. Broadview Hotel, Broadway and Fifth, East St. Louis, Ill.)—Construction permit for a new FM Broadcast station (Class A) to be operated on frequency to be assigned by FCC. Dismissed July 7, 1947, per request of attorney.

W3XBR—The Conestoga Television Association, Inc., Salisbury Twp., Lancaster County, Pa.—Granted CP for reinstatement of (BPVB-165) which authorized a new experimental television relay broadcast station. (BPVB-208)

TV—Applications Accepted for Filing

WMAR—The A. S. Abell Co., Baltimore, Md.—Modification of construction permit (B1-PCT-167, as modified, which authorized a new commercial television broadcast station) for extension of completion date.

KOB-TV—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-PCT-60, as modified, which authorized a new commercial television broadcast station) for extension of commencement and completion dates.

WGNA—WGN, Inc., Chicago, Ill.—Modification of construction permit (B4-PCT-32, which authorized a new commercial television broadcast station) to change type of transmitter, to make changes in antenna system, and to extend completion date.

WTVO—The Fort Industry Co., Detroit, Mich.—Modification of construction permit (B2-PCT-182, which authorized a new commercial television broadcast station) to change frequencies from Ch. #2, 54-60 mc. to Ch. #5, 76-82 mc.

MISCELLANEOUS BROADCAST

Actions

Remote Pickup

WRGF—Miami Broadcasting Co., Mobile, area of Miami, Fla.—Granted modification of CP for extension of completion date to 11-16-47. (BMPRE-67)

KPLM—Emporia Broadcasting Co., Portable, area of Emporia, Kan.—Granted license for new remote pickup station to be used with standard station KTSW. (BLRY-334)

Noncommercial Educational

WHA-FM—State of Wisconsin, State Radio Council, Madison, Wis.—Granted modification of CP for extension of time to 9-1-47 in which to complete construction of noncommercial educational broadcast station. (BMPED-70).

Applications

Remote Pickup

NEW—Granite District Radio Broadcasting Co., area of Salt Lake City, Utah (P. O. 219 Continental Bank Bldg., Salt Lake City, Utah)—Construction permit for a new remote pickup broadcast station to be operated on 133.03, 136.81, 134.85, 138.63 mc., power of 50 watts, emission A3, hours of operation in accordance with Section 4.403.

NEW—Granite District Radio Broadcasting Co., area of Salt Lake City, Utah.—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150, 2790 and 133.03, 136.81, 134.85, 138.63 kc., power of 50 watts, emission A3, and hours of operation unlimited. Amended to eliminate frequencies 133.03, 136.81, 134.85, 138.63.

WILN—American Colonial Broadcasting Corp., Arecibo, P. R.—Modification of construction permit (BPRY-326, which authorized a new remote pickup broadcast station) for extension of commencement and completion dates.

KNGL—Minnesota Broadcasting Corp., area of Minneapolis, Minn.—Modification of construction permit (B4-PRE-477, which authorized a new remote pickup broadcast station) for extension of completion date.

WRLJ—The Western Connecticut Broadcasting Co., area of Stamford, Conn.—License to cover construction permit (B1-PRY-317) which authorized a new remote pickup broadcast station.

Federal Trade Commission Actions

Complaints

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Champion Spark Plug Co.—The Commission has amended its complaint against Champion Spark Plug Co., Toledo, to broaden its charges of price discrimination in violation of the Robinson-Patman and Federal Trade Commission Acts and to add a new count alleging the use of exclusive-dealing contracts in violation of section 3 of the Clayton Act. (3977)

Dawn Products Co.—Challenging the legality of a sales plan by means of which religious, patriotic and charitable organizations are allegedly used as "fronts" to sell miscellaneous merchandise, the Commission issued a complaint

(Continued on next page)

charging Joseph Gordon, trading as Dawn Products Co., 2147 West Lake St., Chicago, with misrepresentation. (5504)

Radio Kits, Inc.—False and misleading advertising of "radio kits," is charged in a complaint issued by the Commission against Radio Kits, Inc., 120 Cedar St., New York, and its officers, Irving Becker, president; Harold Becker, vice president and secretary; and Abraham Becker, treasurer. The respondents are engaged in the interstate sale of radio parts assembled in kits. (5505)

Amendment Stipulation

H. B. Sales Co.—C. A. Briggs Co., trading as H. B. Sales Co., Cambridge, Mass., is released from prohibition against use of the trade name "Hospital Brand" to describe its cough drops under the terms of an amendment stipulation approved by the Commission. (3745)

Cease and Desist Orders

McKinley-Roosevelt, Inc., etc.—Misrepresentation in the sale of correspondence courses is prohibited in a cease and desist order issued against four Chicago corporations and their officers.

The respondent corporations are McKinley-Roosevelt, Inc., McKinley-Roosevelt Foundation, McKinley-Roosevelt Graduate College and McKinley-Roosevelt University, all of 4610 Sheridan Road, Chicago. Officers of the corporations are Jessie M. Taylor, president and treasurer; William R. Peacock, secretary; and Lozier D. Warner, director.

Each of the corporate respondents, together with their officers, is forbidden to represent, through the granting or conferring of so-called degrees or by any other means, that it is an institution of higher learning authorized to confer degrees possessing academic value and recognized in the educational field. (5272)

Watts-Wagner Co., Inc., 109 West 64th St., New York, and its officers have been ordered by the Commission to stop using the words "weld" or "welding," or any other words of similar meaning, to designate, describe or refer to a liquid sealing compound or the results accomplished through its use in repairing cracks in cylinder heads, water jackets or various metal parts of automative engines or other machinery. The product sold by the respondents is now designated "Perma-Weld." (5005)

Need for International Broadcasting Group Stressed in Proposal by United Kingdom

After having been entertained over the weekend in New York City by the United States Telecommunication Companies, the 800 delegates to the International Telecommunications Conference at Atlantic City plunged into their work with renewed vigor.

Already three weeks behind in their schedule and starting on the third month of negotiations, a new and important broadcasting proposal presented by the United Kingdom was not expected to hurry the Conference ending. The British proposed the formation of an International Consultative Committee for Broadcasting (Document 570-R), and outlined an entirely new proposal for worldwide regulation of broadcasting. The United Kingdom representative, in presenting the proposal, stated that it "considers that the time has come for the establishment of a worldwide organization, as an integral part of the I.T.U., to coordinate the requirements of the broadcasting services on a fully international basis. This view is strengthened by proposals which have been made by other countries for the establishment of some form of organization to regulate international broadcasting services . . .

"The need for international co-operation in the operation of broadcasting services has long been apparent and a number of regional organizations have done valuable work in investigating problems of a regional character . . .

"While there may be some arguments in favour of separate organizations to deal in detachment with the conduct of high-frequency and medium and low-fre-

(Continued on page 584)

On the Inside

NAB's Employee-Employer Relations Committee meets in Washington today (21) to analyze effects on the broadcasting industry of the Lea Act and more recent legislation. (p. 586)

The FCC's engineering department, in a reorganizational move, has shifted a number of its staff members in new assignments and has abolished the International Division. (p. 586)

Production figures released by RMA, reveal that member companies have manufactured over eight and a half million receivers during the first six months of 1947. (p. 586)

A talk titled "Radio Advertising in 1947" suitable for delivery by radio station executives is available on request at NAB headquarters. (p. 585)

The Veterans Administration announced a new series of quarter hour transcriptions for broadcast this fall. The discs may be ordered through branch VA offices. (p. 587)

Study of Educational Radio Clinics Planned By Public Relations Committee

A study of how the radio broadcaster can participate more effectively in educational institutes and clinics currently being conducted by many colleges and universities throughout the country will be undertaken by the NAB Public Relations Executive Committee.

Meeting in Washington Thursday and Friday (17-18), the committee appointed a subcommittee of three to explore ways for the industry to join appropriately in these sessions. The sub-committee members are A. A. Schechter, vice president of the Mutual Broadcasting System, as chairman; Buryl Lottridge, vice president and general manager, WOC, Davenport, Iowa; and Craig Lawrence, general manager, WCOP, Boston.

White Hearings: Committee Chairman Gilmore Nunn, president of the Nunn Stations (WLAP, WBIR, WCMI, KFDA, WMOB), in a statement issued pursuant to the meeting, said: "The Committee has asked me to emphasize its enthusiastic endorsement of radio's vigorous stand for freedom which was spearheaded by the appearance of NAB's president, Judge Justin Miller, before the Senate Subcommittee taking testimony on S. 1333 (the White Bill).

"It is the unanimous feeling of this committee that these hearings marked a turning point in the American system of broadcasting.

"We feel that, for the first time in our history, broadcasters have had expressed publicly the principle of freedom for which they stand and for which they will fight."

Mr. Nunn's statement followed a report to the Committee by Judge Miller on the Freedom of Expression Conference, held in Washington June 26. The Conference assembled at the invitation of NAB and was attended by representatives of all media—newspapers,

periodicals, books, motion pictures and radio. Judge Miller told the Committee that the Conference demonstrated a "keen interest on the part of all media" in the overall problem of free expression.

Broadcast Measurement Bureau: The committee urged, by resolution, that "all possible public relations facilities of the NAB be employed inside and outside the industry to bring about general acceptance of BMB and its operations." This recommendation was made after a review of the NAB Board of Director's decision that BMB should be continued on a long range basis.

The committee's resolution reads:

"WHEREAS, the Board of Directors of NAB has gone on record in favor of continuance of BMB and has urged that all possible steps be taken to encourage its work and enhance its effectiveness,

"*Therefore Be It Resolved*, that all possible public relations facilities of the NAB be employed inside and outside the industry to bring about general acceptance of BMB and its operations."

Research Activity: Taking cognizance of the value, to both the individual broadcaster and the industry as a whole, of the data being gathered regularly by the NAB Research Department, the committee adopted a motion endorsing these activities of the Research Department and urging broadcasting stations to cooperate fully in answering queries from the NAB.

The committee reaffirmed its recommendation that an all-out campaign to "sell radio by radio" should be a primary part of the NAB's public relations activity. The committee expressed satisfaction with the way this campaign is being developed by the newly created NAB program department.

Plans for press coverage of the annual NAB convention were examined by the committee and the recommendation made that everything possible be done by the NAB staff to provide fullest possible information and convenient working conditions for all press representatives who attend.

The committee heard reports from the following NAB staff members: A. D. Willard, Jr., executive vice president; C. E. Arney, Jr., secretary-treasurer; Harold Fair, program department director; Kenneth Baker, research department director; Allen Brown, assistant director, broadcast advertising department; and Richard Doherty and David Farber, director and assistant director, respectively, of the employee-employer relations department.

Present for the two-day session were Mr. Nunn, Mr. Schechter, Mr. Lottridge, Mr. Lawrence, William S. Hedges, vice president of NBC; Clarence Worden (representing George Crandall, director of CBS Press Information); Merrill Lindsay, vice president and general manager, WSOY, Decatur, Ill.; Richard H. Mason, general manager, WPTF, Raleigh, N. C.; Harold Wheelahan, general manager WSMB, New Orleans, La.

Unable to attend were James M. LeGate, general manager, WIOD, Miami, Fla.; and the Board Liaison members, Frank M. Russell, NBC vice president and William B. Way, vice president and general manager, KVOO, Tulsa.

The next meeting of the committee will be held at the Convention.

Need for International Broadcasting Group Stressed in Proposal by United Kingdom

(Continued from page 583)

quency broadcasting services, there is a wide range of technical problems relating to all types of broadcasting which, in the opinion of the United Kingdom, are proper to be studied on a worldwide basis. There is also a number of related non-technical matters which might equally profitably be studied on a worldwide basis . . .

"It is not the United Kingdom proposal that the suggested International Consultative Committee for Broadcasting should in any way take over the functions of International or Regional Radio Conferences (which would continue to draw up Regulations and conclude international agreements on frequency assignments to broadcasting services and stations) because these must remain as at present, the functions of governments. The proposed organization would act only in an advisory capacity, in a manner similar to that in which the other Consultative Committees of the Union perform their duties."

Make Recommendations: The International Consultative Committee for Broadcasting (Comite Consultatif International Diffusion) would study and draw up recommendations on technical questions relating specifically to the field of broadcasting and methods of international transmission and exchange of program material. Additionally, the C.C.I.D. would, through its Regional Committees, prepare provisional plans for allocation and use of frequencies for medium, low and international broadcasting services for consideration by the International and Regional Broadcasting Conferences. Another service proposal is that of advising other international organizations on non-technical matters relating to broadcasting which depend for their solution on technical considerations. British proposal

(Continued on next page)

felt that the C.C.I.D. should normally confine its studies to technical broadcasting questions and that such non-technical matters as programming should be left to the consideration of the UN. The C.C.I.D., according to the United Kingdom proposal, would be made up of experts from both government and broadcast operating agencies recognized by the respective governments.

The proposed C.C.I.D. would be broken up as follows:

Committee 1—European Region,
Committee 2—North American Region,
Committee 3—South American Region,
Committee 4—Other Regions,
Committee 5—Tropical Broadcasting

The International Committee, made up of representatives nominated by the various Regional Committees, would advise the International Radio Conference at the High Frequency Broadcasting Conference on broadcasting matters including proposals for frequency assignments and high frequency broadcasting services.

Broadcast Advertising

Stations Requested to Provide Full Address in Ordering NAB Material

Stations ordering the NAB Standard Program Schedule forms are requested to include their complete address, including street or P. O. Box number. The Railway Express has had to hold up delivery, in some cases, for lack of the full address, especially new stations.

The Standard Program Schedule forms are available to all NAB member stations at $5.56 per thousand. Delivery is made about 10 days after receipt of order.

NAB Suggests Rate Card Campaigns To Groups Offering PI Business

NAB member stations have reported offers of per inquiry business from: W. W. Garrison and Company—Speed-O-Matic Camera, Azrael Advertising Agency, Furman, Feiner & Company, Inc.—Atonic Hair & Scalp Conditioner, and Arlind Company.

NAB has written these concerns inviting them to use radio on a rate card basis. The NAB resolution against the acceptance of per inquiry business was enclosed with the letter.

Script on "Radio Advertising in 1947" Available for Local Talks

As a result of requests from broadcasters and agency executives, who attended the Fourth District Advertising Federation of America Convention at Miami Beach, Fla. (June 27-29), copies of an address on radio advertising by J. Allen Brown, NAB Assistant Director, Broadcast Advertising, will be made available to stations. The talk, "Radio Advertising In 1947," has been edited for general use by local station sales and station management.

The script is especially suitable for local talks before Advertising Clubs, Chamber of Commerce and Junior Chamber meetings, Rotary, Kiwanis, Lions and other civic clubs. It runs approximately 20 minutes but may be used in whole or in part, and adapted to the occasion. The script will be sent to stations upon request to NAB.

North Carolina Stations Sponsor Retail Sessions

NAB stations in Charlotte and Durham, North Carolina, invited local retailers to special luncheon meetings Thursday and Friday, July 17 and 18. Miss Lee Hart, assistant director of Broadcast Advertising for NAB, spoke on "Radio for Retailers" and in the afternoon, held round-table discussions for station sales, program and copy personnel in each city.

Public Relations

West Coast Outdoor Advertising Company Schedules Poster on Freedom of Radio

The broadcasting industry's insistence of its constitutional right of freedom of expression on the air is receiving the support of another medium of mass communication—outdoor advertising.

Foster & Kleiser Company, outdoor advertising organization on the West Coast has been running a series of public service announcements on some 400 boards covering the area from Canada to Mexico.

The current campaign includes a board devoted to freedom of radio. The copy reads: "a free people need freedom of speech and freedom of the air . . . Listen to your radio."

Other posters in the campaign asked for cooperation in fighting juvenile delinquency; an appeal for safety on the highway; a suggestion for increased church attendance; a reminder to read the local newspaper.

Employee-Employer Relations

EER Committee Meets to Study Effects Of New Legislation

The Employee-Employer Relations Committee will meet today (21) in order to analyze the effect of the Taft-Hartley Act and the Lea Act upon the radio industry and broadcast operations. As a result of conclusions reached at this meeting, the Department will prepare a special bulletin for all the NAB members so that station managers and owners and their attorneys may understand more fully the application of the new labor law to union-management relations throughout the industry.

Attending the meeting will be:

John Elmer, WCBM, chairman; Ernest de la Ossa, NBC; William Fay, WHAM; Howard Housman, CBS; Leslie C. Johnson, WHBF; Frank King, WMBR; Howard Lane, Field Enterprises, Inc.; Harry R. LePoidevin, WRJN; C. L. McCarthy, KQW; Joseph A. McDonald, ABC; John H. MacDonald, NBC; Marshall Pengra, KRNR; Frank R. Smith, WWSW; Robert Swezey, MBS; C. L. Thomas, KXOK; and Frank K. White, CBS.

NAB staff members who will attend the meeting are:

President Justin Miller, A. D. Willard, Jr., executive vice president, C. E. Arney, Jr., secretary-treasurer, Don Petty, general counsel, Richard P. Doherty, employee-employer relations director, Ivar Peterson, attorney, David Farber, EER department.

FCC Engineering Department Personnel Shifted in Organization Realignment

A complete reorganization of the FCC Engineering Department was announced Friday (18) by George E. Sterling, newly named FCC Chief Engineer (News Release 9970). Chief changes were the promotion of George S. Turner to Assistant Chief Engineer and Assistant Chief Engineer George K. Rollins' transfer to head up a new Radio Operator and Amateur Division. Assistant Chief Engineer John A. Willoughby under new duty assignments will be responsible for engineering contacts relating to new broadcast stations, engineering status of applications, and, in part, providing engineering liaison with the CAA in clearance and marking of radio towers.

Branch chief positions in the Engineering Department are abolished by the directive, and Assistant Chief Engineer Marion H. Woodward has been assigned to Common Carrier. Marine Radio and Safety will be assigned to William H. Krebs. Mr. Turner, who filled the vacancy created by Mr. Sterling's appointment, was assigned additionally the Field Engineering and Monitoring Division.

The change abolished the International Division, which will now come under the jurisdiction of the Radio Section of the Common Carrier Division. Second in command of this Division will be Mr. John A. Russ. Certain treaty functions of the former International Division were transferred, along with the NARBA work of the Standard Broadcasting Division, to the present Frequency Service Allocation Division.

Legal Department

Bill Providing for Zoning Restrictions Passed by House, Awaits Senate Action

A bill to provide for zoning legislation restricting the construction of tower sites, introduced by Rep. Joseph P. O'Hara (R), Minn., (Current Reports, p. 311) was passed by the House on Wednesday (16) and sent to the Senate for its action.

On its proposal, the bill was objected to by NAB, when Don Petty, general counsel, wrote to Mr. O'Hara pointing out the ill effects of such legislation.

A summary of amendments to the bill, as passed by the House, is published in this week's *Legislative Digest.*

Research Department

RMA Member Companies Manufacture Over 8.5 Million Sets in Half-Year

Over eight and a half million radio and television receivers were produced during the first six months of this year by its member companies it was revealed by RMA.

June's record output of 11,484 television receivers brought the half-year's total to 46,389 as compared with 6,476 in the whole of 1946.

A total of 445,563 FM-AM receivers were produced by RMA member-companies during the first six months of 1947 as compared with 181,485 in 1946. June's output, however, declined along with the entire set production below the two previous months. FM-AM receivers manufactured in June numbered 76,624 as compared with 84,507 in May.

However, total June set production dropped to 1,213,142 in an expected seasonal decline as compared with 1,316,373 in May.

The proportion of FM-AM receivers to the total set production rose from 1.4 to more than 5 percent during the first half of 1947.

Automobile radio production during the first half of 1947 exceeded the total for 1946, the respective figures being 1,208,159 (1947) and 1,153,458 (1946).

Following is the monthly breakdown of FM, tele-

(Continued on next page)

vision, and all radio set production for the first six months of 1947:

Month	*FM-AM*	*Television*	*All Sets*
January (five weeks)	51,318	5,437	1,564,171
February	53,594	6,243	1,379,966
March	67,264	6,639	1,377,269
April (five weeks)	112,256	7,886	1,759,723
May	84,507	8,690	1,316,373
June	76,624	11,484	1,213,142
Totals	445,563	46,389	8,610,644

General

NAB Information Assistant Appointed To New Position in Program Dept.

The appointment of Ben Miller as assistant director of NAB's Program Department was announced last week (16) by A. D. Willard, Jr., NAB executive vice president.

Mr. Miller is presently assistant director of information at the NAB. His transfer will take effect, Mr. Willard stated, as soon as his successor in the Information Department has been named.

In his new capacity Mr. Miller will serve as assistant to Harold Fair, who was recently appointed director of the newly created Program Department.

Miller was chosen for his new assignment, it was pointed out, because of his extensive background in radio programming, including both radio station and advertising agency experience. He joined NAB in April, 1946.

After seven years with Young and Rubicam in New York, Miller resigned in April, 1940, to enter the radio station field. At Young and Rubicam he worked on the production staff of "We the People." From the agency he went with the newly formed WPID and assisted in opening and operating that station in Petersburg, Va., holding the post of program director. His next position, a year and a half later, was at Augusta, Ga., with WGAC, also as program director. He left WGAC in the spring of 1942 and shortly thereafter enlisted in the U. S. Army. Released from service 3½ years later, with the rank of Captain, he had served for over a year in the War Department Bureau of Public Relations. Prior to separation from the service, he was chief of the Radio Branch, Army Services Forces Group.

Holiday Arrangements Will Be Made For NAB Members of Jewish Faith

The fact that the Convention this year conflicts with the Jewish High Holidays was brought to the attention of the Convention management only recently. NAB investigated possible methods of accommodating members of NAB who are of the Jewish faith, who desire to attend the convention, and at the same time observe the holidays.

Because of contractual commitments involving the Convention Hall and the hotels in Atlantic City, it was impossible to make any change in the Convention schedule.

A preliminary investigation in Atlantic City brings out the information that the local synagogues—Orthodox and Reformed—are in a position to accommodate those members of the Jewish faith who wish to attend services.

In order that members may be served, however, it is imperative that NAB be informed immediately so that final arrangements for the available facilities may be expedited.

Letter Writing Contest Proposed As National Radio Week Promotion

A recommendation that RMA and NAB cooperate in sponsoring a letter writing contest, similar to last year's, during National Radio Week has been made by the RMA Advertising Committee.

The Committee approved a proposal that RMA set manufacturers be asked for donations of radio-phonograph sets to be offered as prizes in each of the 17 NAB districts, with perhaps an additional grand national prize.

Last year's contest, conducted by NAB's Association of Women Broadcasters, pulled some 200,000 letters from radio listeners who responded to the question: "What I Think About Radio."

It is expected that some 30,000 workbooks, containing promotion material for the observance of radio week, will be distributed sometime in December to radio dealers, broadcasting stations, advertising agencies and others who will join in the nationwide celebration of the 27th anniversary of broadcasting.

Public Interest Programming

New Vet Administration Series Available to Broadcasters

A new series of 13 quarter-hour "Here's To Veterans" transcriptions is in production and will be available to radio stations late in August, for use during September, October and November, Veterans Administration announced.

The series will include "capsule" versions of well-known network programs such as the "Breakfast Club," Eve Arden, Tex Beneke, the King Cole Trio, Frances Langford, Alec Templeton, Woody Herman and Jack Parr.

Broadcasters may order the transcriptions, as in the past, by writing to the public relations office at the nearest VA branch office. Branch offices are located in Boston, New York, Philadelphia, Richmond, Atlanta, Dallas, St. Louis, Columbus, Chicago, St. Paul, Denver, San Francisco and Seattle.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot

(Continued on next page)

Allocation Plans during the week of July 28-August 3, 1947, by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

Our New Soldier—Young, Skilled Volunteer

Before the war, we were a fourth rate military power. We had a standing Regular Army of 178,000 men—*smaller than little Poland's, Roumania's, or Turkey's.* Up till now, our national habit has been to have a strong Army only in wartime—and to say to hell with it as soon as peace comes. Everybody hopes the United Nations will find the means to outlaw war, but everyone admits the way hasn't yet been found. *We live in a still-quarreling world, a world that respects the strong—a world in which our country must assume a position of leadership with its attendant responsibilities.* With this in mind, and after examining our present overseas commitments, Congress has authorized the largest peacetime Regular Army in our history. The required strength has been set at 1,070,000. (We had 8,000,000 during the war.) The Army is conducting a paid recruiting campaign—*but it's not enough.* Unless the Council's campaign to build and maintain prestige and appreciation for the new Regular Army is continued, says the War Department, *it will be very difficult* for the paid campaign to bring in the 30,000 recruits each month that are needed to maintain the Army's authorized strength. *Actually, the new Regular Army of today is a compact, carefully chosen force of skilled technicians.* Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the stakes are high in the task before them: *maintenance of the peace and security for which thousands of other young Americans have already died.* Few people realize that today's Regular Army constitutes what is perhaps the world's greatest single scientific research organization. The technological progress and scientific research of the war years have resulted in countless new devices and methods, all of which are in general use throughout our new Regular Army, and Army men, in cooperation with civilian scientists, are seeking constantly to develop and perfect innumerable techniques and devices that will protect our national security as well as contribute to better peacetime living. It is these advanced methods which today's Regular Army man must know; it is these devices he must understand and operate. *In short, America's peacetime soldier is an informed technician in at least one of many specialized fields—radar, small arms, chemical warfare, photography—whether he be a member of the Infantry, the Artillery, the Air Forces, or any other branch of the service.* Today's new Regular Army is a large school-going organization. Through the facilities of the U. S. Armed Forces Institute, more than a quarter of a million men today are studying cultural subjects ranging from business administration to English literature. In addition to the Institute, the Army conducts numerous technical schools in such fields as radar, radio, diesel engines, aviation specialties, etc. While the primary purpose of these technical schools is to train men for military jobs, they also provide a training that is useful in civilian life. This allocation falls on or around Friday, August 1, which has been designated as Air Force Day in recognition of the 40th Anniversary of the Army Air Forces. You may therefore wish to salute the Air Forces in your message. The purpose of the Day is to emphasize the importance of the Army Air Forces in maintaining the security of the United States . . . to call attention to its many contributions to progress . . . to honor the men, living and dead, who pioneered the development of air power and who have served their country in the air. The slogan for the occasion is *"Air Power Is Peace Power."* (Fact Sheet No. 2-G.)

Nursing Is a Growing Profession

There is a definite and alarming shortage of nurses in the majority of the nation's hospitals. In some instances, whole floors and wings of hospitals have had to close. Literally, thousands of patients are going without adequate nursing care. *In the belief that the demand for nurses can best be met* by pointing out the many opportunities open to those who join the nursing profession, both hospital and nursing groups have recommended that these opportunities be stressed in all student-nurse recruitment copy. There are many reasons why the demand for nurses far exceeds the supply. Among these reasons are: (1) Long-range health plans are vast in scope, calling for the expansion of hospitals, public health programs and industrial clinics. (2) Hospitalization Plans have made it possible for more people to have necessary hospital care. (3) Health education and preventive programs teach people to make greater use of medical resources. Modern medicine is advancing rapidly and demands the best in nursing care to keep pace with its discoveries. Young women who become nurses enter a profession which offers extraordinary opportunities in many different fields: (1) In the years to come, there will be an even greater demand for graduate nurses as a result of the expansion of hospital facilities, public health centers and industrial clinics. (2) Starting with general staff duty, nurses can advance to head nurse, supervisor, Director of Nurses or Hospital Administrators. They can specialize in surgical, psychiatric, industrial and child health, and other fields. Nurses may prepare for executive positions or for teaching in a School of Nursing. They may choose an interesting career in government: in the U. S. Public Health Service, Children's Bureau, Veterans' Administration or in the Indian Service. The Army and Navy offer nurses interesting work, excellent salaries and opportunities for travel. (3) Nursing is an ideal preparation for marriage, family life, parenthood, and leadership in community life. Young women who are high school graduates or college students in good standing are eligible to apply for admission to Schools of Nursing. Applicants should be under 35 and in good health. Interested young women should check with their local hospital for information on how to apply for entrance to a School of Nursing. WACS, WAVES, MARINES and SPARS who qualify as student nurses may find that the entire cost of their nursing education will be covered by their allowance for tuition and books under the G.I. Bill of Rights. (Fact Sheet No. 9-G.)

Federal Communications Commission Docket

WMFJ—W. Wright Esch, Daytona Beach, Fla.—C. P. to change frequency, etc.; **1090 kc.,** 1 KW night, DA-night; 1 KW day, unlimited.

NEW—Hot Springs Broadcasting Co., Hot Springs, Ark.—C. P. **1090 kc.,** 50 KW, unlimited. Facilities of KTHS requested.

Wednesday, July 23

(10:00 A. M.)

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Renewal of License. Complaint.

FCC ACTIONS

AMPLITUDE MODULATION

AM—New CP's Granted

580 KC.

LaCrosse Broadcasting Co., LaCrosse, Wisc.—Adopted order granting CP for new station to operate on 580 kc., 1 KW, unlimited time, DA., subject to reapproval of transmitter site and antenna system by CAA. (BP-4507; Docket 7473)

620 KC.

Georgia-Alabama Broadcasting Corp., Columbus, Ga.—Granted CP for new station to operate on 620 kc., 1 KW, daytime only. (BP-6058)

920 KC.

Cortland Broadcasting Co., Inc., Cortland, N. Y.—Granted CP for new station to operate on 920 kc., 1 KW, daytime only. (BP-6091)

1050 KC.

Langlade Broadcasting Co., Inc., Antigo, Wisc.—Granted CP for new station to operate on 1050 kc., 250 watts, daytime only; engineering conditions. (BP-6055)

1240 KC.

Coeur d'Alene Broadcasting Co., Coeur d'Alene, Idaho—Granted CP for new station to operate on 1240 kc., 250 watts, unlimited time. (BP-5774)

1250 KC.

The Helm Coal Co., York, Pa.—Granted CP for new station to operate on 1250 kc., 1 KW, daytime only; engineering conditions. (BP-6101)

Alf M. Landon, d/b as Englewood Broadcasting Co., Englewood, Colo.—Granted CP for new station to operate on 1250 kc., 1 KW, daytime only; engineering conditions. (BP-6089)

1340 KC.

John H. Phipps, Marianna, Fla.—Granted CP for new station to operate on 1340 kc., 250 watts, unlimited time, provided that no operation shall commence until the outstanding CP of WATL, Tallahassee, Fla. for 1270 kc. is covered by a license. (BP-5372)

AM—License Renewals

Granted renewal of licenses of following stations for the period ending August 1, 1950:

KFVS, Cape Girardeau, Mo.; KTSW, Emporia Kans.; KVRS, Rock Springs, Wyo.; KLUF, Galveston, Texas; WSTC, Stamford, Conn., KCHS, Hot Springs, N. Mex.; KELD, El Dorado, Ark.; KENO, Las Vegas, Nev.; KGFL, Roswell, N. Mex.; KGVL, Greenville, Texas; KHON, Honolulu, Hawaii; KTEM, Temple, Texas; KTTS, Springfield, Mo.; KWIN, Ashland, Ore.; KWLK, Longview, Wash.; WARM, Scranton, Pa.; WBTH, Williamson, W. Va.: WBTM, Danville, Va.; WCNC, Elizabeth City, N. C.; WEST, Easton, Pa.; WGBR, Goldsboro, N. C.; WHDF, Calumet, Mich.; WHUB, Cookeville, Tenn.; WJHO, Opelika, Ala.; WMAN, Mansfield, Ohio; WMFD, Wilmington, Dela.; WMSL, Decatur, Ala.; WRDO, Augusta, Me.; WRJN, Racine, Wis.; WSAM, Saginaw, Mich.; WSLB, Ogdensburg, N. Y.

KWBC—Worth Broadcasting Co., Fort Worth, Texas—Granted renewal of license for period ending May 1, 1950.

WFNS—Burlington-Graham Broadcasting Co., Burlington, N. C.—Granted renewal of license for period ending May 1, 1950.

AM—Designated for Hearing

1260 KC.

Seminole Broadcasting Co., Seminole, Okla.—Designated for hearing application for new station to operate on 1260 kc., 250 watts, daytime only. (BP-6086)

AM—Licenses for New Stations Granted

990 KC.

KTRM—KTRM, Inc., Beaumont, Texas—Granted license for new station to operate on 990 kc., 250 watts, day, and for change of studio location. (BL-2429)

1000 KC.

WSCR—Lackawanna Valley Broadcasting Co., Scranton, Pa.—Granted license for new station to operate on 1000 kc., 1 KW, daytime, and to specify studio location. (BL-2444)

1050 KC.

WRFS—Piedmont Service Corp., Alexander City, Ala.—Granted license for new station to operate on 1050 kc., 1 KW, daytime. (BL-2490)

1070 KC.

WHPE—The High Point Enterprise, Inc., High Point, N. C.—Granted license for new station to operate on 1070 kc., 1 KW, day. (BL-2480)

1090 KC.

KAYX—Waterloo Broadcasting Co., Waterloo, Iowa—Granted license for new station to operate on 1090 kc., 1 KW, daytime, and for change of studio location. (BL-2462)

1220 KC.

WSFT—Thomaston Broadcasting Co., Thomaston, Ga.—Granted license for new station to operate on 1220 kc., 250 watts, daytime. (BL-2466)

1240 KC.

KDEC—Telegraph Herald, Decorah, Iowa—Granted license for new station and for change of studio location; 1240 kc., 250 watts, S. H. (BL-2518)

1320 KC.

WKAN—Kankakee Daily Journal Co., Kankakee, Ill.—Granted license for new station to operate on 1320 kc., 1 KW, daytime. (BL-2476)

(Continued on next page)

1450 KC.

KOPO—Old Pueblo Broadcasting Co., Tucson, Ariz.—Granted license for new station to operate on 1450 kc., 250 watts, unlimited. (BL-2331)

1490 KC.

KDMO—Carthage Broadcasting Co., Carthage, Mo.—Granted license for new station to operate on 1490 kc., 250 watts, unlimited. (BL-2481)

1550 KC.

WLOA—Matta Broadcasting Co., Braddock, Pa.—Granted license for new station to operate on 1550 kc., 1 KW, daytime. (BL-2469)

AM—Modifications of CP's Granted

WVOK—Voice of Dixie, Inc., Birmingham, Ala.—Granted modification of CP to change type of transmitter, make changes in vertical antenna, change transmitter location, and specify studio location. (BMP-2766)

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho—Granted modification of CP for extension of completion date to 8-31-47. (BMP-2887)

WTPS—The Times Picayune Publishing Co., New Orleans, La.—Granted modification of CP for extension of completion date to 2-23-48. (BMP-2875)

KID—Idaho Radio Corp., Idaho Falls, Idaho—Granted modification of CP for extension of completion date to 10-14-47.

WCSC—John M. Rivers, Charleston, S. C.—Granted modification of CP for extension of completion date to 11-20-47. (BMP-2888)

WTAM—National Broadcasting Co., Inc., Cleveland, Ohio—Granted modification of CP for extension of commencement and completion dates to 10-2-47 and 2-2-48, respectively. (BMP-2890)

WFOR—Forrest Broadcasting Co., Hattiesburg, Miss.—Granted modification of CP for extension of completion date to 11-2-47. (BMP-2889)

WCOL—The Pixleys, Columbus, Ohio—Granted modification of CP for extension of completion date to 12-7-47. (BMP-2873)

KRAL—Rawlins Broadcasting Co., Rawlins, Wyo.—Granted modification of CP for extension of completion date to 1-29-48. (BMP-2876)

KVAI—Plains Empire Broadcasting Co., Amarillo, Texas—Granted modification of CP to change type of transmitter and make changes in DA. (BMP-2878)

WKGN—East Tennessee Broadcasting Co., Knoxville, Tenn.—Granted modification of CP to change type of transmitter, approval of antenna and transmitter location, and specify studio location. (BMP-2858)

KFBA—Frontier Broadcasting Co., Cheyenne, Wyo.—Granted modification of CP for extension of completion date to 10-27-47. (BMPH-497)

WHIS-FM—Daily Telegraph Printing Co., Bluefield, W. Va.—Granted modification of CP for extension of completion date to 11-3-47. (BMPH-494)

KPNI-FM—Peninsula Newspapers, Inc., Palo Alto, Calif.—Granted modification of CP for extension of completion date to 10-27-47. (BMPH-501)

KENI—Midnight Sun Broadcasting Co., Anchorage, Alaska—Granted modification of CP to change transmitter site to Anchorage, Alaska. (BMP-2830)

WJJD—WJJD, Inc., Chicago, Ill.—Granted modification of CP for extension of completion date to 8-25-47. (BMP-2892)

KRST—Rose Capital Broadcasting Co., Tyler, Texas—Granted modification of CP to change type of transmitter and make changes in vertical antenna. (BMP-2883)

WDEF—WDEF Broadcasting Co., Chattanooga, Tenn.—Granted modification of CP to extend completion date to 8-1-47. (BMP-2886)

KXSA—San Angelo Broadcasters, San Angelo, Texas—Granted modification of CP to extend commencement and completion dates to 8-18-47 and 2-14-48, respectively. (BMP-2866)

KYOS—Merced Broadcasting Co., Merced, Calif.—Granted CP to make changes in vertical antenna and mount FM antenna on top of AM tower. (BP-5286)

KIYI—Tri-County Radio Corp., Shelby, Mont.—Granted modification of CP to change type of transmitter, approval of antenna and transmitter location, and specify studio location. (BMP-2724)

AM—Miscellaneous Actions

The Commission, by Commissioner Hyde, on July 11 granted petition by **Community Broadcasting Co., Fort Worth Texas,** requesting a 60-day continuance of hearing upon its application for CP (BP-5182; Docket 7848), and continued said hearing to September 22, 1947.

WKTM—Mayfield Broadcasting Co., Inc., Mayfield, Ky.—Granted license to cover CP for changes in vertical antenna, increase power, install new transmitter. (BL-2472)

WHGB—Harrisburg Broadcasting Co., Harrisburg, Pa.—Granted license to cover CP for installation of new transmitter. (BL-2482)

WBNS—Radiohio, Inc., Columbus, Ohio—Granted license to cover CP for installation of new auxiliary transmitter. (BL-2468)

WCAO—Monumental Radio Co., Baltimore, Md.—Granted application to make changes in the WCAO four element directional array and to install an FM antenna on top of one of the towers of the directional system. (BP-6061)

Universal Broadcasting Co., Inc., Indianapolis, Ind.—Adopted Order granting petition to dismiss its application for new station (1130 kc., 10 KW., unlimited time, directional antenna; BP-4148) without prejudice to the filing of an application for transfer of control of Capitol Broadcasting Co., licensee of WISH, Indianapolis, to Universal Broadcasting Co., Inc. (Docket 7100)

WMC—Memphis Publishing Co., Memphis, Tenn.—Adopted Order dismissing petition of WMC for reconsideration of grant to WTAR Radio Corp., Norfolk, Va. (to make changes in directional antenna of Station WTAR and mount FM antenna on top of one of its AM towers), designate said application for hearing and make WMC party to the hearing. In the same order, the Commission further ordered that said grant to WTAR is made subject to the condition that Station WTAR shall radiate in the direction of WMC no more than 157 mv/m at night. (BP-5303)

Lake County Broadcasters, Eustis, Fla.—Adopted Order granting petition for reconsideration and grant of its application; removed from hearing docket, and granted CP for new station to operate on 790 kc., 1 KW, directional antenna day and night. (BP-5193; Docket 8355)

The Commission, by Commissioner Hyde, on July 16th ordered that the consolidated hearing on the applications of Hearst Radio, Inc., for renewal of license of Station WBAL, Baltimore, Md. (Docket 7400), and Public Service Radio Corp. for new station at Baltimore, Md. (Docket 7972), be held on October 6, 1947, at Baltimore, Md.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted petition to reconsider and grant without hearing its application (BP-4591; Docket 8282); severed from consolidated hearing with Northeast Radio, Inc., and Viking Broadcasting Co. (Dockets 8283 and 8284), and granted said application to increase power of Station WTRY from 1 KW to 5 KW, change transmitter location, and install new directional antenna for day and night operation on its present frequency 980 kc.

(Continued on next page)

WRBC—Rebel Broadcasting Co. (assignor), Rebel Broadcasting Co. (assignee), Jackson, Miss.—Granted consent to assignment of permit from a limited partnership to a corporation composed of same parties. (BAPL-28)

KTBS—Radio Station KTBS (assignor); KABH—Radio Station KTBS, Inc.; KTBS-FM (assignee), Shreveport, La.—Granted consent to assignment of license for standard station KTBS, and permits of KTBS-FM and associated relay station KABH from Radio Station KTBS, a partnership, to Radio Station KTBS, Inc., a corporation. (BAL-613)

WAZL-WAZL-FM—Hazleton Broadcasting Service, Inc. (assignor), The Hazleton Broadcasting Co. (assignee), Hazleton, Pa.—Granted consent to assignment of license for Station WAZL and permit for its associated FM station, from Hazleton Broadcasting Service, Inc., a corporation, to The Hazleton Broadcasting Co., a partnership. (BAL-617)

KCNA—Erskine Caldwell, et al (transferor), William A. Small, et al (transferee), Catalina Broadcasting Co. (licensee), Tucson, Ariz.—Granted consent to voluntary transfer of control of Catalina Broadcasting Co. from Erskine Caldwell, et al, to William A. Small, et al; no monetary gain or loss is involved. (BTC-538)

WKRG—Giddens and Rester, Mobile, Ala.—Granted petition for reconsideration and grant without hearing application for CP to operate nighttime with 250 watts, using directional antenna; engineering conditions. (BP-5887; Docket 8300)

KFIO—Spokane Broadcasting Corp., Spokane, Wash., and KVNI—Coeur d'Alene Broadcasting Co., Spokane, Wash.—Adopted Memorandum Opinion and Order denying petition of KFIO directed against grant without hearing of application of KVNI (to move from Coeur d'Alene, Idaho, to Spokane, Wash., increase power, etc.), insofar as petition requests that KVNI application be designated for hearing; insofar as petition requests other relief it is granted to the extent that the following condition be added to the abovementioned grant of KVNI application: "When and if the pending application by Spokane Broadcasting Corp. (KFIO) is granted, the applicant (KVNI) shall cooperate with Spokane Broadcasting Corp. (KFIO) in the correction, to the satisfaction of the Commission, of any cross-modulation or inter-modulation problems that might arise."

KFMB—The Jack Gross Broadcasting Co., San Diego, Calif.; KLIK—Balboa Radio Corp., San Diego, Calif.—Adopted memorandum opinion and order denying joint petition requesting that application of KFMB to change operating assignment from 1450 to 550 kc. be granted and that, subject to such action, KLIK be assigned 1450 kc.; the denial of the petition is without prejudice to the filing of a petition by KLIK requesting leave to amend its application so as to request, on a contingent basis the frequency 1450 kc. (Dockets 8115; 8116)

WTOL—The Community Broadcasting Co., Toledo, Ohio; Public Service Broadcasters, Inc., Toledo, Ohio—Adopted order granting petition of Public Service Broadcasters, Inc., for leave to amend its application to make the same contingent upon a grant of the pending application of WTOL, such amendment to be filed within 30 days; removed said application of Public Service Broadcasters, Inc. from hearing docket and placed in pending file pending Commission action upon application of WTOL (Docket 7515); further ordered that remaining petitions (1—of WTOL requesting dismissal of application of Public Service Broadcasters, Inc., for failure of that applicant to file a timely appearance and to answer official correspondence; (2—petition of Public Service Broadcasters, Inc. for acceptance of late appearance and waiver of Sec. 1.387(b); and (3—letter on behalf of Public Service requesting adjournment of hearing to August 11) be dismissed as moot.

AM—Applications Accepted for Filing

590 KC.

KFXM—Lee Bros. Broadcasting Co., San Bernardino, Cal. (J. C. Lee and E. W. Lee)—Modification of construction permit (B5-P-4093, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for day and night, and change in transmitter location) to make changes in directional antenna and transmitting equipment.

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Modification of construction permit (B3-P-4355, as modified, which authorized increase in power, installation of directional antenna for night use) for extension of completion date.

WJJL—John J. Laux, Niagara Falls, N. Y.—Modification of construction permit (B1-P-5628, which authorized a new standard broadcast station) for approval of antenna and transmitter location.

1450 KC.

WCJU—Forrest Broadcasting Co., Columbia, Miss. (C. J. Wright, B. M. Wright and C. J. Wright, Jr.)—Voluntary assignment of license to Lester Williams.

KCSM—James L. Frank, Colorado Springs, Colo.—Modification of construction permit (B5-P-4918, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to specify studio location.

KWPM—Robert F. Neathery, West Plains, Mo.—License to cover construction permit (B4-P-4959, as modified) which authorized a new standard broadcast station and for change of studio location and authority to determine operating power by direct measurement of antenna power.

1490 KC.

WRLD—Valley Broadcasting Co., West Point, Ga. (L. J. Duncan, Leila A. Duncan and Josephine Rawls)—Construction permit to make changes in transmitting equipment, install new vertical antenna and mount FM antenna on top of AM tower and change studio location from 3rd Avenue and 6th Street, West Point, Ga., to 58 Cherry Street, Lanett, Ala. Amended to specify studio location as 58 Cherry Street, Lanett, Ala., withdraw request to move transmitter and make changes in transmitting equipment.

NEW—The Tower Realty Co., Cumberland, Md. (P. O. 222 East Baltimore Street, Baltimore 2, Md.)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change power from 250 watts to 100 watts.

NEW—Shreveport Broadcasters, Shreveport, La. (James G. Ulmer and James G. Ulmer, Jr., a partnership)—Construction permit for a new standard broadcast station to be operated on 1490 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1490 to 1340 kc. (Contingent on KRMD to change frequency from 1340 to 1480 kc.)

KOCO—B. Loring Schmidt, Salem, Ore.—License to cover construction permit (B5-P-4794, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

KWIK—Burbank Broadcasters, Inc., Burbank, Calif.—Modification of construction permit (B5-P-5251, which authorized a new standard broadcast station) for approval of antenna and transmitter location and to mount FM antenna on AM tower.

1510 KC.

KUSN—San Diego Broadcasting Co., San Diego, Calif.—Voluntary relinquishment of control of permittee corporation from C. Arnholt, J. Frank Burke and John A. Smith to C. Arnholt, J. Frank Burke, John A. Smith and Paul L. Jones.

1520 KC.

NEW—Floral City Broadcasting Co., Monroe, Mich. (Edward T. Dillon and Matthew A. Vance, a partnership) (P. O. % Edward T. Dillon, 2125 Monroe Street, Toledo, Ohio)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts and daytime hours of operation.

NEW—Monroe Publishing Co., Monroe, Mich. (P. O. 22 West First Street)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts and daytime hours of operation.

1540 KC.

WKMH—Suburban Broadcasters, Dearborn, Mich. (Frederick A. Knorr, Harvey R. Hansen and William H. McCoy)—Construction permit to make changes in vertical antenna and mount FM antenna on AM tower.

NEW—Patroon Broadcasting Co., Inc., Albany, N. Y.—Modification of construction permit (B1-P-4611, which authorized a new standard broadcast station) for extension of commencement date.

1570 KC.

NEW—Charles M. Meredith, Silverdale, Pa.—Construction permit for a new standard broadcast station to be operated on 1370 kc., power of 1 KW and daytime hours of

(Continued on next page)

operation. Amended to change frequency from 1370 to 1570 kc.; power from 1 KW daytime to 250 watts daytime; change type of transmitter and change transmitter and studio locations from: to be determined, Silverdale, Pa., to: to be determined, Doylestown, Pa.

WFUR—Furniture City Broadcasting Corp., Grand Rapids, Mich.—License to cover construction permit (B2-P-5391) which authorized a new standard broadcast station and specify studio location and authority to determine operating power by direct measurement of antenna power.

1580 KC.

NEW—Southland Broadcasting Corp., North Miami Beach, Fla.—Construction permit for a new standard broadcast station to be operated on 1000 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 1000 kc. to 1580 kc.; and change transmitter location from: to be determined, in or near North Miami Beach, Fla., to: in or near Fort Lauderdale, Fla.; and change studio location from: to be determined North Miami Beach, Fla., to: Fort Lauderdale, Fla.

1590 KC.

WALB—Herald Publishing Co., Albany, Ga.—Voluntary transfer of control of licensee corporation from Henry T. McIntosh to James H. Gray.

WBRY—American Republican, Inc., Waterbury, Conn.—Construction permit to make changes in directional antenna and install FM antenna.

AM—Application Returned

KKIN—D. O. Innie, Visalia, Calif.—Voluntary assignment of license to KKIN, Inc. Returned July 10, 1947. Incomplete.

AM—Applications Tendered for Filing

940 KC.

KTKC—Turlare-Kings Counties Radio Associates, Visalia, Calif. (J. E. Richmond, Percy M. Whiteside, Homer W. Wood, Charles A. Whitmore and Morley M. Maddox)—Consent to assignment of license to California Inland Broadcasting Co.

960 KC.

NEW—Radio Athens, Inc., Athens, Ga.—Construction permit for a new standard broadcast station to be operated on 960 kc., power of 1 KW and daytime hours of operation.

1010 KC.

KWBU—Century Broadcasting Co., Corpus Christi, Texas—Consent to assignment of outstanding construction permit and SSA of Station KWBU to Baylor University.

1090 KC.

KING—King Broadcasting Co., Seattle, Wash.—Construction permit to increase power from 10 to 50 KW, install new transmitter and make changes in directional antenna patterns for day and night use and approval of the transmitter location and antenna system.

1150 KC.

WJRD—James R. Doss, Jr., Tuscaloosa, Ala.—Modification of construction permit to change proposed transmitter location, using power of 1 KW night, 5 KW day, unlimited hours and directional antenna for night use on 1150 kc.

KWDM—Des Moines Broadcasting Corp., Des Moines, Iowa—Modification of construction permit to change proposed transmitter location and make changes in directional antenna system, operating on 1150 kc., power of 1 KW, unlimited hours and directional antenna for day and night use.

1230 KC.

KOSA—Southwestern Broadcasting Corp., Odessa, Tex.—Construction permit to change frequency from 1450 to 1230 kc. (contingent on KCRS vacating 1230 kc.).

NEW—Erie Broadcasting Corp., Buffalo, N. Y.—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts and unlimited hours of operation.

1360 KC.

NEW—Robert P. LaFollette, Dunkirk, N. Y.—Construction permit for a new standard broadcast station to be operated on 1360 kc., power of 500 watts and daytime hours of operation.

1370 KC.

NEW—Dr. Azra C. Baker, Seymour, Ind.—Construction permit for a new standard broadcast station to be operated on 1370 kc., power of 250 watts, and daytime hours of operation.

1400 KC.

NEW—Springville Radio Co., Springville, Utah (W. W. Clyde and C. G. Salisbury)—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. (Contingent on KNAK changing to 1280 kc.)

1410 KC.

NEW—The Henderson County Broadcasting Co., Athens, Tex. (a partnership composed of J. B. McNutt, Jr., and Merl Saxon)—Construction permit for a new standard broadcast station to be operated on 1410 kc., power of 250 watts and daytime hours of operation.

1450 KC.

NEW—Bessemer Broadcasting Co., Bessemer, Ala. (a partnership composed of Jesse E. Lanier, S/Sgt. Jack Warden, Crawford J. Bass and Walter G. Petty, Jr.)—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts and unlimited hours of operation. (Contingent on WTBC moving to another frequency.)

FREQUENCY MODULATION

FM—Docket Cases

The Commission announces its **Order** (B-373), severing from the hearing docket and granting the following applications for Class B FM stations in Philadelphia, Pa., subject to CAA approval of transmitter site and antenna structure (power is effective radiated power, and antenna height is height above average terrain):

Unity Broadcasting Corp. of Pennsylvania, 103.7 mc. (channel No. 279); 20 KW; antenna 500 feet. (BPH-731; Docket 7643).

Independence Broadcasting Co., 105.3 mc. (channel No. 287); 20 KW; antenna 500 ft. (BPH-806; Docket 7645).

Franklin Broadcasting Corp., 106.1 mc. (channel 291); 20 KW; 500 ft. (BPH-1056; Docket 7818).

In the same order the Commission granted petition of **WDAS Broadcasting Station, Inc.** for leave to amend its application for FM station so as to show a transfer of ownership of applicant corporation to the William Goldman Theatres, Inc., and make other changes; accepted said amendment; and removed application from hearing docket (BPH-128; Docket 7640).

Further ordered that the request of **Patrick Joseph Stanton** for reconsideration and grant forthwith of his application (BPH-967; Docket 7646) be denied, and that said application be continued in hearing status, with oral argument to be held on his exceptions at a date later to be designated.

(Continued on next page)

FM—Allocation Plan Changes

	Deleted	Added
	Channels	
Bristol	223	287
Wabash, Inc.		248
Raleigh, N. C.	273	
Durham, N. C.		273
New London, Conn.	266	

FM—Frequency Assignments

(In lieu of previous assignments)

KGO-FM—American Broadcasting Co., San Francisco, Calif.—106.1 mc. (Channel 291).

WHDH-FM—Matheson Radio Co., Inc., Boston, Mass.—94.5 mc. (Channel 233); **Brownsville Herald Publishing Co.,** Brownsville, Tex. Proposed assignment: 107.1 mc. (Channel 296)

FM—Conditional Grants

The following were authorized conditional grants for the type of station indicated, subject to further review, and approval of engineering details:

Columbia Broadcasting System, Inc., Washington, D. C.—Class B. (BPH-997)

Montgomery FM Broadcasting Corp., Silver Spring, Md.—Class A; Proposed assignment: 103.9 mc. (Channel 280). (BPH-1271)

Appalachian Broadcasting Corp., Bristol, Va.—Class B. (BPH-1272)

Northeast Georgia Broadcasting Co., Gainesville, Ga.—Class A; Proposed assignment: 101.7 mc. (Channel 269). (BPH-1276)

Springtime City Broadcasting Co., Clearwater, Fla.—Class A; Proposed assignment: 100.1 mc. (Channel 261). (BPH-1270)

Syndicate Theatres, Inc., Wabash, Ind.—Class B. (BPH-1275)

Pacific Broadcasting Co., Fresno, Calif.—Class B. (BPH-1220)

Ruth W. Finley, Santa Rosa, Calif.—Class B. (BHP-1279)

WDUK, Inc., Durham, N. C.—Class B. (BPH-1266)

FM—Construction Permits

The following stations were authorized construction permits; conditions. (Note: power given is effective radiated power; antenna height is height above average terrain.)

Associated Broadcasters, Inc., Bethlehem, Pa.—Class B; 107.9 mc. (Channel 300); 16 KW; 545 ft. (BPH-178)

New Rochelle Broadcasting Service, Inc., New Rochelle, N. Y.—Class A; 94.3 mc. (Channel 232); 1 KW; 180 ft. (BPH-1006; BMPH-263)

WGAL, Inc., Lancaster, Pa.—Class B; 101.3 mc. (Channel 267); 16 KW; 545 ft. (BPH-179)

UAW-CIO Broadcasting Corp. of Detroit, Mich.—Class B; 101.9 mc. (Channel 270); 52 KW; 340 ft. (BPH-446)

Dairyland's Broadcasting Service, Inc., Marshfield, Wisc.—Class A; 103.9 mc. (Channel 280); 1 KW; 250 ft. (BPH-826)

The following were authorized construction permits in lieu of previous conditions:

Hudson Valley Broadcasting Co., Inc., Albany, N. Y.—Class B; 93.9 mc. (Channel 230); 2.1 KW; 1130 ft. (BMPH-387)

Laurence W. Harry, Fostoria, Ohio—Class A; 100.9 mc. (Channel 265); 450 watts; 130 ft. (BMPH-400)

Copper City Broadcasting Corp., Rome, N. Y.—Class B; 99.3 mc. (Channel 257); 32 KW; 450 ft. (BMPH-217; BPH-928)

FM—License Renewal

WNYC-FM—City of New York, Municipal Broadcasting System, New York, N. Y.—Granted renewal of license for period ending July 1, 1948.

FM—Designated for Hearing

McClatchy Broadcasting Co., Stockton, Calif.—Designated for hearing application for Class B station, upon the issue: To determine what overlap of service areas, if any, exists between the proposed station and any other existing or proposed stations owned, operated or controlled by the same interests as the proposed station, and whether such overlap, if any, is in contravention of Section 3.240 of the Commission's Rules. (BPH-565)

FM—Licenses for New Stations Granted

Channel #223

WINC-FM—Richard Field Lewis, Jr., Winchester, Va.—Granted license for new FM station; 92.5 mc., Channel 223; 13.4 KW; 1390 ft. (height above average terrain). (BLH-59)

Channel #226

WFBL-FM—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted license for new FM station; 93.1 mc., Channel 226; effective radiated power, 8.5 KW; antenna 690 ft. (height above average terrain). (BLH-65)

Channel #245

WOPI-FM—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Granted license for new FM station; 96.9 mc., Channel 245; 10.4 KW; 2210 ft. (height above average terrain). (BLH-72)

Channel #273

WIBW-FM—Topeka Broadcasting Association, Inc., Topeka, Kans.—Granted license for new FM station; 102.5 mc., Channel 273; 2.9 KW; 336 ft. (height above average terrain). (BLH-61)

FM—Modifications of CP's Granted

KGNC-FM—Plains Radio Broadcasting Co., Amarillo, Texas—Granted modification of CP for extension of completion date to 1-1-48. (BMPH-467)

WFBG-FM—The Gable Broadcasting Co., Altoona, Pa.—Granted modification of CP for extension of completion date to 10-1-47. (BMPH-505)

WNIQ—Uniontown Newspapers, Inc., Uniontown, Pa.—Granted modification of CP for extension of completion date to 12-31-47. (BMPH-508)

WINX-FM—WINX Broadcasting Co., Washington, D. C.—Granted modification of CP for extension of completion date to 11-29-47. (BMPH-503)

KTFI-FM—Radio Broadcasting Corp., Twin Falls, Idaho—Granted modification of CP for extension of completion date to 8-31-47. (BMPH-509)

WAFM—Voice of Alabama, Inc., Birmingham, Ala.—Granted modification of CP for extension of completion date to 2-3-48. (BMPH-482)

WGYN—WGYN, Inc., New York, N. Y.—Granted modification of CP for extension of completion date of FM station to 9-30-47.

FM—Applications Accepted for Filing

KPRC-FM—The Houston Post Co., Houston, Texas—Modification of construction permit (B3-PH-126, as modified) which authorized a new FM broadcast station, for extension of completion date.

WFOB—Laurence W. Harry, Fostoria, Ohio—Modification of construction permit (B2-PH-493, which authorized a new FM broadcast station) for extension of completion date.

TV—License Renewal

W2XMT—Metropolitan Broadcasting and Television, Inc., New York, N. Y.—Granted renewal of license for period ending February 1, 1948.

TV—Application Accepted for Filing

WPEN-TV—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Voluntary assignment of permittee to Philadelphia Record Company.

MISCELLANEOUS BROADCAST

Actions

Remote Pickup

WRLJ—The Western Connecticut Broadcasting Co., area of Stamford, Conn.—Granted license for new remote pickup broadcast station to be used with WSTC. (BLRY-335)

WILN—American Colonial Broadcasting Corp., area of Island of Puerto Rico—Granted modification for extension of commencement and completion dates to 7/1/47 and 12/31/47 respectively. (BMPRY-35)

Granite District Radio Broadcasting Co., area of Salt Lake City, Utah—Granted CP for new remote pickup broadcast station to be used with KNAK. (BPRY-347)

Noncommercial Educational

WNYE—Board of Education, City of New York, N. Y.—Granted modification of CP to make changes in antenna system. (BMPED-69)

Applications

Noncommercial Educational

NEW—Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa—Construction permit for a new noncommercial educational broadcast station to be operated on channel 218, 91.5 mc., power of 1 KW, emission A3 and unlimited hours of operation. Amended to change power from 1 to 3 KW; change type of transmitter and make minor changes in geographic coordinates and antenna system.

WPTL—Providence Bible Institute, Providence, R. I.—Modification of construction permit (B1-PED-55 as modified) which authorized a new noncommercial educational broadcast station for extension of completion.

KOKH—The Board of Education of The City of Oklahoma City, State of Oklahoma, Oklahoma City, Okla.—Modification of construction permit (B3-PED-76 which authorized a new noncommercial educational broadcast station) for extension of commencement and completion dates.

Federal Trade Commission Actions

STIPULATIONS

Arko Herbs, Inc.—Arko Herbs, Inc., 1183 Broadway, Buffalo, N. Y., entered into a stipulation with the Commission to cease and desist from numerous representations as to the therapeutic properties and effectiveness of nearly 200 medicinal preparations and crude herbs. (7624)

A. J. Child & Sons Mercantile Co.—The Commission accepted from A. J. Child & Sons Mercantile Co., 8th St. and Chouteau Ave., St. Louis, a stipulation to cease and desist from certain representations concerning the therapeutic and nutritional properties of a livestock feed supplement designated Child's Matchless Mineral Feed with Yeast, also known as Child's Matchless Mineral-Yeast Supplement. (7621)

Danax Corp.—An agreement to disclose the rayon content of slips and other lingerie has been executed by Danax Corp., 1328 Broadway, New York, and approved by the Commission. (7622)

(Continued on next page)

Heinz Drug, etc.—J. B. Heinz, trading as Heinz Drug and Heinz Pharmacy, 222 East South Temple St., Salt Lake City, Utah, entered into a stipulation with the Commission to stop representing that use of a medicinal preparation designated Heinz Tablets will have any beneficial influence upon rheumatic or muscular aches or pains or eliminate the cause of those conditions. (7623)

CEASE AND DESIST ORDERS

The Bolta Co., etc.—Lawrence, Mass., and New York Merchandise Co., Inc., 32 West 23rd St., New York, have been ordered by the Commission to stop representing that sunglass lenses of foreign manufacture are of domestic manufacture. (4754)

Eastman Kodak Co., Rochester, N. Y., may use a resale-price-maintenance policy in connection with the interstate sale and distribution of Kodachrome film because the product is now "sold in free and open competition" with Ansco color film manufactured by General Aniline & Film Corp., Binghamton, N. Y., the Commission ruled as it suspended in part the operation of a cease and desist order issued in September 1944. (4322)

Kiddieland Studios, etc.—An order prohibiting misrepresentation of the price, terms of sale, and quality of plain or colored photographs or photographic enlargements was issued by the Commission against George D. Newman, trading as Kiddieland Studios and Beacon Studios, 30 Huntington Ave., Boston. (5425)

National Silver Co.—The Commission has modified a 1923 cease and desist order to permit qualified use by National Silver Co., New York, of the word "Sheffield" to describe silverplated ware made elsewhere than Sheffield, England. (1068)

Miss L. B. Rennewanz, etc., 6808 Oswego Place, Seattle, Wash., and J. O. Kinnaman, Ocean View Hotel, Long Beach, Calif., have been ordered by the Commission to cease and desist from misrepresentation in the sale of home study courses and purported academic degrees. (5150)

COMPLAINT DISMISSED

Standard Brands, Inc.—The Commission dismissed without prejudice its amended and supplemental complaint charging Standard Brands, Inc., 595 Madison Ave., New York, with misrepresentation in the sale of a product variously known as Fleischmann's Yeast, Fleischmann's High-Vitamin Yeast and Fleischmann's Compressed Yeast. The order of dismissal states that the challenged advertising appears to have been permanently discontinued. (5107)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 30, July 28, 1947

Latest "Radio for Retailers" Material Shows Large Increase In Sales Volume

The fact that "radio contributed directly to an average increase in sales of 61.96%" in three test departments is revealed in the latest chapters of "Radio for Retailers," the book based on the year-long study of radio advertising conducted at Joske's of Texas.

Latest findings of the study, conducted through the cooperation of the department store and the NAB, are now being distributed by the association and the National Retail Dry Goods Association.

The new material, along with previously published details, while based on the operation and experiences of Joske's radio advertising, can be adapted to guide retailers of all types and sizes in the application of broadcast advertising to their own retail problems. "Radio for Retailers," published in loose-leaf form, includes chapters on "Planning" and "Results," released in October, 1946; and chapters on "Copy" and "Programs," released in February, 1947. The February release also included three appendices—a radio bibliography, examples of radio commercials, and descriptions of retailers' programs.

Special Study: The special study in which "test" and "control" departments were set up was conducted during the six-month period, June–December, 1946, at Joske's.

By setting up the "test" departments *which received radio advertising*, and comparing their sales with those of "control" departments which received normal advertising in other media *but no radio*, the following conclusions were reached:

1. Radio contributed directly to an average increase in sales of 61.96% in the three test departments.

2. Indicating its cumulative effect, radio contributed directly to an average increase of 46.89% during the first six weeks

On the Inside

Membership attention is called to an error in the By-Laws referendum now being conducted, which might cause a member to vote opposite to his desire. (p. 602)

The Inter-American Copyright Convention, recently sent by President Truman to the Senate for ratification, will be opposed by NAB when hearings are held. (p. 602)

Leading technical experts will present papers on engineering progress and operation at the NAB Convention during the engineering conference on September 15. (p. 603)

A new order blank, revised to July 15, listing station aids available through NAB headquarters, is now ready for distribution. (p. 602)

The International engineering conference, in session at Atlantic City, shifted into high gear last week in discussions on admittance of several countries and in answering the United Kingdom's proposal for regulation of broadcasting. (p. 604)

Networks Will Seek to Arrange Duplication of AM Music Programs on FM Stations

The four networks will seek to arrange duplication of network AM musical programs on FM radio stations, network representatives reported to the Employee-Employer Relations Committee Monday (21).

The latter Committee, holding sessions at NAB headquarters on labor legislation, endorsed the report

(Continued on page 600)

Special Standards Committee Concludes Work on Draft of New Industry Code

In a two-day meeting Tuesday and Wednesday (22-23), the NAB Special Standards of Practice Committee completed its work on the drafting of a new Code for the broadcasting industry.

The Standards group, a subcommittee of the NAB's Program Executive Committee, will now submit its Code recommendations for the latter's consideration. Pursuant to consideration by the program committee, the proposed Code will be presented to the Board.

Harold Fair, NAB program department director, stated at the meeting's conclusion: "We are hopeful of having a Code ready by the time of the NAB Convention in September."

Members of the Committee who attended the meeting at NAB headquarters include: Robert Swezey, MBS, chairman; George Biggar, WIBC; Eugene Carr, WPAY; Roger W. Clipp, WFIL; Walter J. Damm, WTMJ; Ken R. Dyke, NBC; Harold Fellows, WEEI; Gilson Gray, CBS; C. T. Lucy, WRVA; and John M. Outler, WSB.

Unable to attend were: Edgar Bill, WMBD, and Gayle W. Grubb, KGO.

NAB was represented by: President Justin Miller, A. D. Willard, Jr., C. E. Arney, Jr., Ben Miller and Mr. Fair.

of the networks by resolution and urged them to proceed with the plan "as quickly as possible."

Following is the text of a resolution adopted by the EER Committee:

"*Be it Resolved*, that the EERC of the NAB endorses the proposal of the networks to confer with the proper officials of the AFM to the end that there be the earliest possible resumption of duplication of AM network musical programs over FM facilities."

Richard P. Doherty, director of NAB's employee-employer relations department, reported to the committee on the current status of labor relations in the broadcasting industry.

NAB will mail the analysis of labor legislation recently announced, to the membership this week.

At the conclusion of the meeting, John Elmer, WCBM, chairman of the Committee, issued the following statement summarizing the day's discussions:

"The full impact of the Taft-Hartley and Lea Acts upon employee-employer relations in the radio industry will be more clearly discerned as existing contracts are renewed and new contracts are written. Except in a few areas, union-management relations throughout the radio industry have been far more harmonious than in most industries. There is nothing in the Taft-Hartley Act which should change this situation. It is expected that broadcasters and radio-union officials will respect their mutual rights and responsibilities and live within the stipulations of the law.

Employer's Responsibilities: "While the new law grants to management new rights and establishes a more equitable balance to the collective bargaining process, it also places added responsibilities upon employers. These are both legal responsibilities under the Act and the moral responsibility to direct and conduct labor relations with fairness and due regard for sound employee-employer relations.

"1. Virtually all radio contracts contain either the closed-shop or union-shop provision and are, therefore, directly affected. The closed shop, with hiring through the union, and the frequent practice of granting 'temporary working cards' in lieu of union membership to persons not furnished by the union—conditions characteristic of many technician contracts—are prohibited.

"2. The 'Guild' shop of one radio union conforms to the spirit, but not the letter, of the Taft-Hartley union-shop provision. Although typical contracts permit management to hire anyone it chooses, new employees are nonetheless required to take out membership immediately. In the future such contracts must provide for a minimum of 30 days' employment prior to compulsory union membership. However, there is nothing which prevents a new employee from joining the union at an earlier date if he so wishes.

"3. Practically all union-security provisions in radio contracts are accompanied by 'good-standing' clauses. Many of these clauses stipulate rather broad, discretionary powers on the part of unions in determining eligibility for membership. These good-standing specifications will now have much less effect upon the employers' obligation to discharge workers who are expelled from the union.

"Under the Taft-Hartley Act union members may still be expelled from the union according to the union's constitution and by-laws. However, the law makes it an unfair labor practice, where a union-shop condition of employment exists, for the union to cause an employer to discharge an employee for any reasons other than failure to pay dues and initiation fees.

"4. One of the most significant prohibitions in the Taft-Hartley Act, as it affects broadcasting, is that against secondary boycotts.

Secondary Boycott: "Basically, the secondary boycott has been more responsible for bad feeling between broadcasters and radio unions than any other single factor. The outlawing of this unfair instrument will not undermine union strength but it will, undoubtedly, lead to a greater spirit of mutual understanding and cooperation between broadcasters and radio unions.

"5. The Taft-Hartley Act specifically excludes 'supervisors' from union representation if management is unwilling to admit to their inclusion within the bargaining unit. So far as broadcasting is concerned, the NLRB has previously, e.g., the Great Trails Broadcasting case, established the policy of excluding from the regular bargaining units of employees all those persons who are actual supervisors, such as chief engineers and chief announcers.

"6. Featherbedding practices have been made unfair labor practices under the Taft-Hartley Act. Furthermore, coercion to force these practices is subject to criminal proceedings under the Lea Act. Thus, the arbitrary imposition of station quotas by unions is clearly outlawed. Agreements may still specify quotas, expressed either in number of persons or in dollars to be spent during the year. However, such quotas cannot be dictated by the union and must conform to what the broadcaster himself accepts as meeting his needs.

"The full impact of the Taft-Hartley and Lea Acts upon radio unions and the employment of their members will depend primarily upon the degree of cooperation extended to broadcasters by union officials. Ada-

(Continued on next page)

mant and arbitrary demands by union leaders, not based upon good programming and operations, will do irreparable harm to both unions and the radio industry. Now is the time to evolve a sound policy based upon economic factors and not coercive demands by either side."

Attending today's meeting were: John Elmer, Chairman, WCBM; Ernest de la Ossa, NBC; Howard Hausman, CBS; William S. Hedges, NBC; Les Johnson, WHBF; Henry Ladner, NBC; Howard Lane, Field Enterprises, Inc.; Harry R. Le Poidevin, WRJN; John H. MacDonald, NBC; C. L. McCarthy, KQW; Joe McDonald, ABC; Gustav B. Margraf, NBC; P. A. O'Bryan, Dow, Lohnes & Albertson; Marshall Pengra, KRNR; Robert Swezey, MBS; Frank R. Smith, WWSW; C. L. "Chet" Thomas, KXOK; Frank K. White, CBS. Those in attendance from NAB were: Judge Justin Miller, President; A. D. Willard, Jr., executive vice president; Don Petty, general counsel; Richard P. Doherty, director of EER; Iver Peterson, general counsel's office; David J. Farber, assistant to the director of EER.

Latest "Radio for Retailers" Material Shows Large Increase in Sales Volume

(Continued from page 599)

of its use, and 76.99% during the second six weeks.

3. Radio advertising has greater "carry-over" value. Although sales decreased when radio advertising was discontinued, the average decline in those departments where radio was used was not as great as in comparable departments where radio had not been used.
4. Results of this test support the results of other methods of measurement, which have indicated that radio is an effective force in the promotion of retail sales.
5. Such research over longer periods of time would provide retailers a simple means of measuring results of their own advertising.

The special study was undertaken through the cooperation of NAB and Joske's when at the end of the study year 1945 there were several fields of promising research still untouched. The 1946 study utilized the services of an outside research specialist, Vernon Fryburger, who was a member of the faculty of the School of Business Administration, Miami University. He joined the Faculty of the University of Illinois when the special study was completed.

Mechanics of Study: To obtain statistical evidence concerning the effectiveness of radio in terms of sales results, six departments with parallel sales were used in the controlled experiment.

Three departments—Infants' Wear, Inexpensive Dresses, and Inexpensive Coats—were promoted by radio and were designated "test departments." Three other departments—Better Dresses, Better Coats, and Better Suits—received no radio promotion and were designated "control departments."

The test period covered 24 weeks from June 24 to December 7, 1946, and was divided into four periods of six weeks each, covering the following stages:

Before Radio—June 24 to August 3. During this period, test departments received no radio advertising. Normal promotion was carried on for the test and control departments. Sales for this period served as a base from which to measure the effect of radio when it would later be added.

During Radio—First 6 weeks—August 5 to September 14. Test departments were promoted by radio. Control departments continued to receive normal promotion in other media. Sales during this period indicated the effect of radio when added to the test departments.

During Radio—Second 6 weeks—September 16 to October 26. Radio promotion of test departments was continued. Sales indicated the cumulative effect of radio. Normal promotion continued in the control departments.

After Radio—October 28 to December 7. Test departments received no radio advertising. Sales indicated the carry-over effect of radio. Test and control departments received normal promotion.

"When radio was added," the report states, "*all three test departments* registered *increased sales*, ranging from 15% to 206% as shown below:

Test Departments	*% Increase over Period Before Radio*
Inexpensive Dresses	15.78
Inexpensive Coats-Suits	206.76
Infants Wear	53.42

Promotion: The book's chapter on Promotion points out that "during the entire period of the radio study, Joske's used coordinated promotion of all advertising media to insure maximum results."

Some of the store's advertising in the newspapers was used to further the radio campaign. To extend and increase the appeal that radio made for specific merchandise through its "beamed program" technique, the newspaper promotion in support of radio was especially written and scheduled.

In developing the promotion campaign, consistency was the aim. The radio director furnished the promotion department with a permanent chart showing the various departments to be advertised on the air and the respective programs with which each was to be paired in visual advertising.

In addition to detailing the various approaches utilized by department stores in tieing-in with newspaper advertising, the book describes numerous techniques employed in promotion through magazines, correspondence, window displays, theatre trailers, etc.

Radio industry leaders who assisted in the preparation of the report are:

Russell A. Brown, vice president in charge of sales promotion and advertising, Allied Stores Corporation; James H. Keenan, vice president in charge of sales promotion, and James Shand, assistant to the president, Joske's of Texas; Willard H. Campbell, sales manager, Sibley, Lindsay & Curr Co.; Howard Abrahams, manager of the sales promotion division, National Retail Dry Goods Association; Walt Dennis, radio and television director, Allied Stores Corporation; James Brown, general manager, KONO; Lewis H. Avery, president of Lewis H. Avery, Inc.; Walter Johnson, assistant general manager, WTIC; Harold Fair, NAB director, program department; Frank E. Pellegrin, NAB director of broadcast advertising, Miss Lee Hart and Hugh M. P. Higgins, assistant directors.

Legal Department

Inter-American Copyright Convention Will Be Opposed by NAB

The Inter-American Copyright Convention of 1946 was sent to the Senate for ratification by President Truman on July 17, 1947.

This treaty, known officially as the Inter-American Convention on the Rights of the Author in Literary, Scientific, and Artistic Works, was signed by delegates of the United States and all of the Latin American countries in Washington in June, 1946. The President sent to the Senate with the treaty, the report of the American delegate, Luther H. Evans, Librarian of Congress, which recommends ratification by the Senate.

The treaty has been referred to the Senate Foreign Relations Committee for consideration. However, present indications are that the Committee will take no action with respect to it before the next session of Congress. It is likely that full consideration will be given to it at the next session and that public hearings, which have been requested by Don Petty, NAB General Counsel, among others, will be held. At that time he will file a brief and appear in opposition.

The treaty, which would become effective in the United States upon approval by a two-thirds vote of the Senate, makes several drastic revisions of the American copyright law which are of serious concern to the radio industry, one of the largest users of copyrighted material in this country. See NAB Reports, Information Bulletin—Legal, Vol. 14, No. 6, July 1, 1946.

One objection in particular is that the treaty is a step toward adherence to the Berne and Rome Conventions and admission to the International Copyright Union, which govern the copyright relations of most of the countries outside of the Americas. The principles of copyright established by the Berne Convention are, in many respects, opposed to those of the American copyright law and, for that reason, the United States has refused to adhere to it despite numerous efforts made toward that end since its inception in 1886.

That one of the purposes of the Inter-American treaty is to pave the way for the adherence of the American states to the Berne Convention is made clear by the action of the delegates to the Conference who unanimously recommended as follows:

> "The Inter-American Conference of Experts on Copyright recommends to the Governing Board of the Pan American Union that it consider the desirability of appointing a temporary commission from among its members for the purpose of studying the means of promoting similarity of laws respecting copyright throughout the Continent and of harmonizing the inter-American and the Berne Union copyright systems."

Further, Mr. Evans in his letter of transmittal to the Secretary of State said:

> "The improvement of inter-American copyright relations among the American republics is thus a necessary first step in this specialized field toward the realization of a United Nations convention within which authors and owners of literary, scientific, and artistic works may have their rights in such works safeguarded throughout the world."

IMPORTANT CORRECTION!

An important correction in connection with the balloting on the proposed By-Laws is called to the attention of all NAB members.

Through an error the subheads of Proposals No. 1 and No. 2 to Article VI in the printed revision were transposed. Since the explanatory notes which digest the changes relate directly to these proposals by number, those members who vote on the basis of the explanatory note would be voting opposite to their desire.

In order to eliminate incorrect balloting, NAB has instructed Ernst & Ernst, Inc., New York accounting organization which is conducting the referendum, to mail to the Association's membership a supplementary ballot dealing with the election of Directors-at-Large.

Following is the statement being sent to the membership with the supplementary ballot:

"The proposed revision of the By-Laws previously sent you was in error through transposition of the bold face subheads on pages 4 and 5, i.e. 'Proposal No. 1;' 'Proposal No. 2.'

"Since the explanatory note on Page 6 relates directly to these Proposals the Supplemental Referendum Ballot enclosed herewith is intended to correct the error and will be considered the official ballot on Article VI and only those votes on that Article recorded on this Supplemental Referendum Ballot will be counted."

Small Market Stations

Harry W. Linder, KWLM, Willmar, Minn., has been appointed Small Market Stations Chairman for NAB District Eleven (Minn., Mich.,* North Dakota, South Dakota* and Wis.*). The appointment was announced by John F. Meagher, District Director.

---

* Part of these states are in District Eleven.

New Order Blanks List Material Available To NAB Members

The Small Market Stations Division will send, upon request, a new order blank (revised as of July 15, 1947) listing the many station aids available to NAB members. While the material is of special interest to small stations, it will also be helpful to large operations. Requests should be mailed to Department of Broadcast Advertising, National Association of Broadcasters, 1771 N Street, N. W., Washington 6, D. C.

Plan to Attend—Attend to Plan

Broadcast Advertising

Radio Advertising Speech to Be Published In August Issue of "Stores" Magazine

The August issue of "Stores," the monthly NRDGA publication which features constructive articles on all phases of retailing, will publish the speech made by Miss Lee Hart, NAB's assistant director of Broadcast Advertising, for the recent NRDGA Sales Manager's Clinic in Chicago.

The title of the speech is "Planned Advertising and Copy for the Ear Bring Results from Radio." NAB has had a number of requests from store advertising managers and sales promotion directors for copies of this speech, so it is suggested that stations call local NRDGA member's attention to this article.

Other key speeches about sales promotion problems given at the NRDGA Sales Manager's Clinic will also be reproduced. Station sales, copy and program people can therefore find valuable material for adaptation in selling and servicing retail accounts in this August issue of "Stores." Your local NRDGA member would probably be glad to lend you his copy of "Stores" for study by your staff.

KITS FOR STATIONS

This week two new NAB member stations, identity unknown, are without the kit of broadcast advertising literature which is sent free-of-charge to all radio stations immediately upon acceptance of their membership application.

Reason: two bundles of the literature were returned to the NAB Mail Room by the Post Office after address stickers became detached and lost. If YOUR new station has not received its Manual of Radio Advertising, series of management studies, agency and advertiser contract forms and mats, radio success stories, sample rate cards, retailing booklets, pamphlets, etc., write the Department of Broadcast Advertising for a duplicate mailing.

Louisville Station Promotes Tune-in with Push Button Tabs

A novel promotion idea which has worked effectively for Station WKYW, Louisville, Ky., and which it recommends for other stations, is a die-cut card with call letters imprinted on the separate tabs for convenient use on push button radio sets.

Station WKYW mails the card to radio service shops in its primary area. Promotional copy on the reverse side urges the change of push button tabs to the station's frequency, and the station offers a free spot announcement to radio shops which bring or mail the names of 30 customers who have had push buttons reset to WKYW.

Books for Broadcasters

News on the Air, by Paul W. White. c1947. 398 p. $3.50. Harcourt, Brace. 383 Madison Ave., New York 17.

This lively and explicit volume covers the whole field of radio journalism. A brief history of how the radio and the press got together is followed by chapters on how news gets over the air.

The scores of examples, stemming from the author's experience or borrowed or created by him, give the book humor and human interest as well as the value of being specific. The novice in the news room will probably cut short his "six month" probation period if he absorbs the advice Mr. White offers him.

Public Relations in Action, ed. by Philip Lesly. c1947. 280 p. $4.50. Ziff-Davis, 350 Fifth Ave., New York.

This is a series of case studies of successful public relations activies. Of particular interest are chapters on The Advertising Council, NAB's "Radio Week" of 1945, NBC's "America United", NORC, and such drives as the National Safety Council's "National Farm Safety Week" in which radio participated.

Railroad Reservations to NAB Convention

Referring to Convention, Bulletin No. 2, July 14, regarding the operation of through cars to Atlantic City leaving various junction points on September 11th, September 13, it now develops that some members desire to *arrive in Atlantic City on Thursday morning September 11th.*

When you send your application for railroad accommodations to Harry A. Karr, Pennsylvania Railroad, Washington, D. C., make special mention of the fact that you will leave junction points on Wednesday, September 10th arriving in Atlantic City, Thursday morning, September 11th.

Engineering Department

Interesting Sessions Promised to Engineers at Convention on September 15

A number of the nation's outstanding engineering authorities, both industry and government, will present papers on technical progress and operation during the engineering conference at the NAB Convention on September 15.

In addition to this practical discussion of engineer-

(Continued on next page)

ing matters, the country's leading broadcast equipment manufacturers are planning a vast exhibit and demonstrations of the latest television, facsimile, AM and FM broadcasting apparatus.

NAB President Justin Miller will open the Engineering Conference with an address of welcome. The agenda, prepared under the direction of Royal V. Howard, NAB director of engineering, will encompass a broad field of engineering problems and developments and will feature, at the closing session, an FCC-Industry Roundtable.

The morning session, to be presided over by Orrin W. Towner, chairman of the NAB Engineering Executive Committee, will open with a discussion on Television by O. B. Hanson, NBC vice-president and chief engineer. Mr. Hanson's talk, illustrated with motion pictures, will deal with the subject of "Recent Television Developments," with particular emphasis on photography of Kinescope images, and with a description of the Washington and New York NBC television stations.

The second paper will be given by Paul A. de Mars, FM pioneer, who will speak on "Frequency Modulation Broadcast Station Construction." This paper will deal with the technical and economic problems that are encountered in the construction of broadcast transmitter facilities. The scope of the paper takes into consideration all factors affecting transmitter facilities. The final paper of the morning session will bring to the podium John D. Colvin, audio facilities engineer, ABC, who will give an illustrated talk on "Audio Considerations for Broadcast Stations," with emphasis on improved physical and electrical operation. Mr. Colvin's paper will present practical audio facility layouts for low and medium power AM and FM stations, and additionally will feature improved methods of turntable operation and the use of a newly developed record surface noise suppressor.

Following the luncheon recess, the afternoon session, presided over by Mr. Howard, will open with a symposium on "Transmitter Maintenance for Small and Medium-Sized Stations." This will be conducted by G. Porter Houston, chief engineer, WCBM, for the Small Stations, and Alfred E. Towne, director of engineering, KSFO, for the Medium-Sized Stations. Mr. Houston will delve into the fundamentals of maintenance and Mr. Towne will discuss and illustrate the practical adaptations of maintenance procedures.

The second paper in the afternoon session will attempt to clarify one of the major problems facing engineers in modern radio allocation when Dixie B. McKey, consulting radio engineer of Washington, will present his lecture on "Directional Antennas, Their Care and Maintenance."

At 3 p.m. George P. Adair, former chief engineer of the FCC and now a radio engineering consultant in Washington, will speak on the "Technical Regulation of Radio." Mr. Adair will elaborate on technical regulations, both past and future, the responsibilities of the Commission, the broadcaster and the engineer. He will include in his paper the problem of operator licensing requirements.

The final session of the afternoon will be the FCC-Industry Engineering Roundtable. The Commission representatives, headed by Chief Engineer George E. Sterling, will be: Dr. John A. Willoughby, assistant chief engineer; James E. Barr, chief, Standard Broadcast Division; Cyril M. Braum, chief, FM Broadcast Division; and Curtis B. Plummer, chief, Television Broadcast Division. This "Information Please" panel will attempt to answer all regulatory engineering problems presented by the engineers in attendance.

International Delegates Discuss Admissions, British Proposal for Broadcasting Regulation

Shifting from the low gear of the past few weeks, the members of the International Telecommunications Union in session at Atlantic City this week slipped into high vocal gear on two important subjects. The first of these occurred at the Plenipotentiary Conference when the question of the admission of Latvia-Estonia, Lithuania, Outer Mongolia and Spain was settled by the rejection of their applications. It was not easily settled. Russia fought unsuccessfully for her group, but succeeded in keeping Spain out.

The second debate centered in the Radio Conference, as the British proposal for a carte blanche organization for the regulation of all types of broadcasting (AM-FM-TV-HF), including programs and legal, on an international basis was reopened for discussion (Current REPORTS, p. 583). Opposing the United Kingdom proposal, the U. S. Delegation immediately assumed an adamant "Monroe Doctrine" attitude, feeling that under the UK proposal the United States would become involved in regional discussions.

UK Attempts Clarification: In re-starting the previous discussion on their proposal to include standard broadcasting within the international organization the UK delegate stated, in an attempt to clarify their position: "I do not think that any country represented at this Conference will deny the very important part which broadcasting now plays in the daily lives of men and women in every individual nation, and thus it is the view of the United Kingdom that the time has arrived when the importance of broadcasting should be recognized by the setting up of an organization especially to coordinate the technical aspects of broadcasting services. The idea of a special organization for broadcasting matters only is not new. Before the War the need for international cooperation in the operation of broadcasting services was clearly apparent."

The delegate went on to explain that in Europe they have had their committees and that similar bodies have come into being in other regions of the world. "During and since the War there have been two very important differences which, in the view of the United Kingdom, make the need for full international cooperation in broadcasting matters even more imperitive. The first of these is International Broadcasting and the second is the realization by the United Nations, its sub-organizations and its specific organizations such as UNESCO, of the very important part which broadcasting has played and can play in international relations generally in education, social and cultural developments and in the cause of peace. As regards International Broadcasting, there is clear indication, for example in the proposals of the United States, of

(Continued on next page)

the need for an international organization to coordinate shortwave broadcasting services. The United Kingdom has considerable sympathy for such proposals in principal, but does not think that they go far enough, i.e., the United Kingdom does not think that any special organization for broadcasting should confine itself only to questions relating to international broadcasting on short wave lengths."

In regards to programs between countries, the British delegate stated that "broadcasting matters which will be dealt with under the aegis of the United Nations, namely investigation into such matters as freedom of information in relation to broadcasting program content, exchange of programs between countries and broadcasting in the cause of improvement in cultural and social relations, will be concerned in the main with program matters, but many of the discussions will have repercussions on what is or is not possible from technical considerations. It is, therefore, of great importance, in the opinion of the UK, that an authoritative body, under the ITU, representing all fields of broadcasting, should be available to guide and advise and maintain liaison with the United Nations on technical aspects of broadcasting. The UK, therefore, proposes that there should be an international broadcasting organization representative of the world as a whole which would deal with problems which should be considered on a world-wide basis, including, in addition to short wave, those matters of regional concern which it may be desirable to consider on a world-wide scale.

"The UK considers that in any international organization on the foregoing lines provisions should be made for participation by at least consultation between (1) Governments, since questions of frequency assignment will be considered and repercussions on other services will have to be borne in mind. (2) *Broadcasting organizations who will be the real experts in broadcasting matters but which, in many cases, are not Government representatives,* (3) Manufacturing organizations because any changes in broadcasting techniques, frequency assignments, etc., must be made in close collaboration with the manufacturers who produce the broadcast transmitting equipment and broadcasting receivers, (4) other international organizations or specialized agencies which are concerned with broadcasting."

Chairman's Comment: At the conclusion of Britain's explanatory remarks, the Chairman, Gunnar Pedersen of Denmark, in commenting on the British proposal, said: "The discussion at the 15th meeting of Subcommittee A of the Organization Committee had disclosed widely differing opinions amongst the members." The Chair then opened the meeting for comment, and Lahaye of the French delegation stated that they opposed the British proposal for a broadcasting organization for all broadcasting for the reason that the ITU must keep to the minimum its organization except those "organizations whose utility has been clearly and irrefutably proved."

In the French opinion, the Delegate from Cuba concurred, however, the Delegate from India stated ". . . that he agreed with the principle contained" in the British proposal.

Opposing the British proposal, the Delegate from Canada then said that "in the opinion of his delegation, some form of international broadcasting organization was needed to obtain maximum integration and use of international shortwave broadcasting from the technical point of view." "At present", he said, "the technical situation as regards shortwave broadcasting was very little short of chaotic. Many stations work simultaneously on the same frequencies, each causing interference with another. Worse still, some broadcasting stations were operating on frequencies proper to other services and were causing interference to those services. Canada would support the creation of an organization to handle international broadcasting on the high frequencies but, as regards the standard broadcast band (535-600 Kc), as far as the American region is concerned, this was regulated by the NARBA Agreement of Havana in 1937, as revised at Washington in 1946. This NARBA Agreement laid down elaborate and specified standards of engineering rules under which 1500 stations in this region operated. To permit this many stations to operate, specific provisions were made with regard to the use of directive antenna. This required high engineering standards. Canada, as a part to NARBA, could not agree to any plan which envisaged activities of a technical character by an international body in the field of standard band broadcasting in the North American region.

U. S. Concurs: In this view the U. S. delegation concurred with the delegate of Canada that high frequency broadcasting should be planned on a worldwide basis, but that in standard band and long wave broadcasting, this was not the case. He stated that the UK proposal envisaged, inter alia, that the proposed new organization, the CCID, should, through its regional committees, prepare provisional plans for the allocation and use of frequencies for standard and low frequency broadcasting services for consideration by regional broadcasting conferences. The U. S. delegate, Mr. Otterman, then stated that it was not clear if the preparation of the frequency allocation plans was to be on a national basis, and, if its plans were to be considered by regional conferences, it was proposed to introduce a worldwide organization which could not be familiar with all of the technical details within a given region, and that the U. S. could not agree to any intervention by a worldwide organization in the operation of NARBA Conferences, as an example, and further that, in his opinion, there was no need for a third organization to become involved in such studies.

In reply to this the delegate of the UK said that he entirely shared the views that some organization was necessary as regards high frequency international broadcasting services. He pointed out that it was not the UK proposal that the suggested Consultative Committee for Broadcasting should in any way take over the functions of international or regional radio conferences and that they would continue. He pointed out that this proposed body, the CCID, would meet as an administrative conference and would conclude agreements, just the same, in the case of Europe, it was envisaged that conventions such as those of Lucerne and Montreaux would continue on a governmental basis to conclude agreements, *including the assignment of specific frequencies to broadcasting stations.* "Simi-

(Continued on next page)

larly," the UK delegate stated he "wished to make it equally clear that the regional committees envisaged (of the CCID) would advise regional administrative broadcasting conferences within the province of each region, including frequency assignments under a regional agreement. In other words, he believed there was clearly no intention that there should be any interference by European authorities in any matters which were wholly within the province of NARBA; that their main purpose of submitting the proposal was to suggest that coordination should be established between the various regions for the purpose of interchanging information for the study of problems which were of worldwide concern.

Belgian Delegate's Stand: After this repartee the Belgian delegate then stated that the British proposal was not confined to purely technical matters, that it includes cultural (program) and legal problems; therefore, it does not properly belong in the ITU. The Belgian delegate then pointed out that, "Under the British proposal, questions pertaining to broadcasting under *all* its aspects (technical, cultural and legal) may be first studied by the owners or operators of broadcasting organizations who are competent in all their particular fields and who are intimately connected with broadcasting. These owners or operators are in constant daily contact with broadcasting problems in all their various aspects, which is not always the case with administrations." The Belgian delegation then went on to explain that under the British proposal private broadcasting operators would sit *only as advisers* to the administrations and this might not be satisfactory. The Cuban viewpoint was explained when the delegate stated "They had agreed in general with the views expressed by the delegate of France, but he had gone on to say that since the European manner of approaching the problem of frequency assignments for national broadcasting was fundamentally opposed to the manner in which the Americas approached the same problem, and specially as done by the nations parties to the NARBA, and also the difference between the two continents in the manner of rendering these services, one official operation while private operation was predominant in America, Cuba was opposed to any broadcasting organization of a world scope which in any way might touch on the standard broadcast band, until that date when the European manner of approach reached the degree of useful frequency sharing made possible by NARBA, in the North American Region." Other nations followed with their comments, and the Netherlands delegation agreed with the conclusions given by Belgium, and Denmark's representative believed that other sections of the ITU could do the technical work proposed by Britain without being involved in programming and other subjects. The delegate from the USSR stated that his Government's position was one of not favoring interference with regional plans and the British proposal of cultural and legal encompassment was not tenable.

After this exchange of remarks India modified its position to that of straddling the fence, while the Argentine supported the U. S. delegation, which was concurred in, in part, by Mexico.

In concluding the meeting the Chairman stated that after the lengthy discussion which had taken place, that in regard to medium and standard broadcasting, there appeared to be a very strong opinion against the establishment of any organization which would interfere with regional broadcasting arrangements in different parts of the world and that a working party to study the question in greater detail should be appointed. It was finally agreed that this should be done, and the delegate of India was appointed Chairman. The Committee was made up of delegates of the UK, Mexico, USSR, France, Sweden and Canada. It was also agreed that Switzerland would have the right to participate if she so desired.

Public Interest Programming

Fire Prevention Week, October 5-11; Broadcasters' Cooperation Requested

1,700,000 needless fires attack the U. S. economy each and every year. This is a preventable fire about every 20 seconds—right around the clock—resulting in the annual death of about 11,000 Americans and a property loss which will this year approximate $700,000,000.

Fire is *not* a necessary evil. It has been statistically proven that 90 per cent of *all* fires are preventable. The methods of fire prevention are not complicated. Neither are they expensive. They are simple time-proven tenets tested in the crucible of daily application. The problem of fire control is, however, determining ways and means of establishing common denominators for public education—methods of educating the general public "painlessly" about the simplicity of fire prevention and its accruing dividends.

Radio has an important stake in this campaign in the public interest. It can "sandwich in" the fire control message in programs while the public is in a receptive mood. The week of October 5 to 11 will be designated by President Truman, the governors of the several states and the Governor-General of Canada as Fire Prevention Week. The National Fire Protection Association as sponsors of Fire Prevention Week, asks the support of the National Association of Broadcasters to spotlight the importance of fire control.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocations Plans during the week of August 4-10, 1947 by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

(Continued on next page)

CARE

THE ADVERTISING COUNCIL ASKS YOUR HELP WITH THIS CAMPAIGN, APPROVED BY THE ADVISORY COMMITTEE ON VOLUNTARY FOREIGN AID OF THE U. S. DEPARTMENT OF STATE AND THE DEPARTMENT OF AGRICULTURE. *BECAUSE* . . . the 27 top welfare agencies in the country concerned with foreign aid, which compose CARE (Cooperative for American Remittances to Europe, Inc.) have asked The Advertising Council to call to the attention of the American people that the widespread spring and winter crop devastation in Europe has created a critical food situation there. *BECAUSE* . . . by sending more CARE food packages to Europe now, and during the coming months, individual Americans can help alleviate hunger overseas. CARE now handles orders for 10,000 packages a day—it can handle 50,000 a day. The goal of this campaign is to present the need to the American people so that, by using CARE's facilities to the maximum, they may bring this additional help as quickly as possible to those in need during the present emergency. *BECAUSE* . . . President Truman has endorsed this campaign and "commends CARE to the American People" as the non-profit organization through which individual Americans and American groups can get food and clothing textile packages to Europe *now*. Herbert Hoover also endorses CARE, and General Eisenhower has called CARE "a person-to-person expression of international goodwill," since each CARE package is delivered in the name of an individual American to a specific individual in Europe. 1. Stress the urgent need for food in Europe now and during coming months. Government reports indicate food conditions in many European countries are more desperate than a year ago. Winter kill and spring floods have destroyed food grains in country after country. Reserves are exhausted. Rations are being lowered at a time when malnutrition and disease are taking an increased toll among the children, men and women of Europe. With UNRRA having terminated its food program, the people of Europe are faced with a critical food situation now. 2. Point out that Americans can help by sending CARE food packages—endorsed by President Truman and Herbert Hoover. 3. Describe CARE packages. Indicate that in no other way can one send so much for so little. Because it is non-profit and because of its volume, CARE provides more food, and of higher calorie content, than the individual can purchase any other way. (a) *For $10 CARE guarantees delivery of its 21½ pound, 41,000-calorie food package to any individual or group in 15 countries in Europe.* Each food package is designed to supplement rations of a family of four for a month. Contents are chosen by top nutritionists to meet most basic shortages; combine with available foods to make nationally preferred dishes; to provide the highest possible calorie content. (b) *For $4 CARE delivers (1) a package containing 25 pounds of flour or (2) a package containing 10 pounds of lard.* These meet two of the most acute food shortages in Europe today. 4. Point out how simple it is to order a CARE food package: (a) *Just send $10 to "CARE"—New York*, for a package containing 21½ pounds of food, or $4 for either 10 pounds of lard or 25 pounds of flour. (b) Give your name and address and name and address of recipient. If you do not have the name of an individual or group you may designate a classification of individual you would like to help—such as "a French orphan," or "a Polish widow and family," or "a needy Austrian postman." *You will receive a signed receipt upon delivery.* (Fact Sheet No. 39.)

Nursing Is a Growing Profession

There is a definite and alarming shortage of nurses in the majority of the nation's hospitals. In some instances, whole floors and wings of hospitals have had to close. Literally, thousands of patients are going without adequate nursing care. *In the belief that the demand for nurses can best be met* by pointing out the many opportunities open to those who join the nursing profession, both hospital and nursing groups have recommended that these opportunities be stressed in all student-nurse recruitment copy. There are many reasons why the demands for nurses far exceeds the supply. Among these reasons are: (1) Long-range health plans are vast in scope, calling for the expansion of hospitals, public health programs and industrial clinics. (2) Hospitalization Plans have made it possible for more people to have necessary hospital care. (3) Health education and preventive programs teach people to make greater use of medical resources. Modern medicine is advancing rapidly and demands the best in Nursing care to keep pace with its discoveries. Young women who become nurses enter a profession which offers extraordinary opportunities in many different fields: (1) In the years to come, there will be an even greater demand for graduate nurses as a result of the expansion of hospital facilities, public health centers and industrial clinics. (2) Starting with general staff duty, nurses can advance to head nurse, supervisor, Director of Nurses or Hospital Administrators. They can specialize in surgical, psychiatric, industrial and child health, and other fields. Nurses may prepare for executive positions or for teaching in a School of Nursing. They may choose an interesting career in government: in the U. S. Public Health Service, Children's Bureau, Veterans' Administration or in the Indian Service. The Army and Navy offer nurses interesting work, excellent salaries and opportunities for travel. (3) Nursing is an ideal preparation for marriage, family life, parenthood, and leadership in community life. Young women who are high school graduates or college students in good standing are eligible to apply for admission to Schools of Nursing. Applicants should be under 35 and in good health. Interested young women should check with their local hospital for information on how to apply for entrance to a School of Nursing. WACS, WAVES, MARINES and SPARS who qualify as student nurses may find that the entire cost of their nursing education will be covered by their allowance for tuition and books under the G. I. Bill of Rights. (Fact Sheet No. 9-G.)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., unless otherwise indicated, during the week beginning Monday, July 28. They are subject to change.

Monday, July 28

Further Hearing

(9:30 A. M.)

NEW—Wired Music, Inc., Rockford, Ill.—C. P. **1400 kc.**, 250 watts, unlimited.

Respondent: WRJN—Racine Broadcasting Corp., Racine, Wisc.

Further Hearing

(10:00 A. M.)

NEW—Van Curler Broadcasting Corp., Albany, N. Y.—C. P. **1460 kc.**, 5 KW, unlimited, DA-night.

NEW—The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—C. P. **1460 kc.**, 5 KW, unlimited, DA-N&D.

NEW—Governor Dongan Broadcasting Corp., Albany, N. Y.—C. P. **1460 kc.**, 5 KW, unlimited, DA-N&D.

(Continued on next page)

NEW—The Joseph Henry Broadcasting Co., Inc., Albany, N. Y.—C. P. **1460 kc.**, 500 watts night, 1 KW LS, unlimited. For license to operate on the present facilities of WOKO.

Tuesday, July 29

Further Hearing

(10:00 A. M.)

NEW—The Patriot Co., Harrisburg, Pa.—C. P. **580 kc.**, 5 KW, unlimited, DA-night.

WHP—WHP, Inc., Harrisburg, Pa.—C. P. **580 kc.**, 5 KW, unlimited, DA-night.

WARM—Union Broadcasting Co. (WARM), Scranton, Pa.—C. P. **590 kc.**, 1 KW, unlimited, DA-night and day.

WBAX—John H. Stenger, Jr. (WBAX), Wilkes-Barre, Pa.—C. P. **590 kc.**, 1 KW, unlimited, DA-night and day.

Intervenors: Columbia Broadcasting System, Inc.
WTAG—WTAG, Inc.,
Worcester, Mass.
WIAC—Radio Station WIAC, Inc.,
San Juan, P. R.

Further Hearing

(10:00 A. M.)

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—C. P. to increase power, etc. **1190 kc.**, 50 KW, unlimited, DA-night.

WLIB—WLIB, Inc., Brooklyn, N. Y.—C. P. to increase power, etc. **1190 kc.**, DA, 5 KW night, 10 KW day, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—New CP Granted

1360 KC.

The Sandhill Community Broadcasters, Inc., Southern Pines, N. C.—Granted CP for a new station to operate on 1360 kc., 1 KW, daytime only; engineering conditions. (BP-5583)

AM—Designated for Hearing

730 KC.

Kentucky Mountain Holiness Assn., Lawson, Ky.; Wyoming Broadcasting Co., Pineville, W. Va.—Designated for consolidated hearing the application of Kentucky Mountain Holiness Assn. (BP-6034), with application of Wyoming Broadcasting Co. (BP-6149), both requesting new stations to operate on 730 kc., 1 KW day.

1070 KC.

Texas Gulf Coast Broadcasting Co., Corpus Christi, Texas; KBKI—Alice Broadcasting Co., Alice, Texas—Designated for consolidated hearing application of Texas Gulf Coast Broadcasting Co. for a new station to operate on 1070 kc., 10 KW, unlimited time, DA, and application of KBKI (BP-5882) to change from 1070 kc., 1 KW day only, to 1070 kc., 5 KW, unlimited, using DA at night.

1340 KC.

Bert Williamson, Martinez, Cal.—Designated for hearing application (BP-6114) for a new station to operate on 1340 kc., 250 watts, unlimited time, and made station KSRO, Santa Rosa, a party to the proceeding.

1370 KC.

Lakes Area Broadcasting Co., Pryor, Okla.—Designated for hearing application (BP-5752) for a new station to operate on 1370 kc., 250 watts, daytime only.

1480 KC.

WHOM—Atlantic Broadcasting Co., Inc., Jersey City, N. J.—Designated for hearing application for modification of license to change main studio to New York, N. Y. (BML-1256)

AM—Licenses Granted for New Stations

690 KC.

KPET—Lamesa Broadcasting Co., Lamesa, Tex.—Granted license for new station to operate on 690 kc., 250 watts, daytime, and to specify studio location. (BL-2461)

1290 KC.

WMLO—Cream City Broadcasting Co., Inc., Milwaukee, Wisc.—Granted license for new station to operate on 1290 kc., 1 KW, daytime only, and to specify studio location. (BL-2402)

1540 KC.

WJMO—W. J. Marshall, Cleveland, Ohio—Granted license for new station to operate on 1540 kc., 1 KW, daytime. (BL-2478)

1590 KC.

KCBD—Caprock Broadcasting Co., Lubbock, Texas—Granted license for new station to operate on 1590 kc., 1 KW-DA, unlimited. (BL-2449)

AM—License Renewals and Extensions

The following stations were granted renewal of licenses for the period ending August 1, 1950:

WDAX and Aux., Philadelphia; WCBM, Baltimore; WMGA, Moultrie, Ga.; WJLD, Bessemer, Ala.; WAGF, Dothan, Ala.; KSYL, Alexandria, La.; WPAY, Portsmouth, Ohio; WMIN, St. Paul, Minn.; KTUC, Tucson, Ariz.; KIUP, Durango, Colo.; KOKO, La Junta, Colo.; KTOK, Oklahoma City; KXLK, Great Falls, Mont.; WBOB, Galax, Va.; KCOY, Santa Barbara; KFRU, Columbia, Mo.; KREO, Riverside, Cal.; KWON, Bartlesville, Okla.; WATW, Ashland, Wis.; WBLK, Parkersburg, W. Va.; WBNY, Buffalo, N. Y.; WCOS, Columbia, S. C.; WDAR, Savannah, Ga.; WEOA, Indianapolis; WGRC, Louisville; WHBQ, Memphis; WJZM, Clarksville, Tenn.; WKMO, Detroit; WKPT, Kingsport, Tenn.; WKWK, Wheeling, W. Va.; WMBR, Jacksonville, Fla.; WRAK, Williamsport, Pa.; WRRN, Warren, Ohio; WSAU, Milwaukee; WTON, Staunton, Va.; WTCM, Traverse City, Mich.; KARV, Mesa, Ariz.; KODI, Cody, Wyo.; KUGN, Yuba City, Cal.; KOLN, Lincoln, Neb.; WORD, Spartanburg, S. C.

Licenses for the following stations were extended upon a temporary basis to October 1, 1947, for the reasons indicated:

KEBE—Billy Avinette Laurie, Jacksonville, Texas—Pending receipt of renewal application.

KTNM—McMa Agency, Tucumcari, N. M.—Pending receipt of renewal application.

WDEF—WDEF Broadcasting Corp., Chattanooga, Tenn.—Pending receipt of renewal application.

KVOP—W. J. Harpole, Plainview, Texas—Pending receipt of information requested by the Commission under Sec. 308(b) of the Act.

WJLB—Booth Radio Stations, Inc., Detroit, Mich.—Pending receipt of information requested by the Commission under Sec. 308(b) of the Act.

WNOC—H. Ross Perkins, Norwich, Conn.—Pending receipt of renewal application for new license. (Assignment of license granted July 3, 1947.)

(Continued on next page)

WCAW—Capital Broadcasting Corp., Charleston, W. Va.—Pending study of various departments; renewal application filed July 18.

WSGC—Elberton Broadcasting Co., Elberton, Ga.—Pending study of various departments; renewal application filed July 16.

KRKO—Everett Broadcasting Co., Inc., Everett, Wash.; KTFS—Texarkana Broadcasting System, Texarkana, Texas—Pending receipt of information requested by the Commission under Sec. 308(b) of the Act.

AM—Modifications of CP's Granted

KHBC—Hawaiian Broadcasting System, Ltd., Hilo, Hawaii—Granted modification of CP to change type of transmitter and for approval of antenna and transmitter location. (BMP-2751)

KFH—Radio Station KFH Co., Wichita, Kans.—Granted modification of CP for extension of completion date to 10-14-47. (BMP-2925)

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted modification of CP for extension of completion date to 8-15-47. (BMP-2921)

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Granted modification of CP for extension of completion date to 2-3-48. (BMP-2922)

WHUC—The Colgren Broadcasting Co., Hudson, N. Y.—Granted modification of CP to make changes in vertical antenna. (BMP-2895)

WKOP—The Binghamton Broadcasters, Binghamton, N. Y.—Granted modification of CP to change type of transmitter. (BMP-2904)

KCRS—Millard Eidson, Independent Executor of Estate of Clarence Scharbauer (deceased), Midland, Texas—Granted modification of CP to change type of transmitter. (BMP-2885)

KTIL—Tillamook Broadcasting Co., Inc., Tillamook, Ore.—Granted modification of CP to change type of transmitter and make changes in vertical antenna.

WMAZ—Southeastern Broadcasting Co., Macon, Ga.—Granted modification of CP to install new transmitter. (BMP-2907)

WGUY—Portland Broadcasting System, Inc., Bangor, Maine—Granted modification of CP to change name to Guy Gannett Broadcasting Services. (BMP-2911)

WRBL—Columbus Broadcasting Co., Columbus, Ga.—Granted modification of CP to change transmitter location. (BMP-2935)

WROL—Stuart Broadcasting Co., Knoxville, Tenn.—Granted modification of CP to make changes in directional antenna. (BMP-2813)

WCRK—Cherokee Broadcasting Corp., Morristown, Tenn.—Granted modification of CP to change type of transmitter, make changes in vertical antenna, change transmitter and studio locations, and for extension of completion date to 12-3-47. (BMP-2800)

KEEN—United Broadcasting Co., San Jose, Calif.—Granted modification of CP to change studio location. (BMP-2902)

KYAK—Yakima Broadcasting Corp., Yakima, Wash.—Granted modification of CP to change type of transmitter, for approval of antenna, transmitter and studio locations. (BMP-2849)

WFIL—Triangle Publications, Inc. (The Phila. Inquirer Div.), Philadelphia, Pa.—Granted modification of CP for extension of completion date to 11-1-47. (BMP-2872)

KSEL—Lubbock Broadcasting Co., Lubbock, Texas—Granted modification of CP to change directional antenna by reducing overall tower height. (BMP-2806)

WLOH—Mountain Broadcasting Service, Inc., Princeton, W. Va.—Granted modification of CP for change in type of transmitter, approval of antenna, transmitter and studio locations. (BMP-2877)

WVIM—Ewing Broadcasting Co., Vicksburg, Miss.—Granted modification of CP for approval of antenna and transmitter location, and specify studio location. (BMP-2740)

KGAF—Gainesville Broadcasting Co., Inc., Gainesville, Texas—Granted modification of CP for approval of antenna and transmitter location, and specify studio location as same as transmitter location. (BMP-2782)

KXXL—The Voice of Reno, Reno, Nev.—Granted modification of CP to change type of transmitter, change transmitter and studio locations, and extend completion date to 2-13-48. (BMP-2734)

WGL—Farnsworth Television & Radio Corp., Ft. Wayne, Ind.—Granted modification of CP to change type of transmitter.

WHOW—Cornbelt Broadcasting Co., Clinton, Ill.—Granted modification of CP to change type of transmitter, make changes in vertical antenna and specify studio location. (BMP-2791)

AM—Miscellaneous Actions

KVAL—Radio Station KEEW, Ltd., Brownsville, Texas—Adopted order denying petition for waiver of Section 1.363 (a) of the Rules and accept for filing its application for CP to change assignment from 1490 kc., 250 watts, to 1480 kc., 1 KW, DA.

Gulf Broadcasting Co., Inc., Mobile, Ala.—Denied petition requesting the Commission to modify its decision adopted June 28, 1947, in the matter of applications of petitioner (Docket 7313), Burton Broadcasting Co. (Docket 7314) and Mobile Broadcasting Co. (Docket 7482) so as to specify the effective date thereof August 1, 1947 in lieu of June 30, 1947. (B-339)

KBKI—Alice Broadcasting Co., Alice, Texas—Denied application (BSSA-164) for Special Service Authorization to operate KBKI unlimited time with 1 KW day, 100 watts night, and dismissed petition of KBKI to accept application for filing and grant, and petition of KNX to dismiss.

WPUV—Southwest Broadcasting Co., Pulaski, Va.—Granted consent to assignment of license of station WPUV from Howard R. Imboden tr/as Southwest Broadcasting Co., to the Southwest Broadcasting Corp., representing Imboden's 50% interest, for a consideration of $25,000. (BAL-601)

Hot Springs Broadcasting Co., Hot Springs, Ark.—Granted, in part, petition requesting the Commission to reopen the record in the proceeding upon the applications of Hot Springs Broadcasting Co., KTHS, Radio Broadcasting, Inc., and WMFJ (Dockets 7652, 7086, 7156 and 7355), for the purpose of having the record show the election of Harry G. Galloway for Leo P. McLaughlin as a director, and Carl E. Bailey as President of Hot Springs Broadcasting Co. corporation in place of Leo P. McLaughlin; ordered that the record in this proceeding be further reopened for the purpose of presenting evidence at the further hearing scheduled for July 22 as to certain changes in the officers and directors of Hot Springs Broadcasting Co.

Williamson County Broadcasting Co., Taylor, Texas—On Commission's own motion, removed from hearing docket application for new station which had been designated for consolidated hearing with Harris application, noted above. (BP-6139; Docket 8437)

Northwestern Theological Seminary & Bible Training School, Minneapolis, Minn.—Granted petition for leave to amend applications for AM and FM stations (BP-5273; BPH-970) so as to add to applications a set of by-laws of corporation recently adopted by the Board of Directors, and an amplified statement showing detailed information concerning its Board of Directors; accepted said amendments. (Dockets 7922; 7923)

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Cal.—Granted petition to amend application (BP-3909; Docket 7601) so as to show a change in location of main studio from Visalia to Fresno, and make other changes, and accepted said amendment.

(Continued on next page)

Coast Broadcasters, Inc., Tillamook, Ore.—Granted petition for leave to amend its application for new station (BP-5460; Docket 8209) so as to change location from Tillamook to Astoria, Ore., and make other changes; accepted said amendment and removed application from hearing docket.

KYUM—KUMA Broadcasting Co., Yuma, Ariz.—Granted petition for leave to amend application for CP (BP-5977; Docket 8399) so as to add to application (a) affidavit by B. R. Fulbright, secretary, concerning blanketing of signal, (b) an engineering affidavit relative to interference to existing stations, (c) affidavits from various persons regarding growth of population of Yuma, and (d) maps showing trend of population settlement of Yuma; accepted said amendment.

Southeastern Massachusetts Broadcasting Corp., New Bedford, Mass.—Granted petition for extension of time to August 18 within which to file exceptions to proposed decision in Dockets 7053, 7054 and 7312.

WKIX—Inter-City Advertising Co., Columbia, S. C.—Granted petition for leave to amend its application (BP-5023; Docket 8373) so as to specify new transmitter site, and make other changes; accepted said amendment; removed application from hearing docket.

KCOR—Raoul A. Cortez, San Antonio, Texas—Granted petition for leave to amend application (BP-5472; Docket 8357) so as to specify 1 KW night instead of 5 KW, and make other changes; accepted said amendment and removed application from hearing docket.

Tri-City Broadcasting Co., Newport, Ky.—Granted petition to accept late its reply to petition of Moraine Broadcasters, Inc., Dayton, Ohio, requesting a rehearing in consolidated proceeding upon these two applications (Dockets 7716 and 7717), and accepted reply to the request for rehearing.

Leonard B. Brown, Kerrville, Tex.—Granted petition for waiver of Sec. 1.387 and accepted late written appearance in re application BP-5767; Docket 8128.

Abilene Broadcasting Co., Abilene, Texas—Granted petition requesting continuance to August 4 in further hearing on its application (BP-4438) and Citizen's Broadcasting Co., Inc. (BP-4637), and having under consideration request by Citizen's for continuance to August 7; continued hearing to Aug. 7. (Dockets 7367; 7483)

WGAN—Portland Broadcasting System, Inc., Portland, Maine—Granted modification of license to change name of licensee to Guy Gannett Broadcasting Services. (BML-1259)

KSAL—KSAL, Inc., Salina, Kans.—Granted petition to dismiss in part its petition and supplement thereto requesting reconsideration of grants in re applications of KSAL (BP-4364), Gila Broadcasting Co., Coolidge, Ariz. (BP-4677), Mosby's, Inc., Great Falls, Mont. (BP-5481), and Des Moines Broadcasting Corp., Des Moines, Iowa (BP-4940), insofar as said petition relates to application of Mosby's, Inc.

Concordia Broadcasting Co., Concordia, Kans.—Granted petition to dismiss without prejudice its application for CP. (BP-5782; Docket 8173)

George Basil Anderson, Columbus, Nebr.—Upon Commission's own motion, removed from hearing docket application for new station (BP-5656; Docket 8172), since above-noted action on Concordia removed conflict.

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—On Commission's own motion, continued hearing on application for renewal of license to September 25, 1947. (Docket 6987)

WHSC—Hartsville Broadcasting Co., Hartsville, S. C.—Granted modification of license to change studio location. (BML-1258)

KXOA—Sacramento Broadcasters, Inc., Sacramento, Calif.—Granted license to cover CP which authorized installation of new transmitter. (BL-2497)

1130 KC.

Bartell Broadcasting Co., Madison, Wisc.—Granted petition for leave to amend application (BP-5508; Docket 8271) so as to specify 1130 kc., 250 watts, daytime, instead of 1010 kc., 1 KW, daytime, and make other changes; accepted said amendment, and removed application from hearing docket.

1370 KC.

Thomas G. Harris, et al, Austin, Texas—Granted petition for leave to amend its application for new station (BP-4355; Docket 7373) so as to specify 1370 kc., 1 KW, day only, instead of 1260 kc., 1 KW, day only; accepted amendment and removed application from hearing docket.

1540 KC.

Wyandotte News Co., Wyandotte, Mich.—Granted petition for leave to amend application (BP-5084; Docket 7756) so as to specify 1540 kc. instead of 1310 kc., and make other changes; accepted said amendment and removed application from hearing docket.

AM—Applications Accepted for Filing

590 KC.

KCSJ—The Star Broadcasting Co., Inc., Pueblo, Colo.—License to cover construction permit (B5-P-4094, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

610 KC.

KLEE—W. Albert Lee, Houston, Tex.—Modification of construction permit (B3-P-4628, which authorized a new standard broadcast station) for approval of directional antenna system. (DA-N)

KVNU—Cache Valley Broadcasting Co., Logan, Utah—Modification of construction permit (B5-P-4842, which authorized change in frequency, increase in power, and installation of new transmitter and directional antenna for night use) to make changes in directional antenna.

630 KC.

NEW—Pat Murphy Courington, Albertville, Ala.—Construction permit for a new standard broadcast station to be operated on 630 kc., power of 250 watts and daytime hours of operation. Amended to change power from 250 watts to 500 watts and change type of transmitter.

650 KC.

NEW—Wilmington Tri-State Broadcasting Co., Inc., Wilmington, Dela.—Construction permit for a new standard broadcast station to be operated on 650 kc., power of 250 watts and daytime hours of operation. Amended to make changes in directors.

690 KC.

NEW—Haygood S. Bowden, Camden, S. C.—Construction permit for a new standard broadcast station to be operated on 840 kc., power of 250 watts, and daytime hours of operation. WWHG—The W. H. Greenhow Co., Hornell, N. Y.—Granted modification of CP for extension of completion date to 10-17-47. (BMPH-542)

WRGA-FM—Rome Broadcasting Corp., Rome, Ga.—Granted modification of CP for extension of completion date to 10-10-47. (BMPH-541)

WDAK-FM—Radio Columbus, Inc., Columbus, Ga.—Granted modification of CP for extension of completion date to 9-30-47. (BMPH-543)

WAJR-FM—West Virginia Radio Corp., Morgantown, W. Va.—Granted modification of CP for extension of completion date to 12-12-47. (BMPH-544)

WTRC-FM—Truth Publishing Co., Inc., Elkhart, Ind.—Granted modification of CP for extension of completion date to 11-11-47. (BMPH-546)

WISE-FM—Radio Station WISE, Inc., Asheville, N. C.—Granted modification of CP for extension of completion date to 1-1-48. (BMPH-545)

WROL-FM—S. E. Adcock, Knoxville, Tenn.—Granted modification of CP for extension of completion date to 11-28-48. (BMPH-547)

WFOB—Laurence W. Harry, Fostoria, Ohio—Granted modification of CP for extension of completion date to 10-1-47. (BMPH-522)

WKJG—Northeastern Indiana Broadcasting Co., Inc., Fort Wayne, Ind.—Granted modification of CP for extension of completion date to 9-30-47. (BMP-2913)

KPRC-FM—The Houston Post Co., Houston, Tex.—Granted modification of CP for extension of completion date to 10-25-47. (BMPH-528)

WCBS-FM—Columbia Broadcasting System, Inc., New York, N. Y.—Granted modification of CP for extension of completion date to 11-13-47. (BMPH-524)

WEFM—Zenith Radio Corp., Chicago, Ill.—Granted modification of CP for extension of completion date to 11-24-47. (BMPH-523)

WBCA—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted modification of CP for extension of completion date to 10-20-47. (BMPH-526)

WJPG-FM—Green Bay Newspaper Co., Green Bay, Wisc.—Granted modification of CP to change studio location. (BMPH-519)

WBBM-FM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted modification of CP for extension of completion date to 12-13-47. (BMPH-525)

WQDI—Quincy Newspapers, Inc., Quincy, Ill.—Granted modification of CP for extension of completion date to 10-6-47. (BMPH-441)

WGAN-FM—Portland Broadcasting System, Inc., Portland, Maine—Granted modification of CP for extension of completion date to 10-31-47. (BMPH-507)

WCAF-FM—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted modification of CP for extension of completion date to 8-6-47. (BMPH-517)

WGUY-FM—Portland Broadcasting System, Inc., Bangor, Maine—Granted modification of CP for extension of completion date to 10-31-47. (BMPH-506)

WRRF-FM—Tar Heel Broadcasting System, Inc., Washington, N. C.—Granted modification of CP for extension of completion date to 1-21-48. (BMPH-475)

WCON-FM—The Constitution Pub. Co., Atlanta, Ga.—Granted modification of CP for extension of completion date to 1-17-48. (BMPH-479)

WRVA-FM—Larus & Brother Co., Inc., Richmond, Va.—Granted modification of CP for extension of completion date to 1-20-48. (BMPH-498)

WTAQ-FM—WHBY, Inc., Green Bay, Wis.—Granted modification of CP for extension of completion date to 1-4-48. (BMPH-483)

FM—Miscellaneous Actions

Pryor Dillard, Raymondville, Texas—Granted petition requesting that the Commission vacate its action of May 1, 1947, dismissing his application (BPH-1121). The Commission ordered that its order of May 1 be vacated and the application reinstated, and further authorized a conditional grant for a Class A station; proposed assignment: 101.7 mc., Channel 269, subject to further review and approval of engineering details.

Radio Projects, Inc., Jamaica, N. Y.; Radio Projects, Inc., W. New Brighton, N. Y.—Ordered that applications (BPH-532) and (BPH-533) for Class A stations be dismissed as not in compliance with Sec. 3.203(b) of the Commission's Rules.

WNBC-FM—National Broadcasting Co., Inc., New York, N. Y.—Granted renewal of license for period ending May 1, 1948. (BPH-47)

FM—Applications Accepted for Filing

KDTH-FM—Telegraph Herald, Dubuque, Iowa—Modification of construction permit (B4-PH-159, as modified), which authorized a new FM broadcast station for extension of completion date.

WFMY—Greensboro News Co., Greensboro, N. C.—Modification of construction permit (B3-PH-354, which authorized a new FM broadcast station) for extension of completion date.

(Continued on next page)

KIDO-FM—KIDO, Inc., Boise, Idaho—Modification of construction permit (B5-PH-371, as modified) to change type of transmitter, ERP to 6.9 KW; antenna height above average terrain to —413 feet; make changes in antenna system and change commencement and completion dates.

WJBC-FM—Bloomington Broadcasting Corp., Bloomington, Ill.—Modification of construction permit (B4-PH-236, as modified), which authorized a new FM broadcast station to change transmitter site, ERP to 45 KW; type of transmitter and make changes in antenna system and change commencement and completion dates.

KTRH-FM—KTRH Broadcasting Co., Houston, Texas—Modification of construction permit (B3-PH-253, as modified), which authorized a new FM broadcast station for extension of completion date.

WKRS—Keystone Printing Service, Inc., Waukegan, Ill.—Modification of construction permit (B4-PH-334, as modified) which authorized a new FM broadcast station, for extension of completion date.

WTHI-FM—Wabash Valley Broadcasting Corp., Terre Haute, Ind.—Modification of construction permit (B4-PH-691, which authorized a new FM broadcast station) to specify studio location and make changes in antenna system.

WBOC-FM—The Peninsula Broadcasting Co., Salisbury, Md.—Modification of construction permit (B1-PH-202, which authorized a new FM broadcast station) for change in effective radiated power to 12 KW; antenna height above average terrain to 382 feet and make changes in antenna system.

WFMR—E. Anthony & Sons, Inc., New Bedford, Mass.—Modification of construction permit (B1-PH-98, as modified) which authorized a new FM broadcast station, to change ERP to 19.5 KW; antenna height above average terrain to 510 feet; make changes in antenna system and change commencement and completion dates.

WKNP—Corning Leader, Inc., Corning, N. Y.—Modification of construction permit (B1-PH-301, which authorized a new FM broadcast station) for extension of completion date.

WDOD-FM—WDOD Broadcasting Corp., Chattanooga, Tenn.—Modification of construction permit (B3-PH-324, which authorized a new FM broadcast station) for extension of completion date.

WJPG-FM—Green Bay Newspaper Co., Green Bay, Wisc.—Modification of construction permit (B4-PH-147, as modified) which authorized a new FM broadcast station, for extension of completion date.

WTRI—Troy Broadcasting Co., Inc., Troy, N. Y.—Modification of construction permit (B1-PH-550, as modified) which authorized a new FM broadcast station, for extension of completion date.

WESB-FM—Bradford Publications, Inc., Bradford, Pa.—Modification of construction permit (B2-PH-467, as modified) which authorized a new FM broadcast station, for extension of completion date.

WJNO-FM—WJNO, Inc., West Palm Beach, Fla.—Modification of construction permit (B3-PH-713, which authorized a new FM broadcast station) for extension of completion date.

WLAD-FM—The Berkshire Broadcasting Corp., Danbury, Conn.—Modification of construction permit (B1-PH-701, which authorized a new FM broadcast station) to change ERP to 150 watts; antenna height above average terrain to 602 feet; make changes in antenna system and change commencement and completion dates.

WBRC-FM—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Modification of construction permit (B3-PH-330, as modified), which authorized a new FM broadcast station for extension of commencement and completion dates.

WDXE—Johnston Broadcasting Co., Birmingham, Ala. (George Johnston and George Johnston, Jr.)—Modification of construction permit (B3-PH-518, which authorized a new FM broadcast station, as modified) for extension of commencement and completion dates.

WJTN-FM—James Broadcasting Co., Inc., Jamestown, N. Y.—Modification of construction permit (B1-PH-279, as modified), which authorized a new FM broadcast station for extension of completion date.

WGHF—William G. H. Finch, New York, N. Y.—Modification of construction permit (B1-PH-42, as modified), which authorized a new FM broadcast station for extension of completion date.

WTNY—The Troy Record Co., Troy, N. Y.—Modification of construction permit (B1-PH-555, which authorized a new FM broadcast station) for extension of completion date.

WCLT—The Advocate Printing Co., Newark, Ohio—License to cover construction permit (B2-PH-417, as modified, which authorized a new FM broadcast station) for extension of commencement and completion dates.

WELD—Radiohio Inc., Columbus, Ohio—Modification of construction permit (B2-PH-1066, which authorized changes in FM broadcast station) for extension of commencement and completion dates.

WPEN-FM—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Voluntary assignment of license to Philadelphia Record Co.

WAPO-FM—WAPO Broadcasting Service, Chattanooga, Tenn. (Ramon G. Patterson, Louise Patterson Pursley, Ramon G. Patterson, executor, and Louise Patterson Pursley, executrix of the Estate of Joda Patterson, deceased)—Modification of construction permit (B3-PH-768, which authorized a new FM broadcast station) for extension of completion date.

KRBA-FM—Darrell E. Yates, Lufkin, Tex.—Modification of construction permit (B3-PH-947, which authorized a new FM broadcast station) for extension of completion date.

WKNB-FM—The New Britain Broadcasting Co., New Britain, Conn.—Modification of construction permit (B1-PH-833, as modified) which authorized a new FM broadcast station, for extension of completion date.

WSAU-FM—The Journal Co., Wausau, Wisc. (The Milwaukee Journal)—Modification of construction permit (B4-PH-903, as modified) to change type of transmitter to REL 520-DL Max., 10 KW, and make changes in antenna system.

WTAR-FM—WTAR Radio Corp., Norfolk, Va.—Modification of construction permit (B2-PH-218) which authorized a new FM broadcast station, to change ERP to 49 KW, make changes in antenna system and change commencement and completion dates.

WKBZ-FM—Ashbacker Radio Corp., Muskegon, Mich.—Modification of construction permit (B2-PH-143, which authorized a new FM broadcast station) to change transmitter site, make change in antenna system, ERP to 50 KW, and change commencement and completion dates.

WCAR-FM—Pontiac Broadcasting Co., Pontiac, Mich.—Modification of construction permit (B2-PH-538, which authorized a new FM broadcast station) to change corporate name to WCAR, Inc.

KFH-FM—The Radio Station KFH Co., Wichita, Kans.—Modification of construction permit (B4-PH-411, as modified) which authorized a new FM broadcast station, for extension of completion date.

WSBA-FM—Susquehanna Broadcasting Co., York, Pa.—Modification of construction permit (B2-PH-160, as modified) which authorized a new FM broadcast station, for extension of completion date.

KWRN-FM—Reno Newspapers, Inc., Reno, Nev.—Modification of construction permit (B5-PH-376, as modified) which authorized a new FM broadcast station, for extension of completion date.

Channel #229 or #263

NEW—Radio Station WAIT, Chicago, Ill. (Gene T. Dyer, Evelyn M. Dyer, Gene T. Dyer, Jr., Adele Moulds, Louis E. Moulds and Grace V. McNeill)—Construction permit for a new FM broadcast station (Metropolitan) to be operated on

(Continued on next page)

Channel 229, 93.7 mc.; 241, 96.1 mc., or 263, 100.5 mc. Amended to specify frequency as Channel 274, 102.7 mc.

Channel #236

NEW—Rural Radio Network, Inc., De Ruyter Village, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 236, 95.1 mc., ERP of 1 KW, and antenna height above average terrain 465 feet.

Channel #241

NEW—John J. Laux, Niagara Falls, N. Y. (P. O. 130 Brady Circle, Steubenville, Ohio)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 241, 96.1 mc., and ERP of 12.4 KW.

Channel #243

WHEF—WHEC, Inc., Rochester, N. Y.—Construction permit to specify frequency as Channel 243, 96.5 mc., effective radiated power as 65.5 KW, install new transmitter, and specify antenna system.

Channel #260

NEW—Booth Radio Stations, Inc., Flint, Mich. (P. O. 10 Witherell St., Detroit, Mich.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 260, 99.9 mc., and ERP of 5.2 KW.

Channel #263

NEW—Southern Virginia Broadcasting Corp., Crewe, Va. (P. O. 117 Carter St., Crewe, Va.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 263, 100.5 mc., ERP of 10.1 KW.

Channel #270

NEW—Rural Radio Network, Inc., Cherry Valley, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 270, 101.9 mc., ERP of 1 KW, and antenna height above average terrain 1011 feet.

NEW—Rural Radio Network, Inc., South Bristol, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 270, 101.9 mc., ERP of 1 KW, and antenna height above average terrain 993 feet.

Channel #275

NEW—Rural Radio Network, Inc., Highmarket, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 275, 102.9 mc., ERP of 1 KW, and antenna height above average terrain 584 feet.

NEW—Rural Radio Network, Inc., Wethersfield, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 275, 102.9 mc., ERP of 1 KW, antenna height above average terrain 469 feet.

Channel #281

NEW—Madera Broadcasting Co., Madera, Calif. (Harold Ray Brown, Daniel B. Halcomb, Dean S. Lesher and Kathryn C. Lesher) (P. O. Box 1176)—Construction permit for a new FM broadcast station (Class A) to be operated on Channel 281, 104.1 mc., ERP of 275 watts.

Channel #293

NEW—Rural Radio Network, Inc., Ithaca, N. Y. (P. O. 116 Prospect St., Ithaca, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 293, 106.5 mc., ERP of 1 KW, and antenna height above average terrain 779 feet.

To Be Assigned By FCC

NEW—Inter-City Broadcasting Co., Providence, R. I.—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be assigned by FCC and ERP of 16.4 KW.

NEW—Southern California Associated Newspapers, Glendale, Calif.—Construction permit for a new high frequency FM broadcast station to be operated on 48,300 kc. Amended to change transmitter location from Broadway and Jackson Streets, Glendale, California, to "to be determined", Mount Wilson, California; studio site from Broadway and Jackson Streets, Glendale, California, to 510 S. Spring Street, Los Angeles, California, ERP from 440 watts to 58.1 KW; frequency from 48,300 kc. to "to be determined by Chief Engineer FCC", specifies type transmitter and make changes in antenna system, change class station from A to B.

NEW—Metropolitan Radio Corporation of Chicago, Inc., Chicago, Ill. (P. O. 1200 East 55th St.)—Construction permit for a new FM broadcast station (Class B) to be operated on frequency to be asisgned by FCC, and ERP of 34.5 KW.

FM—Application Returned

Scotland Broadcasting Co., Laurinburg, N. C.—Construction permit for a new FM broadcast station (Class B) to be operated on 94.5 mc. Returned July 11, 1947, program analysis not submitted and also discrepancy concerning effective radiated power.

FM—Applications Tendered for Filing

WFOB—Laurence W. Harry, Fostoria, Ohio—Consent to assignment of construction permit of FM station WFOB to Seneca Radio Corp.

WGYN—WGYN, Inc., New York, N. Y.—Consent to transfer of control of license and construction permit for FM station WGYN to Charles E. Merrill and Radio Sales Corp.

TELEVISION

TV—Modification of CP Granted

WGNA—WGN, Inc., Chicago, Ill.—Granted modification of CP to change type of transmitter and antenna system and extension of completion date to 12-31-47. (BMPCT-79)

TV—Applications Accepted for Filing

NEW—Westinghouse Radio Stations, Inc., Within Continental limits of the United States (P. O. 1619 Walnut St., Philadelphia, Pa.)—Construction permit for a new experimental television relay broadcast station to be operated on 6500-7050 mc., power of 0.1 watt, emission A5, and unlimited (in accordance with Sections 4.131(b) and 4.163) hours of operation.

WNBK—National Broadcasting Co., Inc., Cleveland, Ohio—Modification of construction permit (B2-PCT-23, which authorized a new commercial television broadcast station) for further extension of completion date.

WWBT—Hearst Radio, Inc., Baltimore, Md.—Modification of construction permit (B1-PCT-68, as modified, which authorized a new commercial television broadcast station) for extension of commencement and completion dates. Change call letters from WWBT to WBAL-TV.

NEW—The Journal Co., The Milwaukee Journal, area of Milwaukee, Wisc. (P. O. 333 W. State St., Milwaukee 1, Wisc.)—Construction permit for a new experimental television relay broadcast station to be operated on 6950-6975 mc., power of .1 watt, emission A5, and hours of operation in accordance with Section 4.131(b) and 4.163.

NEW—Johnson-Kennedy Radio Corp., Chicago, Ill. (P. O. % Ralph L. Atlass, 230 N. Michigan Ave.)—Construction permit for a new commercial television broadcast station to be operated on Channel #2, 54-60 mc., power vis. 5 KW (peak); aur. 2.5 KW, and unlimited hours of operation.

MISCELLANEOUS BROADCAST

Actions

Experimental License Extended

W9XBZ—Sarkes Tarzian, Bloomington, Ind.—Extended present license to October 1, 1947, pending further engineering study. (BPEX-52)

Remote Pickup Modification of CP Granted

KNGL—Minnesota Broadcasting Corp., area of Minneapolis, Minn.—Granted modification of CP for extension of completion date to 11-12-47. (BMPRE-68)

Applications Accepted for Filing

Remote Pickup

NEW—Mojave Valley Broadcasting Co., area of Barstow, Calif. (a partnership of William T. Brown, Burton C. Boatright and Robert E. Reno) (P. O. Box 1230, Barstow, Calif.) —Construction permit for a new remote pickup broadcast station to be operated on 1646, 2090, 2190 and 2830 kc., power of 20 watts, emission A3 and hours of operation in accordance with Section 4.403.

NEW—Mississsissippi Valley Broadcasting Co., area of East St. Louis, Ill. (Myles H. Johns, Penrose H. Johns, William F. Johns and William F. Johns, Jr., a partnership)—Construction permit for a new remote pickup broadcast station to be operated on 31.62, 35.26, 37.34, 39.62 mc., power of 42 watts and emission A3, hours of operation in accordance with Section 4.403. Amended to change name to On The Air, Inc.

Noncommercial Educational

NEW—International Evangelical Christian Church, Los Angeles, Calif. (P. O. 6219 7th Ave.)—Construction permit for a new noncommercial educational broadcast station to be operated on frequency to be assigned by FCC and ERP of 100 watts.

KOAG-FM—Oklahoma Agricultural and Mechanical College, Stillwater, Okla.—Modification of construction permit (B3-PED-58, as modified), which authorized a new noncommercial broadcast station for extension of completion date.

WFUV—Fordham University, New York, N. Y.—License to cover construction permit for new noncommercial educational broadcast station. (B1-PED-65, as modified).

Federal Trade Commission Actions

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Smithline Coats, etc.—Misbranding of wool products is alleged in a complaint issued by the Commission against Philip Smithline, Max Silpe and Joseph Miller, trading as Smithline Coats and Smithline Coat Co., 252 West 38th St., New York. (5506)

CEASE AND DESIST ORDER

Friedman-Klein Sales Co., etc.—Selling or otherwise disposing of merchandise by the use of lottery devices is prohibited under the provisions of an order issued by the Commission against Jack Klein and Martin D. Friedman, trading as Friedman-Klein Sales Company and Western Novelty Company, 217 West 9th St., Kansas City, Mo. (5452)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 31, August 4, 1947

A Statement on BMB by NAB President Justin Miller

The Executive Committee of Broadcast Measurement Bureau has adopted a plan to establish BMB on a permanent basis. It is important that broadcasters realize the full implications of this decision. The plan was devised on the recommendation of the NAB Board of Directors. It was prepared by a committee of our Board working with the BMB. It has been approved by both our Board and the BMB Board. Advertisers and agencies endorse it. Broadcasters now have the opportunity to give permanent support to the principle of standardized uniform measurement. If properly supported and directed, BMB can supply for broadcasting basis measurements and factual background which will inspire confidence upon the part of those who use it.

Prominent Radio Executives to Participate In Advertising, Employee-Employer Clinics

Preliminary details of two clinics—one on employee-employer relations, the second on broadcast advertising—to be held at the 25th Annual NAB Convention in Atlantic City, on September 15, were announced Friday (1).

The Employee-Employer Relations Clinic will afford unionized and non-unionized employees an opportunity to get a clarification on all major labor relations problems facing the radio industry, including discussions of the Taft-Hartley and Lea Acts; the AFM situation; overtime problems under the Wage and Hour Act; profit sharing and bonus plans; selection, hiring and training of supervisors; trends in union contracts and related subjects.

There will be no speeches at this Clinic; the entire period will be devoted to panel discussions of employee-employer relations problems. In preparation for the Clinic, the EERD has collected questions from broadcasters all over the nation and these questions will serve as the basis for discussion. In addition, full opportunity will be available for individual station managers and owners to

Chairman Denny, Opening HF Conference, Calls on Industry Engineers for Aid

FCC Chairman Charles R. Denny, opening the preliminary session of the High Frequency Broadcasting Conference for the American delegates in Atlantic City on Friday (1), requested aid from the broadcasting industry in supplying engineers to participate in the Conference.

Chairman Denny stated that he expected the Conference to end about October 1st.

He pointed out the enormity of the task in the International HF conference, and emphasized that it may take a long time to work out the details.

The proposal by the United States includes the establishment of a new world commission to work out a revised international allocation which would make the Berne priority and frequency list obsolete, and would require re-engineering of all the stations worldwide.

At press time on Friday, the heads of all delegations, Radio and Plenipotentiary, were scheduled to meet that night to determine whether the International HF Broadcasting Conference should be postponed for a period up to six months, as the two conferences now in

session are tying up personnel. However, it is expected that the HF Conference will start on August 15 on a limited scale.

Six committees for the HF Conference were set up as follows: Steering, Credentials, Organization, Technical, Procedures and Drafting.

NAB executives who have been named to serve are: President Justin Miller and Don Petty, general counsel, on the Procedures Committee; and Royal V. Howard, engineering director, on the Technical Committee.

Prominent Radio Executives to Participate In Advertising, Employee-Employer Clinics

(Continued from page 619)

bring their own particular questions before the panel of experts.

The Employee-Employer Relations Clinic will be a closed session, restricted to station managers and owners. The panel, which Richard P. Doherty, director of the Employee-Employer Relations Department, has selected, consists of: Frank K. White, vice president in charge of finance and labor relations, CBS; Ernest de la Ossa, director of personnel and labor negotiator, NBC; Harold Essex, general manager, WSJS, Winston Salem, N. C.; C. L. Thomas, general manager, KXOK, St. Louis, Mo.; Harold Beckjorden, assistant executive secretary, AAAA; Samuel Ganz, assistant to the deputy administrator, Wage and Hour Division, Department of Labor; and Richard P. Doherty, director, NAB employee-employer relations department, moderator.

Broadcast Advertising Clinic: A shirt-sleeve session for sales managers, devoted to matters pertaining directly to the commercial aspects of radio, is scheduled to run through the entire day.

The tentative program for the clinic, arranged by the NAB Sales Managers Convention Planning Subcommittee, includes wide participation in the discussion by industry leaders.

In cooperation with the National Retail Dry Goods Association, "Case Histories Come to Life" will be presented. This portion of the program will be presented under the direction of William T. White, sales manager, Wieboldt's, Inc., Chicago, who will act as chairman and moderator. Other participants include: Miss Myrtle Green, Wieboldt's, Inc., who will discuss the program *Melody Lane;* L. A. Foster, The Fair, Chicago, who will give details on handling of *News;* Julian Trivers, Hengerer's, Buffalo, who will describe the store's daytime program of general appeal to women—*Early Date at Hengerer's;* Joe DuMond, president, KXEL, Waterloo, and Dick Bailey of the James Black Dry Goods Co., Waterloo, who will share time in describing *RFD 1540*, a program which appeals to rural listeners. Miss Lee Hart, assistant director, NAB department of broadcast advertising, will sum up specific suggestions on basis copy appeals and measurement of results.

The luncheon session will be held jointly with broadcasters attending the Program Managers' Clinic. Two luncheon speakers, Barbara Wells, WOR, and Gordon Gray, WIP, Philadelphia, are scheduled to deliver grass roots talks during the session. A third guest, to speak on "How to Build Programs For Sale" will be named later.

The afternoon meeting of the sales managers group will be highlighted by discussions of the work of the various sub-committees of the Sales Managers Executive Committee. Participants selected to date include: Odin Ramsland, KDAL, Duluth, committee chairman, presiding; J. Robert Gulick, WGAL, Lancaster, Pa.; Arthur Hull Hayes, WCBS, New York; Jack Kennedy, WHAM, Rochester, New York; Craig Lawrence, WCOP, Boston; Louis Read, WWL, New Orleans; Eugene Thomas, WOR, New York.

Members of the Convention Planning Subcommittee are: Lewis H. Avery, Avery-Knodel, Inc., chairman; Mr. Thomas, and Frank E. Pellegrin, NAB.

Research Department

Second NORC Study To Be Made in November; Dr. Paul Lazarsfeld to Interpret Findings

Plans for the second study of the public's opinion of radio, to be conducted by the National Opinion Research Center of the University of Denver, were discussed at a meeting of a subcommittee of the NAB's Research Committee in New York Wednesday (30).

Field work for the study will be conducted in November of this year. Similar work on the previous NORC study was conducted in November, 1945. In addition, the Committee has requested Dr. Paul Lazarsfeld, Columbia University, to receive the results of the study and to provide an analysis and interpretation of the findings of the study. Dr. Lazarsfeld, collaborating with the late Dr. Harry Field, analyzed the findings of the first study.

(Continued on next page)

Since the results of the forthcoming study will not be available until early in 1948, no date has been set for publication of the findings.

During its meeting, the Committee studied in detail the various items which have been suggested for inclusion in the second study. Eliminations and modifications were made in these items, so that pre-testing in the field could proceed immediately. Further changes will be made in accordance with results of the pre-test. Attending the meeting were: Hugh M. Beville, NBC, chairman; Carl Burkland, WTOP; Paul Lazarsfeld, Columbia University; Paul Sheatsley, NORC; Elmo C. Wilson, CBS; Earl Winger, WDOD; William Zurflieh, NBC; and Kenneth H. Baker, NAB.

Engineering Department

FCC Revises Requirements for Operator Licenses and Examinations

Revisions in its requirements for commercial radio operator examinations and licenses were announced by the FCC on Friday (1), in its public notice #8932.

Under the new plan, provision is made for three classes of broadcast operator licenses authorizing operation of standard, international, FM, facsimile, television, developmental and auxiliary broadcast stations. Present requirements state that only the first class radiotelephone operator's license authorizes operation of these stations.

The following is reprinted from the Commission's announcement:

"Under the new plan, the three new classes of broadcast operator's licenses would be valid for operator duties as follows:

Broadcast Engineer-Operator

Chief Engineer or Staff Operator of any Standard, International, FM, Facsimile, Television, Developmental and Auxiliary stations.

Broadcast Technician-Operator

Chief Engineer of a Standard Broadcast Station of not more than 1 kilowatt power employing a non-directional antenna system or an FM Broadcast Station.

Staff Operator of any Standard, International, FM, Facsimile, Television, Developmental and Auxiliary station.

Broadcast Radio-Operator

Staff Operator of a Standard Broadcast Station not exceeding 1 kilowatt power employing a non-directional antenna system, or the Staff Operator of an FM Broadcast Station of not more than 1 kilowatt effective radiated power.

All broadcast stations would be required to employ at least one Engineer-Operator with the exception of (1) FM Broadcast stations (2) Standard Broadcast stations of 1 kilowatt or less with non-directional antenna. The excepted stations could employ at least one Technician-Operator in lieu of the Engineer-Operator.

The Commission's current proposal provides only for the issuance of the Broadcast Radio-Operator license to persons who will serve under the technical supervision of a person holding a higher class of operator's license.

The examination for Broadcast Radio-Operator's license will cover technical subjects relating to routine operation of a broadcast transmitter and associated equipment to the extent that such an operator can on his own responsibility place the transmitter on and off the air, replace tubes and other defective parts that are readily replaceable by plug-in methods, assure compliance with the rules and regulations relating to modulation and frequency stability, and insure that the operator will call the responsible technical supervisor should any circumstance arise requiring a decision or action beyond the scope of his responsibility under the Broadcast Radio-Operator license. The examination will also cover appropriate portions of the rules and regulations governing the operation of Standard and FM Broadcast stations to insure proper maintenance of the station logs and other records and adherence to broadcast station operating procedures.

Further proposals will be made with respect to the implementation of the two remaining classes of broadcast station operator licenses. When these proposals are adopted in final form they will be carried into effect as rapidly as the examinations, study guides, and license forms can be produced and distributed to the Field Offices.

The Commission is fully aware of the problems of existing holders of operator licenses, particularly those that arise in the transition from one kind of operator license to another. In the proposals for implementation of the new classes of licenses, provision will be made to recognize experience gained under existing licenses in prescribing the conditions under which the new licenses may be obtained.

(Continued on next page)

How Do You Stand on the Convention?

It is important that all NAB members make certain that all forms in connection with the NAB Convention in Atlantic City on September 15-18 have been sent to NAB headquarters.

Form #1 (Advance Registration). One form accompanied by check for $27.50 for each person attending the general sessions, luncheons and banquet. After August 15, the price will be $30.00.

Form #2 (Certification Form). One form from each NAB active member designating delegate and alternate for voting purposes.

Form #3 (Hotel Reservations). Twin bedded rooms for occupancy of two persons are still available at most NAB hotels. Our option on rooms expires August 15. After that date it may be exceedingly difficult to obtain the kind of accommodations you desire in Atlantic City.

Form #4 (Special Registration). One form accompanied by check for $5.00 for each person attending the clinics and luncheon on Monday. This is not included in the $27.50 registration mentioned above.

ABC Engineering Director Named to Membership on NAB Committee

Frank Marx, director, General Engineering Department, ABC, has been appointed to membership on the NAB Engineering Executive Committee.

Mr. Marx replaces Royal V. Howard, now NAB director of engineering.

Recording, Reproducing Standards Meeting Scheduled for Atlantic City September 16

Resuming its war-interrupted work on the establishment of recording and reproducing standards the NAB Recording and Reproducing Standards Committee is scheduled to meet during the Annual Convention in Convention Hall, Atlantic City, on September 16.

The meeting is designed primarily for manufacturers of equipment and recording engineers, and will not conflict with other broadcasting business to be discussed that day.

All parties interested in the establishment of the standards were requested to advise NAB of their intention to participate in resolving the problem and to name representatives and alternates to the full Committee.

"The acceptance of NAB's preliminary standards has been most gratifying," Royal V. Howard, NAB Director of Engineering, stated at a preliminary meeting held at NAB headquarters. "The need for completion of the standards and possible minor modification of the existing ones is one of the most pressing of the industry's engineering problems. From a practical standpoint, it is expected that if standardization of the type envisioned can be achieved, not only can vast sums be saved the industry but more uniform and higher quality recorded programs would be presented to the public."

In view of the wide usage by broadcast stations of standard "home type" 78 rpm records, the Executive Committee of the Recording and Reproducing Standards Committee has included in the agenda of standardization the characteristics of these records in addition to that of 33.3 rpm transcriptions.

After discussions with several foreign broadcasters, Mr. Howard stated that many international broadcasters have expressed a desire to take advantage of the NAB Recording and Reproducing Standards so that transcriptions the world over would have uniform characteristics. Many foreign countries now use the Standards, but feel complete standards should be established.

The NAB Recording and Reproducing Standards Committee was first organized at Detroit in June, 1941. Seventy-seven members of the Committee, representing organizations interested in recording and reproduction, participated in the work. The present standards were officially adopted by the NAB Board of Directors in March, 1942.

It is expected that working Committees of specialists would be selected in addition to a new Executive Committee at the Standardization meeting in September.

On the list of problems to come up for discussion at the Atlantic City meeting is the reopening of the subject of high frequency pre-emphasis for transcriptions. Present standards show a high frequency boost of 100 mili-seconds, but some recorders believe this should be reduced to 75 mili-seconds as in FM.

While some 16 standards have been adopted, several others were left undecided by the war. Among these are standards for: recorded level; signal to noise ratio; concentricity of center hole; turntable diameter (this was tentatively standardized that the minimum diameter of the reproducing turntable shall be 15⅝ inches); minimum turntable torque; output level of the pickup equalizer combination; tracking error; groove contour and others.

Clear Channel Hearings Postponed To Avoid Conflict with Convention

The FCC announced last Monday (28) that it had postponed the Clear Channel Hearings from September 15 until September 29.

If the hearings had not been postponed, a date conflict would have arisen since the NAB Convention will get underway on September 15.

Small Market Stations

Work of Small Market Stations Group Culminates in Revision of FCC Requirements

As a result of the project initiated about two years ago by the NAB Small Market Stations Executive Committee, the FCC on Friday (1) announced its plan to place commercial radio operator examinations and licenses in line with developments that have been made in the industry.

Details of the revisions in the requirements will be found in this issue of Reports on page 621.

General

Educational Standards Committee to Study Methods of Setting Radio Course Standards

Looking toward methods of establishing close cooperation between the radio broadcasting industry and schools which offer radio courses, the NAB Educational Standards Committee held its initial meeting in Washington Monday (28).

Because of the rapid expansion in the field of broadcasting, with the resulting heavy demands for qualified personnel, the Association's Board of Directors, at its meeting in May, authorized the establishment of the Committee to study the various radio courses offered by high schools, colleges and universities, and to recommend to the Board possible methods for setting standards.

The Committee, as a result of its meeting on Mon-

(Continued on next page)

day will pursue its exploration along four major channels:

1. Planning accrediting procedures for schools offering courses in radio education.
2. Initiating high professional standards as a long range program for radio personnel.
3. Setting up recommended standards as a means of preparing newcomers to the radio field.
4. Improving radio performance by a program of in-service training for those already engaged in radio activities.

Committee members present for the meeting include: Ralph W. Hardy, KSL, chairman; Dr. Willis Dunbar, WKZO; F. C. Sowell, WLAC; Judith C. Waller, NBC. William B. Way, KVOO, who was unable to attend was represented by Ben Henneke, University of Tulsa.

NAB executives present were: President Justin Miller; A. D. Willard, Jr., C. E. Arney, Jr., and Robert K. Richards.

Continued Free Press Requires Free Radio Willard Warns at 'Common Glory' Performance

Commemorating "Freedom of Speech" night, and preceding the performance of "The Common Glory," A. D. Willard, Jr., NAB executive vice president, addressing the audience Tuesday night (29), cited government-imposed limitations as "the greatest danger to individual freedom." He stated, however, that "because we have a free press" and "a vigilant press, which has kept the people in day-to-day communion with the activities of their elected leaders" we have escaped such restrictions.

Continuing, he warned "that without a free radio, we will not have for long a free press."

"The Common Glory" written and directed by Paul Green, is being presented for a two-months period near Williamsburg, Virginia, an area where some of America's earliest pioneers settled. The landmarks are symbolic of the nation's fight for the freedoms which we now enjoy.

Tuesday night's performance was the first of a series dedicated to "Four Freedoms"—freedom of speech, freedom of assembly, freedom of religion and freedom of the press.

Campbell Arnoux, president and general manager, WTAR, introduced Mr. Willard to the audience. The talk was carried on the air over a state-wide network of Virginia radio stations. Walter R. Biship, WRVA, was appointed by Governor Tuck to be chairman for the proceedings.

Following is the text of Mr. Willard's talk:

"Those of us who are even casual students of American history carry in our minds a portrait that represents the stupendous struggles of Thomas Jefferson in the cause of freedom.

"We see him before assemblies and in courts of law, eloquently declaiming the principles upon which this nation since has prospered and grown. We picture him at the desk he himself designed, patiently transcribing those principles for posterity.

"Thomas Jefferson was a man with purpose in a land that sought freedom from the ultimate enslavement; domination by those who rule.

"Let us try to paint upon the canvas of your mind another picture of another man. This, as historical portraiture, is more contemporary. This is also a picture of a man who is dead. His body was found at the pedestal of a radio microphone in the charred ruins of a hole into which he had crawled as he was cornerd by the forces of freedom.

"What he said into that microphone before he put a gun to his temple and destroyed himself, no one knows. No one cares. But it is symbolically significant that his body should have been found by an instrument which he had employed for the destruction, rather than the glorification, of his fellowmen.

"This man's name was Joseph Goebbels.

"Forget his name. There are always others in our world society of equally treacherous aspiration. We can forget his name, but we must remember his purpose and the means by which he sought to attain it.

"Joseph Goebbels could never have said—'We hold these truths to be self-evident.' He did not respect truth.

"He could never have written, 'The Reichstag shall make no law abridging the freedom of speech.' He and his confederates made the law, and freedom of speech meant freedom for a handful of gangsters.

"He impressed acceptance of that law upon the people of his land by lying in the public prints and on the air. Always remember that he used the microphone, employing it to whip up the martial spirit of a nation; to enslave an entire people; to launch a world holocaust that finally consumed him.

"So let us keep in our minds' historic archives not only the treasured memory of Thomas Jefferson, but the picture of that body found beside a microphone. Let us remember the common glory—and the constant peril.

"In America we have a free radio. Its freedom—to operate as a constant check against insolence of office (which was the Jefferson concept of a mass medium's purpose in society)—its freedom is limited only by the law, and the administration of that law, under which it operates.

Radio and Newspapers Compared: "When one considers the purpose of a mass medium in a society of free men, and even the method by which the purpose is accomplished, there is little difference between the newspaper and the broadcasting station.

"Each should perform its public obligation in disseminating information and knowledge. It is only a physiological difference that one accomplishes this through the avenue of the eye and the other through the avenue of the ear. Even this difference is without significance, evidence emerging from our electronic laboratories would indicate. For already many thousands of Americans accept television in their homes as casually as most of us accept sound radio, and facsimile will print by 'radio' anything that can be printed by the press.

"You may compare the schedule of your favorite broadcasting station with the format of your favorite newspaper, and find the analogy even more compelling. Each carries news, editorial interpretation, special features for women, sports, classified ads and display ads. The newspaper provides comic strips; and radio provides daily serials and adventure and mystery dramas.

"Basically, by purpose—by method—by economic structure—by social obligation—these media aspire to the same objectives in our pattern of American life. Within the concept of the democracy to which Thomas Jefferson devoted his life, within the framework of the eternal language which gave our nation charter, there can be only one freedom of speech—and that is freedom for *all*.

(Continued on next page)

Radio Is First Defense: "However, I should like to warn you assembled here that the first defense against encroachment upon that freedom in our nation is American radio. You may measure the status of your individual freedom by the barometer of the freedom of broadcasting.

"This is true because every broadcasting station operates under a license granted by the Federal government through a Commission established by Congress. The essential purpose of this licensing process is to obviate the interference of electrical signals which would result in the absence of such administration.

"Thomas Jefferson recognized, as have all of our great leaders through the years, that the power to license is the power to censor. As long as radio is licensed, and that process would seem inevitable, broadcasting will be the first front attacked in any effort to limit our freedom.

"Please believe me, when I say that there are those among us, in every age, who seek such limitation. At this moment, there are those associated with the commission which licenses broadcasting who would concern themselves not only with the assignment of radio signals, as provided by law, but with the program matter which traverses those signals.

"Every broadcaster in every city of the United States is required, not by law, but by the regulations of an executive commission, to report periodically to the Government the program content of his broadcast schedule.

"The proclaimed purpose of this procedure is to furnish the Government with evidence upon which it will base its decisions in determining a station's performance in the public interest. The proclaimed purpose may indeed be the real purpose of this process, but in its execution lies the same real danger that Jefferson saw in a licensed press.

Vigilant Press: "The greatest danger to individual freedom is that those who govern us, even if by our own selection, should limit our freedoms as well. They never have in this nation, and the principal reason they never have is because we have had a free press; a free and *vigilant* press, which has kept the people in day-to-day communion with the activities of their elected leaders.

"Without that free press, we would not survive long as a democracy.

"And I say to you that without a free radio, we will not have for long a free press.

"For an encroachment upon one is an encroachment upon all.

"So you see, we in broadcasting find special meaning in this magnificent pageant which is being presented in the great state where our freedom was born.

"We have emerged, as an art, from 27 years of development and experimentation. We believe we have earned and possess the confidence of the American listener. We consider it our duty, as a medium of free expression, to take militant stand against any invasion of the freedom reserved to us by the Constitution's guarantees. We fight this fight in the firm belief that it's the people's cause. We are not ready to trade freedom for fancied security.

"The control that should be exercised over American broadcasting to make it the best broadcasting possible is in the hands of the listener—who will select the good and reject the bad. It will remain there.

"I hope you will help to keep it there. I hope you will remember—when next you sit by your radio listening to Bob Hope and Joseph Harsch or the American Forum of the Air, or, yes, Ma Perkins—you will remember that it is eminently better listening than the exhortation of a tyrant.

"We are unique only as a nation of individuals, not as individuals alone. History bears witness that these things can happen here. Against their imminence, men like Thomas Jefferson took up arms—and in the peace that followed battle, gave us inviolate principles by which to live.

"We destroy our heritage and we lose the common glory if we fail to defend those principles with all our vigor."

Newly Elected Board Members Attend Two-Day Observation Session at NAB

Six new members of the NAB Board of Directors attended a two-day session at association headquarters on Thursday and Friday (31-1) to obtain first-hand detailed information on the functions of the organization and the work of the various departments.

The session, the first of its kind, was designed to acquaint the new board members with the manifold procedures followed by the headquarters executives and staff in carrying out the association's policies and day-to-day activities.

In addition to hearing from President Justin Miller, Executive Vice-President A. D. Willard, Jr., and Secretary-Treasurer C. E. Arney, Jr., who presented the overall operations, the board members heard in detail from each of NAB's staff directors, and visited each department to observe the operations.

The newly elected directors present for the conferences were: Harold E. Fellows, WEEI, District 1; Henry P. Johnston, WSGN, District 5; Gilmore Nunn, WLAP, District 7; Charles C. Caley, WMBD, District 9; John F. Meagher, KYSM, District 11; and Clyde Rembert, KRLD, District 13.

Creighton U. Dean Cites Radio's Strength At Summer Session Radio Institute

[*Because of the pertinence of his remarks at the Creighton University Radio Institute, the talk by Rev. M. B. Martin is reprinted here for membership information. Father Martin is Dean of the Creighton College of Arts and Sciences, and Director of the Summer Session.*]

"Not long ago a certain university conducted a survey of radio listening habits in a small city of the Middle West. The survey concluded that: "The average listener doesn't know a great deal about radio and doesn't want to be informed or educated by it." It is my opinion that the implications of this conclusion are false. People who listen to the radio are, consciously or unconsciously, influenced by the persons with whom they associate over the air; statistics show that these unseen voices sell their listeners vast amounts of commercial products. These same voices also sell their listeners a philosophy of life, a philosophy of spiritual and material values, a culture which is elevating and refining or a shabby materialism which is debasing.

"We become like the persons with whom we associate. That is why we at Creighton are interested in the training of radio personnel—persons whose company will have an ennobling and cultural influence on us and our fellow citizens.

"I have no patience with the person who insists that radio must be debasing because of commercial lineage

(Continued on next page)

and guardianship. A greedy and selfish commercialism is a curse to any industry and it always commits suicide. A greedy and unprincipled commercialism in American radio would blight American culture and destroy the industry. Unprincipled greed in anything, in culture itself, will destroy itself.

"Fifty centuries of civilization demonstrate that culture has always been the bride of commerce. Our alphabet was invented by the Phoenician merchants who were forced to devise some accurate means of recording commercial transactions. The desire of the prosperous merchants for entertainment and intellectual stimulation supported the epic poets of Greece and gave birth to the immortal books of Homer. Herodotus, the father of history, was a commercial attache. Only the peace and prosperity of the Greek merchants made possible the unexcelled culture of Athens. Culture followed the arteries of commerce to Rome. During the commercial revival under Charlemagne we also find a cultural renaissance. The high renaissance of the Middle Ages owed its birth to the prosperity of commercial guilds and followed the routes of the great fairs and commercial leagues. It died with the narrowing nationalism of the sixteenth century. Culture sailed on the commercial ships of England to the shores of America, of Australia, Asia and Africa. And the commercial guns of Admiral Dewey opened the gates of Japan to culture. The economic necessities and the leisure furnished by modern commerce are the media in which modern culture must grow.

"Where commerce is throttled by a totalitarian government there culture is stifled as well. What is a threat to the one is a threat to the other. Where commercialism becames so brash and shortsighted as to destroy culture it also destroys itself.

"Friends, let us be realistic—radio is going to be wed to commerce or to government, be that government merely political or totalitarian. We are of the opinion that in a healthy society the government's control of radio can be only that of a traffic officer and nothing more, that radio is wed to commerce and that the union is a legitimate one and unless commerce is so unwise and ungoverned as to bring about its own destruction, it must necessarily foster culture. To help bring about a sound union of commerce and culture is the purpose of this Institute.

"You are not ordinary listeners who do not want to be informed or educated by radio. You are educators and educated listeners who value our cultural heritage. But you are discriminating listeners who detect the dangers of over-commercialization which might cause the death of the radio industry and serious harm to our culture.

"For this reason the radio stations and commercial networks have sent representatives to the Institute who are aware of radio's difficulties and dangers and its obligations to society. They are here to explain their limitations and shortcomings as well as their hopes and aspirations for the betterment of the industry. The industry is improved only when it serves you better. These men and women want you to tell them frankly how they can serve you better because in doing that they are also promoting culture and securing the future of the industry.

"Radio is hardly twenty-five years old but it has a marvelous record of growth to maturity. It is doubtful whether any other industry of comparable proportions has come through those years of infancy and adolescence with a cleaner face or a cleaner escutcheon.

"The radio of the future offers cultural possibilities which have not yet been explored. Any of you who witnessed the television program last night must have been struck by the thought that television of the future can be of untold value in cementing the family together in the home and in making the family a healthy unit of a healthy society. It is our hope, and I think that of the industry, that everything on the air will be healthy and worth bringing into the homes of this nation under God.

"Perhaps radio has now come of age—if it is possible for any industry to come of age in the brief span of twenty-five years. Perhaps now is the time for the critic to come in and have his say, to tell its representative about cheap programs, excessive commercial plugs and gags, shady jokes and poor artistry. But there can be no sound criticism without knowledge, and it seems to be unfortunately true that many of commercial radio's most outspoken critics have lacked broad knowledge and understanding of the American system of radio.

"This institute, we hope, will give you further insight into the complexities of American radio, will acquaint you with some of its problems and plans. Then if you must criticize, and do criticize, let your criticism be intelligent. An intelligent commerce will gladly accept your intelligent criticism. If the industry is intelligent it will promote culture, morality and religion because only in this atmosphere can commerce itself be healthy and secure."

Broadcast Advertising

NAEA Attempt to Boost Retail Rates Meets NRDGA Opposition

The "magazine resolution" which the Newspaper Advertising Executives Association adopted at its summer meeting in San Francisco has met with prompt criticism from Lew Hahn, president and general manager, National Retail Dry Goods Association, whose members contribute a large portion of the annual gross advertising revenue earned by newspapers.

The resolution recommended to NAEA members that they bill at the "general" rate those retail advertisers who feature magazine advertising. Although believed to be aimed at tie-ups with *Look* magazine, the same application of the general rate could be made when retail advertisements featured radio programs, motion pictures or plays.

In a full-page chastisement of the NAEA resolution, Mr. Hahn stated in part:

"Currently, if a retailer, in his advertising, calls attention to some radio program, he is then expected to pay for such advertisement at the rate charged to radio stations, and, if the store chooses to mention some moving picture or stage play, the advertisement is to be required to be paid for at the amusement rate classification.

"What are we coming to? It is still the retailer's advertising! The retailer will mention the magazine, or the radio program, or the film, or play for one purpose only—to enable him to sell goods, not to boost the business of these other enterprises! In our own innocence, we had always supposed newspaper adver-

(Continued on next page)

tising executives had a direct personal interest in seeing that the advertising space purchased by the retailer actually moved merchandise! . . .

"We remember a discussion which was started about a year ago on the matter of retail advertising in which a department store head made the statement, in a meeting in New York, that the store he had formerly directed could trace less than 1 per cent of its sales to its newspaper advertising. Probably few merchants, who are regular users of newspaper space, would have any need to confess to results as sparse as this, but, on the other hand, there are not many stores which have found newspaper advertising as productive of business as the sellers of newspaper advertising like to claim. . . .

"Any way you may wish to look at it, it would seem as though such action, in concert, by the newspapers is bound to have a limiting effect upon the value—and consequently the use—of newspaper advertising."

First of Talks for Presentation Locally Being Distributed to NAB Membership

The first of a series of talks, prepared by NAB's Broadcast Advertising Department for use and delivery by local station executives, is currently being distributed to the membership.

The talk is based on "advertising" and is part of the Sales Promotion Sub-committee's campaign to provide material that will enable radio to tell its story more effectively.

Prepared by Hugh M. P. Higgins, assistant director of broadcast advertising, the speech is suitable for presentation before advertising groups, schools, PTA, Kiwanis, Elks, Rotary Clubs, etc.

Radio Comics' Sabotage of Advertising Scored by Southwestern Agency Association

"A trend among certain radio performers to belittle and ridicule advertising is having the effect of a subtle campaign of sabotage against the entire advertising industry," in the opinion of the Southwestern Association of Advertising Agencies, according to a story which appeared in a recent issue of *Editor & Publisher.*

The Association called upon sponsors of such performers to "reconsider this ill-advised practice of broadcasting programs which tend to destroy public confidence in the value and integrity of advertising."

In announcing the action of his Association, President Thomas F. Conroy, San Antonio, Tex., said:

"The Association agrees that any advertiser has the right, within FTC regulations, to say what he wishes about his own product. But we do not believe he has the moral right to sabotage advertising as a whole and, by burlesque and ridicule, help to undermine public confidence in other peoples' advertising.

"Effects of this kind of sabotage against advertising are particularly apparent in the cynical and disbelieving attitude among youth toward advertising. Advertising, to be effective, naturally must be believed. How can we acvhieve that belief when one of advertising's greatest media discredits it?"

Libel and Slander Insurance

NAB headquarters is interested in receiving from members information they have on companies which have written libel and slander insurance for them and the location of such companies.

News

First Phase of Station Operation Study At Denver U. Covers Radio News

With complete backing of an industry committee and the school's radio committee, J. Russell Porter, coordinator of radio at the University of Denver, has inaugurated an experiment in teaching which demonstrated its worth at the conclusion of the first week which ended July 25.

The experiment is a series of five week-long clinics, each dealing with a particular phase of station operation, with special attention given to small market stations, by a man active within the industry, rather than a regular instructor.

Arthur Stringer, NAB director of special services, was the first guinea pig "professor." He took over the radio news assignment, July 21 through 25. Each of his five class sessions began at 9:00 a.m. and ran for four to five hours, including ten minute breaks, about 10:30 and noon. Mr. Porter said that the "professor" experienced no difficulty in holding the attention of the students, both station people and regular college students, during these unusually long periods.

Live Talent—Denver Editors: As a definite part of the instruction students heard various members of the Denver Radio News Editors Association, of which Jack Fitzpatrick, KFEL news editor, is president. Their assigned talks were designed to fit in with each day's instruction. Speakers included Sheldon Peterson, news editor, KLZ, and Milton Hoffman, KFEL newsman.

Hal Rennolet, farm editor, KOA, handled farm news and farm service. Earl McCain, former KLZ news editor, with long prior experience on the Denver Post, was another newsman to assist with instruction.

Texas Coverage Studied: Pat Flaherty, news editor, KPRC, Houston, assisted by long distance, by preparing a paper on the Texas City disaster. He emphasized that in an emergency, as in daily work, men who can cover and report the news, write and broadcast the news, are essential if the news department is to live up to its responsibilities to public as well as station.

(Continued on next page)

Getting specific, Mr. Flaherty said that "the most glaring fault among the many radio news crews working from the disaster area was the tendency to sensationalize a story which spoke of tragedy and pity from all angles of its presentation. The situation called for a straightforward presentation of the facts and it was no place for radio to become 'newspaper-minded' and blare out with sensational headlines.

" . . . press services carried stories which were very much 'off base' and there were times when our direct broadcast from Texas City contradicted network newsroom reports on the same story.

"In an effort to maintain a steady straight 'filler' broadcast, some stations brought unqualified persons to the microphone for their reports on a dangerous and threatening situation. I actually saw and heard people on the microphone who were there just because they were dirty and ragged . . . It is safer to talk with these people first—to find out what their story is before they are given the liberty of an open microphone. That all goes back to the fundamental that *the spoken word is the most powerful. Therefore, it must be right.*

" . . . I believe all this adds up to a great need in radio news—that all those connected with radio news should be fully impressed that there is a difference between radio news and that which is used and found in a newspaper."

Mr. Stringer explained to the students that it was prior assumption of station responsibility to get the news itself that enabled KPRC to turn in the excellent job it did. Station had a staff of competent radio newsmen, men who can report, write, edit and broadcast, as suggested by the NAB Radio News Committee. Since 1945 this committee has recommended the employment of a minimum of at least one competent full-time radio newsman who reports directly to management.

Governor and Mayor Help: To point up the fact that stations must cover the local front if they are to broadcast local news, the 36 university students and industry members participated in two radio-press conferences: that of Colorado's Governor Lee Knous; and that of Quigg Newton, Denver's Mayor.

The Governor's conference was also used to demonstrate the use of the wire recorder with Editor Peterson of KLZ compressing a half hour conference into a four minute-five second program.

Committee Personnel: Mr. Porter is chairman of the industry planning committee and the University's radio committee, which, in addition to Mr. Porter, consists of the Chancellor, five Deans and five University Administrators.

Members of the industry committee are: Hugh Terry, manager KLZ, NAB district director; Clarence Moore, program director, KOA; Paul Godt, program director, KFEL; Vince Corbett, technical director, KVOC; Jack Todd, general manager, KBOL, Boulder; Allen Miller, Rocky Mountain Radio Council; Ben Bezoff, Bezoff agency; Phil Gray, Gray agency; James Price, Dean, College of Business Administration, University of Denver; Rex Howell, KFXJ, Grand Junction; Gifford S. Phillips, KGHF, Pueblo; and Mr. Porter.

Public Interest Programming

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 11-17, 1947, by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

CARE

The 27 top welfare agencies in the country concerned with foreign aid, which compose CARE (Cooperative for American Remittances to Europe, Inc.) have asked The Advertising Council to call to the attention of the American people that the widespread spring and winter crop devastation in Europe has created a critical food situation there. By sending more CARE food packages to Europe now, and during the coming months, individual Americans can help alleviate hunger overseas. CARE now handles orders for 10,000 packages a day—it can handle 50,000 a day. The goal of this campaign is to present the need to the American people so that, by using CARE's facilities to the maximum, they may bring this additional help as quickly as possible to those in need during the present emergency. President Truman has endorsed this campaign and "commends CARE to the American people" as the non-profit organization through which individual Americans and American groups can get food and clothing textile packages to Europe *now*. Herbert Hoover also endorses CARE. General Eisenhower has called CARE "a person-to-person expression of international good will." 1. Stress the urgent need for food in Europe now and during coming months. Government reports indicate food conditions in many European countries are more desperate than a year ago. Rations are being lowered at a time when malnutrition and disease are taking an increased toll. With UNRRA having terminated its food program, the people of Europe are faced with a critical food situation now. 2. Point out that Americans can help by sending CARE food packages. 3. Describe CARE packages. Because it is non-profit and because of its volume, CARE provides more food, and of higher calorie content, than the individual can purchase any other way. (a) For $10 CARE guarantees delivery of its 21½-pound, 41,000-calorie food package to any individual or group in 15 countries in Europe. Each food package is designed to supplement rations of a family of four for a month. Contents are chosen by top nutritionists to meet most basic shortages; combine with available foods to make nationally preferred dishes; to provide the highest possible calorie content. (b) For $4 CARE delivers (1) a package containing 25 pounds of flour or (2) a package containing 10 pounds of lard. These meet two of the most acute food shortages in Europe today. 4. Point out how simple it is to order a CARE food package: (a) Just send $10 to "CARE"—New York, for a package containing 21½ pounds of food, or $4 for either 10 pounds of lard or 25 pounds of flour. (b) Give your name and address and name and address of recipient. If you do not have the name of an individual or group you may designate a classification of individual you would like to help—such as "a French orphan," or "a Polish widow and family," or "a needy Austrian postman." You will receive a signed receipt upon delivery. (Fact Sheet No. 39.)

United America—Group Prejudice—A Post War Menace

To divide the United States along racial and religious lines, and so to conquer it was the chief hope of our enemies during the war. In fact, it was the possibility that America could be thus weakened and disintegrated by conflict between group and group that gave the Axis the courage to embark on its catastrophic adventure. This Axis strategy was defeated. But today we cannot afford division any more than we could during the war. We have two great tasks before us: (1) to build a peaceful world; (2) to press forward on the home front to high production and prosperity. The achievement of both these goals becomes immeasurably more difficult if America is torn by racial and religious strife. A divided America seems weak in the eyes of the world and is disabled as a force for peace. What makes the danger of division especially acute at the present time is that many real problems now confront the American people—problems of housing for veterans and other civilians, jobs for the returning servicemen, strikes, shortages of food and household goods, rising costs of living. In the midst of post-war dislocations and unrest, the "scapegoat" technique of blaming all difficulties on one group or another is likely to pay off well. Political quacks and adventurers belonging to the "lunatic fringe" of American life seek to gain adherents and make easy money for themselves by diverting citizens from their real problems and attacking some racial or religious group as being "at the bottom of" the shortages, the strikes, or the rising prices. People who, out of indifference to American principles of racial and religious freedom, and "undecided" about prejudice, or who might support hate campaigns against Protestants or Jews, Catholics or Negroes, are potential confederates or dupes of such subversive forces. We can (1) recognize such antagonisms for what they are: a danger to the nation that is particularly acute in the midst of post-war dislocations and unrest; (2) isolate such antagonisms and quarantine them, prevent them from spreading and infecting the whole community; malicious slanders against groups of fellow Americans cannot be respected as "honest opinions"; (3) guard ourselves and our families against the danger of contracting prejudices and passing them on, however innocently—we can refuse to listen to or spread stories which discredit members of any race or religion—we can make sure that we judge our fellow-men by the character of their lives alone, and not on the basis of their race or religion—we can keep our children from absorbing prejudice. (Fact Sheet No. 31.)

Buy U. S. Savings Bonds—"Save the Easy Automatic Way"

The way the public debt is managed will affect the life of every American for years to come, as regards money supply, the price level, business conditions and what the dollar will buy; and wise management of the debt demands that ownership of U. S. securities be spread as widely as possible among individuals. Beginning June 1, the U. S. Treasury, in cooperation with the banks of America, is inaugurating an easy, automatic method—The Bond-A-Month Plan—of buying Bonds for the millions of Americans not on regular payrolls. The backbone of the Savings Bonds program is still the Payroll Savings Plan, and, although it is receiving whole-hearted support from industry, recent surveys show that this method now needs additional stimulation. The rate of interest, sound investment value, and convenience of purchase of U. S. Savings Bonds make them the ideal way for the individual investor to save for the future. Money invested in U. S. Savings Bonds today will make possible long-range personal objectives like retirement incomes, education for the children, new homes, the most enjoyable use of leisure time. As an investment, U. S. Savings Bonds are safe, profitable. The effective way to provide for the future is through regular savings. Regular saving is easy and automatic if you sign up for the Payroll Savings Plan where you work, or the Bond-A-Month Plan where you bank. (Fact Sheet No. 11-G.)

Federal Communications Commission Docket

HEARING

The following is the only published hearing scheduled for the week beginning Monday, August 4. It is subject to change.

Thursday, August 7

Further Hearing

(Washington, D. C., 10:00 A. M.)

NEW—Abilene Broadcasting Co., Abilene, Tex.—C. P. **1340 kc.,** 250 watts, unlimited.

NEW—Citizens Broadcasting Co., Inc., Abilene, Tex.—C. P. **1340 kc.,** 250 watts, unlimited.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

910 KC.

The Commission announces its **Final Decision** * (B-365) granting application of **Paul F. Braden** for new station at **Middletown, Ohio,** to operate on 910 kc., 1 KW, daytime only (BP-4680; Docket 7587), and denying mutually exclusive application of **I and E Broadcasting Co.** for new station at **Dayton, Ohio.** (BP-4659; Docket 7586)

920 KC.

The Commission announces its **Order** * granting applications of (1) **Lee-Smith Broadcasting Co.** (BP-4581; Docket 7875) for new station at **Faribault, Minn.,** to operate on 920 kc., 1 KW, unlimited time; (2) **Associated Broadcasters, Inc.** (BP-5351; Docket 8038) for same facilities at **Wadena, Minn.;** and (3) **KFNF, Inc.,** for CP to change antenna site and increase daytime power to 5 KW, of Station KFNF, **Shenandoah, Iowa,** now operating on 920 kc., with 1 KW day and 500 watts night (BP-5840; Docket 8164); conditions.

Further ordered that petition of Associated Broadcasters, Inc., requesting severance and grant of its application be dismissed as moot.

940 KC.

The Commission announces adoption of a **Proposed Decision and Order** * denying the application of **Capitol Broadcasting Corp.** to change frequency of **WISH, Indianapolis, Ind.,** from 1310 kc. to 940 kc., and increase power from 5 KW day, 1 KW night, to 5 KW, unlimited time (BP-4979; Docket 7671), and ordered that the Motion for Stay of Proceedings and petition by WISH for comparative consideration in the matter of the application of **Independent Broadcasting Co., Des Moines, Iowa** (BP-3770; Docket 6734) be dismissed.

Adopted an **Order** * granting application of **Independent Broadcasting Co.** for a new station at **Des Moines, Iowa,** to operate on 940 kc., 5 KW night, 10 KW day, directional antenna day and night, unlimited time (BP-3770; Docket

---

* Commissioner Durr not participating.

(Continued on next page)

6734) subject to reaffirmation of approval of antenna site by CAA.

960–1240 KC.

The Commission announces its **Order*** granting petition of **KROW, Inc.**, for leave to amend its application to specify a new directional pattern and a new antenna site, for reconsideration of its application, as amended, and grant; and granted said application as amended for CP to change facilities of **KROW, Oakland, Calif.**, from 960 kc., 1 KW, unlimited time, DA day and night, to 960 kc., with 5 KW unlimited time, DA day and night, and to change transmitter location from Oakland to San Francisco, Calif. (BP-4283; Docket 7101); conditions.

Further ordered that application of **KOVO Broadcasting Co.** (BP-3667; Docket 6739), for CP to change facilities of **KOVO, Provo, Utah,** from 1240 kc., 250 watts, unlimited, to 960 kc., 1 KW, unlimited time, DA night, be granted; conditions.

Further ordered that the Proposed Decision in the above matters, as herein modified, be made final, and that the exceptions thereto and the request for oral argument thereon of KROW, Inc., be dismissed as moot.

1250 KC.–1450 KC.

The Commission announces its **Final Decision** (B-347) granting the application of **Radio Fort Wayne, Inc.,** for a new station at **Fort Wayne, Ind.,** to operate on 1450 kc., 250 watts, unlimited time; engineering conditions, and subject to the further condition that it shall not commence operation until Farnsworth Television and Radio Corp. shall be licensed to operate Station **WGL, Fort Wayne, Ind.,** on 1250 kc. (Docket 7877)

At the same time the Commission denied applications of **Homer Rodeheaver** (Docket 7097) and **Community Broadcasting Corp.** (Docket 7699) seeking same facilities.

Commissioner Walker not participating; Commissioners Durr and Hyde dissenting, considering that the Proposed Decision looking toward the grant of the application of Community Broadcasting Corp. should be made final.

1330 KC.

The Commission announces its **Final Decision** (B-338) granting the application of **WJPS, Inc.,** for a new station at **Evansville, Ind.,** to operate on 1330 kc., 5 KW day, 1 KW night (BP-3293; Docket 6921), and a denial of the application of **Tri-State Broadcasting Corp.** for new station at **Evansville,** seeking the same frequency with power of 5 KW day and night. (BP-4119; Docket 6922)

Commissioners Denny and Jett considers that the application of Tri-State Broadcasting Corp. should be granted for the reason stated in the Proposed Decision.

1450 KC.

The Commission announces adoption of a **Proposed Decision*** looking toward a grant of the application of Lester R. Taylor, tr/as **Mid-Utah Broadcasting Co.** for a new station at **Provo, Utah,** to operate on 1450 kc., 250 watts, unlimited time (BP-4774; Docket 7572), and a denial of the mutually exclusive application of Dan B. Shields, tr/as **Utah Valley Broadcasting Co.,** seeking the same facilities. (BP-4693; Docket 7571).

At the same time the Commission adopted an Order* denying motion filed by Utah Valley Broadcasting Co. for leave to amend its application so as to add additional partners of applicant, since it appeared that good cause for waiving Commission Rules has not been shown.

1490 KC.

The Commission announces its **Proposed Decision*** looking toward a grant of the application of **United Broadcasting Co.** for a new station at **Ogden, Utah,** to operate on 1490 kc., 250 watts, unlimited time (BP-4107; Docket 6885), and denial of the mutually exclusive application of **Ogden Broadcasting Co., Inc.** (BP-4553; Docket 7435)

---

* Commissioner Durr not participating.

AM—New CP's Granted

730 KC.

Columbia Basin Broadcasting Co., Ephrata, Wash.—Granted CP for a new station to operate on 730 kc., 250 watts, daytime only. (BP-6005)

740 KC.

Raymond L. Prescott, Jr., Henry L. Wilson, d/b as Tri-Cities Broadcasting Co., Tullahema, Tenn.—Granted CP for a new station to operate on 740 kc., 250 watts, daytime only; engineering conditions. (BP-6127)

820 KC.

Michael J. Mintern as Overseer of the Christian Catholic Church, Zion, Ill.—Granted CP for a new station to operate on 820 kc., 5 KW, limited time, 11 a. m. to 1 p. m., and 2 to 5 p. m. Sundays, sharing time with station WAIT, Chicago. (BP-6059) (Comr. Walker voted to continue WAIT renewal application in hearing; also for hearing on associated applications.)

860 KC.

Radio Atlanta, Inc., Atlanta, Ga.—Granted CP for a new station on 860 kc., 1 KW, daytime only, engineering conditions, and a further condition that Roby Robinson divest himself of his interest in WCON, Atlanta, or sever his connection with the applicant. Also adopted an order dimissing petition filed by News Publishing Co., licensee of WLAQ, Rome, Ga., operating on 670 kc., 1 KW, day, requesting that the application of Radio Atlanta, Inc. (BP-5653), which at the time said petition was filed, requested operation on 670 kc., 1 KW, day, be designated for hearing and that WLAQ be made a party to such hearing.

910 KC.

KJAN Broadcasting Co., Inc., Opelousas, La.—Granted CP for new station to operate on 910 kc., 1 kw., unlimited time, DA night, subject to CAA approval. (BP-5143)

1050 KC.

Southwestern Broadcasting Co., North Little Rock, Ark.—Granted CP for a new station to operate on 1050 kc., 1 KW, daytime only; engineering conditions. (BP-5788)

1240 KC.

Nolan Hallewell, James E. McKahan, d/b as Home Appliance Store, Susanville, Calif.—Granted CP for a new station to operate on 1240 kc., 250 watts, unlimited time; engineering conditions. (BP-6090)

1450 KC.

WBUY—Davidson County Broadcasting Co., Lexington, N. C.—Granted CP to change frequency from 1190 to 1450 kc., hours of operation from day to unlimited, and make changes in transmitting equipment. (BP-5715)

AM—License Renewals and Extensions

The following stations were granted renewal of licenses for the period ending August 1, 1950:

WHGB, Harrisburg, Pa.; WHYN, Holyoke, Mass.; KFPW, Fort Smith, Ark.; WFTL, Ft. Lauderdale, Fla.; WDWS, Champaign Ill.; WLLH, Lowell, Mass.; KNAK, Salt Lake City; WINC, Winchester, Va.; KCOL, Ft. Collins, Colo.; KRLC, Lewiston, Idaho; KTMC, McAlester, Okla.; KVGB, Great Bend, Kans.; WFOR, Hattiesburg, Miss.; WHAL, Shelbyville, Tenn.; WHUN, Huntingdon, Pa.; WLCS, Baton Rouge, La.; KCLA, Pine Bluff, Ark.; WELL, Battle Creek, Mich.; WMBC, Macon, Miss.; KIUN, Pecos, Texas; WIRA, Fort Pierce, Fla.; and KMHL, Marshall, Minn.; and WWJ-Aux., Detroit Mich.

Licenses for the following stations were extended upon a temporary basis to October 1, 1947, for the reasons indicated:

KIFI—Eastern Idaho Broadcasting Co., Idaho Falls, Idaho—Pending receipt of information requested under Sec. 308(b) of the Act, and further accounting study.

(Continued on next page)

KLIZ—Brainerd Broadcasting Co., Brainerd, Minn.—Pending receipt of information requested under Sec. 308(b) of the Act, and further accounting study.

WATL—Atlanta Broadcasting Co., Atlanta, Ga.—Pending receipt of information requested under Sec. 308(b) of the Act, and further accounting study.

KKIN—D. T. Kinnie, Visalia, Calif.—Pending study of application filed July 18.

WGNH—General Newspapers, Inc., Gadsden, Ala.—Pending study of application filed July 23.

KGKL—KGKL, Inc., San Angelo, Texas—Pending study of application filed July 17.

KRE—Central California Broadcasters, Inc., Berkeley, Calif.—Pending further engineering study.

KBIO—Jessica L. Longston, Burley, Idaho—Pending study of information requested under Sec. 310(b) of the Act.

WGIL—Galesburg Broadcasting Co., Galesburg, Ill.—Pending study of information requested under Sec. 310(b) of the Act.

KTRC—The New Mexico Publishing Co., Santa Fe, N. Mex.—Pending receipt of information requested under Sec. 308(b) of the Act.

KFVD—Northwest Broadcasting Co., Ft. Dodge, Iowa—Pending receipt of information requested under Sec. 308(b) of the Act.

WELM—James Robert Meachem, Elmira, N. Y.—Pending receipt of information requested under Sec. 308(b) of the Act.

WCTT—The Corbin Times-Tribune, Corbin, Ky.—Present license extended upon a temporary basis to October 1, 1947, pending receipt of renewal application.

WAIT—Radio Station WAIT, Chicago, Ill.—Granted renewal of license for WAIT (BR-604), and application for modification of license (BML-1254) to change hours of operation from limited to sunset at Dallas, to limited to sunset at Dallas, except for the hours between 11 a. m. to 1 p. m. and 2 to 5 p. m. each Sunday.

AM—Designated for Hearing

550 KC.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Designated for hearing application to increase daytime power from 1 KW to 5 KW and install a new transmitter (BP-5733) to be heard in consolidation with applications of KFMB (Docket 8115) and KLIK (Docket 8116).

960 KC.

Platte Valley Broadcasting Corp., Scottsbluff, Neb.—Designated for hearing application for a new station to operate on 960 kc., 1 KW, daytime only. (BP-5714).

980 KC.

Crescent Broadcast Corp., Shenandoah, Pa.—Designated for hearing application for CP (BP-4092) for a new station to operate on 980 kc., 5 KW, unlimited time, DA-1.

1450 KC.

The Acme Broadcasting Corp., Elizabethtown, Ky.—Designated for hearing application for a new station to operate on 1450 kc., 250 watts, unlimited time. (BP-5941).

AM—Licenses for New Stations Granted

1430 KC.

WILS—Lansing Broadcasting Co., Lansing, Mich.—Granted license for new station; 1430 kc., 500 watts, daytime only; conditions, and for change of studio location. (BL-2308)

1470 KC.

WWOK—Drohlich Brothers, Flint, Mich.—Granted license for new station; 1470 kc., 1 KW-DA, unlimited time, and to specify studio location. (BL-2515)

1600 KC.

KPMO—Valley Broadcasting Co., Pomona, Cal.—Granted license for new station; 1600 kc., 500 watts, unlimited time, and to specify studio location. (BL-2448)

AM—Modifications of CP's Granted

KOBE—The Mesilla Valley Broadcasting Co., Las Cruces, N. M.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to specify studio location. (BMP-2817)

KIMO—The Blue Valley Co., Independence, Mo.—Granted modification of CP to change type of transmitter and make changes in vertical antenna. (BMP-2903).

KTRB—Blackstone Broadcasting Co., Tyler, Texas—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location and to specify studio location. (BMP-2793)

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted modification of CP for extension of completion date to 8-18-47.

KWOA—Worthington Broadcasting Co., Worthington, Minn.—Granted modification of CP for approval of antenna, transmitter and studio locations. (BMP-2869)

KTEM—Bell Broadcasting Co., Temple, Tex.—Granted modification of CP for extension of completion date to 10-18-47. (BMP-2934)

KTXL—WesTex Broadcasting Co., San Angelo, Tex.—Granted modification of CP for approval of antenna and transmitter location, and to specify studio location. (BMP-2807)

WSTS—Sandhills Broadcasting Corp., Southern Pines, N. C.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to specify studio location. (BMP-2815)

WPTN—Broadcasters Associates, Paris, Tenn.—Granted modification of CP for approval of antenna, transmitter and studio locations. (BMP-2831)

KWTC—Mojave Valley Broadcasting Co., Barstow, Cal.—Granted modification of CP to change transmitter and studio locations. (BMP-2826)

Patroon Broadcasting Co., Inc., Albany, N. Y.—Granted modification of CP for extension of commencement date to 9-20-47. (BMP-2931)

KTAN—Denison Broadcast Corp., Sherman, Tex.—Granted modification of CP to change type of transmitter and to change transmitter and studio locations. (BMP-2832)

WCOM—Parkersburg Broadcasting Co., Parkersburg, W. Va.—Granted modification of CP to make changes in transmitting equipment, for approval of antenna and transmitter site, and to change studio location. (BMP-2748)

WAGE—WAGE, Inc., Syracuse, N. Y.—Granted modification of CP, which authorized increased daytime power of 5 KW, to specify 5 KW night power, installation of a new transmitter, changes in nighttime DA, and change in location, subject to (1) WAGE taking full responsibility for all changes made in WSYR's equipment to prevent internal modulation and antenna re-radiation problems between the two stations as well as to provide two satisfactory monitoring receivers; (2) approval by CAA of the proposed transmitter site and antenna system, and (3) satisfying all legitimate complaints of blanket interference occurring within the 250 mv/m and 500 mv/m contours. (BMP-2731).

WSAC—Chattahoochee Broadcasting Co., Columbus, Ga.—Granted modification of CP for approval of DA for day and night use, make changes in transmitting equipment and change transmitter location (BMP-2691).

(Continued on next page)

AM—Miscellaneous Actions

The Commission, on its own motion, on July 28, ordered the hearing in the matter of **Clear Channel Broadcasting** (Docket 6741) be continued from September 17 to September 29, 1947.

Wired Music, Inc., Rockford, Ill.—Granted petition insofar as it requests leave to amend application (BP-5296) so as to specify 100 watts power instead of 250 watts, and make other changes; accepted said amendment; insofar as petition requests enlargement of issues, it is dismissed. (Docket 7964)

Governor Dongan Broadcasting Corp., Albany, N. Y.—Granted petition for leave to amend its application (BP-6124) so as to show the addition of five minor stockholders; and make other changes; accepted said amendment (Docket 8440)

KPSC—Sun Country Broadcasting Co., Phoenix, Ariz.—Granted petition for leave to amend its application (BP-5945) so as to show revised transmitter site; make other changes; accepted amendment. (Docket 8393)

Blackhawk Broadcasting Co., Sterling, Ill.—Granted petition for leave to amend its application (BP-5409) so as to add supplemental engineering report containing additional information concerning possible interference to certain existing stations; accepted said amendment. (Docket 8179)

The Gate City Company, Keokuk, Iowa—Granted petition for leave to amend its application (BP-5858) so as to show current information on qualification of applicant's officers, directors and stockholders, and make other changes; accepted said amendment. (Docket 8196)

DeKalb Radio Studios, DeKalb, Ill.—Granted petition insofar as it requested leave to amend its application (BP-5648) so as to specify 500 watts power instead of 250, and to change paragraphs 16 and 25-28 of application to show change in power and engineering information incidental thereto; accepted said amendment. (Docket 8419)

Western Maryland Broadcasting Corp., Hagerstown, Md.—Granted petition for leave to amend its application (BP-5850) so as to change name to "Cavalier Broadcasting Corp." and accepted said amendment. (Docket 8201)

WCNT—Hobart Stephenson, Centralia, Ill.—Granted petition to dismiss without prejudice its application for CP. (BP-5693; Docket 8174)

WARM—Union Broadcasting Co., Scranton, Pa.; WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—The Commission, on its own motion, ordered enlargement of the issues in the proceeding upon applications in Dockets 7851 and 7852.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted petition for leave to amend its application (BP-5186) so as to change paragraph 14 to show more detailed information concerning the feed system used with petitioner's directional array; accepted said amendment. (Docket 7851)

KBTM—Regional Broadcasting Co., Jonesboro, Ark.—Granted petition for waiver of Sec. 1.387 and late acceptance of written appearance in re application of Scott County Broadcasting Co., Sikeston, Mo. (BP-5796; Docket 8413)

Mason City Broadcasting Co., Mason City, Iowa—Granted petition for leave to amend its application (BP-5324) so as to add a supplemental engineering study relative to other radio service available to the area proposed to be served; accepted said amendment. (Docket 8166)

KCOK—Herman Anderson, Tulare, Calif.—Granted petition insofar as it requests leave to amend its application (BP-5050) so as to specify new transmitter site and make other changes; accepted said amendment; removed amended application from hearing docket (Docket 8394): further ordered that insofar as petition requests grant without hearing, the petition is dismissed.

KAKC—Public Radio Corp., Tulsa, Okla.—Granted petition to enlarge issues in proceeding in Dockets 8043, 8064, 8065 and 8270, and amended Notice of Hearing to include issue: "To determine the type and character of program service rendered by KOIN to the areas and populations that would be lost, if any, to KOIN if the application of Public Radio Corp. (KAKC) were granted, and the character of other broadcast services available to those areas and populations."

KTHS—Radio Broadcasting, Inc., West Memphis, Ark.—Denied petition to enlarge the issues in the proceeding upon applications of KTHS (Docket 7086), Radio Broadcasting, Inc., Hot Springs, Ark. (Docket 7156); WMFJ (Docket 7355); and Hot Springs Broadcasting Co., Hot Springs, Ark. (Docket 7652).

WBRK—Leon Podolsky, Pittsfield, Mass.—Granted consent to assignment of license of WBRK and permit for associated FM station, from Leon Podolsky to Greylock Broadcasting Co., a corporation, for a consideration of $150,000. (BAL-595).

KGFJ—Ben S. McGlashan, Los Angeles, Calif.—Granted CP to increase power from 100 watts to 250 watts and make changes in transmitting equipment, and to operate with such increased power only such hours as KPPC, Pasadena, is not operating. (BP-6096)

Eastern Oklahoma Broadcasting Corp., Muskogee, Okla.—Denied petition for rehearing directed against Commission decision and order of April 30, 1947, granting petition of Wichtex Broadcasting Co. for severance and grant of its application for CP (Docket 7127; BP-3981), granting petition of KTOK, Inc., for removal from hearing docket and grant of its application (BP-4763; Docket 7775), and denying petitioner's petition filed December 23, 1946, requesting consolidation of its application for CP (BP-4996; Docket 8386) for hearing with said applications of Wichtex and KTOK.

Adopted an order setting for oral argument on September 25, a petition by **WORL, Boston,** for rehearing or reconsideration of the Commission's decision (Docket 6626). (Commissioner Hyde not participating.)

WKAT, Inc., Miami Beach, Fla.—Denied petition requesting Commission to order WMBM, Miami Beach, Fla., to show cause why its permit should not be modified to specify use of 1360 kc. with either 5 KW or 1 KW power day and 1 KW power night instead of its present daytime facilities on 800 kc. and that the order be consolidated with the proceeding on petitioner's application.

Metropolitan Broadcasting Co. of Milwaukee, Wis.—Ordered that waiver of hearing be accepted, and removed application (BP-5755; Docket 8202) from hearing calendar.

Hillsdale Broadcasting Co., Inc., Hillsdale, Mich.—On Commission's own motion, ordered that application (BP-5281; Docket 7941) be removed from hearing docket and placed in pending file until a decision is announced in the matter set out in the May 9th public notice re daytime operation on a U. S. clear channel frequency. Docket 8333.

KVOL—Evangeline Broadcasting Co., Lafayette, La.—Denied the petition filed by KVOL requesting that its application (BP-5668) be designated for hearing in consolidated proceeding with application of KTBS (Docket 7598) and application of KRMD (BP-5983) and Shreveport Broadcasters (BP-5939).

WILX—Carolina-Northwest Broadcasting Co., No. Wilkesboro, N. C.—Granted consent to assignment of permit for WILX, from Edney Ridge and Hadley Hayes, a partnership, d/b as Carolina-Northwest Broadcasting Co., to a newly organized North Carolina Corporation of the same name. No money involved. (BAP-52).

KSST—Hopkins County Broadcasting Co., Sulphur Springs, Texas—Granted consent to assignment of license of station KSST from Hopkins County Broadcasting Co., a partnership, to Hopkins County Broadcasting Co., a corporation. No money involved. (BAL-610).

KHUB—Luther E. Gibson, Watsonville, Calif.—Granted petition to dismiss without prejudice its application (BP-5586; Docket 8362).

KYOR—Silver Gate Broadcasting Co., San Diego, Calif.—The Commission, on its own motion, removed from the hearing docket application (BP-5438; Docket 8361).

Deep South Broadcasting Corp., New Orleans, La.; WNOE, James A. Noe, New Orleans, La.—Dismissed as moot joint

(Continued on next page)

petition for extension of time to file exceptions to the Commission's proposed decision in these proceedings.

Deep South Broadcasting Corp., New Orleans, La.; WNOE, James A. Noe, New Orleans, La.—Granted joint petition insofar as it requests leave to amend their applications so as to specify 5 KW nighttime; show a revised directional antenna pattern, etc.; for reopening the record for the purpose of incorporating these amendments; and on its own motion the Commission scheduled a further hearing in this proceeding for September 4, 1947.

Democrat Printing Co., Durant, Okla.—Granted petition to dismiss without prejudice its application (BMP-2566; Docket 8303).

Medford Radio Corp., Medford, Ore.—Granted petition for extension of time in which to file a reply brief in the proceeding re applications for assignment of license of KMED, and the time was extended to and including August 5.

Hilding V. Foreen, Merrill, Wis.—Granted petition for leave to amend his application (BP-5877; Docket 8208) so as to substitute the Lakeland Broadcasting Corp. as the applicant instead of Hilding V. Foreen as an individual.

The Montana Network, Inc., Billings, Mont.—Granted petition insofar as it requests leave to amend and remove from the hearing docket its application (BP-5716; Docket 8345), so as to request use of a DA at night; show a new transmitter site, etc. Insofar as petition requests grant without hearing, it is dismissed.

Radio Broadcasting Associates, Houston, Texas—Granted petition to dismiss without prejudice its application (BP-4563; Docket 7910).

Lewis Service Corp., Weston, W. Va.—Granted petition for leave to amend its application (BP-6054; Docket 8464), so as to add to the application a supplementary engineering exhibit containing field intensity measurements.

N-K Broadcasting Co., Muskegon, Mich.—Granted petition for leave to amend its application (BP-6071; Docket 8408), so as to add a revised partnership agreement showing financial interests of the two partners of applicant partnership.

Keystone Broadcasting Corp., Harrisburg, Pa. et al.—Granted joint petition requesting a continuance of consolidated hearing presently scheduled for August 11, and continued same to September 15, 1947.

KVOL—Evangeline Broadcasting Co., Lafayette, La.—Dismissed petition requesting reconsideration of the Commission's action of April 30, 1947, granting without hearing the application of Mobile Daily Newspapers, Inc.

American Pacific Radio Broadcasting Co., Redlands, Calif.—Granted petition for leave to amend its application (BP-5544; Docket 8314), so as to change transmitter and studio locations from Redlands to Corona, Calif.

WHBC—Ohio Broadcasting Co., Canton, Ohio—Granted petition to intervene in the hearing on application of Radio Courier, Inc., E. Liverpool, Ohio (Docket 8432). Also granted oral request to intervene in the hearing on application of E. Liverpool Broadcasting Co. (Docket 8171).

Radio Greenville, Greenville, Ala.—Granted petition to dismiss without prejudice its application (BP-6025; Docket 8443).

The Greenville Broadcasting Co., Greenville, Ala.—The Commission, on its own motion, removed from the hearing docket application. (BP-6094; Docket 8444).

Heights Broadcasting Co., Cleveland, Ohio—Granted petition for leave to amend its application (BP-5412; Docket 8266), so as to show deletion of one Ralph Nathanson as a stockholder of applicant corporation.

900 KC.

Bastrop Broadcasting Co., Bastorp, La.—Granted petition for leave to amend its application (BP-6049; Docket 8410), so as to specify the frequency 900 kc., with 1 KW daytime only, instead of 1240 kc., 250 watts unlimited. The amendment was accepted and application removed from hearing docket.

960 KC.

Mt. Pleasant Broadcasting Co., Mt. Pleasant, Texas—Granted petition for leave to amend its application (BP-5439) so as to specify the frequency 960 kc. with 1 KW, daytime only, instead of 1340 kc., 250 watts, unlimited time. Earl C. Hankamer, Houston, Texas—Class B. (BPH-1286)

FM—New Noncommercial Educational CP Granted

Iowa State College of Agriculture and Mechanical Arts, Ames, Iowa—Granted CP for a new station (Channel No. 217); 91.3 mc.; 8.3 KW; antenna 520 feet. (BPED-39)

FM—Modifications of CP's Granted

WTRI—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted modification of CP for extension of completion date to 12-21-47. (BMPH-554)

WJPG-FM—Green Bay Newspaper Co., Nr. Green Bay, Wisc.—Granted modification of CP for extension of completion date to 9-3-47. (BMPH-556)

WKNP—Corning Leader, Inc., Corning, N. Y.—Granted modification of CP for extension of completion date to 9-27-47. (BMPH-560)

KQV-FM—Allegheny Broadcasting Corp., Pittsburgh, Pa. Granted modification of CP for extension of commencement and completion dates to 7-15-47 and 12-28-47, respectively. (BMPH-512)

WJIM-FM—WJIM, Inc., Lansing, Mich.—Granted modification of CP for extension of commencement and completion dates to 1-1-48 and 7-1-48, respectively. (BMPH-540)

WDOD-FM—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted modification of CP for extension of completion date to 11-18-47. (BMPH-557)

KPOR—The Broadcasting Corporation of America, Riverside, Calif.—Granted modification of CP for extension of completion date to 1-19-48. (BMPH-551)

WSVA-FM—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted modification of CP for extension of completion date to 1-29-48. (BMPH-514)

WMMW-FM—Silver City Crystal Co., Meriden, Conn.—Granted modification of CP for extension of completion date to 11-23-47. (BMPH-510)

WFIL-FM—Triangle Publishers, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa.—Granted modification of CP to change completion date to 9-10-47. (BMPH-192)

KIMV—Hutchinson Publishing Co., Grand Township, Kans.—Granted modification of CP for extension of completion date to 1-27-48. (BMPH-513)

WRGK—George M. Ives, Brookfield, Ill.—Granted modification of CP for extension of completion date to 1-14-48. (BMPH-527)

WHKY-FM—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted modification of CP for extension of completion date to 11-4-47. (BMPH-495)

KTRH-FM—KTRH Broadcasting Co., Houston, Texas—Granted modification of CP for extension of completion date to 2-12-48. (BMPH-533)

WFMY—Greensboro News Co., Greensboro, N. C.—Granted modification of CP for extension of completion date to 11-11-47. (BMPH-534)

WKRS—Keystone Printing Service, Inc., Waukegan, Ill.—Granted modification of CP for extension of completion date to 11-13-47. (BMPH-563)

WQXQ—Interstate Broadcasting Co., Inc., New York City.—Granted modification of CP for extension of completion date to 12-31-47. (BMPH-536)

WSMB-FM—WSMB, Inc., New Orleans, La.—Granted modification of CP for extension of completion date to 1-28-48. (BMPH-537)

WESX-FM—North Shore Broadcasting Co., Salem, Mass.—Granted modification of CP for extension of completion date to 11-18-47. (BMPH-539)

WESB-FM—Bradford Publications, Inc., Bradford, Pa.—Granted modification of CP for extension of completion date to 11-17-47. (BMPH-562)

WJTN-FM—James Broadcasting Co., Inc., Jamestown, N. Y.—Granted modification of CP for extension of completion date to 10-16-47. (BMPH-574)

WGHF—William G. H. Finch, New York City—Granted modification of CP for extension of completion date to 11-10-47. (BMPH-569).

WDXE—Johnston Broadcasting Co., Birmingham, Ala.—Granted modification of CP for extension of completion date to 11-24-47. (BMPH-575)

KRBA-FM—Darrell E. Yates, Lufkin, Tex.—Granted modification of CP for extension of completion date to 11-14-47. (BMPH-571)

WJNO-FM—WJNO, Inc., West Palm Beach, Fla.—Granted modification of CP for extension of completion date to 11-6-47 (BMPH-568)

WAPO-FM—WAPO Broadcasting Service, Chattanooga, Tenn.—Granted modification of CP for extension of completion date to 1-21-48. (BMPH-570)

WOL-FM—Cowles Broadcasting Co., Washington, D. C.—Granted modification of CP for extension of completion date to 11-26-47. (BMPH-553)

FM—Frequency Assignment

(In lieu of previous assignment)

Copeley Press, Inc., Joliet, Ill.—92.7 mc. (Channel 224) proposed.

FM—Designated for Hearing

Suffolk Broadcasting Corp., Coram, L. I., N. Y.—Designated for hearing, application for a Class B station in lieu of Class A station previously granted on Aug. 23, 1946. (BMPH-409). (Action taken by the Commission on July 28).

(Continued on next page)

FM—Applications Accepted for Filing

WAIR-FM—WAIR Broadcasting Co., Winston-Salem, N. C. (C. G. Hill & George D. Walker)—Modification of construction permit (B3-PH-468, as modified) which authorized a new FM broadcast station, for extension of completion date.

WLWA—Crosley Broadcasting Corp., Cincinnati, Ohio—Modification of construction permit (B2-PH-214, as modified) which authorized a new FM broadcast station, to make changes in antenna system and change commencement and completion dates.

WCOL-FM—The Pixleys, Columbus, Ohio (Lloyd A. Pixley, Martha P. Pixley, Milton A. Pixley, and Grace M. Pixley, partners)—Modification of construction permit (B2-PH-307, as modified) for extension of completion date.

KSEO-FM—Democrat Printing Co., Durant, Okla. (B. F. Story and Bennett Story)—Modification of construction permit (B3-PH-855, as modified) which authorized a new FM broadcast station, for extension of completion date.

WLVA-FM—Lynchburg Broadcasting Corp., Lynchburg, Va.—Modification of construction permit (B2-PH-476, as modified) for extension of completion date.

WGTM-FM—Penn Thomas Watson, Wilson, N. C.—Modification of construction permit (B3-PH-829, which authorized a new FM broadcast station) for extension of completion date.

WFMJ-FM—The WFMJ Broadcasting Co., Youngstown, Ohio—Modification of construction permit (B2-PH-187, which authorized a new FM broadcast station) for extension of completion date.

NEW—United Broadcasting Co., Inc., Silver Spring, Md. (P. O. 8512 Georgia Ave.)—Construction permit for a new FM broadcast station (Class A) to be operated on Channel 240, 95.9 mc., ERP of 500 watts, and antenna height above average terrain 340 feet.

KSEI-FM—Radio Service Corp., Pocatello, Idaho—Modification of construction permit (B5-PH-512, as modified) which authorized a new FM broadcast station, for extension of completion date.

WFAS-FM—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of construction permit (B1-PH-176, which authorized a new FM broadcast station) for extension of completion date.

WCTS—The Cincinnati Times-Star Co., Cincinnati, Ohio—Modification of construction permit (B2-PH-289, as modified) which authorized a new FM broadcast station, for extension of completion date.

WFBU-FM—Hawley Broadcasting Co., Reading, Pa.—Modification of construction permit (B2-PH-121, as modified) which authorized a new FM broadcast station, for extension of completion date.

WSJN—Radio Americas Corp., San Juan, P. R.—Modification of construction permit (BPH-822, which authorized a new FM broadcast station) for extension of completion date.

WHFB-FM—The Palladium Publishing Co., Benton Harbor, Mich.—Modification of construction permit (B2-PH-288, as modified) which authorized a new FM broadcast station, for extension of completion date.

WKIL—Kankakee Daily Journal Co., Kankakee, Ill.—Modification of construction permit (B4-PH-717, as modified) which authorized a new FM broadcast station, for extension of completion date.

WKMO-FM—Kokomo Broadcasting Corp., Kokomo, Ind.—Modification of construction permit (B4-PH-434, as modified) which authorized a new FM broadcast station, to extend completion date.

WMCP—Belvedere Broadcasting Corp., Baltimore, Md.—Modification of construction permit (B1-PH-782, which authorized a new FM broadcast station) to specify studio location, change transmitter site, make changes in antenna system, and change commencement and completion dates.

WLBC-FM—Donald A. Burton, Muncie, Ind.—Modification of construction permit (B4-PH-292, which authorized a new FM broadcast station) for extension of completion date.

WMFM—James A. Hardman, North Adams, Mass.—Modification of construction permit (B1-PH-452, as modified) which authorized a new FM broadcast station, for extension of completion date.

NEW—Washington Radio, Inc., Washington, Ind. (P. O. 11 SE 4th St.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 293, 106.5 mc., ERP of 12.5 KW and antenna height above average terrain 331 feet.

KCFM—KCMO Broadcasting Co., Kansas City, Mo.—Modification of construction permit (B4-PH-766, as modified, which authorizes a new FM broadcast station) to extend completion date.

WSNJ-FM—Eastern States Broadcasting Corp., Bridgeton, N. J.—Modification of construction permit (B1-PH-510, as modified), which authorized a new FM broadcast station for extension of completion date.

KTUL-FM—Tulsa Broadcasting Co., Tulsa, Okla.—Modification of construction permit (B3-PH-544, as modified, which authorized a new FM broadcast station) for extension of completion date.

WWOD-FM—Old Dominion Broadcasting Corp., Lynchburg, Va.—Modification of construction permit (B2-PH-600, as modified, which authorizes a new FM broadcast station) to extend commencement and completion dates.

Channel #240

NEW—Cardinal Broadcasting Co., Palo Alto, Calif. (John E. Gurich and Edward Iannelli) (P. O. Temp. John E. Gurich, 2950 Van Ness Ave., San Francisco, Calif.)—Construction permit for a new FM broadcast station (Class A) to be operated on Channel 240, 95.9 mc., and ERP of 1 KW.

Channel #241

NEW—Auburn Publishing Co., Auburn, N. Y. (P. O. 34-36 Dill St.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 241, 96.1 mc., ERP of 18.5 KW, and antenna height above average terrain 519 feet.

Channel #250

WGYN—WGYN, Inc., New York, N. Y.—Relinquishment of control of licensee from Muzak Corporation to Charles E. Merrill and Radio Sales Corp. (333⅓ shares capital stock 33⅓%, transferred equally to Charles E. Merrill and Radio Sales Corporation) two remaining stockholders each own 50% of stock.

Channel #259

NEW—Muscatine Broadcasting Co., Ltd., Muscatine, Iowa (Charles A. Henderson, George J. Volger and Thelma Marie Volger) (P. O. % Station KWPC)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 259, 99.7 mc., ERP of 2.2 KW, and antenna height above average terrain 323 feet.

Channel #264

NEW—Beacon Broadcasting Co., Inc., Boston, Mass. (P. O. 73 Tremont St., Boston, Mass.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 264, 100.7 mc., ERP of 15.3 KW.

Channel #266

NEW—Saint Louis County Broadcasting Co., Clayton, Mo. (P. O. 8135 Forsythe Blvd.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 266, 101.1 mc., ERP of 11.1 KW, and antenna height above average terrain 294 feet.

NEW—Air Waves, Inc., Baton Rouge, La. (P. O. 204 North St.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel 266, 101.1 mc., ERP of 3.2 KW.

FM—Application Returned

Tribune Publishing Co., Pratt, Kans. (P. O. 319 Ninnescah, Pratt, Kansas)—Construction permit for a new FM broad-

(Continued on next page)

cast station (Class A) to be operated on frequency to be assigned by FCC and ERP of 902.5 watts. Returned July 28, 1947, application incomplete.

FM—Application Dismissed

Macon Telegraph Pub. Co., Macon, Ga.—Granted request to vacate its construction permit for a Class B station (BPH-298), as the company has ascquired a 16% interest in the Macon Broadcasting Co., which also holds a CP for a Class B station in Macon.

TELEVISION

TV—Miscellaneous Actions

Earle C. Anthony, Inc., Los Angeles, Calif.—Ordered that the petition requesting the Commission to reconsider its decision granting it Television Channel No. 9 rather than Channel No. 4, and reply thereto filed by the National Broadcasting Co., be set for oral argument on August 25, 1947. (Docket 7254 and 7256.)

WWBT—Hearst Radio, Inc., Baltimore, Md.—Granted modification of CP for extension of completion date to 1-21-48; and for change in call letters from WWBT to WBAL-TV. (BMPCT-76.)

The Journal Co. (The Milwaukee Journal), Portable, area of Milwaukee, Wis.—Granted CP for a new experimental television relay broadcast station. (BPVB-209).

TV—Applications Accepted for Filing

KLAC-TV—Dorothy S. Thackrey, Los Angeles, Calif.—Modification of construction permit (BPCT-165, which authorized a new commercial television broadcast station) to request extension of completion date.

WTVT—The Fort Industry Co., Toledo, Ohio—Modification of construction permit (BPCT-166, which authorized construction of new commercial television broadcasting corporation) to request extension of commencement and completion dates.

NEW—Triangle Publications, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa. (P. O. 400 N. Broad St.) —Construction permit for a new experimental television relay broadcast station to be operated on 6975-7000 mc., power of 0.1 watts, emission special, and hours of operation unlimited, in accordance with Sections 4.131(b) and 4.163.

NEW—Triangle Publications, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa. (P. O. 400 N. Broad St.) —Construction permit for a new experimental television relay broadcast station to be operated on 7100-7125 mc., power of 0.1 watt, emission special, and hours of operation unlimited, in accordance with Sections 4.131(b) and 4.163.

NEW—Triangle Publications, Inc. (The Philadelphia Inquirer Division), Philadelphia, Pa. (P. O. 400 N. Broad St.) —Construction permit for a new experimental television relay broadcast station to be operated on 7000-7025 mc., power of 0.1 watt and emission special, hours of operation unlimited, in accordance with Sections 4.131(b) and 4.163.

WPTZ—Philco Television Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (BPCT-179, which authorized construction of a new antenna system) to request extension of completion date.

KECA-TV—American Broadcasting Co., Inc., Los Angeles, Calif.—Modification of construction permit (BPCT-81, which authorized construction of a new commercial television broadcast station) to request extension of completion date.

KTTV—The Times-Mirror Co., Los Angeles, Calif.—Modification of construction permit (BPCT-92, which authorized construction of a new commercial television broadcast station) to request extension of completion date.

WNBW—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (BPCT-319, as modified, which authorized construction of new commercial television broadcast station) to request further extension of completion date.

WEWS—Scripps-Howard Radio, Inc., Cleveland, Ohio—Modification of construction permit (BPCT-121, as modified, authorizing construction for a new commercial television broadcast station) to request further extension of completion date.

WLWC—Crosley Broadcasting Corp., Columbus, Ohio—Modification of construction permit (BPCT-112, which authorized a new commercial television broadcasting station) to make changes in antenna system, and change of transmitter location.

WLWC—Crosley Broadcasting Corp., Columbus, Ohio—Modification of construction permit (BPCT-112, which authorized construction of a new commercial television broadcast station) to request extension of completion date.

W9XKY—The Journal Co. (The Milwaukee Journal), Milwaukee, Wisc.—Modification of construction permit (BPVB-169, which authorized a new experimental television station) to request further extension of completion date.

W6XAO—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (BPVB-167, which authorized installation of new visual and aural transmitters and changes in antenna system) for further extension of completion date.

WLWT—Crosley Broadcasting Corp., Cincinnati, Ohio—Modification of construction permit (BPCT-103, which authorized construction of a new commercial television broadcast station) to request new aural and visual transmitters and to make further changes in antenna system.

WJAR-TV—The Outlet Co., Providence, R. I.—Modification of construction permit (BPCT-87, which authorized a new commercial television broadcast station) for extension of commencement and completion date.

KARO—Broadcasting Corporation of America, Riverside, Calif.—Modification of construction permit (BPCT-30, which authorized construction of a new commercial television broadcast station) to request extension of commencement and completion dates.

W2XQX—Allen B. Du Mont Laboratories, Inc., area of New York, N. Y.—License to cover construction permit (BPVB-190) for a new experimental television relay broadcast station.

MISCELLANEOUS BROADCAST

Actions

Noncommercial Educational

KOKH—The Board of Education of the City of Okla. City, Oklahoma City, Okla.—Granted modification of CP for extension completion date to 1-21-48. (BMPED-72).

KOAG-FM—Okla. Agr. and Mech. College, Stillwater, Okla.—Granted modification of CP for extension of completion date to 2-15-48. (BMPED-73).

Applications Accepted for Filing

Remote Pickup

NEW—Muscle Shoals Broadcasting Corp, area of Muscle Shoals City, Ala. (P. O. Box 230, Sheffield, Ala.)—Construction permit for a new remote pickup broadcast station to be operated on 1622, 2058, 2150, 2790 kc., power of 50 watts, Emission A3 and hours of operation in accordance with Section 4.403.

WDNS—Kenneth Edward Rennekamp, area of Oil City, Penna.—License to cover (BPRY-345) for a new remote pickup broadcast station.

Program Committee Approves Proposed New Standards of Practice

The proposed new Standards of Practice received approval Friday (8) of the NAB's Program Executive Committee.

After a two-day meeting devoted exclusively to discussion of the proposed document, the committee announced that it had completed work on the new "code" and that it was being dispatched to the NAB Board of Directors for action.

(Continued on page 642)

NAB Music Advisory Committee Reports Progress in ASCAP Discussions

Progress in its discussions with ASCAP concerning renewal of broadcasting industry licenses was reported by the NAB's Music Advisory Committee last week, after a meeting in New York City with ASCAP President Deems Taylor and a special committee appointed by the music licensing organization's Board of Directors.

Theodore Streibert, WOR, chairman of the NAB committee, said after the meeting Wednesday that tentative plans had been made to meet again in about one month.

In addition to Mr. Streibert, NAB committee members attending were Walter Hasse, WDRC, Hartford, Conn.; Robert T. Mason, WMRN, Marion, Ohio; Ed Yokum, KGHL, Billings, Mont.; Julius Brauner, CBS, N. Y; and Board Liaison Member Campbell Arnoux, WTAR, Norfolk, Va. Secretary-Treasurer C. E. Arney, Jr., and General Counsel Don Petty represented the NAB headquarters staff.

Plans for Convention Include Important Session on All Phases of Programming

Plans for the Program Clinic at the annual convention of the National Association of Broadcasters, announced Friday by the NAB, call for a day-long session in which the problems and potentialities of radio programming will be thoroughly explored by a group of experts on all phases of the subject, including music, news, production, planning and traffic.

"The purpose of this Program Clinic," said Harold Fair, director of NAB's program department, who is planning the event, "is to send every station manager, program director, salesman, announcer, everyone who attends, away with new ideas for building programs that will bring more and happier listeners to his station—plus more and happier sponsors on the air."

The Program Clinic is one of many innovations that will feature this year's convention, marking the first time in the history of NAB that a special meeting to discuss the problems of program directors has been held at the annual convention. Station and program managers attending the session will be encouraged to participate in the program during the question and answer period.

The tentative agenda shapes up like this:

The morning session will open with a discussion of the general problems facing program directors. Clarence Menser, former vice-president in charge of programs for NBC, will chair the panel and speak on the subject of "The Objectives and Obligations of the Program Manager." Mr. Menser will pay particular attention to the need for developing programs that will conform to the management

(Continued on next page)

On the Inside

NAB assured NRDGA last week that it favored *coordinated* retail advertising, integration of campaigns in various media. (p. 642)

Newest home radio sets, AM, FM, and television, will be shown as special feature of the forthcoming convention; NAB associate member exhibits will be most extensive this year. (p. 644)

FCC's recent proposal to change requirements for engineers caused much discussion in industry circles last week. (pp. 645-646)

National spot business was down in July, according to Rorabaugh Report, but 65% of accounts remained unchanged. (p. 649)

International High Frequency Broadcast Conference will begin at Atlantic City August 16th, telecommunications delegates agreed last week. (p. 647)

IT COSTS MORE TO REGISTER FOR THE NAB CONVENTION AFTER AUGUST 15th!

policy and also appeal to the audience and sponsor.

The second panel will be devoted to a discussion of "The Fundamentals of Copy-Right Law and the Use of Copy-Righted Music." Theodore Streibert, WOR, New York, chairman of the NAB Music Advisory Committee, will discuss the various music contracts now in force and their effect on the broadcasters. The second speaker on this panel, Sydney Kaye, general counsel for Broadcast Music, Inc., will outline certain aspects of the copy-right laws, setting up red and green lights for the guidance of program men in the use of music.

The panel discussion devoted to public interest programs will feature talks by William Bryan, formerly public relations director for KOMA, Oklahoma City, and Edward Byron of Byron Productions, Inc., New York City, with Edgar Bill, WMBD, Peoria, Illinois, a member of the NAB Program Executive Committee and Special Standards of Practice Committee, as moderator. Methods of performing this service in such a way as to do an effective job and, at the same time, increase listener acceptance will be outlined.

The final discussion of the morning session is being planned by NAB's Farm News Editors' Committee. This panel on "Farm Service Programming" will be presided over by Herb Plambeck, WHO, Des Moines, chairman of the NAB Farm News Editors' Committee. In his talk, Mr. Plambeck will point out the advantages of utilizing this type of program to build new listeners and additional revenue.

The luncheon session—planned as a joint affair with participants in the Broadcast Advertising Clinic because of the many problems common to program and sales personnel—will be highlighted by three speakers. Barbara Wells, WOR, New York, and Gordon Gray, WIP, Philadelphia, are scheduled to speak. The third will be announced later.

Following the luncheon, attention will be focused on the "Disc Jockey Program." At least two broadcasters, including Harold Fellows, WEEI, Boston, who have utilized this technique with unusual success, will take part in this panel. The speakers will give the other broadcasters the benefit of their experience in staging this type of show.

The final panel will be devoted to a discussion of coordinating the scheduling of programs. The speakers—John Outler, WSB, Atlanta, and Ralph Hardy, KSL, Salt Lake City—will pay particular attention to the methods of properly scheduling local originations and spot announcements in order to achieve the best possible results.

Program Committee Approves Proposed New Standards of Practice

(Continued from page 641)

The program committee adopted the standards substantially as recommended by the Special Standards of Practice Committee. There were only minor revisions, mostly in language. The program group adopted a motion commending the Standards Committee for its work in drafting the document and upon the speed with which it was accomplished.

Four members of the Special Standards of Practice Committee met with the Program Committee. They were: Robert D. Swezey, chairman, MBS, New York; Ken R. Dyke, NBC, New York; John M. Outler, WSB, Atlanta, Ga.; Harold Fellows, WEEI, Boston, Mass.

Members of the Program Executive Committee in attendance were: Merle S. Jones, chairman, WCCO, Minneapolis, Minn., Edgar L. Bill, WMBD, Peoria, Ill.; Phillips Carlin, MBS, New York; Arthur B. Church, KMBC, Kansas City, Mo.; Herb Plambeck, WHO, Des Moines, Iowa; H. W. Slavick, WMC, Memphis, Tenn.; Glenn Snyder, WLS, Chicago, Ill.; Davidson Taylor, CBS, New York; E. R. Vadeboncoeur, WSYR, Syracuse, N. Y.

NAB was represented by President Justin Miller, Secretary-treasurer C. E. Arney, Jr., and Harold Fair, director of the program department.

Broadcast Advertising

NAB Assures NRDGA of Radio's Approval of Coordinated Promotion

Approval by the radio industry of *coordinated* retail advertising, whereby the retailer may employ more than one medium in an integrated campaign, was expressed to Lew Hahn, president of NRDGA, in a letter this week from Frank E. Pellegrin, NAB's Director of Broadcast Advertising.

For several weeks the NRDGA has been bitterly opposing a resolution passed by the Newspaper Advertising Executives Association, which would have the effect of charging higher rates to retailers who wished to include in their newspaper advertising tie-ins with magazine advertising, (and presumably might also

(Continued on next page)

apply to newspaper ads in which the retailer wished to tie-in radio or any other form of advertising.)

The letter stated:

"In view of the current controversy between the Newspaper Advertising Executives Association and the National Retail Dry Goods Association, involving an attempt by newspapers to charge a higher rate to retailers who wish to mention magazine tie-ups in their newspaper advertising, we believe the position of the radio industry should be made clear.

"We believe in coordinated, integrated promotion.

"To our knowledge, there has never been a single instance reported in which any radio station has increased its advertising rates to any retailer who desired to tie-in his newspaper advertising with his radio advertising."

In the report, "Radio for Retailers," published as a result of the study conducted at Joske's of Texas, a special chapter on "Promotion" specifically recommends that retailers coordinate *all* of their various forms of advertising and sales promotion, to achieve maximum results. Joske's frequently mentioned their newspaper ads in their radio programs, and vice versa.

West Coast Stations Plan Retail Sessions; Lee Hart to Speak in Eleven Cities

NAB stations in and near eleven West Coast cities are planning a series of meetings on retail advertising. Miss Lee Hart, Assistant Director of Broadcast Advertising, has been invited to make a special speaking trip for these meetings.

In each city Miss Hart will speak to an audience of invited retailers on the subject "Radio For Retailers." She will also conduct round-table discussions on retail advertising for the staffs of the co-sponsoring stations. The following cities are on the retail meeting list:

Denver, Colo., August 11, 12
Los Angeles, Calif., August 13, 14, 15 and 18
San Diego, Calif., August 18, 19
Santa Barbara, Calif., August 20
San Jose, Calif., August 21
San Francisco, Calif., August 22
Fresno, Calif., August 25, 26
Sacramento, Calif., August 27, 28
Santa Rosa, Calif., August 29
Portland, Ore., September 2, 3
Seattle, Wash., September 4, 5

Robert Gulick of WGAL Appointed to Retail Committee Which Meets August 27th

J. Robert Gulick, sales manager, WGAL, Lancaster, Pennsylvania, has been appointed chairman of the NAB Sales Managers Retail Advisory Subcommittee, it was announced today by Odin Ramsland of KDAL, Duluth, Minnesota, chairman of the Sales Managers Executive Committee.

Mr. Gulick succeeds William D. Murdock, Sales Manager, WOL, Washington, D. C.

Next meeting of the subcommittee is scheduled for August 27 in New York City.

Advertiser Withdraws P-I Offer; Stations Had Protested

The Farmers Wholesale Nursery of Smithville, Tenn., reported last week as offering P-I propositions to radio stations, has notified the NAB that it is withdrawing its cost-per-inquiry proposal. It also assures the NAB that the several leading stations mentioned in its circular letter containing the P-I offer, are actually carrying the business at straight card rates.

The letter to the NAB states:

"It was not our intention to leave the impression that WSM, WHAS, KWKH, WBT and WSB were handling our account on a Cost-Per-Inquiry Basis. These stations definitely operated on a straight Rate Card Rate.

"We are today writing the smaller stations that we previously contacted informing them of this fact."

Following circularization of the original P-I letter, in which the call letters of the stations mentioned above were listed, the NAB received numerous inquiries from other stations wondering if the industry's position with regard to per-inquiry advertising had been changed.

Letters of protest were sent to the advertiser by the stations whose call letters were used in the letter.

Member stations are reminded that advertisers making per-inquiry offers often buy time at card rates from several leading stations, and that the fact that their advertising is being carried by those leading stations does not necessarily mean that it is carried on a P-I basis.

Auto Manufacturers' Ass'n Publishes Booklet Titled "How to Work With Radio"

A brochure, "How To Work With Radio," has been issued by Automobile Manufacturers Association. The AMA points out the value of *broadcast advertising* and effective methods for working with radio's news and programming departments.

Emphasis is given to using radio as a public relations medium, and the auto association reported that "a national industrial trade association annually prepares a series of recorded broadcasts which are offered to local radio stations in plant communities. Time for the program is secured by the organization's field men, who report that 350 stations now carry the shows.

An association of independent retail business men prepares a weekly five minutes script stressing news of that industry. These are sent free to members, who in turn purchase time on local stations. The organization reports that around 400 radio outlets carry these programs.

Another major industrial trade association, AMA reports, offers a 13-week series of recorded programs free to its members. The organization has this to say:

"Radio advertising by individual companies in their own plant communities is an increasingly used component of community relations programs.

"Radio is very useful for reaching large numbers of people with basic information, such as the need for uninterrupted production, the fact that production creates wealth and payrolls, and similar subjects."

(Continued on next page)

The booklet was written by Harry Cushing, in charge of Radio, Public Relations Department, Automobile Manufacturers Association, New Center Building, Detroit 2, Michigan.

Philco's Successful Use of Radio Advertising, As Told by *Broadcasting*, Reprinted by NAB

Broadcasting's recent two-part story of the Philco Corporation's use of radio advertising to attain a position of dominance in the radio set industry has been reprinted by the Department of Broadcast Advertising and is available on request in limited quantities.

The Philco story, written by J. Frank Beatty, outlines the merchandising and advertising techniques used by the company, and describes in detail the results that followed.

"Radio for Retailers" Receives Praise from Press and Industry

Numerous trade magazine articles and letters to the Department of Broadcast Advertising indicate that releases of the Joske report, "Radio for Retailers," are being enthusiastically received.

The addition to the "Results" chapter shows that radio contributed directly to an average increase in sales of 61.96% in three radio test departments during a scientifically controlled experiment. Broadcasters report that this is proving to be a potent and timely sales aid because it shows that radio results can be measured in terms of overall store or department sales, as well as in terms of items advertised.

The technique of measuring results, as outlined in the release, could be applied in stores anywhere. This new material also offers pertinent suggestions about concentration of scheduling and copy approaches which can improve the effectiveness of results.

It is recommended that broadcasters call retail clients' attention to this new addition to the "Results" chapter, and that retail clients or prospects not now in possession of the report should be provided with one by the broadcaster. Copies of the entire report including previously released chapters on Planning, Results, Copy, Programs and the new chapter on Promotion can be purchased from the NAB Dept. of Broadcast Advertising for $3.00.

Convention

New Sets Be Shown at Convention; Associate Member Exhibits Most Extensive

The 1947-48 lines of home radio sets, AM, FM, and Television, will be displayed in the Atlantic City Municipal Auditorium during the NAB Twenty-Fifth Annual Convention and Exposition, September 15-18.

Displays of equipment manufacturers and transcription companies and program services, however, will occupy the largest amount of space in the hall.

Other exhibitors are the U. S. Navy, trade papers and certain industry organizations. Individual display space runs from 100 to 2400 square feet.

Associate NAB members who have made arrangements for exhibits as of today include the following:

Equipment Manufacturers

Amperex Electronic Corporation
Brooklyn, New York

Andrew Company
Chicago 12, Illinois

Audio Devices, Inc.
New York 22, N. Y.

Collins Radio Company
Cedar Rapids, Iowa

The Daven Company
Newark 4, New Jersey

Allen B. DuMont Laboratories, Inc.
Passaic, New Jersey

Eitel-McCullough, Inc.
San Bruno, California

Fairchild Camera and Instrument Corp.
Jamaica 1, New York

Federal Telephone & Radio Corp.
Clifton, New Jersey

Gates Radio Company
Quincy, Illinois

General Electric Company
Syracuse, N. Y.

The Langevin Company, Inc.
New York 23, N. Y.

Lehigh Structural Steel Co.
New York 4, N. Y.

Magnecord, Inc.
Chicago 21, Ill.

Presto Recording Corp.
New York 19, N. Y.

Radio Inventions, Inc.
New York 14, N. Y.

Radio Corporation of America, RCA Victor Division
Camden, New Jersey

Rangertone, Inc.
Newark 4, New Jersey

Raytheon Manufacturing Co.
Waltham, Massachusetts

Rek-O-Kut Company
New York 13, New York

Technology Instrument Corporation
Waltham 54, Mass.

United States Recording Company
Washington 5, D. C.

Western Electric Company, Inc., Graybar Electric Company, Inc.
New York, N. Y.

Westinghouse Electric Corp.
Pittsburgh 30, Pa.

Wincharger Corporation
Sioux City 6, Iowa

Small Market Stations

NAB Seeks Small Stations' Views on FCC Proposed Revision of Operators' License

Copies of the FCC Proposed Revision of Operators' License and Examinations were mailed last week by NAB members of the Small Market Stations Executive Committee and the 17 District Small Market Stations Chairmen.

Since the NAB Small Market Stations Executive Committee has been especially interested in FCC operator requirements, and has continually, during the past four years or more, stressed the hardships invoked on small stations in complying with FCC rules and regulations requiring straight first class engineers' license, NAB is asking for the comments and views of all small station management. These stations should file their comments with their District Chairmen or direct to the NAB Small Market Stations Division, which is coordinating with the Engineering Department on the proposed revision.

NAB also sent copies of the proposed revision to members of the Engineering Executive Committee, and the District Engineering Chairmen. Royal V. Howard, Director of Engineering, stated in part: "Any comments or briefs concerning this proposed rule making must be filed with the Federal Communications Commission on or before September 1, 1947.

"Consequently we are interested in obtaining from you and others an opinion as to the proposed regulations, and, in particular, as to whether NAB should file with the Commission a statement setting forth our views.

"If we are to take any action, your comments and suggestions must reach us not later than August 20, 1947."

(For additional details see ENGINEERING *this issue)*.

Industry Leaders Teaching Radio Courses at University of Denver

The fundamentals of every phase of station operation are being taught by industry leaders this summer at Denver University, Denver, Colorado. The second week of the clinic, July 28 through August 1, covered Radio Advertising, Sales, Promotion and Station Operation by "Professor" J. Allen Brown, NAB assistant director, Broadcast Advertising.

The effectiveness of a planned radio sales campaign was dynamically illustrated when Fred C. Mueller, sales manager, KLZ, Denver, reviewed the inception, programming and selling of the award-winning "KLZ Farm Reporter" to a national account.

James R. MacPherson, sales manager, and Clarence Moore, program director, KOA, Denver, emphasized the importance of cooperation between sales and programming departments. Case histories of the NBC station were cited. Mr. MacPherson also explained the development of network commercial shows, using his discovery of "Fibber McGee & Molly" in Chicago as a case in point.

The techniques and procedures of prize-winning station promotion were forcefully presented by Lee Fondren, KLZ, promotion director.

The daily classes, including open-discussion periods ran four hours daily. They are followed by a summary period conducted by R. Russell Porter, coordinator of radio, Denver University.

Special attention is being given to the small market station type of operation.

Legal Department

FCC Bar Sponsors New Radio Reporting Service

[Ed. Note: *Last week the Federal Communications Bar Association announced a proposal for a new radio reporting service. A letter from Guilford Jameson, acting president of the Bar Association, to NAB General Counsel Don Petty outlining plans for the service is reprinted herewith at the request of the Bar Association.*]

During the past several years the Federal Communications Bar Association has entertained numerous proposals to satisfy the need of radio practitioners and operators for an administrative reporting service especially designed to fulfill their requirements.

At the last annual meeting of the Association the Executive Committee was instructed to take whatever action may be necessary to fulfill the requirements for an appropriate administrative reporting service.

Pursuant to such authorization Reed Rollo, President of the Association, appointed a Special Committee consisting of Neville Miller, Arthur W. Scharfeld and Russell Rowell to review and report on the matter. This Special Committee has discussed the matter with numerous publishers and other interested parties. As a result thereof final arrangements have been made with the administrative reporting firm of Pike & Fischer of Washington, D. C., to provide and maintain the desired facilities.

The new facilities, among other things, will provide and maintain FCC Rules and Regulations, Standards of Good Engineering Practice, pertinent statutes, decisions, and orders of the FCC and pertinent court opinions. We believe that the new service will prove to be of the utmost value to radio station owners and operators as well as to attorneys and consulting engineers and other groups which are interested in the administrative aspects of radio regulation.

To insure the publication of this new service which is being sponsored by the Federal Communications Bar Association, it will be necessary to obtain a nominal number of subscriptions before editing and reproduction activities may be commenced. *The publication firm requires an initial subscription list of 100 subscriptions for a period of 3 years each at the entirely reasonable price of $120 per year.* Publication will be commenced immediately upon assurance that the necessary financial support has been obtained as

(Continued on next page)

evidenced by the receipt of the required minimum number of subscriptions.

The Executive Committee cordially invites the National Association of Broadcasters and its members to assist in the inauguration of the new service by forwarding subscriptions to John H. Midlen, Secretary of the Federal Communications Bar Association, 1030 National Press Building, Washington, D. C., by return mail. Payment for the first year, $120, will not be due until delivery of Volumes I and II of the service.

Engineering Department

Industry Expresses Much Interest in Proposed New Requirements for Engineers

Engineers and management this past week continued to study effects the Commission's proposed revision of operators licenses and examinations would have upon the industry.

Letters and details were sent out by NAB to engineering and small market station committees asking for expressions and comments on Public Notice 8932 (NAB REPORTS, p. 621) and Notice of Proposed Rule Making, Docket 8481 (see below). This information, when received, will be relayed on to the Commission. All were asked to forward their criticism and comments to NAB.

Comment so far received on the Commission's action in creating the Broadcast-Operator grade license has been favorable, and in some cases hailed as a forward step in Industry-Commission cooperation. Others vigorously opposed the plan without modification.

Current engineering comment has chiefly centered on the problems arising from the future status of present holders of first class licenses. While George E. Sterling, chief engineer of the Commission, has indicated that first class licenses will be permitted to run to termination and then would be renewable in the usual manner at the proper level, this question as to grade of renewal and conditions of renewal has developed into a major issue.

It is not known whether the Commission would renew first class licenses at the Technician or Engineer level. Suggestions have been received from engineers indicating concern that, unless automatic renewal at the Engineer-Operator level is provided to experienced personnel, an artificial shortage might develop. Professional Engineer licenses, they pointed out, generally provide "Grandfather" clauses to cover these transitory or interim periods and are for life.

While the Commission's announcement did not so state, Broadcast-Operator license holders will be permitted to operate auxiliary stations, i.e., STL, Portable-Mobile, etc.

According to the Commission, the Broadcast-Operator license study guides are now in process of execution and are expected to be released shortly. These would disclose the extent of technical knowledge that will be required for this class. Full import of the Commission's action cannot be determined pending the release of this information. For the Engineer-Operator and Technician-Operator classes, the study guide is not expected to be released before the first of the year.

It is indicated from the Commission's release, for the grade of Engineer, that they intend to include in the examination engineering elements on both FM and TV. Questions on FM engineering matters will apparently be included in the examinations for Technician-Operator licenses.

Industry Comment: Throughout the week engineers submitted these comments to NAB:

"Thinks first class ticket OK as is";

"Doesn't think Chief Engineer should be required to know design theory";

"Generally opposed to FCC plan but in any case thinks that 'Grandfather' clause should be included to apply to present first class ticket holders who are now in jobs which would require top class licenses under the new plan";

"Feels that if top grade license is required for 1 KW directionals that it should be required for FM over 1 KW";

"Believes that many capable men now doing perfectly satisfactory job may be licensed right out of a job";

"Can see personnel problems arising all over country. Will undoubtedly increase cost of operation for some stations";

"If FCC wants to stiffen requirements, why not include new subjects in present examinations";

"Will FCC guarantee Chief Engineer license holder will be good administrator?";

"Generally opposed. Some change in licensing may be necessary but not to this extent. FCC should place stress on good equipment rather than require geniuses to run it";

"First Class license holders should be automatically granted Engineer-Operator tickets if they've had three years experience."

The Commission's full Notice of Proposed Rule making is as follows:

"FEDERAL COMMUNICATIONS COMMISSION 8931

Washington 25, D. C.

In the Matter of
Amendment of Section 13.2
Amendment of Section 13.21 } DOCKET NO. 8481
Amendment of Section 13.22
Amendment of Section 13.61

NOTICE OF PROPOSED RULE MAKING

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. Based upon a study of the design, construction and reliability of operation of low power standard and FM broadcast stations, the Commission is of the opinion that the licensees of certain of such stations may be expected to meet the operating requirements prescribed by the rules and regulations if the normal watch is maintained by an operator with less technical qualification than is required to obtain the First Class Radiotelephone Operator's license; provided, a higher class operator is employed as technical supervisor and is made responsible for all major adjustments and repairs.

3. The proposed amendments, authority for which is contained in Sections 303(l) and (r) of the Communications Act of 1934, as amended, are set forth in an appendix attached to this notice.

(Continued on next page)

4. Any interested party who is of the opinion that the proposed amendments should not be adopted, or should not be adopted in the form set forth, may file with the Commission, on or before September 1, 1947, a written statement or brief setting forth his comments. The Commission will consider any such comments that are received before taking any final action regarding the proposed amendments, and if any comments are received which appear to warrant the holding of an oral argument before final action is taken, notice of the time and place of such oral arguments will be given.

FEDERAL COMMUNICATIONS COMMISSION
T. J. SLOWIE,
Secretary.

Attachment:
Adopted: August 1, 1947
Released: August 1, 1947

APPENDIX

It is proposed to amend Part 13 of the Rules and Regulations of the Federal Communications Commission, as follows:

Section 13.2, Classes of Licenses,—by adding at the end thereof a new subsection, as follows:

(d) Broadcast radio operator license.

Section 13.21, Examination Elements,—by adding at the end thereof a new subsection, as follows:

(7) Practical broadcast operation,—Practical matters relating to minor adjustments and normal operating practices of standard and FM broadcast stations.

Section 13.22, Examination Requirements,—by adding at the end thereof a new subsection, as follows:

(g) Broadcast radio operator license:
  1. Ability to transmit and receive spoken messages in English.
  2. Written examination elements: 1 and 7.

Section 13.61, Operator Authority,—by adding at the end thereof a new subsection, as follows:

(g) Broadcast radio operator license,—to serve as staff operator of any standard broadcast station employing a non-directional antenna and not exceeding 1 kw. power, or of an FM broadcast station of not more than 1 kw. effective radiated power; provided
  (1) The holder of a First Class Radiotelephone Operator License is employed as technical supervisor.
  (2) Internal tuning adjustments, major repairs and overhauls are made by or under the direction of the technical supervisor.
  (3) The duties of a broadcast radio operator may include such operations as placing the station on and off the air, keeping the transmitter log, making external tuning adjustments, other minor adjustments as may be required as a result of primary power supply variations and failures, and replacement only of such defective parts as tubes, fuses and other items designed for simple plug-in replacement."

High Frequency Broadcast Conference Gets Under Way Aug. 16 at Atlantic City

After many hours of heated discussion, a decision was reached Tuesday (5) at the International Telecommunications Radio Conference at Atlantic City that the first plenary session of the International High Frequency Broadcasting Conference would be held on August 16. At this session committees will be formed to prepare the agenda for the full start of the HFB Conference—at the second plenary session to be held on August 26. The Conference also announced that September 28 would be the target date for the final closing of all conferences of the ITU.

In spite of the efforts of Chairman of the Conference Charles R. Denny, with the wholehearted support of Alexander Fortuoshenko of the USSR, toward a full and complete conference at this time, the session reversed the US and USSR request for a complete conference and decided (by a vote of 56 in favor, 3 against, 11 absent, and 7 abstaining) that the present work would be of an exploratory nature only. The main work at this session will be to prepare the fundamentals for a full conference to be held at a later date. The HFB Conference itself will determine when and where this will be held. Delegates "guesstimated" that the second or final conference would be held some time in 1948.

American Agenda: The revised American agenda, which will be broken down in 7 parts, is primarily concerned with the drafting of a proposal formulating the principles on which equitable frequency distribution can be effected. The parts of this proposal are:

Consideration of the requirements for frequency allocation; discussion of the possibility of effecting economy of circuits; establishment of broad engineering principles associated with such assignments; drafting preliminary frequency assignment plan for the next Conference; deciding what action should be taken in advance of the forthcoming Conference; drafting agenda for the next Conference; and setting the date and place for the next Conference.

Chairman Denny stressed the importance of this preliminary work, and stated that he hoped that all delegates who had originally intended to participate in the International High Frequency Broadcasting Conference would remain throughout the preliminary session as now planned. Applause seconded his motion. Commissioner Jett stated that he believed that the Conference starting August 25 could be completed not later than September 30 if the Radio Regulations could be signed by September 15. The American delegation felt that, in the time available, complete broadcast allocations could not be made or specific assignments allocated, but that important progress could be made and the groundwork laid for the following session.

Attending the first preliminary Broadcast Conference held on Friday and Saturday (1 and 2) at Atlantic City were:

For the Government: Chairman Charles R. Denny, Spokesman E. K. Jett, Curtis Plummer, David C. Adams and Albert McIntosh, FCC; Vice-Chairman and Spokesman Francis deWolf, Vice-Chairman John M. Begg, Forney A. Rankin and Rogger Legge, State Department; and A. G. Simpson, War Department.

For the U. S. Broadcasters: Clure Owen, ABC; Edmund Chester, William Lodge and Adrian Murphy, CBS; E. M. "Pete" Johnson, MBS; Royal V. Howard, NAB; William Duttera, Stanley Richardson and F. M. Russell, NBC; Gustav Margraf, RCA-NBC; Philip Siling and James P. Veatch, RCA; George Haggerty, Westinghouse; and J. L. Condon, Worldwide Broadcasting of Boston.

The American delegation then established the following committees:

Committee I—Steering Committee
Committee II—Credentials Committee

(Continued on next page)

Committee III—Organization Committee
Committee IV—Technical Committee
Committee V—Procedures Committee
Committee VI—Drafting Committee.

Industry assignments to these committees are as follows:

Clure Owen, ABC, Observer to Committee IV; W. E. Dumm, Associated Broadcasters, Inc., Committee V; Alfred E. Towne, Associated Broadcasters, Inc., Committee IV; Robert N. deHart, CBS, Committee IV; Edmund Chester, CBS, Committees III, IV and V; William Lodge, and J. W. Wright of CBS, Observers-at-Large; Albert Crosley, Crosley Corporation, Committee IV; William Purcell, General Electric, Committee IV; E. M. Johnson, MBS, Observer to Committee IV; Judge Justin Miller and Don Petty, NAB, Committees III and V; Royal V. Howard, NAB, Committee IV; Philip Siling, James Veatch and William Duttera, NBC, Committee IV; Charles B. Jolliffe, NBC, Observer-at-Large; D. A. Meyer and George Haggerty, Westinghouse, Committee IV; J. L. Condon, Worldwide Broadcasting of Boston, Committee IV; and Walter Lemon, Worldwide Broadcasting of Boston, Committee III.

News

Council on Radio Journalism to "Graduate" Three More College Profs

Next month three journalism professors will complete internships in the news departments of three broadcast stations. And, within a week after "graduation", each will be passing on to students the know-how absorbed from news editors and their staffs.

This unique method of "teaching teachers" and so raising the standards of radio news began in 1945. It is directed by the Council on Radio Journalism, which was formed jointly by the National Association of Broadcasters and the American Association of Schools and Departments of Journalism.

Station sponsors of the three one-man post graduate radio journalism schools and their internes are:

WHAM, Rochester, N. Y.—Paul Krakowski, University of Georgia
WOC, Davenport, Iowa—Carleton J. Smyth, Kent State University (Ohio)
WSYR, Syracuse, N. Y.—Edwin H. Johnson, South Dakota State College

FM Department

NAB FM Executive Committee Convenes August 25th for One-Day Meeting

The NAB FM Executive Committee will meet in Washington for a one-day session August 25th. This meeting, first to be held under the chairmanship of Leonard Asch, FM Station WBCA, Schenectady, New York, will be held in the Board Room at NAB headquarters.

Mr. Asch was recently named chairman of the FM group, succeeding Walter J. Damm, WTMJ-FM, Milwaukee, who requested that he be relieved of these duties but remains as a member of the Committee.

Delegates to International Conference Hear FM Demonstration

Swarming into the Renaissance Room of the Hotel Ambassador at Atlantic City, world delegates to the International Telecommunications Union Conference, as guests of the U. S. delegation, heard a special demonstration of Frequency Modulation. The special demonstration, held Wednesday evening (6), was intended to demonstrate to the foreign delegates how wide area coverage could be obtained by rebroadcasting other FM stations.

The programs originated from W2XEA-W2XMN at Alpine, New Jersey, approximately 110 miles north of Atlantic City and about three times below line of sight or 7340 feet. Near Atlantic City an REL receiver and a special 3-bay directional antenna system picked up the Alpine signals and carried them on both the low and standard FM bands over a special high-fidelity seven-mile wire circuit to the transmitter of WBAB-FM, Atlantic City. This station's signal was then picked up in the Ambassador and reproduced over a wide-range reproducing system.

After the broadcast, which included the Army Band Concert from Washington, D. C., the meeting was addressed by Dr. Edwin H. Armstrong. Dr. Armstrong was followed by C. M. Jansky, Jr., who presented a paper on the coverage obtained by the Atlantic City and Alpine stations and the method by which they were inter-connected without long wire circuits.

At the conclusion of the demonstration the Chief Delegate of each nation attending the World Conference was presented with a table model Zenith combination AM-FM receiver as a gift from Dr. Armstrong.

Hollywood Ad Club Establishes Radio-Motion Picture Liaison Group

To set up a permanent liaison between radio and motion pictures, six-man Motion Picture Advisory Committee of the Hollywood Advertising Club was named recently by Mal Boyd, chairman. In addition to Boyd, head of the Radio-Motion Picture Relations Office, members are Bob Coleson, assistant to the President, NAB; Ed Cashman, West Coast head of the Kudner Agency; Bob Rains, Radio Director, Universal-International; Martin Lewis, Radio Director, Paramount; Maurice Binder, Columbia; and Mal Sibley, v.p., Bank of America. Among original aims of committee is to work closely with studios toward end that film sequences dealing with radio and advertising will be portrayed correctly.

General

RMA-NAB Liaison Committees to Meet in Washington August 26th

A meeting of the NAB-Radio Manufacturers Association Liaison Committees has been called for August 26. Meeting at NAB headquarters in Washington,

(Continued on next page)

the group of radio manufacturers and broadcasters will discuss several matters of mutual interest, including plans for the jointly sponsored National Radio Week scheduled for October 26-November 1, 1947.

Research Department

Summer Slump Shows Up in National Spot Billings, But 65% Accounts Unchanged

July spot was down. According to the August issue of the Rorabaugh Report, approximately 10% of the national and regional accounts cancelled out entirely—a high for the year. Another 14% curtailed their schedules by lopping off markets and stations; 7% increased their station lists slightly; and less than 3% became newly active or resumed their spot activity.

Still another indication that timebuyers were more interested in vacation spots than radio spots: as many as 65% of the accounts kept their schedules running without change whatsoever.

	April-May	*May-June*	*June-July*
Increasing	13%	09%	08%
Curtailing	08	19	14
Cancelled out	06	06	10
Newly active	04	07	03
Static	69	59	65
	100%	100%	100%

Among those accounts which were either newly active or increased their spot station lists during July were:

Airy Fairy Coffee-Cake Mix
Better Homes & Gardens Magazines
Champagne Velvet Beer
Cliquot Club Gingerale
Dash Dog Food
Dollar Book Club
Esmond Baby Blankets
Hensler's Beer & Ale
Hyde Park Beer
Listerine Toothpaste
Look Magazine
Luden's Cough Drops
Metal Sponges
Nervine
Northrup, King Feeds
Nu-Maid Margarine
Omega & White Ring Flour
Paramount Pictures
Rainier Beer & Ale
Resinol
Serutan-Nutrex, R.D.X.
Sperry Flour Products
Swift's Agricultural Research
Tartan
Taystee Bread
Tawn
Tootsie Fudge Mix
Trommer's Beer

[1] Non-commercial CP included.

[2] FCC states that 251 FM stations are now on the air. They include CG, CP and licensed stations. There are 12 TV operating.

** Includes stations licensed to operate, CP's and CG's.

*** Stations which have been granted construction permits or conditional grants during the preceding month.

CP—Construction permit.

CG—Conditional Grant.

nings of "toll broadcasting" and the experiments with "sponsored programs" which paved the way for our whole American system. The origins of network broadcasting are also part of the picture.

The book is a part of radio history. It is written with a good deal of nostalgia for the early days and reflects the enthusiasm and excitement of the experimental years of broadcasting.

FREEDOM OF THE PRESS. The Framework of Principle, by William Ernest Hocking. c1947. 243 p. $3.00. University of Chicago Press, Chicago, Ill.

The term "press" here "includes all means of communicating to the public news and opinions, emotions and beliefs, whether by newspapers, magazines, or books, by radio broadcasts, by television, or by films."

This is an expansion of the ideas put forth in the "Summary of Principle" which was appended to the Report from the Commission on Freedom of the Press. Some of the questions raised are—does liberty cover the right to lie? does the principle of toleration require that we tolerate the intolerant? should liberty be pruned for the common good?

One of the tenets is that "freedom of speech and press is close to the central meaning of all liberty." Since radio is a vital part of the press, these principles of freedom apply directly to radio.

Public Interest Programming

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 18-24, 1947, by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

The Crisis in Our Schools

With hundreds of thousands of teachers quitting their profession in the past five years, leaving positions unfilled or staffed by emergency teachers who fail to meet educational standards—with an ominous decline in the number of qualified young men and women studying to become teachers—with overcrowded classrooms and the physical deterioration and inadequacy of school buildings and equipment throughout the country—American education is in the midst of an unprecedented crisis. The chief victims of this crisis are the children of the United States, the 26,000,000 who are in school and the 2,000,000 of school age who should be in school but are not. When schools are closed, or when they provide an inferior education, irreparable damage is done to the future of our country. The Chamber of Commerce of the United States and the National Association of Manufacturers (both represented on the Citizens Federal Committee), recognizing the economic importance of a well-educated citizenry, are solidly behind the effort to improve our schools. Since the beginning of the war however, our schools have been going down hill to a shocking degree. This decline is revealed in: 1. *Teachers quitting their profession.* In the last five years, due to various factors including economic conditions and more attractive opportunities in other fields, the nation has lost 350,000 experienced teachers over and above the number who would normally leave; loss of men teachers has been particularly alarming. 2. *Fewer teachers being trained.* Too few young people are choosing teaching as their profession. For a quarter of a century before 1943, approximately 90,000 women enrolled each year in teachers colleges. By the fall of 1945 the number had dropped to 51,000. In the same period the number of men students dropped even more sharply—from 39,000 to 13,000. 3. *Lowered teacher morale.* In a great many communities teachers are dissatisfied and discontented. Some have grown ashamed to be teachers and frankly advise their pupils not to enter the field. . . . The poor morale of teachers is by no means entirely attributable to the fact that they are underpaid and overworked. Teachers faced with overcrowded classrooms, inadequate equipment, and lack of public interest in what they are doing feel frustrated in their efforts to bring education to their pupils. 4. *Poor buildings and equipment.* Particularly in the poorer states and rural areas many schools have long been unsuitable—badly lighted, unsanitary, grim in atmosphere. Many schools are dilapidated and dangerous and lack adequate equipment and instructional materials. The main victims of this state of affairs are our children—28,000,000 of them—and our nation. Inferior education for American boys and girls means damage to our future prosperity, our traditions of freedom, our very security. An alert and active interest on the part of parents and all citizens in their own school system is essential to overcome the present crisis and to bring to boys and girls the kind of education they need and Americans want them to have. Urge all Americans to: a) Join and work with local groups actively concerning themselves with the problems of better education. b) Show by their friendliness and interest that they appreciate the vital importance of the teachers' services to them, their children and their community—teachers exert a vital influence on the character and future careers of American boys and girls. While most schools are still closed in August, interest in education remains keen. During the summer parents are making plans for their children's schooling the following year. In many parts of the country, particularly in rural areas communities are concerning themselves with vitally important decisions about the next educational year. Teachers are being employed; working conditions decided; the needs for new equipment surveyed and new equipment ordered. There are already abundant signs that messages on the school crisis carried by business firms in the interests of serving the nation are producing results and earning for business the gratitude of millions of parents and teachers. In state after state, community after community, decisive action has been taken in recent months to improve the status of teachers and educational conditions generally. Your program can help in the good work by keeping "The Crisis In Our Schools" before the public this month. (Fact Sheet No. 37-A)

Our New Soldier—Young, Skilled Volunteer

Before the war, we were a fourth rate military power. We had a standing Regular Army of 178,000 men—smaller than little Poland's, Roumania's, or Turkey's. Up till now, our national habit has been to have a strong Army only in wartime—and to say to hell with it as soon as peace comes. Everybody hopes the United Nations will find the means to outlaw war, but everyone admits the way hasn't yet been found. We live in a still-quarreling world, a world that respects the strong—a world in which our country must assume a position of leadership with its attendant responsibilities. With this in mind and after examining our present overseas commitments, Congress has authorized the largest peacetime Regular Army in our history. The required strength has been set at 1,070,000.

(Continued on next page)

(We had 8,000,000 during the war.) The Army is conducting a paid recruiting campaign—but it's not enough. Unless the Council's campaign to build and maintain prestige and appreciation for the new Regular Army is continued, says the War Department, it will be very difficult for the paid campaign to bring in the 30,000 recruits each month that are needed to maintain the Army's authorized strength. Actually the new Regular Army of today is a compact, carefully chosen force of skilled technicians. Young men seeking to enter must have brains and ability. They must be able to understand and profit by technical training that is second to none. They must be capable of leadership. They must be all this because the stakes are high in the task before them: maintenance of the peace and security for which thousands of other young Americans have already died. Few people realize that today's Regular Army constitutes what is perhaps the world's greatest single scientific research organization. The technological progress and scientific research of the war years have resulted in countless new devices and methods, all of which are in general use throughout our new Regular Army, and Army men, in cooperation with civilian scientists, are seeking constantly to develop and perfect innumerable techniques and devices that will protect our national security as well as contribute to better peacetime living. It is these advanced methods which today's Regular Army man must know; it is these devices he must understand and operate. In short, America's peacetime soldier is an informed technician in at least one of many specialized fields—radar, small arms, chemical warfare, photography—whether he be a member of the Infantry, the Artillery, the Air Forces, or any other branch of the service. Today's new Regular Army is a large school-going organization. Through the facilities of the U. S. Armed Forces Institute, more than a quarter of a million men today are studying cultural subjects ranging from business administration to English literature. In addition to the Institute, the Army conducts numerous technical schools in such fields as radar, radio, diesel engines, aviation specialties, etc. While the primary purpose of these technical schools is to train men for military jobs, they also provide a training that is useful in civilian life. (Fact Sheet No. 2-G)

Federal Communications Commission Docket

HEARINGS

There were no hearings pre-scheduled by the Commission for the week beginning Monday, August 11.

FCC ACTIONS

AMPLITUDE MODULATION

AM—Docket Cases

1340 KC.

The Commission announces its **Proposed Decision** (B-377) looking toward a grant of the application of **Sunland Broadcasting Co.** for a new station at **El Paso, Texas**, to operate on 1340 kc., 250 watts, unlimited time (BP-4290; Docket 7073), conditions; and a denial of the mutually exclusive applications of **Seaman and Collins** (BP-4129; Docket 6875), **Del Norte Broadcasting Co., Inc.** (BP-4700; Docket 7534), and **Timberwolf Broadcasting Co., Inc.** (BP-5079; Docket 7721)

Commissioner Durr not participating; Commissioners Denny and Jett consider this is a very close case but favor a grant to Timberwolf Broadcasting Co., Inc., because of what they regard as the outstanding qualifications of General Allen, who would be responsible for the operation of the proposed station.

1490 KC.

The Commission announces its **Proposed Decision** (B-378) looking toward the grant of the application of **Community Service Broadcasting Corp.**, of **Amsterdam, N. Y.**, for a new station in that city to operate on 1490 kc., 250 watts, unlimited time, conditions (BP-5021; Docket 7703), and a denial of the application of **Amsterdam Broadcasters, Inc.**, seeking the same facilities (BP-4481; Docket 7704). (Commissioner Durr not participating.)

AM—New CP's Granted

1050 KC.

Albert P. Pyatt, Garden City, Kans.—Granted CP for a new station to operate on 1050 kc., 1 KW, daytime. (BP-6064)

1220 KC.

Interlake Broadcasting Corp., Renton, Wash.—Adopted an order granting petition to remove from hearing docket and grant its application (BP-5485, Docket 8412), and the same was granted for a new station to operate on 1220 kc., 250 watts, daytime only; engineering conditions.

1410 KC.

Leavenworth Broadcasting Co., Leavenworth, Kans. (Alf M. Landon)—Granted CP for a new station to operate on 1410 kc., 500 watts, daytime only, subject to the filing, within 60 days of grant, of an application for modification of CP, specifying a transmitter site and antenna system meeting the requirements of the engineering standards. (BP-5718)

AM—New CP Deleted

1250 KC.

Alf M. Landon, d/b as Englewood Broadcasting Co., Englewood, Colo.—Granted request that action taken by the Commission on July 17 in granting application for a new station at Englewood to operate with 1 KW, daytime only, on 1250 kc., be deleted without prejudice to applicant filing and application specifying another frequency in Denver, Colo. At the same time the Commission dismissed as moot a petition filed by Frontier Broadcasting Co. objecting to the Englewood grant.

AM—Licenses Granted for New Stations

1400 KC.

WTRR—Southeastern Broadcasting System, Sanford, Fla.—Granted license for new station; 1400 kc., 250 watts, unlimited time. (BL-2464)

KRPL—Interstate Radio, Inc., Moscow, Idaho—Granted license for new station; 1400 kc., 250 watts, unlimited time. (BL-2477)

KDWT—David W. Ratliff, Stamford, Texas—Granted license for new station; 1400 kc., 250 watts, unlimited time. (BL-2380)

AM—Frequency Change

1290 KC.

WJSW—Altoona Broadcasting Co., Altoona, Pa.—Granted CP to increase power from 250 watts to 1 KW-LS, 500 watts night; hours of operation from day to unlimited, DA-N; change frequency from 650 kc. to 1290 kc., change studio location and install DA for night use (BP-5676); engineering conditions.

(Continued on next page)

AM—Designated for Hearing

740 KC.

George M. Hughes, Florence, S. C.—Designated for hearing application for a new station (BP-6044) to operate on 740 kc., 1 KW, daytime only, and ordered that WMBL, Morehead City, N. C., and WPAQ, Mt. Airy, N. C., be made parties to the proceeding.

1220 KC.

Lamar A. Newcomb, Falls Church, Va.—Designated for hearing application for a new station (BP-5436) to operate on 1220 kc., 250 watts, daytime only.

1420 KC.

Fannin County Broadcasting Co., Bonham, Texas—Designated for hearing application (BP-5720) for a new station to operate on 1420 kc., 1 KW, daytime only, and ordered that KGVL, Greenville, Texas, be made a party to the proceeding.

AM—Modifications of CP's Granted

WLEE—Lee Broadcasting Corp., Richmond, Va.—Granted modification of CP for extension of completion date to 2-17-48. (BMP-2946)

WWSR—Vermont Radio Corp., Inc., St. Albans, Vt.—Granted modification of CP for extension of completion date to 8-1-47.

KRBA—Darrell E. Yates, Lufkin, Texas—Granted modification of CP for extension of completion date to 11-7-47. (BMP-2945)

KAKE—KAKE Broadcasting Co., Inc., Wichita, Kans.—Granted modification of CP to change type of transmitter, make changes in vertical antenna, change transmitter location and studio location "to be determined." (BMP-2786)

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted modification of CP for extension of completion date to 9-15-47. (BMP-2936)

KELN—Boulder City Broadcasting Co., Ely, Nev.—Granted modification of CP to change transmitter location from Ely to near Ely, Nev. (BMP-2825)

WNJR—North Jersey Radio, Inc., Newark, N. J.—Granted modification of CP for extension of completion date to 11-26-47. (BMP-2960)

WKMA—Radio South, Quitman, Ga.—Granted modification of CP for extension of completion date to 9-19-47. (BMP-2954)

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted modification of CP for extension of completion date to 10-17-47. (BMP-2947)

WGCM—The Lawrence Broadcasting Co., Lawrence, Mass.—Granted modification of CP to change type of transmitter and make changes in vertical antenna. (BMP-2970)

WJAG—Huse Publishing Co., Norfolk, Neb.—Granted modification of CP for extension of completion date to 11-1-47. (BMP-2961)

WALD—Walterboro Broadcasting Co., Walterboro, S. C.—Granted modification of CP to change type of transmitter. (BMP-2980)

WORA—Radio Americas Corp., Mayaguez, P. R.—Granted modification of CP for extension of completion date to 11-26-47. (BMP-2955)

WGL—Farnsworth Telephone & Radio Corp., Fort Wayne, Ind.—Granted modification of CP for extension of completion date to 8-30-47.

WJOC—Air Waves, Inc., Jamestown, N. Y.—Granted modification of CP for approval of antenna and transmitter location. (BMP-2753)

WWEZ—Sky Broadcasting Service, New Orleans, La.—Granted modification of CP to change type of transmitter, for approval of antenna and transmitter location, and to specify studio location. (BMP-2926)

KRLC—Station KRLC, Lewiston, Idaho—Granted modification of CP for extension of completion date to 3-7-48. (BMP-2943)

KLAS—Las Vegas Broadcasters, Inc., Las Vegas, Nev.—Granted modification of CP for extension of commencement and completion dates to 9-1-47 and 3-1-48, respectively. (BMP-2957)

KOAC—Ore. State Agricultural College, Corvallis, Ore.—Granted modification of CP for extension of commencement and completion dates to 8-5-47 and 2-6-48, respectively. (BMP-2959)

KSEI—Radio Service Corp., Pocatello, Idaho—Granted modification of CP (BP-3735) for extension of completion date to 8-31-47.

KSO—Murphy Broadcasting Co., Des Moines, Iowa—Granted modification of CP (BP-4327) for extension of completion date to 11-27-47. (BMP-2968)

AM—Miscellaneous Actions

WLBJ—The Bowling Green Broadcasting Co., Bowling Green, Ky.—Granted CP to install new vertical antenna and mount FM antenna on AM tower. (BP-6079)

WLNH—Northern Broadcasting Co. (Assignor), Northern Broadcasting Corp. (Assignee), Laconia, N. H.—Granted voluntary assignment of license of station WLNH from Northern Broadcasting Co. to Northern Broadcasting Corp., for a consideration of $45,000. (BAL-607)

WLBB—The Carroll Broadcasting Co., a partnership (Assignor), Carroll Broadcasting Co., Inc. (Assignee), Carrollton, Ga.—Granted consent to assignment of license of WLBB from the Carroll Broadcasting Co., a partnership, to Carroll Broadcasting Co., Inc., a corporation. No monetary consideration. (BARL-25)

KSJO—Santa Clara Broadcasting Co., San Jose, Calif.—Denied petition requesting reconsideration of the Commission's action of June 20, 1947, denying their application for special service authorization. (BSSA-162)

Chronicle Publishing Co., Inc., Marion, Ind.—Adopted memorandum opinion and order denying petition for rehearing and for other relief, directed against Commission action of Sept. 18, 1946, denying after hearing, petitioner's application for a new station (BP-4109; Docket 6798).

WMBY—Magic City Broadcasting Co., Birmingham, Ala.—Granted request for cancellation of construction permit and modification (BP-3671 and MP-2354) which authorized a new station on 730 kc., 1 KW, daytime.

WKBW—Buffalo Broadcasting Corp. (Assignor); Broadcasting Foundation, Inc. (Assignee), Buffalo, N. Y.—Adopted memorandum opinion authorizing exemption from publication as required by Rule 1.321, of the application for assignment of license of station WKBW (BAL-630).

Tri-City Broadcasting Co., Newport, Ky.—Granted petition for leave to file amended and supplemental reply to petition of Moraine Broadcasters, Inc., requesting reconsideration of the Commission's action in re application of Tri-City Broadcasting Co. and Moraine Broadcasters, Inc. (Dockets 7716 and 7717)

KOCY—Plaza Court Broadcasting Co., Oklahoma City, Okla.—Granted leave to intervene in the hearing on application of Howdy Folks Broadcasters et al.

Steel City Broadcasting Co., Gary, Ind.—Granted petition for leave to amend its application (BP-5681; Doc. 8178) so as to specify 1370 kc. with 1 KW instead of 1260 kc with 250 watts. The amendment was accepted and application removed from the hearing docket.

Radio Calumet, Inc., Gary, Ind.—The Commission, on its own motion, removed from the hearing docket application (BP-6131; Docket 8452).

Northeast Radio, Inc., Lawrence, Mass.—Granted petition for leave to amend its application (BP-5302; Docket 8283) so as to add a supplemental engineering exhibit containing field intensity measurements.

(Continued on next page)

Plan to Attend—Attend to Plan

Eastern Oklahoma Broadcasting Corp., Muskogee, Okla.—Dismissed petition requesting extension of time within which to file an appearance in re its application (BP-4996; Docket 8386).

Greenville Broadcasting Co., Greenville, Ala.—Dismissed petition requesting removal of its application (BP-6094; Docket 8444) from the docket and immediate grant thereof.

Pellegrin & Smeby, Detroit, Mich.—Granted petition for leave to amend its application (BP-5805; Docket 8431) so as to specify the frequency 1440 kc. with 1 KW, daytime only, instead of 1460 kc., 500 watts, daytime. The amendment was accepted and application removed from the hearing docket.

The Gate City Co., Keokuk, Iowa—Granted petition for leave to amend its application (BP-5858; Docket 8193) so as to specify 1580 kc. with 1 KW, daytime only, instead of 1100 kc., 250 watts, daytime only. The amendment was accepted and application removed from the hearing docket.

KNOX Broadcasting Co., Galesburg, Ill.—The Commission, on its own motion, removed from the hearing docket application (BP-5761; Docket 8125).

Bee Broadcasting Co., Beeville, Texas—Granted petition for leave to amend its application (BP-4639; Docket 7604) so as to specify the frequency 1490 kc. with 250 watts, unlimited time, instead of 810 kc., 250 watts, daytime. The amendment was accepted and application removed from the hearing docket.

Northwestern Ohio Broadcasting Corp., Lima, Ohio—Granted petition for leave to amend its application (BP-4447; Docket 7357) so as to show the withdrawal from applicant corporation of Edward Cooper, as director, assistant secretary and stockholder, and of Robert F. Jones as a stockholder. The amendment was accepted and the Commission, on its own motion, ordered the record reopened for the purpose of adding the above-mentioned amendment, and scheduled a further hearing in the consolidated proceeding involving the application of Northwestern Ohio Broadcasting Corp., WOOP, Inc., and Sky Way Broadcasting Corp., for August 28, in Washington. Exceptions noted by counsel for Sky Way Broadcasting Corp.

WARM—Union Broadcasting Co., Scranton, Pa., et al.—Ordered that the notices of hearing in the consolidated proceeding involving WARM, WBAX, et al (Dockets 7851, 7852, etc.), be amended to include an issue to determine whether the proposed operation of WARM and WBAX would involve objectionable interference with service of a proposed station at Lynchburg, Va.

AM—Applications Accepted for Filing

550 KC.

KOPR—Copper Broadcasting Co., Butte, Mont. (Frank C. Carman, David G. Smith; Frank C. Carmen, Administrator of the estate of Jack L. Powers and Grant R. Wrathall)—Modification of construction permit (B5-P-3993, as modified, which authorized a new standard broadcast station) for extension of commencement and completion dates.

KCRS—Millard Eidson, Midland, Texas (Independent Executor of the Estate of Clarence Scharbauer, deceased)—Modification of construction permit (B3-P-4474, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for day and night, and change in transmitter location) for extension of completion date.

600 KC.

KFSD—Airfan Radio Corp., Ltd., San Diego, Calif.—Modification of construction permit (B5-P-2259, as modified, which authorized installation of new transmitter and directional antenna, increase in power and move transmitter) for extension of completion date.

680 KC.

WDBC—Delta Broadcasting Co., Escanaba, Mich.—Construction permit to change frequency from 1490 to 680 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use, and change transmitter location.

WMPS—WMPS, Inc., Memphis, Tenn.—Modification of construction permit (B3-P-4310, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change transmitter location) for extension of completion date.

690 KC.

NEW—William J. Brennan, Jacksonville, Fla. (P. O. 1021 Roger St., Powderly, Ala.)—Construction permit for a new standard broadcast station to be operated on 690 kc., power of 5 KW, and daytime hours of operation.

KPET—Lamesa Broadcasting Co., Lamesa, Tex. (R. O. Parker, R. A. Woodson, K. S. Ashby, a partnership)—Modification of license to change hours of operation from daytime to unlimited.

740 KC.

NEW—Radio Station Des Moines, Inc., Des Moines, Iowa (P. O. 1000 Fleming Bldg.)—Construction permit for a new standard broadcast station to be operated on 740 kc., power of 250 watts, and daytime hours of operation.

780 KC.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—License to cover construction permit (B4-P-4009, as modified) which authorized installation of new vertical antenna and authority to determine operating power by direct measurement of antenna power.

790 KC.

WTNC—Thomasville Broadcasting Co., Thomasville, N. C. (George W. Lyles, Sr., Russell F. Van Landingham and George W. Lyles, Jr.)—Modification of construction permit (B3-P-5206, as modified, which authorized a new standard broadcast station) to change studio location.

830 KC.

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Extension of special service authorization to operate additional time between the hours of 6:00 a.m., EST, and sunrise at New York, N. Y., and between the hours of sunset at Minneapolis, Minn., and 10:00 p.m., EST, using directional antenna designed therefor, for the period beginning 3:00 a.m., EST, September 2, 1947.

850 KC.

WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Modification of construction permit (B2-P-3609, which authorized change in frequency, increase in power, installation of directional antenna for day and night, installation of new transmitter, and change in transmitter location) to make changes in directional antenna and mount FM antenna on AM tower.

890 KC.

NEW—Piedmont Broadcasting Co., Greenville, S. C.—Construction permit for a new standard broadcast station to be operated on 890 kc., power of 1 KW and daytime hours of operation. Amended re officer, directors, and stockholders.

910 KC.

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—License to cover construction permit (B3-P-4300, as modified) which authorized increase in power, installation of new transmitter and authority to determine operating power by direct measurement of antenna power.

920 KC.

NEW—Springtime City Broadcasting Co., Clearwater, Fla. (Victor John Morgan)—Construction permit for a new standard broadcast station to be operated on 920 kc., power of 250 watts and daytime hours of operation. Amended to change power from 250 to 500 watts.

(Continued on next page)

950 KC.

NEW—Humboldt-Milan-Trenton Broadcasting Co., Humboldt, Tenn. (P. O. Plaza Theatre Bldg.)—Construction permit for a new standard broadcast station to be operated on 950 kc., power of 1 KW, and daytime hours of operation.

WINC—Richard Field Lewis, Jr., Winchester, Va.—Construction permit to change frequency from 1400 to 950 kc., increase power from 250 to 500 watts night and 1 KW day, change type of transmitter and install directional antenna for night use.

960 KC.

WBOC—The Peninsula Broadcasting Co., Salisbury, Md.—Modification of construction permit (B1-P-3786, as modified which authorized change in frequency, increase in power, making changes in transmitting equipment and installing directional antenna for night use) for extension of completion date.

970 KC.

KPDR—Central Louisiana Broadcasting Corp., Alexandria, La.—Construction permit to change frequency from 1490 to 1400 kc. Amended to change frequency from 1400 to 970 kc., power from 250 watts to 1 KW, install directional antenna for night use, change type transmitter and change transmitter location.

990 KC.

WHOO—Orlando Daily Newspapers, Inc., Orlando, Fla.—Modification of construction permit (B3-P-4328, as modified which authorized a new standard broadcast station) for extension of completion date.

1010 KC.

WABZ—Albemarle Broadcasting Co., Albemarle, N. C. (T. R. Wolfe, W. E. Smith, S. L. Myers, Carl C. Aley, and R. H. Whitlow, a partnership)—Voluntary assignment of construction permit to Radio Station WABZ, Inc.

1030 KC.

NEW—Baylor University, Houston, Tex. (P. O. % Pat M. Neff, Baylor University, Waco, Tex.)—Construction permit for a new standard broadcast station to be operated on 1030 kc., power of 50 KW and daytime hours of operation (LSR Boston, Mass., to LSS Houston, Tex.). Request the facilities of KWBU.

1050 KC.

WRFW—Chippewa Valley Radio and Television Corp., Eau Claire, Wisc.—Modification of construction permit (B4-P-5313, which authorized a new standard broadcast station) to change type of transmitter, and for approval of antenna, transmitter and studio locations.

(Continued on next page)

Streeter Creek, 0.1 mile south of Hampton Roads Terrace Beach, Nansemond County, Virginia.

KPSC—Sun Country Broadcasting Co., Phoenix, Ariz.—Construction permit to change frequency from 1450 to 1270 kc., increase power from 250 watts to 5 KW, install new transmitter and directional antenna for night use, and change transmitter location. Amended to change transmitter location.

KCOK—Herman Anderson, Tulare, Calif.—Construction permit to change frequency from 1240 to 1270 kc., increase power from 250 watts to 1 KW, install new transmitter and directional antenna for night use. Amended to change transmitter location and make changes in directional antenna.

1280 KC.

KIT—Carl E. Haymond, Yakima, Wash.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and install directional antenna for night use.

1300 KC.

KROP—Broadcasting Corp. of America, Brawley, Calif.—Construction permit to install new transmitter.

1310 KC.

WISH—Capitol Broadcasting Corp., Indianapolis, Ind.—Voluntary transfer of control of licensee corporation from C. Bruce McConnell, Earl H. Schmidt, Frank McConnell, John E. Messick and Edward W. Harris to Universal Broadcasting Co., Inc.

1330 KC.

NEW—Jack Henry Kidd, Jr., Kingsville, Tex.—Construction permit for a new standard broadcast station to be operated on 1170 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 1170 to 1330 kc., power from 250 watts to 1 KW and change type of transmitter.

1340 KC.

NEW—Beaufort Broadcasting Co., Washington, N. C.—Construction permit for a new standard broadcast station to be operated on 1400 kc., power of 250 watts and unlimited hours of operation. Amended to change frequency from 1400 to 1340 kc., contingent on WGTN to change frequency to 590 kc.

KRUL—Pacific States Radio Co., Corvallis, Ore.—Modification of construction permit (B5-P-5014, as modified, which authorized a new standard broadcast station) to change type of transmitter.

WROD—Daytona Beach Broadcasting Co., Daytona Beach, Fla. (Wade R. Sperry, Edgar J. Sperry and Josephine T. Sperry, co-partners)—Voluntary assignment of construction permit to Daytona Beach Broadcasting Corp.

1360 KC.

NEW—DeKalb Radio Studios, DeKalb, Ill. (Theodore A. Lanes and Roland Wallem, a partnership)—Construction permit for a new standard broadcast station to be operated on 1360 kc., power of 250 watts, and daytime hours of operation. Amended to change power from 250 to 500 watts, changes in antenna and type transmitter and change transmitter location.

1370 KC.

NEW—Fairmont Broadcasting Co., Fairmont, Minn. (P. O. 103 S. North Ave.)—Construction permit for a new standard broadcast station to be operated on 1370 kc., power of 1 KW, directional antenna and unlimited hours of operation. (DA-2.)

1380 KC.

WATL—Atlanta Broadcasting Co., Atlanta, Ga. (J. W. Woodruff)—Modification of construction permit (B3-P-3985, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and change in transmitter location) for extension of commencement and completion dates.

KPBX—WCPZ Broadcasting Co., Beaumont, Texas (William Paul Beville, Louise Beville, Vincent F. Callahan, Florence Anita Callahan, Eugene M. Zuckert and Barbara J. Zuckart, a partnership)—Voluntary assignment of license to KPBX Broadcasting Co.

NEW—Penn Lincoln Broadcasting Co., Inc., Carlisle, Pa.—Construction permit for a new standard broadcast station to be operated on 720 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 720 to 1380 kc., power from 250 watts to 1 KW and change type of transmitter.

1400 KC.

WCOH—Newnan Broadcasting Co., Newnan, Ga. (a partnership composed of D. T. Manget, Evan W. Thomasson, James Thomasson and Ida A. Thomasson)—Modification of construction permit (B3-P-4487, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and transmitter location and to specify studio location.

WHLB—Head of the Lakes Broadcasting Co., Virginia, Minn.—Construction permit to make changes in transmitting equipment.

1420 KC.

NEW—Highland Broadcasting Corp., Peekskill, N. Y. (P. O. 1037 Main St.)—Construction permit for a new standard broadcast station to be operated on 1420 kc., power of 250 watts, and daytime hours of operation.

1430 KC.

KLO—Interstate Broadcasting Corp., Ogden, Utah—Modification of construction permit (B5-P-5032, which authorized installation of new directional antenna for day and night use) to make changes in directional antenna.

NEW—Robert F. Wolfe, Co., Fremont, Ohio (Robert F. Wolfe and Margaret R. Wolfe, a partnership) (P. O. 907 West State Street)—Construction permit for a new standard broadcast station to be operated on 1430 kc., power of 1 KW, and daytime hours of operation employing directional antenna.

1440 KC.

NEW—Floral City Broadcasting Co., Monroe, Mich. (Edward T. Dillon and Matthew A. Vance, a partnership)—Construction permit for a new standard broadcast station to be operated on 1520 kc., power of 250 watts and daytime hours of operation. Amended to change frequency from 1520 to 1440 kc.

1450 KC.

WILM—Delaware Broadcasting Co., Wilmington, Del.—Authority to determine operating power by direct measurement of antenna power.

WASK—WFAM, Inc., Lafayette, Ind.—Modification of construction permit (B4-P-4827, as modified, which authorized installation of new vertical antenna, and change transmitter location) for extension of completion date.

NEW—Western Maryland Broadcasting Corp., Hagerstown, Md.—Construction permit for a new standard broadcast station to be operated on 1450 kc., power of 250 watts, and unlimited hours of operation. Amended to change name of applicant from Western Maryland Broadcasting Corporation to Cavalier Broadcasting Corp.

WMIQ—Iron-Mountain-Kingsford Broadcasting Co., Iron Mountain, Mich.—Authority to determine operating power by direct measurement of antenna power.

1460 KC.

KRUZ—Monterey Bay Broadcast Co., Santa Cruz, Calif. (L. John Miner, Taft R. Wrathall and Grant R. Wrathall)—Modification of construction permit (B5-P-4150, which authorized a new standard broadcast station) to make changes in transmitting equipment and directional antenna, and change transmitter location.

1470 KC.

WRGA—Rome Broadcasting Corp., Rome, Ga.—Modification of construction permit (B3-P-5334, which authorized

(Continued on next page)

change in frequency, increase in power, installation of new transmitter and directional antenna for night, and change in transmitter location) to change type of transmitter and make changes in directional antenna.

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Modification of construction permit (B2-P-4047, as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use) for extension of completion date.

1480 KC.

NEW—Easton Broadcasting Co., Inc., Easton, Md. (P. O. 46 S. Washington St.)—Construction permit for a new standard broadcast station to be operated on 1480 kc., power of 1 KW, and unlimited hours of operation, employing directional antenna.

WHBC—The Ohio Broadcasting Co., South Canton, Ohio—Modification of construction permit (B2-P-3939, as modified, which authorized increase in power, installation of new transmitter, changes in directional antenna for night use and change in transmitter location) for extension of completion date.

1490 KC.

WRLD—Valley Broadcasting Co., West Point, Ga. (L. J. Duncan, Leila A. Duncan and Josephine Rawls)—Construction permit to make changes in transmitting equipment.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Modification of license to change name of licensee from James F. Hopkins, Inc., to Detroit Broadcasting Co.

KVER—Intermountain Broadcasting Co., Albuquerque, N. M.—License to cover construction permit (B5-P-5083, as modified) which authorized a new standard broadcast station and for change of studio location and authority to determine operating power by direct measurement of antenna power.

WTMV—Evansville On The Air, Inc., East St. Louis, Ill.—Modification of license to change name of licensee from Evansville On The Air, Incorporated to On The Air, Inc.

WALD—Walterboro Broadcasting Co., Walterboro, S. C.—Modification of construction permit (B3-P-5075, as modified, which authorized a new standard broadcast station) to change type of transmitter.

WBEC—Western Massachusetts Broadcasting Co., Pittsfield, Mass.—Modification of license to increase power from 100 to 250 watts.

1500 KC.

WJBK—James F. Hopkins, Inc., Detroit, Mich.—Construction permit to change frequency from 1490 to 1500 kc., increase power from 250 watts to 10 KW, install new transmitter and directional antenna for day and night use and change transmitter location from Detroit to Brownstown Township, Mich. (Contingent upon WABJ filing application for change in frequency and grant of said application.)

1510 KC.

KUSN—San Diego Broadcasting Co., San Diego, Calif.—Modification of construction permit (B5-P-3744, as modified which authorized a new standard broadcast station) for extension of completion date.

1520 KC.

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Voluntary assignment of license to Broadcasting Foundation, Inc.

1580 KC.

NEW—Mid-Island Radio, Inc., Patchogue, N. Y. (P. O. ℅ Solomon H. Bauch, 45 John St., New York, N. Y.)—Construction permit for a new standard broadcast station to be operated on 1580 kc., power of 250 watts, and daytime hours of operation.

AM—Applications Returned

Kenneth Edward Rennekamp, Harrisburg, Pa. (P. O. 513-515 Berger Bldg., Pittsburgh, Pa.)—Construction permit for a new standard broadcast station to be operated on 1230 kc., power of 250 watts, and unlimited hours of operation. Returned 8-1-47. Incomplete.

Lincoln Broadcasting Co., Detroit, Mich., and Woodward Broadcasting Co., Detroit, Mich.—Adopted an Order granting joint petition requesting reconsideration and grant of their applications for Class B Stations and ordered applications (BPH-1231, Doc. 8350) and (BPH-1240, Doc. 8351) removed from the docket and conditionally granted for Class B stations.

Suburban Broadcasters, Dearborn, Mich. (a co-partnership)—Class B. (BPH-1304)

Radio Anthracite, Inc., Scranton, Pa.—Class B. (BPH-1250)

Laredo Broadcasting Co., Laredo, Tex.—Class B. (BPH-1108)

Commonwealth Broadcasting Co., Norfolk, Va.—Class B. (BPH-1194)

Western Maryland Broadcasting Corp., Norfolk, Va.—Class B. (BPH-1249)

Suffolk News Company, Suffolk, Va.—Class B. (BPH-1210)

Madera Broadcasting Co., Madera, Calif.—Class A. (BPH-1309); proposed assignment: 103.9 mc. (Channel 280).

Nashua Broadcasting Corp., Nashua, N. H.—Class A. (BPH-1282); proposed assignment: 106.3 mc. (Channel 292).

Union Broadcasting Co., Elizabeth, N. J.—Class A. (BPH-1287); proposed assignment: Channel 240.

Harold O. Bishop, Green Brook Twp., N. J.—Class A. (BPH-1198); proposed assignment: Channel 280.

Newark Broadcasting Corp., Newark, N. J.—Class A. (BPH-1280); proposed assignment: Channel No. 224.

Chanticleer Broadcasting Co., New Brunswick, N. J.—Class A. (BPH-1186); proposed assignment: Channel 252.

C. H. Winans Co., Watchung, N. J.—Class A. (BPH-1187); proposed assignment: Channel No. 288.

Coastal Broadcasting Co., Inc., Bay Shore, N. Y.—Class A. (BPH-1257); proposed assignment: Channel No. 240.

Harry D. Fornari, Mineola, N. Y.—Class A. (BPH-1285); proposed assignment: Channel No. 288.

Radio New Rochelle, Inc., New Rochelle, N. Y.—Class A. (BPH-1172); proposed assignment: Channel No. 232.

American Quartz Labs., Inc., Yonkers, N. Y.—Class A. (BPH-1181); proposed assignment: Channel No. 272.

Bell Broadcasting Co., Inc., Temple, Tex.—Class B in lieu of a Class A granted Nov. 23, 1945. (BMPH-477)

Denny Park Lutheran Church of Seattle, Wash., Seattle, Wash.—Class B. (BPH-1278)

FM—Construction Permits

The following were authorized construction permits; conditions. (Note: power given is effective radiated power; antenna height is height above average terrain):

KTMS-FM—News-Press Pub. Co., Santa Barbara, Calif. —Class A; Channel: 98.3 mc. (No. 252); 380 watts; 550 feet. (BMPH-210; PH-436)

San Mateo County Broadcasters, San Mateo, Calif.—Class A; Channel: 100.9 mc. (No. 265); 380 watts; 180 feet. (BPH-1029)

KTUR—"Turlock Broadcasting Group," Turlock, Cal.—Class A; Channel: 100.9 mc. (No. 265); 1 KW; 155 feet. (BPH-1050)

WLOF-FM—Hazlewood, Inc., Orlando, Fla.—Class B; Channel: 100.3 mc. (No. 262); 65 KW; 450 feet; conditions. (BPH-835)

Stillwater Pub. Co., Stillwater, Okla.—Class B; Channel: 93.9 mc. (No. 230); 3.1 KW; 375 feet. (BPH-985) (Channel 230 allocated to Stillwater.)

West Central Broadcasting Co., Tulsa, Okla.—Class B; Channel: 99.5 mc. (No. 258); 185 KW; 510 feet. (BPH-1089)

Radio Station KTBS, Shreveport, La.—Class B; Channel: 96.5 mc. (No. 243); 47 KW; 370 feet. (BPH-1167)

Wayne M. Nelson, Nr. Concord, N. C.—Class B; Channel: 96.5 mc. (No. 243); 3.8 KW; 330 feet; conditions. (BPH-1116)

Coastal Broadcasting Co., Inc., Nr. New Bern, N. C.—Class B; Channel: 103.7 mc. (No. 279); 2.9 KW; 300 feet; conditions. (BPH-926)

KFYO-FM—Plains Radio Broadcasting Co., Lubbock, Tex. —Class B; Channel: 99.5 mc. (No. 258); 13 KW; 270 feet. (BPH-1129)

The following were authorized construction permits in lieu of previous conditions:

KIDO-FM—KIDO, Inc., Boise, Idaho—Class B; Channel 106.1 mc. (No. 291); 7 KW; 415 feet. (BMPH-558)

WJBC-FM—Bloomington Broadcasting Corp., Bloomington, Ill.—Class B; Channel: 101.5 mc. (No. 268); 45 KW; 365 feet. (BMPH-559)

(Continued on next page)

WMIX-FM—Mt. Vernon Radio & Tele., Mt. Vernon, Ill.—Class B; Channel: 94.1 mc. (No. 231); 15.2 KW; 550 feet. (BMPH-530)

WTHI-FM—Wabash Valley Broadcasting Corp., Terre Haute, Ind.—Class B; Channel: 99.9 mc. (No. 260); 20 KW; 305 feet. (BMPH-564)

KCRA-FM—Central Valleys Broadcasting Co., Sacramento, Calif.—Class B; Channel: 96.1 mc. (No. 241); 49 KW; 355 feet; condition. (BPH-848)

WOL-FM—Cowles Broadcasting Co., Washington, D. C.—Class B; Channel: 98.7 mc. (No. 254); 20 KW· 410 feet. (BMPH-173)

WJAX-FM—City of Jacksonville, Jacksonville, Fla.—Class B; Channel: 95.1 mc. (No. 236); 130 KW; 565 feet. (BPH-655)

WMCP—Belvedere Broadcasting Corp., Baltimore, Md.—Class B; Channel: 94.7 mc. (No. 234); 20 KW; 405 feet. (BMPH-597)

WBOC-FM—The Peninsula Broadcasting Co., Salisbury, Md.—Class B; Channel: 97.5 mc. (No. 248); 12 KW; 370 feet. (BMPH-565)

WMIN-FM—WMIN Broadcasting Co., St. Paul, Minn.—Class B; Channel: 99.5 mc. (No. 258); 65 KW; 375 feet. (BMPH-520)

WHB-FM—WHB Broadcasting Co., Kansas City, Mo.—Class B; Channel: 102.1 mc. (No. 271); 46 KW; 500 feet. (BMPH-549)

KCFM—KCMO Broadcasting Co., Kansas City, Mo.—Class B; Channel: 104.3 mc. (No. 282); 54 KW; 350 feet. (BMPH-552)

WEW-FM—St. Louis University, St. Louis, Mo.—Class B; Channel: 95.1 mc. (No. 236); 68 KW; 530 feet. (BMPH-487)

WCEC-FM—Josh L. Horne, Rocky Mount, N. C.—Class B; Channel: 100.7 mc. (No. 264); 33 KW; 400 feet. (BPH-392)

WTAR-FM—WTAR Radio Corp., Norfolk, Va.—Class B; Channel: 97.3 mc. (No. 247); 50 KW; 345 feet. (BMPH-580)

FM—Allocation Plan Change

Muskegon, Mich.—Delete Channel 297; add Channel 263.

FM—Frequency Assignment

(In lieu of previous assignment)

WMUS-FM—Greater Muskegon Broadcasters, Inc., Muskegon, Mich.—100.5 mc. (Channel 263).

FM—Modifications of CP's Granted

WLVA-FM—Lynchburg Broadcasting Corp., Lynchburg, Va.—Granted modification of CP for extension of completion date of FM station to 10-17-47. (BMPH-585)

KSEI-FM—Radio Service Corp., Pocatello, Idaho—Granted modification of CP for extension of completion date of FM station to 8-31-47. (BMPH-598)

KDTH-FM—Telegraph Herald, Dubuque, Iowa—Granted modification of CP for extension of completion date of FM station to 3-8-48. (BMPH-531)

WFMJ-FM—The WFMJ Broadcasting Co., Youngstown, Ohio—Granted modification of CP for extension of completion date of FM station to 2-18-48. (BMPH-600)

WFAS-FM—Westchester Broadcasting Corp., White Plains, N. Y.—Granted modification of CP for extension of completion date of FM station to 10-5-47. (BMPH-601)

WJLS-FM—Joe L. Smith, Jr., Beckley, W. Va.—Granted modification of CP for extension of completion date of FM station to 2-21-48. (BMPH-603)

KTUL-FM—Tulsa Broadcasting Co., Tulsa, Okla.—Granted modification of CP for extension of completion date of FM station to 1-29-48. (BMPH-602)

WAIR-FM—WAIR Broadcasting Co., Winston-Salem, N. C.—Granted modification of CP for extension of completion date of FM station to 10-21-47. (BMPH-586)

WGTM-FM—Penn Thomas Watson, Wilson, N. C.—Granted modification of CP for extension of completion date of FM station to 3-16-48. (BMPH-599)

WCAR-FM—Pontiac Broadcasting Co., Pontiac, Mich.—Granted modification of CP to change corporate name to WCAR, Inc. (BMPH-582)

WLBC-FM—Donald A. Burton, Nr. Muncie, Ind.—Granted modification of CP for extension of completion date to 10-22-47. (BMPH-591)

WKWK-FM—Community Broadcasting, Inc., Wheeling, W. Va.—Granted modification of CP for extension of completion date to 9-27-47. (BMPH-447)

WKNB-FM—The New Britain Broadcasting Co., New Britain, Conn.—Granted modification of CP for extension of completion date to 10-15-47. (BMPH-581)

WMFM—James A. Hardman, No. Adams, Mass.—Granted modification of CP for extension of completion date to 11-13-47. (BMPH-593)

WKIL—Kankakee Daily Journal Co., Kankakee, Ill.—Granted modification of CP for extension of completion date to 9-20-47. (BMPH-589)

WHFB-FM—The Palladium Publishing Co., Benton Harbor, Mich.—Granted modification of CP for extension of completion date to 10-25-47. (BMPH-596)

WKMO-FM—Kokomo Broadcasting Corp., Kokomo, Ind.—Granted modification of CP for extension of completion date to 12-3-47. (BMPH-588)

KSEO-FM—Democrat Printing Co., Nr. Durant, Okla.—Granted modification of CP for extension of completion date to 10-27-47. (BMPH-590)

WMIX-FM—Mt. Vernon Radio and Television Co., Mt. Vernon, Ill.—Granted modification of CP for extension of completion date to 12-15-47. (BMPH-535)

WTNY—The Troy Record Co., Troy, N. Y.—Granted modification of CP for extension of completion date to 11-18-47. (BMPH-576)

KFH-FM—The Radio Station KFH Co., Wichita, Kans.—Granted modification of CP for extension of completion date to 2-4-48. (BMPH-577)

WSBA-FM—Susquehanna Broadcasting Co., Nr. York, Pa.—Granted modification of CP for extension of completion date to 11-5-47. (BMPH-578)

WCTS—The Cincinnati Times-Star Co., Cincinnati, Ohio—Granted modification of CP for extension of completion date to 11-18-47. (BMPH-587)

WSJN—Radio Americas Corp., San Juan, P. R.—Granted modification of CP for extension of completion date to 11-21-47. (BMPH-594.

WCOL-FM—The Pixleys, Columbus, Ohio—Granted modification of CP for extension of completion date to 11-22-47. (BMPH-595)

WEEU-FM—Hawley Broadcasting Co., Reading, Pa.—Granted modification of CP for extension of completion date to 10-29-47.

FM—Miscellaneous Actions

WELD—Radio Ohio, Inc., Columbus, Ohio—Granted CP for extension of commencement and completion dates to 8-1-47 and 2-1-48. (BMPH-572)

WLSC—Lancaster Broadcasting Co., Lancaster, S. C.—Granted CP for extension of commencement and completion dates to 9-2-47 and 12-2-47. (BMPH-473)

United Broadcasting Co., Cleveland, Ohio—Granted petition to accept late its notice of intention to participate in oral argument in re its application for a new FM station. (BPH-99)

(Continued on next page)

FM—Applications Accepted for Filing

WCOL-FM—The Pixleys, Columbus, Ohio (Lloyd A. Pixley, Martin P. Pixley, Milton A. Pixley and Grace N. Pixley, partners)—Involuntary assignment of construction permit to Lloyd A. Pixley, Martha P. Pixley and Grace M. Pixley, partners, d/b as The Pixleys.

WCSI—Syndicate Theatres, Inc., Columbus, Ind.—Modification of construction permit (B4-PH-658, which authorized a new FM broadcast station) to change studio location and make changes in antenna system.

NEW—Sundial Broadcasting Corp., San Francisco, Calif. (P. O. 13 E. Ninth St., New York, N. Y.)—Construction permit for a new FM broadcast station (Class B) to be operated on Channel #259, 99.7 mc., with 30 KW ERP.

KPRA—Pacific Radio Advertising Service, Portland, Ore. (A partnership composed of John C. Egan and Wilbur J. Jerman)—Modification of construction permit (B5-PH-503, as modified, which authorized a new FM broadcast station) for extension of completion date.

KVWC-FM—Northwestern Broadcasting Co., Vernon, Tex.—Modification of construction permit (B3-PH-576, which authorized a new FM broadcast station) for extension of completion date.

WJLS-FM—Joe L. Smith, Jr., Beckley, W. Va.—Modification of construction permit (B2-PH-494, as modified, which authorized a new FM broadcast station) to change completion date.

FM—Application Dismissed

Fountain of Youth Broadcasting Co., St. Augustine, Fla.—Construction permit for a new FM broadcast station to be operated on 92 to 106 mc., and coverage of 2,580 square miles. Request of attorney. 8-1-47.

TELEVISION

TV—Miscellaneous Actions

Westinghouse Radio Stations, Inc., area of Boston, Mass.—Granted CP for new experimental television relay broadcast station to be used with WBZ-TV. (BPVB-210)

WNBW—NBC, Washington, D. C.—Granted modification of CP for further extension of completion date to 10-19-47. (BMPCT-88)

WJAR-TV—The Outlet Co., Providence, R. I.—Granted modification of CP for further extension of completion date to 3-16-48. (BMPCT-82)

WPTZ—Philco Television Broadcasting Corp., Philadelphia, Pa.—Granted modification of CP for extension of completion date to 12-2-47. (BMPCT-92)

WEWS—Scripps-Howard Radio, Inc., Cleveland, Ohio—Granted modification of CP for further extension of completion date to 1-25-48. (BMPCT-90)

KTTV—The Times-Mirror Co., Los Angeles, Calif.—Granted modification of CP for extension of completion date to 2-20-48. (BMPCT-87)

WLWT—Crosley Broadcasting Corp., Cincinnati, Ohio—Granted modification of CP for extension of completion date to 1-21-48. (BMPCT-83)

W6XOA—Don Lee Broadcasting System, Hollywood, Calif.—Granted modification of CP for further extension of completion date to 2-13-48. (BMPVB-163)

WNBK—NBC—Granted modification of CP for further extension of completion date to 1-16-48. (BMPCT-81)

W9XKY—The Journal Co. (The Milwaukee Journal), Milwaukee, Wisc.—Granted modification of CP for further extension of completion date to 2-20-48. (BMPVB-167)

KARO—Broadcasting Corp. of America, Riverside, Cal.—Granted CP for extension of commencement and completion dates to 8-1-48 and 2-1-49, respectively. (BMPCT-91)

WTVT—The Fort Industry Co., Toledo, Ohio—Granted extension of completion date to 2-5-48. (BMPCT-93)

KECA-TV—American Broadcasting Co., Inc., Los Angeles, Cal.—Granted extension of completion date to 2-20-48. (BMPCT-89)

TV—Applications Accepted for Filing

NEW—The Elm City Broadcasting Corp., New Haven, Conn. (P. O. 1110 Chapel Street)—Construction permit for a new commercial television broadcast station to be operated on Channel #6 82-88 mc., power of Vis 500 watts peak; Aur. 250 watts and hours of operation unlimited.

NEW—Hearst Radio, Inc., Baltimore, Md. (P. O. 959 Eighth Avenue, New York, N. Y.)—License to cover construction permit (BPVB-214) which authorized construction of a new experimental television broadcast station.

NEW—Hearst Radio, Inc., Baltimore, Md. (P. O. 959 Eighth Avenue, New York, N. Y.)—License to cover construction permit (BPVB-215) which authorized construction permit of a new experimental television relay broadcast station.

MISCELLANEOUS BROADCAST

Remote Pickup

Miscellaneous Actions

WHRW—United Broadcasting Co., area of Cleveland, Ohio—Granted modification of CP for extension of completion date to 10-29-47. (BMPRE-69)

WHRX—United Broadcasting Co., area of Cleveland, Ohio—Granted modification of CP for extension of completion date to 10-29-47. (BMPRE-70)

Mojave Valley Broadcasting Co., area of Barstow, Calif.—Granted CP for new remote pickup station. (BPRY-348)

Muscle Shoals Broadcasting Corp., Nr. Muscle Shoals City, Ala.—Granted CP for new remote pickup station. (BPRY-349)

WDNS—Kenneth Edw. Rennekamp, area of Oil City, Pa.—Granted license for new remote pickup station. (BLRY-336)

WKBM—American Colonial Broadcasting Corp., Arecibo, P. R.—Granted modification of CP for extension of commencement and completion dates to 7-27-47 and 1-27-48, respectively. (BMPRY-36)

Applications Accepted for Filing

WSGR—General Broadcasting Co., area of Atlanta, Ga. (Mike Benton)—License to cover construction permit (BPRE-490) which authorized construction of a new remote pickup broadcast station.

WSGS—General Broadcasting Co., area of Atlanta, Ga. (Mike Benton)—License to cover construction permit (BPRE-491) which authorized construction of a new remote pickup broadcast station.

Federal Trade Commission Actions

25 ANNUAL NAB CONVENTION

ATLANTIC CITY—SEPTEMBER 15-18, 1947

Routing:

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1771 N STREET, N. W. WASHINGTON 6, D. C. Vol. 15, No. 33, August 18, 1947

Congressman Lea, FCC Chairman Denny and Emilio Azcarraga Are Convention Speakers

Congressman Clarence F. Lea (D-Calif.), author of the Lea Act, FCC Chairman Charles R. Denny, and Emilio Azcarraga, Mexican broadcaster who is a member of the Board of the Inter-American Broadcasters Association, will be speakers at the 25th annual NAB convention, Atlantic City, September 15-18.

Congressman Lea and Mr. Azcarraga will appear on the opening day's program Tuesday, September 16, and Chairman Denny will be the luncheon speaker the following day.

Mr. Denny made his first appearance as FCC Chairman before an NAB Convention last October at the 1946 meeting in Chicago.

(Continued on page 662)

Program Fare of NAB Member Stations One-Third Sustaining, Survey Shows

NAB member stations spend one-third of their time on the air presenting "sustaining" programs, according to an extensive analysis just completed by the NAB Research Department.

These programs constitute 34% of the program fare broadcast by NAB members. The remaining time is devoted to sponsored features.

For purposes of this survey, a "sustaining program" was defined as: "Any uninterrupted segment of the station's time which is five minutes or more in length and from which the station derives no income."

First of Twice-yearly Series: This study was the first of a series of such surveys which will be made by the NAB. It was based on station logs for the week of November 21-27, 1946. Already the NAB Research Department has begun a similar analysis of logs for a week in February of 1947. It is expected that these studies will be

On the Inside

FCC proposed last week to terminate most sharing of TV channels and to reallocate TV channel #1 for exclusive use of services now sharing other TV channels. (p. 665)

Plans to feature the "Radio for Every Purpose" campaign during National Radio Week were agreed upon last week by the Presidents of RMA and NAB. (p. 667)

WTOL's long pending renewal application received FCC approval last week. Station had revamped program structure. (p. 663)

Names of additional participants in two advertising sessions scheduled for the NAB Convention were announced last week. (p. 668)

The Red Cross has thanked radio for its "superb cooperation," stated it demonstrates the "great contribution which a free radio has made to our democratic way of life. (p. 669)

FM, TV and FX Board Directorships Approved; All By-Law Proposals Accepted by Members

FM, television, and facsimile broadcasting stations are now eligible for direct representation on the Board of Directors of the National Association of Broadcasters.

This provision is contained in new By-Laws just adopted by the membership of the Association in a mail referendum. The vote was overwhelmingly in favor of this and other changes in the By-Laws which had been proposed by the NAB Board of Directors.

Announcement of results was made today by NAB on the basis of final tabulations completed August 11th by the New York accounting firm of Ernst and Ernst, which conducted and audited the referendum.

Ernst and Ernst reported a return of 494 ballots. No more than ten negative votes were cast against any of the fifteen separate proposals on which the NAB membership voted.

Enlargement of the Board provides for four new directors-at-large: one each from FM stations in Class A, FM stations in Class B, television stations, and facsimile stations.

At present there are six directors-at-large serving on the NAB Board, two each from small, large, and medium stations. The provisions for directorships-at-large become effective only when there are twenty-five stations from the category concerned in the membership of NAB.

Election Methods Altered: The method of nominating and electing directors-at-large has also been changed. Effective with election of directors-at-large in 1948, these directors may be nominated and elected, by referendum, only by members in the category which they would represent. Previously, all active members had been entitled to nominate and vote in all elections to fill these posts.

FRANK E. PELLEGRIN *Director of Broadcast Advertising*
DON E. PETTY *General Counsel*
ROBERT K. RICHARDS *Director of Public Relations*
ARTHUR C. STRINGER *Director of Special Services*

Elections in 1947 will be held, as customary, at the annual convention.

A change was made also in the method of nominating district directors. There are seventeen of these directorships, one each for the seventeen geographical areas into which the United States is divided for organizational purposes. Under the By-Laws as they stood before the present changes, nominations for these positions could be made only at district meetings. Now they may also be made by mail in advance of the district meetings. Elections will continue to be held only at district meetings.

Also, the geographical boundaries of these seventeen districts, which were fixed by the old By-Laws, may now be changed at the discretion of the Board of Directors.

Dues Brackets: Another change readjusts the income brackets upon which the dues of member stations are based. Inequities had been found in the former schedule. It was revised to produce a parity between the various classifications of stations and to eliminate sudden increases in dues which had previously occurred. The amount of dues to be paid by stations in the various categories will continue to be fixed annually by the Board of Directors.

Provision is also made for combining station incomes for the purpose of determining dues brackets where the same firm or individual owns an AM station and an FM station in the same city.

Other changes define more clearly the authority and responsibility of the Board of Directors and of the President and Secretary-Treasurer, who are elective officers of the Board.

In addition, there was a general "overhaul" to clarify and simplify all provisions of the By-Laws, which had been amended several times since their original adoption in 1938.

A revised version of the NAB Charter was presented to the membership, along with the By-Laws, and adopted by a vote of 480 to 4. There were no substantive changes, the revisions being intended only to make the Charter conform to the new By-Laws.

Text of the Ernst and Ernst Notice

We hereby certify that there have been returned to us 494 signed ballots as originally distributed to the membership and 449 amended ballots with respect to Article VI of the By-Laws, and that the results of the referendum vote based on such returned ballots were as follows:

	Yes	*No*
Certificate of Incorporation	480	4
Article I	490	0
Article II	488	2
Article III (except Section 1)	485	4
Article IV	476	6
Article V	467	6
Article VI	415	7
Article VI (Proposal No. 1)	226	2
(Proposal No. 2)	211	0
Article VII	479	7
Article VII	479	10
Article IX	484	5
Article X	489	0
Article XI	487	1
Article XII	486	0

New York, N. Y.
August 11, 1947 Ernst & Ernst

Following receipt of the above certification, C. E. Arney, Jr., Secretary-Treasurer, announced the revised By-Laws and Charter will be printed and distributed to the membership at an early date.

Congressman Lea, FCC Chairman Denny and Emilio Azcarraga Are Convention Speakers

(Continued from page 661)

A veteran legislator, Mr. Lea was first elected to the Congress in 1917. He has served in the House of Representatives continuously since that time. Long interested in American radio, he was chairman of the House Interstate and Foreign Commerce Committee from 1937 to 1947.

The Lea Act, which he introduced in January, 1946, was written by Mr. Lea to prevent "feather-bedding." It was tested in court and found constitutional by the Supreme Court of the United States on June 23, 1947.

Lea Retiring: This probably will be the broadcasters' last opportunity to hear Mr. Lea as a Congressman. He has announced that he will retire from public life after the last session of the 80th Congress.

Mr. Azcarraga is the owner of XEW and XEQ in Mexico City. He heads the Mexican delegation at the Atlantic City telecommunications conference. In addressing the NAB Convention, he will speak in behalf of the Inter-American Broadcasters Association, of which the NAB is an active member. A pioneer Mexican broadcaster, Mr. Azcarraga also operates extensive banking and theatrical interests. He was educated in the United States. He organized the Mexican Association of Broadcasters in 1933 and twice served as its president.

Mr. Azcarraga is credited with putting the Havana

(Continued on next page)

Treaty into operation by guiding it through the Mexican Senate after that body twice had rejected it.

Subjects to be discussed by the two guests will be announced later.

More than 2000 representatives of the radio industry are expected to attend the Atlantic City meeting. Last week more than one thousand had registered, a record high for pre-registrations a month in advance of the annual meeting.

Program Fare of NAB Member Stations One-Third Sustaining, Survey Shows

(Continued from page 661)

continued regularly on a semi-annual schedule.

A scientifically selected sample of station program records was used as the basis for the study just completed. This sample was limited to commercial AM stations in continental United States which were actually on the air and were NAB members on November 1, 1946. The stations had no advance knowledge that their records would be requested.

"The selection of the sample," NAB Research Director Kenneth H. Baker pointed out, "was by a randomized procedure so that the results would be projectable to the membership. Although the actual selection of the stations was determined by the use of tables of random numbers, definite controls were established to produce representativeness in the following variables: station size, city size, geographic distribution, network affiliation, and part-time—full-time operation.

"One hundred stations were selected at random according to the above controls. Of this number, 85 returned usable data."

In this connection, Dr. Baker cautioned: "No significance should be attached to differences of less than five points between percentages. The size of the sample was such that these differences could be caused by chance variations."

Much additional data from the station logs has been recorded by NAB on IBM punched cards and continuing studies of the information will be made. Dr. Baker will report additional findings to the NAB Convention at Atlantic City in September.

Percent of Broadcast Time Devoted to Sustaining Programs

By Size of Station

Total Time on the Air = 100%

		Monday thru Friday	Saturday and Sunday	Total	
LARGE STATIONS (7.5 kw to 50 kw)	Sign-on to Noon	23%	68%	33%	36%
	Noon to 6 pm	29%	33%	30%	
	6 pm to Sign-off *	40%	27%	36%

	6 pm to Sign-off *	37%	35%	37%	

---

* "Sign-off" time is taken as 1:30 AM for stations broadcasting all night.

Legal Department

WTOL, Cited in Blue Book, Receives Renewal After Revamping Program Service

The Federal Communications Commission granted the renewal application of WTOL, Toledo, Ohio, operating with 250 watts on 1230 kc, unlimited time, in a decision adopted July 28 and released August 15.

WTOL's application, pending for more than a year, was set down for hearing on September 19, 1946 "on issues relating to the past, present and future program policies of the applicant and related matters." More specifically, the Commission objected to what it considered the excessive commercialism of the station, and referred to the station's operation in its "Blue Book."

In granting the renewal, the Commission referred to the statement of the officers of WTOL that the station was over-commercialized, was not correctly programmed, and that the management "were not carrying out [their] public service responsibility." Nevertheless, the Commission considered that the station had in recent years carried local public service programs on a sustaining basis during the daytime and in some cases during the evening. It referred to the testimony of the Director of Radio Visual Education of the Toledo Public Schools that he did not know what more the station could do to further the city's educational programs. Other public service groups testified that WTOL had never refused their requests for time. The Commission also relied on the new policies of the station formulated in March 1946 as follows:

> "(1) Commercial programs would represent from 65% to 75% of the total broadcast time, the latter figure being a maximum that would not be exceeded; (2) the station would not permit more than three minutes of commercial continuity or four commercial spot announcements in a 14½ minute participating program, nor more than 3 minutes of commercial continuity in a 14½ minute sponsored commercial program; and (3) in 'shopper's guide' program (defined as programs in which commercial announcements relate to bargain sales of services

(Continued on next page)

Golf Tournament

Entries for the annual convention golf tournament for the *Broadcasting* Magazine trophies should be submitted to Maury Long, in care of the publication, 870 National Press Bldg., Washington 4, D. C.

Silver cups will be awarded for low gross and low net scores. Mere notice of intent to compete is all that is required. Blind bogey handicap system will be used in selecting gross winner.

The tournament will be held Sunday, Sept. 14, at Atlantic City Country Club. Transportation will be arranged by the magazine.

or merchandise) not more than 6 commercial spot announcements would be broadcast, and not more than four 'shopper's guide' programs would be carried in a single day . . . 'Shopper's guide' programs were permanently discontinued after September 7, 1946."

In conclusion, the Commission said:

> "On the record we conclude that the basic reasons for the program situation that existed at WTOL were, first, failure of the owners of the licensee to participate in or closely supervise the day-to-day operations of the station; second, employment of a general manager in complete charge of day-to-day operations on an incentive pay contract under which the manager's income was directly related to the amount of gross sales; third, preoccupation of the management and owners with the commercial functions at the expense of the programming and service functions of the station; and, fourth, failure of the owners to insure that program and sales functions should be segregated, and that control of program structure should be divorced from employees whose primary functions were the sale of commercial time."

* * *

However, "the applicant's officers have testified that the record made during this period [since March, 1946] will be continued or improved upon; that, in the future, the principle of ownership-management will be adhered to; that all commercial contracts will be subject to the approval of the program director and the managing director as representative of the board of directors, with due attention being given to the effect of commercial program or anouncement upon the over-all program structure; and that no person connected with the programming of the station will be compensated on an incentive pay basis."

Contracts Which Lessen Station Control By Licensee Object of FCC Concern

The FCC reiterated its concern last week with station contracts and other arrangements which result in the loss of station control by licensees.

The Commission announced that it had received information about contracts by which advertising agencies bought time for resale, programmed it themselves, and in some cases used their own studios for the broadcasts. It was noted that none of these contracts had been filed with the Commission, although §1.342 of the Rules and Regulations requires the filing, within 30 days of their execution, of "all documents, instruments, contracts, . . . and changes therein . . . relating to ownership, management, or control . . .; the use, management or operation of licensed facilities; and agreements relating to network service, transcription service, or bulk time sales (amounting to two hours or more per day)."

The FCC cited Sec. 310 (b) of the Communications Act which requires Commission approval before assignment of a license or transfer of control of a corporate licensee, and quoted its leading decision on this subject, Bellingham Broadcasting Co., 8 FCC 159, May 1940:

> " * * * the licensee of a radio broadcast station must be necessarily held responsible for all program service and may not delegate his ultimate responsibility for such to others."

In another more recent case, City of Camden, Proposed Decision filed September 5, 1946, the Commission considered this question. On that occasion, speaking of a contract giving an advertising agency control of most of the station's time, the opinion said:

> "The record in this cause, as a whole, demonstrates the incompatibility with the purpose of the statute of the instant arrangement between the City and Mack Radio Sales, whereby the privileges which the Commission has granted an applicant found to be qualified have been delegated without authorization to a stranger to the Commission. The consequences of this action are evident here: Mack Radio Sales' unresponsiveness to the Commission's and the licensee's standards and suggestions; its open determination to exploit the station's time to its maximum financial advantage, without regard to the interest of the licensee or the public, and its readiness to resort to the coercive process of another tribunal [New Jersey courts] to vindicate its alleged right under the contract to defy the Commission and the licensee, are logical if not inevitable results of such a delegation."

The Commission concluded its notice with the statement that the requirement that licensees maintain "full and final responsibility" for their operations "is a basic feature of the Communications Act" and that therefore they cannot "directly or indirectly" divest themselves of the control necessary to fulfill it.

LEGISLATIVE ACTIVITIES

The following final actions on proposed legislation reported in the *Legislative Digest* earlier this year, are reported here since they were not taken when publication of the *Digest* was suspended with the adjournment of Congress and the state legislatures. The references are to the issues of the *Digest* which were sent to the membership.

Approved by Governor, August 5. Chapter Number 486.

Television

FCC Proposal to End Most TV Channel Sharing Involves Loss of Channel #1

A proposed order abolishing most provisions for sharing television channels with other radio services and changing assignment of the 44 to 50 mc band from television to non-government fixed and mobile stations was issued by the FCC on Thursday (14).

Effect of this order would be to eliminate the first of thirteen channels currently assigned to television, with no provision for replacement of this facility. All non-government fixed and mobile services now sharing television channels 1 through 5 and 9 through 15 would be moved and concentrated into the 44 to 50 mc band, now occupied by TV channel #1.

One construction permit has been issued for a television station to operate on this channel, but there is no station yet actually using this facility, the Commission stated.

"Salient provisions and objectives" of the proposed changes wert summarized by the Commission as follows:

(a) "All provision for sharing of television channels (except channels 7 and 8) is abolished.

(b) "In order to accommodate the non-government fixed and mobile radio services for which provision was formerly made on a shared basis on television channels 1 through 5 and 9 through 13, the assignment of the band 44 to 50 mc is changed from television to non-government fixed and mobile. At the present time there is no television station operating on this channel and there is only one construction permit outstanding.

(c) "The band 72-76 mc is to be limited to use by the 75 mc aeronautical marker beacons and to fixed circuits on an engineered basis with the view to avoiding adjacent channel interference to television broadcasting. Radio stations presently authorized in the 72-76 mc band will be permitted to continue for a five year period.

(d) "Possibilities of interference to television from such sources as harmonic radiations, television receiver response to stations on intermediate or image frequencies and television receiver oscillator radiations are engineering equipment problems which the Commission expects can more properly be solved by equipment development rather than further revisions of frequency allocations."

Briefs May Be Filed: No date was set for oral argument, but the Commission stated that interested parties may file written statements or briefs on or before September 15th. "If any comments are received which appear to warrant the Commission in holding oral argument before final action is taken, notice of the time and place of such oral argument will be given at a subsequent date," the FCC stated.

In announcing its conclusion that there is no "practical sharing arrangement," the Commission said:

2. In May and June 1945 the Commission issued its Allocation Report providing in part for 13 television channels and specifying that 12 of those channels be shared with other radio services on a mutually non-interference basis Since that time the Commission has conducted a comprehensive study of various sharing arrangements. The problems inherent in sharing were also discussed at length at an informal engineering conference held on June 10 and 11, 1947. As a result of these studies the Commission is of the opinion that there is no practicable sharing arrangement which will not cause serious interference to television reception.

Services which would ocupy the 44-50 mc. band include police, fire, highway maintenance, special emergency, petroleum, power utility, forestry conservation, transit utility, and experimental.

The new allocations would be as follows:

REVISED TABLE OF PROPOSED FREQUENCY ALLOCATIONS 44-88 and 174-216 Mc.

Band Mc.	*United States Service-Allocation*	*Remarks*
44–50	Non-Government (a) Fixed (b) Mobile	See Annex B
50–54	Amateur	
54–72	54–72 Mc. Non-Government 54–60 Mc. Television Broadcasting Channel 2 60–66 Mc. Television Broadcasting Channel 3 66–72 Mc. Television Broadcasting Channel 4	
72–76	Non-Government Fixed (Note A)	
76–88	76–88 Mc. Non-Government 76–82 Mc. Television Broadcasting Channel 5 82–88 Mc. Television Broadcasting Channel 6	
174–186	(a) Government; Fixed;Mobile (b) Non-Government, Television Broadcasting 174–180 Mc. Channel 7 180–186 Mc. Channel 8	
186–216	186-216 Mc. Non-Government 186–192 Mc. Television Broadcasting Channel 9 192–198 Mc. Television Broadcasting Channel 10 198–204 Mc. Television Broadcasting Channel 11 204–210 Mc. Television Broadcasting Channel 12 210–216 Mc. Television Broadcasting Channel 13	

Note A. Future assignments to be limited to fixed circuits which, as a result of an engineering study, may be expected to operate in this band on a non-interference basis to the television service.

REVISED TABLE OF PROPOSED ALLOCATION OF TELEVISION CHANNELS TO METROPOLITAN DISTRICTS

NOTE: Changes required as a result of channel 1 reallocation are underlined. Current assignments are from Subpart E (formerly Subpart D) of the Commission's rules governing broadcast services (Part 3) with the exception of cities bearing footnote 3.

[1] Channel 4 shift from Des Moines to Ames, Iowa, is the result of prior action and is not related to any proposed change in the total number of television channels.

[2] Channel 9 deleted at the request of the Canadian Government for use in Windsor, Ontario, and is not related to proposed change in the total number of television channels.

[3] Channel 10 shift from Indianapolis to Bloomington, Ind., is the result of prior action and is not related to any proposed change in the total number of television channels.

[4] Added subsequent to publication of Subpart E (formerly D) of the Commission's Part 3 Rules.

General

"More Sets" Campaign to Be Featured During Radio Week, NAB and RMA Heads Agree

Looking forward to the celebration of National Radio Week from October 26 to November 1, the Presidents of NAB and RMA have exchanged letters pledging cooperation in the current "Radio for Every Purpose" campaign which will be featured during the 1947 observance of Radio Week.

NAB President Justin Miller pointed out that this campaign "eventually means more listening by more individuals to our program offerings."

"No effort will be spared by NAB to make Radio Week in 1947 a happy and successful undertaking for both our industries," Judge Miller wrote.

More Sets—More Listening: Pointing out also that "more radios at the finger tips of more people will substantially increase listening," RMA President Max F. Balcom asserted that "every broadcaster, as well as manufacturer, will benefit materially from this coordinated drive toward one common goal."

Following is the text of Judge Miller's letter:

"I have observed with great satisfaction the ever-increasing cooperation between our two industries, fostered by the appointment of the Joint RMA-NAB Committees, and culminating in our annual joint effort in promoting "National Radio Week".

"Broadcasting has much to gain from this closer collaboration. "A Radio-in-Every-Room" and "A-Radio-for-Every-Purpose" eventually means more listening hours by more individuals to our program offerings and, of course, these are goals toward which the members of our industry constantly strive.

"Evidence of my real interest in the campaign is the fact that I have especially assigned Jess Willard, Executive Vice President of the NAB, to coordinate and supervise our part of the job, and, working with him, members of our staff are actively promoting a greater participation by our membership than ever before in the history of the event.

"I do want to assure you that no effort will be spared by NAB to make Radio Week in 1947 a happy and successful undertaking for both our industries."

The RMA President had written Judge Miller:

"It was a pleasure indeed for me to note recently that the Sales Managers Executive Committee and the Small Market Stations Executive Committee of the National Association of Broadcasters have endorsed the "Radio-in-Every-Room" campaign of the Radio Manufacturers Association. I am sure we can count on the active support of individual broadcasters and RMA also would appreciate the influential endorsement of the National Association of Broadcasters itself.

"We in the RMA believe that every broadcaster, as well as manufacturer, will benefit materially from this coordinated drive toward one common goal. More radios at the finger tips of more people will substantially increase listening—that is a common goal for broadcasters and manufacturers.

"The campaign stresses the need for more radios so that every member of the family may enjoy more fully the wide variety of programs presented by broadcasters. We believe that if we can think in terms of selling radios as a medium of entertainment and enlightenment for all members of the family, we will not only further our own objectives, but increase the service rendered by radio broadcasters.

"The RMA Advertising Committee is making progress in taking our program to retailers across the country, as well as to magazines and newspapers. "National Radio Week" has been successfully sponsored by our two organizations for the past two years and I am informed that plans are well under way for a much more successful campaign this fall. This is one example of how our two organizations can work together to our mutual benefit. I am sure there will be others. Your suggestions from time to time will certainly be appreciated."

RMA-NAB Liaison Committee Meeting Postponed

RMA-NAB Joint Liaison Committee meeting, schedulled for Tuesday, August 26, has been postponed due to inability of several key members of both committees to be present. A new date is to be set for an early fall meeting if possible.

Broadcast Advertising

A Broadcaster's Reactions to Per-Inquiry Deals, by Wiley P. Harris

Radio's answer to that perennial nuisance, the P-I deal, has been given eloquent expression by Wiley P. Harris, director, WJDX, Jackson, Miss., in an exchange of letters with the Mason Advertising Agency, Charleston, W. Va.

Declining to take advantage of the "generous and appreciated offer" the agency made for its client on a contingent fee basis, Mr. Harris wrote:

"We are in receipt of your generous and appreciated offer to advertise over this station your new, double action remedy, "KINKS-PLUS", on the basis that the station provide the time and talent for the advertising of this product to be handled on a $1.00, C. O. D., basis, the station to deduct 30¢ from each order as their compensation for time, talent and other expenses incident to the advertising.

"At first, we were very much inclined to jump immediately at this offer in view of the fact that "KINKS-PLUS" is a new, double action remedy to be taken in the easy-to-take form, and that thousands of persons had found prompt relief by this form of medication. However, after a lengthy consideration, it dawned upon us that we had never heard of "KINKS-PLUS" and we had no testimonials of the merit and effectiveness of the remedy and the public might not be gullible enough to send in $1.00 for an unknown article when it could purchase known and tried remedies for such an amount or less.

"It further soaked in that we have invested over $200,000.00 in this station; that same is staffed and handled by a personnel and employees that will not work on a contingent salary basis, and that all of the other advertisers on the station are paying a prescribed and published rate for their advertising. In other words, they were willing to gamble the legitimate cost the station charges for its advertising and take a chance on the eighteen years' operation of the station proving its effectiveness as a sales medium; and by this means they are paying for the actual operation of the station and any reasonable profit the station might earn from their expenditures.

"All of this caused mental kinks and misgivings, and led to the conclusion that you were very generously offer-

(Continued on next page)

ing to take advantage of our capital investment, plus talent and personnel cost, to sell your product at no financial risk to you whatever. This doesn't seem quite fair to the other advertisers on the station, as they would be called upon in a measure to pay for the time the station was giving to your advertising and the exploitation of your product.

"As a result of all the kinks-plus that came into our minds, there was one bright idea that predominated, to wit; if your client really wished to sell its product and had faith in its merits, as claimed in your continuity, why not let them make up a couple of Hundred-Thousand Dollars' worth of these tablets and send them out to the leading drug stores of the country on strictly a consignment basis; that is, the druggists would put the "KINKS-PLUS" tablets on sale without cost to him, and he could remit to you as sales were made on the basis of 70¢ per package less transportation charges.

"It occurred to us this would be a brilliant way for your client to demonstrate its belief in the merit of your product and, at the same time, show they were willing to invest a couple of Hundred-Thousand Dollars in the promotional scheme without requesting any one else to do this for them. We think this would be a grand idea for your client—and certainly they would not want some one else to do for them what they are not willing to do for themselves—that is, take all of the risk at no cost.

"In looking over the list of accredited agencies, we assume you must be new in the agency field. And, if you expect to grow, prosper, and enjoy the confidence and prestige of radio stations of the country, I hope you will accept this friendly advice from an old radio operator—don't insult the intelligence of radio stations by sending them a proposal such as you have offered.

"This advice is as free as the advertising you hope to get for "KINK-PLUS."

Eugene Carr and Donald Davis to Participate in Convention Sessions on Advertising

The acceptances of Eugene Carr, general manager, Brush-Moore stations, and Donald D. Davis, general manager, WHB, Kansas City, Mo., to participate in the September 15 retail advertising clinic, and the broadcast advertising general session scheduled for Wednesday, September 17 respectively, complete two of the expertly staffed panels which are expected to write convention history during next month's meeting in Atlantic City.

Mr. Carr, who presided at the initial NAB retailer-broadcaster panel during the Cleveland convention five years ago, will occupy the unique role of official historian of a project which he started. Outgrowth of the Cleveland convention was the industry-wide Retail Promotion Plan conducted during 1943. At Atlantic City, following the NRDGA radio committee's presentation, "Case Histories Come to Life", Mr. Carr will present a summary and application entitled, "Cleveland—Five Years Later," showing the progress made by retailers and broadcasters in achieving greater understanding of each other's problems and of the mutual techniques developed for solving them.

Mr. Davis will appear as a member of the "All America Radio Team" panel in a discussion of the subject, "The Sales Foundation of the American System of Broadcasting." He has been selected to represent the position of "program director."

NAB Sales managers are urged to register now for the September 15 clinic along with as many of their staff as plan to attend.

Two Companies Seek Free Publicity, One for Product, Other Institutional

Industrial Synthetics Corporation has sent NAB member stations an announcement extolling the virtues of "Supplex," a garden hose, sold at department and hardware stores. The commercial message includes the price of the product and the company's guarantee. The corporation suggested that the announcement be used without charge on station's home-service programs.

NAB has written the organization inviting them to use radio at published card rates. The NAB resolution against the acceptance of "free time deals" was included in the letter.

Another example of this "side door approach" to free radio time is contained in a circular letter addressed to the "news editor" of various radio stations by the Nash-Kelvinator Corporation. Attached to the letter is copy for an institutional ad that was scheduled to run in "80 leading newspapers", whereas the "news editors" of American radio stations were asked to carry the copy without charge.

Many NAB member stations have an established routine whereby all such publicity-seeking mail must receive the okay of the station manager or sales manager before broadcast.

Standard Program Schedule Forms Increased in Cost to $6.33 Per Thousand

The printers of the NAB Standard Program Schedule Form have advised that because of increased costs of paper, it will be necessary to raise the price of the forms to $6.33 per thousand.

These forms are used by stations as availability sheets and promotion pieces for mailing to advertising agencies and advertisers.

All orders should be sent to Department of Broadcast Advertising, National Association of Broadcasters, 1771 N Street, Northwest, Washington 6, D. C. Deliveries are made approximately ten days after receipt of orders.

Small Market Stations

"Broadcasters Community Challenge" Is Subject of Talk Published by NAB

Station management, particularly those new to radio, will find helpful suggestions for evaluating radio's community services and responsibilities in the new NAB publication, "The Broadcaster's Community Challenge," by Robert T. Mason, WMRN, Marion, O.

The broadcaster takes up such subjects as management's responsibility, staff members, community activities, survey on community leadership, station management as molder of public opinion, the crusading newspaper editor, the early days of journalism, radio's early days, and the maturity of radio.

Requests for copies should be sent to NAB Small Market Stations Division.

Mississippi Station Executive Comments on FCC Proposed Revision of Operators' Licenses and Examinations

"Our group of five stations representing the small market class," writes Bob McRaney, General Manager, WCBI, Columbus, Miss., and The Midsouth Network, "have been particularly interested in the recent proposed revision of the operators license as recently announced by the FCC.

"We have long contended that it was unnecessary for small stations, such as ours, to operate with a full staff of First Class Operators. This point was proved during the war when our stations were allowed to use restricted permit holders with one First Class Operator in charge. We never lost a minute off the air or experienced any difficulties in operation during the long period this was in effect. We feel that it will give us an opportunity to select our employees from local residents, making a more stable staff and smarter operations for our stations. We feel that it will also encourage youngsters to go into the operating part of radio which heretofore has made it necessary for them to undergo a long period of training before they could be considered for employment. The new license arrangement will allow us to employ local people on a more or less apprenticeship basis which will allow them to learn as they earn. Heretofore this has been impossible.

"Equipment, if properly installed and maintained does not require the service of an expert in order to keep a radio station operating successfully. Our group endorses the proposed decision of the Commission heartedly and we feel that this opens the door to improvement of local residents who have up to now been denied this privilege."

Studio and Transmitter Building Layouts Included in New Brochure for Stations

"Floor plans and sketches of studio and transmitter building layouts" are contained in a new brochure issued by a leading equipment manufacturer. The late material was compiled at the request of the NAB Small Market Stations Division as an aid to broadcasters who contemplate the construction of new studios and engineering departments, or the remodeling of present quarters. Copies of the brochure may be secured from R. B. Rennaker, Collins Radio Company, Cedar Rapids, Iowa.

Public Relations

James Dawson Replaces Ben Miller In NAB Information Department

James Dawson, veteran radio and newspaper editor, has been named assistant director of information of the NAB. He will report on September 2nd to replace Ben Miller, who has been transferred to the newly-created Program Department as assistant director.

At present Dawson is news editor and director of programs in the public interest at WFBC, Greenville, S. C., a position he has held since release from active duty as a naval reserve officer. His four years in the Navy included three years of duty as a combat intelligence officer in the Pacific, beginning in the Solomons and continuing through the final Third Fleet campaign off the coast of Japan.

Prior to the war, Mr. Dawson operated his own advertising agency, Dawson, Inc., in Greenville, having previously served as managing editor of the Augusta, (Ga.) *Chronicle.*

He began his newspaper career as a member of the Greenville *Piedmont* editorial staff, and was subsequently associate managing editor of the *S. C. Newsview.*

Mr. Dawson was born in New Bern, North Carolina in 1910. He is the son of James B. Dawson, well-known North Carolina newspaper publisher.

The new NAB staff member is a graduate of the University of North Carolina. He also did graduate work at Georgetown University in Washington, D. C.

News

Jack Harris Appointed Member of Council on Radio Journalism

Jack Harris, general manager, KPRC, Houston, has been appointed to the Council on Radio Journalism, Inc., by the NAB. Five members are appointed by NAB and five by the American Association of Schools and Departments of Journalism.

Council will hold its next meeting in Atlantic City, Wednesday, September 17, during the NAB convention, according to call issued by Chairman Wilbur Schramm, director, school of journalism, University of Iowa.

Besides Messrs. Harris and Schramm, Council members are: Kenneth G. Bartlett, director, Radio Workshop, Syracuse University; Floyd K. Baskette, assistant professor of journalism, Emory University; William Brooks, vice president, National Broadcasting Company; Mitchell V. Charnley, professor of journalism, University of Minnesota; Fred S. Siebert, director, school of journalism, University of Illinois; E. R. Vadeboncoeur, vice president, WSYR, Syracuse; Karl Koerper, vice president and managing director, KMBC, Kansas City, Mo.; and Arthur Stringer, NAB, secretary-treasurer.

Public Interest Programming

Red Cross Praises Radio for "Superb Cooperation" in Fund Campaign

Crediting the nation's broadcasters with playing a major part in publicizing the 1947 Fund Campaign,

(Continued on next page)

Basil O'Connor, president of the American National Red Cross, has expressed his thanks to the radio industry for its "superb cooperation" in the successful drive.

In addition to thanking the networks and the NAB for their help, Mr. O'Connor, in a letter to President Justin Miller, asked that his thanks be conveyed "to each of the more than 1400 individual stations whose help was so generously given to local Red Cross chapters."

"The many people making up our great American system of broadcasting can well be proud of the record they helped make for us and the aid this will enable us to give to our fellow-men. It is an accomplishment which pays high tribute to your industry by demonstrating the great contribution which a free radio has made to our democratic way of life," Mr. O'Connor asserted in his letter to Judge Miller.

The text of Mr. O'Connor's letter follows:

O'Connor Letter: "Though our 1947 Fund Campaign officially ended last March 31, we are just now able to view the overall results of our work and the response received from the public. As you probably know, the drive was a great success, having been oversubscribed by more than thirty percent, placing total funds received through July 31, 1947, at $79,413,215.00 as compared with our original $60,000,000.00 goal.

"Great credit is due the radio industry for its superb cooperation and enthusiastic support in carrying the story of Red Cross to the nation's millions of listeners. For example, a survey just completed shows that national radio messages allocated by the Advertising Council provided nearly one billion listener-impressions. During March, 608 national network programs carried Red Cross messages with 164 programs aired on "Red Cross Radio Day" alone. Besides this, 850 stations carried a special series of programs featuring Helen Hayes. One thousand three hundred and fifty stations cooperated by broadcasting announcements, Hollywood star appeals, and many local live programs. One hundred and ninety-eight of our foreign language stations also told the Red Cross story in French, Spanish, Italian, Polish and Yiddish.

"We are sincerely grateful to the National Association of Broadcasters for its support and excellent cooperation. Although we have already thanked those in national radio organizations for their splendid help, I should like through you to express the gratitude of our entire organization to each of the more than 1400 individual stations whose help was so generously given to local Red Cross chapters. Each of them rendered a valuable service to humanity by advancing the work of the Red Cross at home and abroad.

"The many people making up our great American system of broadcasting can well be proud of the record they helped make for us and the aid this will enable us to give to our fellow-men. It is an accomplishment which pays high tribute to your industry by demonstrating the great contribution which a free radio has made to our democratic way of life."

Television Broadcasters Offered Help of Veterans Administration in Building Programs

Recognizing the potentialities of television as a mass communication medium, the Veterans Administration has announced the redesignation of its radio section as the Radio and Television Division.

In announcing the change, Charles E. Dillon, chief of the division, pointed out that there are certain aspects of VA activities which, imaginatively treated, may supply very interesting television material. In addition to the use of prominent personalities, Mr. Dillon suggested medical rehabilitation of hospitalized veterans, G. I. education and training, both college and on-the-job, and new businesses backed by G. I. loan guarantees as examples of possible television shows.

Pointing out that veterans and their families constitute a potential audience equal to half the total population of the country, Mr. Dillon expressed the desire of the VA to cooperate with television networks and producers in the presentation of programs of interest to former G. I.'s.

Ad Council Network Campaigns

The following public interest campaigns have been given top priority on Network and National Spot Allocation Plans during the week of August 25-31, 1947, by The Advertising Council. Copies of individual Fact Sheets and Schedules showing exactly what messages will be carried daily by the programs of the network with which your station is affiliated may be obtained on request from George P. Ludlam, Radio Director, The Advertising Council, 11 West 42nd Street, New York 18, New York.

Safety on the Highway

The National Safety Council reports: 1) *More deaths in 1946.* The nation's 1946 motor vehicle death toll of 33,500 was 19% greater than the total of 28,076 for 1945—though it was still about 6,500 below the all-time high of 1941. 2) *More driving.* Vehicle mileage in 1946 is estimated at 39% above 1945, 4% above 1941, the previous high year. With more new cars pouring into the market daily, mileage totals will continue to rise—thus multiplying the danger of traffic casualties unless Americans learn to be more careful than ever before. 3) *Inexperienced drivers.* In 1946 there were 45% more traffic deaths in the 15 to 24 year age group than in 1945. Many teen-age drivers have recently returned from the Armed Services; others are new drivers. Teen-age drivers as a rule have a higher accident rate per mile than any other age group. Stress the seriousness of the accident menace, as revealed in National Safety Council statistics. Remind each listener that accidents don't always happen to someone else—that the chances he takes every day are the very ones that are causing our present big accident totals. Make him realize that HE is a potential accident victim, and that he cannot afford to be careless. Stress the safety campaign theme: "BE CAREFUL! THE LIFE YOU SAVE MAY BE YOUR OWN." Point out that there are one or more violations of the law in almost every motor vehicle accident. The National Safety Council—the recognized authority in the field of public safety—believes that obedience to the law is one of the best ways to promote safety on the highway. Every motorist and every pedestrian should obey traffic signs and signals. Drivers should observe safety and other traffic regulations . . . never drive after drinking . . . keep cars in good condition at all times . . . watch for warnings at grade crossings . . . be alert and careful every moment behind the wheel. Urge every motorist and pedestrian actively to support the safety movement in his own community . . . encourage driver training in high schools . . . teach children the rules of safety on the highway, in the home and everywhere. Listeners should be reminded of the extra need for careful driving in order to avoid Labor Day accidents. (Fact Sheet No. 15-D)

Help Prevent Forest Fires

Our forest and woodlands are vital to the nation's welfare. America needs timber for homes and thousands of

(Continued on next page)

other urgent uses . . . water for irrigation, power and domestic use. In the midst of a critical lumber shortage, our natural resources are suffering appalling losses from forest fires, *9 out of 10 of which are man-made.* Figures compiled on forest fires and the damage done by them show that sharp reductions have been achieved as the result of what advertisers have done to alert Americans to the danger of forest fires and how to prevent them. Over 200,000 forest fires annually lay waste an average of 31,000,000 acres of timberland—an area larger than the State of New York . . . destroy enough timber to build 215,000 two-bedroom homes; enough to make 90 million railroad ties or almost 6 million tons of newsprint . . . tie up almost 1 million man-days of labor . . . cripple watersheds on which many people, industries and cities depend for pure water, power and light . . . cause soil erosion, floods and serious property damage . . . transform playgrounds into charred wastes—destroying wildlife—robbing America of its peace and beauty. More gasoline, tires and time in 1947 mean MORE opportunity for MORE Americans to be careless with fire in 1947. Everyone, therefore, should memorize and follow these four rules of forest fire prevention: 1. Crush out cigarette, cigar and pipe ashes. 2. Break matches in two after using. 3. Drown all camp fires; then stir and drown again. 4. Find out the law before using fire. Remind Labor Day weekenders of the simple rules for preventing Forest Fires. (Fact Sheet No. 16-C)

Federal Communications Commission Docket

HEARINGS

The following hearings are scheduled to be heard before the Commission, Washington, D. C., during the week beginning Monday, August 18. They are subject to change.

Tuesday, August 19

Further Hearing

(10:00 A.M.)

NEW—The Patriot Co., Harrisburg, Pa.—C. P. **580 kc.,** 5 KW, unlimited; DA-Night.

WHP—WHP, Inc, Harrisburg, Pa.—C. P. **580 kc.,** 5 KW, unlimited; DA-Night.

WARM—Union Broadcasting Co. (WARM), Scranton, Pa.—C. P. **590 kc.,** 1 KW, unlimited; DA-Night and day.

WBAX—John H. Stenger, Jr. (WBAX), Wilkes-Barre, Pa.—C. P. **590 kc.,** 1 KW, unlimited; DA-Night and day.

Intervenors: Columbia Broadcasting System, Inc.
WTAG—WTAG, Inc.,
Worcester, Mass.
WIAC—Radio Station WIAC, Inc.,
San Juan, P. R.

Wednesday, August 20

(10:00 A.M.)

NEW—Woodward Broadcasting Co., Detroit, Mich.—C. P. DA; **840 kc.,** 5 KW; DA-Daytime.

Intervenor: WHAS—Courier-Journal and Louisville Times Co., Louisville, Ky.

FCC ACTIONS

GENERAL

Notice

The Commission announced on Friday (15) that the Clear Channel Hearings previously scheduled for September 29 have been postponed until October 14.

AMPLITUDE MODULATION

AM—Docket Case

The Commission announces its **Decision and Order** (B-333) granting the application of Community Broadcasting Service for renewal of license of Radio Station **WTOL, Toledo, Ohio** (BR-958; Docket 7867).

Commissioners Denny, Jett and Webster concur in the result; Commissioner Durr not participating.

AM—New CP Granted

1370 KC.

Radio Anthracite, Inc., Pottstown, Pa.—Granted CP for new station to operate on 1370 kc., 1 KW, daytime only; engineering conditions. (BP-5582; Docket 8091)

AM—Designated for Hearing

800 KC.

Johnson County Broadcasting Corp., Iowa City, Iowa—Designated for hearing application for new station to operate on 800 kc., 1 KW, DA, daytime only; made KCMO, Kansas City, Mo., and WBBM, Chicago, Ill., parties to proceeding. (BP-5935)

1490 KC.

WSRS—Samuel R. Sague, Cleveland Heights, Ohio—Designated for hearing application for modification of CP specifying transmitter location. (BMP-2650)

AM—Licenses for New Stations Granted

600 KC.

WTCB—Trendle-Campbell Broadcasting Corp., Flint, Mich.—Granted license for new station; 600 kc., 500 watts night, 1 KW-LS, DA unlimited, and to specify studio location. (BL-2396)

860 KC.

KSFA—Nacogdoches Broadcasting Co., Nacogdoches, Tex.—Granted license for new station; 860 kc., 1 KW; daytime. (BL-2479)

1500 KC.

WABJ—The Adrian Broadcasting Co., Adrian, Mich.—Granted license for new station; 1500 kc., 250 watts, daytime; conditions. (BL-2180)

AM—Modifications of CP's Granted

WTWS—Airplane & Marine Instruments, Inc., Clearfield, Pa.—Granted modification of CP for extension of completion date to 12-24-47. (BMP-2978)

WKAQ—Radio Corp. of Puerto Rico, San Juan, P. R.—Granted modification of CP to make changes in DA. (BMP-2969)

(Continued on next page)

WESL—The Eastern Shore Broadcasting Co., Preston, Md.—Granted modification of CP for extension of commencement and completion dates to 10-17-47 and 1-17-48, respectively. (BMP-2972)

KGHI—Broadcasting Service, Little Rock, Ark.—Granted modification of CP to change type of transmitter. (BMP-2963)

KVRC—Arkadelphia Broadcasting Co., Arkadelphia, Ark.—Granted modification of CP for approval of antenna and transmitter locations, and to specify studio location. (BMP-2848)

WTNC—Thomasville Broadcasting Co., Thomasville, N. C.—Granted modification of CP to change studio location. (BMP-2975)

WTAL—Atlanta Broadcasting Co., Atlanta, Ga.—Granted modification of CP for extension of completion date to 2-5-48. (BMP-2985)

KRUL—Pacific States Radio Co., Corvallis, Ore.—Granted modification of CP to change type of transmitter. (BMP-2981)

KXO—Valradio, Inc., El Centro, Cal.—Granted modification of CP to change studio location. (BMP-2915)

KVNU—Cache Valley Broadcasting Co., Logan, Utah—Granted application for modification of CP to make changes in DA for nighttime use, subject to CAA approval of transmitter site and antenna system and subject to conditions that applicant will satisfy legitimate complaints of blanket interference occurring within the 250 mv/m contour (BMP-2950).

AM—Miscellaneous Actions

WTMV—Evansville On the Air, Inc., E. St. Louis, Ill.—Granted modification of license to change name of licensee to On The Air, Inc.

WNAD—University of Oklahoma, Norman, Okla.—Granted CP to install new vertical antenna and mount FM antenna on #1 tower, install new transmitter and change transmitter location. (BP-6085)

WASK—WFAM, Inc., Lafayette, Ind.—Granted CP to install old main transmitter at present location of main transmitter, to be used for auxiliary purposes only, with 250 watts. (BP-6157)

Southern Broadcasting Corp., New Orleans, La.—Adopted order denying petition requesting the Commission to reconsider its action of 2-6-47 in dismissing its application which requested facilities of WJBW, and for reinstatement of its application BP-5587.

KGGM—New Mexico Broadcasting Co., Inc., Albuquerque, N. Mex.—Adopted order dismissing petition for reconsideration directed against action of Commission granting without hearing application of KVNU to change facilities.

Community Broadcasting Co., Erie, Pa.—Adopted memorandum opinion and order denying petition of Community Broadcasting Co. for reconsideration directed against action of Commission granting without hearing application of Community Service Broadcasting Co. for new station in Erie, Pa.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Adopted memorandum opinion and order denying petition of WERC directed against action of Commission granting without hearing application of Community Service Broadcasting Co. for new station in Erie, Pa.

WARM—Union Broadcasting Co., Scranton, Pa.—Adopted order granting petition insofar as it requests a continuance in the further hearing in Dockets 6884, 7115, 7851, 7852, now scheduled for August 19, and continued same to September 11, 1947; denied petition insofar as it requests reconsideration of action of Presiding Officer of Motions Hearing enlarging issues in this proceeding.

Eugene Broadcasters, Inc., Eugene, Ore.—Adopted memorandum opinion and order granting petition insofar as it requests leave to amend application for new station re antenna system; denied petition insofar as it requests removal from hearing docket. (BP-4259; Docket 7484)

WKOP—The Binghamton Broadcasters (Assignor); The Binghamton Broadcasters, Inc. (assignee), Binghamton, N. Y.—Granted consent to assignment of permit of WKOP from a partnership to a corporation; no monetary gain. (BAP-54)

KGRI—Goggan Radio Sales (assignor); Henderson Broadcasting Corp. (assignee), Henderson, Texas—Granted consent to assignment of CP for KGRI from Goggan Radio Sales, a partnership, to Henderson Broadcasting Corp., a corporation, for $4,500 cash. (BAPL-27)

Albert J. Felman, Joliet, Ill.—Adopted order dismissing without prejudice to refiling after a final decision has been rendered with respect to application of WJOL for renewal of license or after said application has otherwise been disposed of, application for new station requesting facilities now used by WJOL. (BP-6160)

940 KC.

Neal W. Welch, North Adams, Mass., and Rossmoyne Corp., Leymoyne, Pa.—Denied joint petition requesting that their applications, each seeking daytime operation on 940 kc. be removed from pending files and restored to processing line. (BP-5618; BP-5862)

980 KC.

WKLF—Southeastern Broadcasting Co., Clanton, Ala.—Granted modification of CP to change assignment from 760 kc., 500 watts, daytime, to 980 kc., 1 KW, daytime; engineering conditions. (BMP-2920)

1440 KC.

KEYS—Nueces Broadcasting Co., Corpus Christi, Texas—Adopted order granting petition to remove from hearing docket, and granted, in part, application to operate KEYS on 1440 kc., 1 KW day, 500 watts night, using the DA now specified, subject to CAA approval of proposed transmitter site and antenna system and to condition that applicant satisfies all legitimate complaints of blanket interference occurring within the 250 mv/m contour. (BP-3999; Docket 7561)

1450 KC.

KLIK—Balboa Radio Corp., San Diego, Calif.—Granted petition for leave to amend its application (BP-5622; Docket 8116) so as to specify 1450 kc. with 250 watts, unlimited time, instead of 550 kc. with 5 KW, unlimited time, etc. The amendment was accepted and application removed from the hearing docket.

1480 KC.

KYOS—Merced Broadcasting Co., Merced, Calif.—Granted petition for leave to amend its application (BP-5886; Docket 8354) so as to specify 1480 kc. with 5 KW, unlimited time, instead of 1360 kc., 1 KW, unlimited time; to specify a new transmitter site, etc. The amendment was accepted and application removed from hearing docket.

1560 KC.

Lake Broadcasting Co., Inc., Gary, Ind.—Adopted order denying petition requesting consideration and partial grant of its application BP-4341 for unlimited operation on 1560 kc. so that part of its application relating to daytime operation would be granted and that part pertaining to nighttime operation would be retained in hearing status. (Docket 7185)

Viking Broadcasting Co., Newport, R. I.—Granted petition for leave to amend its application (BP-5953; Docket 8284) so as to specify 500 watts instead of 1 KW.

KWKW—Southern Calif. Broadcasting Co., Pasadena, Calif.—Granted petition for leave to amend its application (BP-3710; Docket 6737), so as to specify 50 KW daytime only on 830 kc., instead of 5 KW, daytime only.

KPMO—Valley Broadcasting Co., Pomona, Calif.—Dismissed petition requesting leave to intervene in the hearing on application of KUBA (Docket 8387).

Sacramento Broadcasters, Inc., Chico, Calif.—Granted petition for leave to amend its application (BP-5745; Docket 8186), so as to specify unlimited instead of daytime only.

(Continued on next page)

Woodward Broadcasting Co., Detroit, Mich.—Granted petition for continuance of hearing presently scheduled for August 20, in re application (Docket 8167), and hearing was continued to October 20, 1947.

Northeast Ga. Broadcasting Co., Gainesville, Ga.—Granted petition for leave to amend its application (BP-5659; Docket 8433), so as to add a supplemental engineering statement containing field intensity measurements, etc.

Logansport Broadcasting Corp., Logansport, Ind.—Denied petition requesting the Commission designate an early hearing date in re its application (BP-5770; Docket 8194). No date has yet been specified.

Gulf Broadcasting Co., Inc., Mobile, Ala.—Granted petition requesting the Commission to accept a revised Memorandum Brief in place of Memorandum Brief filed July 21, in conjunction with petition for rehearing in re consolidated proceeding (Docket 7313, 7314, etc.).

Bay State Broadcasting Co., New Bedford, Mass.—Granted petition requesting extension of time within which to file exceptions to the Commission's proposed decision in the consolidated proceeding (Dockets 7054, et al.), and the time was extended to and including August 25.

Correction

The following items appearing in last week's REPORTS *are corrected by the Commission as follows:*

KNOX Broadcasting Co. was inadvertently listed as removed from the hearing docket. Omit the item.

Northwestern Ohio Broadcasting Corp., same page, omit the last sentence "Exceptions noted by counsel for Sky Way Broadcasting Corp."

AM—Applications Accepted for Filing

550 KC.

WDEV—Radio Station WDEV, and Ernest C. Perkins, Executor of Estate of William G. Ricker, Waterbury, Vt. (Lloyd E. Squier, Surviving Partner of Lloyd E. Squier and William G. Ricker)—Modification of construction permit (BP-4492, which authorized change in hours of operation, installation of directional antenna for day and night use, and change in name of applicant) for approval of directional antenna system. Amended to change directional antenna night time pattern.

560 KC.

WGAI—The Advance, Inc., Elizabeth City, N. C.—Modification of construction permit (BP-5750, which authorized a new standard broadcast station) to change type of transmitter for approval of antenna and transmitter location and to specify studio location.

570 KC.

WWNC—Asheville Citizen-Times Co., Inc., Asheville, N. C.—License to use old main transmitter at 20 Battery Park Place, Asheville, N. C., to be used for auxiliary purposes with power of 1 KW.

590 KC.

KFXM—J. C. Lee and E. W. Lee, San Bernardino, Calif. (Lee Bros. Broadcasting Co.)—Modification of construction permit (B5-P-4093, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for day and night use and change in transmitter location) for extension of completion date.

610 KC.

NEW—United Broadcasting System, Van Nuys, Calif. (Daniel M. Sheridan, Al Rothschild, Walt Emeson, Alexander Haagen, Earl L. Patrick, and Edward Lannelli, a partnership) (P. O. % Daniel M. Sheridan, 139 So. Vermont Ave., Los Angeles, Calif.)—Construction permit for a new standard broadcast station to be operated on 610 kc., power of 500 watts, and daytime hours of operation.

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—License to cover construction permit (B4-P-4421) which authorized increase in power, installation of new transmitter, and make changes in direction antenna for night use, and make changes in ground system, and authority to determine operating power by direct measurement of antenna power.

640 KC.

KFI—Earl C. Anthony, Inc., Los Angeles, Calif.—Modification of construction permit (B5-P-4712, as modified, which authorized installation of new vertical antenna) for extension of completion date.

700 KC.

WLW—Crosley Broadcasting Corp., Cincinnati, Ohio—Authority to determine operating power by direct measurement of antenna power.

730 KC.

NEW—Superior Enterprises, Hammond, La. (Joseph A. Sims and Henry A. Montz, Jr., a partnership)—Construction permit for a new standard broadcast station to be operated on 800 kc., power of 1 KW, and daytime hours of operation. Amended to change frequency from 800 to 730 kc., power from 1 KW to 250 watts; changes in antenna and ground system and change transmitter location from 3 blocks west of Highway 51 on Black Cat Road 2 miles south of Independence, La., to south of Hammond on east side of Highway 51, Hammond, La., and change studio location from Morrison Bldg., Hammond, La., to Hammond, La. (Request equipment facilities of WSAL.)

740 KC.

WMBL—Carteret Broadcasting Co., Morehead City, N. C.—License to cover construction permit (B3-P-5140, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

750 KC.

WSB—Atlanta Journal Co., Atlanta, Ga.—Modification of construction permit (B3-P-5261, as modified, which authorized installation of new transmitter) for extension of completion date.

800 KC.

WCCM—The Lawrence Broadcasting Co., Lawrence, Mass.—License to cover construction permit (B1-P-5239, as modified) which authorized a new standard broadcast station and to specify studio location and authority to determine operating power by direct measurement of antenna power.

820 KC.

WIKY—South Central Broadcasting Corp., Evansville, Ind.—License to cover construction permit (B4-P-5087, as modified) which authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

840 KC.

WHAS—WHAS, Inc., Louisville, Ky.—License to cover construction permit (B2-P-5093, as modified) which authorized installation of FM antenna on AM tower, and authority to determine operating power by direct measurement of antenna power.

850 KC.

WNAO—The News and Observer Publishing Co., Raleigh, N. C.—Modification of construction permit (B3-P-4176, as modified, which authorized a new standard broadcast station) for extension of completion date.

860 KC.

WKOB—Citizens Broadcasting Co., North Adams, Mass. (Everard B. Cureton, Jr., George W. Fisher, John T. Ward, Jr., and Joseph R. Trott, Jr., a partnership)—License to cover construction permit (B1-P-5376, as modified) which

(Continued on next page)

authorized a new standard broadcast station and authority to determine operating power by direct measurement of antenna power.

900 KC.

NEW—The Southwestern Broadcasting Co. of Mississippi, McComb, Miss. (Albert Mack Smith, Phillip Dean Brady, Kenneth Hinton Quin, and J. P. Melvin, a partnership)—Construction permit for a new standard broadcast station to be operated on 1550 kc., power of 250 watts, and unlimited hours of operation. Amended to change frequency from 1550 kc. to 900 kc., hours of operation from unlimited to daytime; change type transmitter and change transmitter location.
